Cumulative Subject Index
Analytica Chimica Acta
Volumes 476–500, 2003

doi:10.1016/j.aca.2003.12.033

A**AAS**

Determination of butyltin species in natural waters using aqueous phase ethylation and off-line room temperature trapping, 477 (2003) 103

Absorbance

Multi-reflection photometric flow cell for use in flow injection analysis of estuarine waters, 499 (2003) 81

Light emitting diode-based detectors. Absorbance, fluorescence and spectroelectrochemical measurements in a planar flow-through cell, 500 (2003) 337

Absorbance spectroscopy

Liquid core waveguide-based optical spectrometry for field estimation of dissolved BTEX compounds in groundwater. A feasibility study, 485 (2003) 155

Absorption

Prediction of drug bioavailability based on molecular structure, 485 (2003) 89

Abused drugs

Meeting challenges in forensic toxicology in Japan by liquid chromatography/mass spectrometry, 492 (2003) 83

Accelerated solvent extraction

Screening for gestagens in kidney fat using accelerated solvent extraction and liquid chromatography electrospray tandem mass spectrometry, 483 (2003) 51

Accelerated Ultrasonic Extraction

Evaluation of capillary electrophoresis combined with a BCR sequential extraction for determining distribution of Fe, Zn, Cu, Mn, and Cd in airborne particulate matter, 498 (2003) 175

Accuracy and precision

The accuracy and precision of a new H/D exchange- and mass spectrometry-based technique for measuring the thermodynamic stability of proteins, 496 (2003) 225

Acetaldehyde

Thermal decomposition of surface compounds for the generation of small quantities of acetaldehyde. Calibration of a thermal desorption-gas chromatography-flame ionization detection, 488 (2003) 89

Acetic-acid bioavailable fraction

Stripping chronopotentiometric detection of copper using screen-printed three-electrode system—application to acetic-acid bioavailable fraction from soil samples, 493 (2003) 95

Acetonitrile

Direct evidence of singlet molecular oxygen [$O_2(^1\Delta_g)$] production in the reaction of acetonitrile with hydrogen peroxide in alkaline solutions, 482 (2003) 99

Acetylacetone

A sensitive mediator-free tyrosinase biosensor based on an inorganic-organic hybrid titania sol-gel matrix, 489 (2003) 199

Acetylcholinesterase

Adsorption: an easy and efficient immobilisation of acetylcholinesterase on screen-printed electrodes, 481 (2003) 209

2-Acetylpyridine salicyloylhydrazone

Experimental designs in the development of a new method for the sensitive determination of cadmium in seawater by adsorptive cathodic stripping voltammetry, 487 (2003) 229

Acid dissociation constant

Determination of dissociation constants of weak acids by feedback-based flow ratiometry, 499 (2003) 199

Acid-base chemistry

Acid-base chemistry of omeprazole in aqueous solutions, 481 (2003) 155

Acidity constant

Effect of citrate impurities on the reference pH value of potassium dihydrogen buffer solution, 482 (2003) 137

Determination of dissociation constants of weak acids by feedback-based flow ratiometry, 499 (2003) 199

Acridinium ester

Clinical applications of chemiluminescence, 500 (2003) 279

Acridine orange (AO)

Total internal reflected resonance light scattering detection of DNA at water/tetrachloromethane interface with acridine orange and cetyltrimethylammonium bromide, 494 (2003) 11

Activated carbon

Adsorption of lead(II) and copper(II) on activated carbon by complexation with surface functional groups, 480 (2003) 171

Activated charcoal

Study of metal-loaded activated charcoals for the separation and determination of selenium species by energy dispersive X-ray fluorescence analysis, 478 (2003) 229

Activated-sludge flocs

Luminescent hexanuclear Cu(I)-cluster for the selective determination of copper, 486 (2003) 11

Acyl enzyme

Fourier-transform mass spectrometry for detection of thioester-bound intermediates in unfractionated proteolytic mixtures of 80 and 191 kDa portions of Bacitracin A synthetase, 496 (2003) 217

Adenosine

Evaluation of the recognition ability of molecularly imprinted materials by surface plasmon resonance (SPR) spectroscopy, 489 (2003) 191

Adjustor buffer

Morpholinoethanesulfonic acid-based buffer system for improved detection limit and stability of the fluoride ion selective electrode, 478 (2003) 77

ADMA

Rapid simultaneous determination of arginine and methylated arginines in human urine by high-performance liquid chromatography-mass spectrometry, 487 (2003) 145

Adsorption

Study of metal-loaded activated charcoals for the separation and determination of selenium species by energy dispersive X-ray fluorescence analysis, 478 (2003) 229

Adsorption: an easy and efficient immobilisation of acetylcholinesterase on screen-printed electrodes, 481 (2003) 209

Preconcentration of phosphate and arsenate at sub-ng mL⁻¹ level with a chelating polymer-gel loaded with zirconium(IV), 494 (2003) 81

Adsorption on activated carbon

Adsorption of lead(II) and copper(II) on activated carbon by complexation with surface functional groups, 480 (2003) 171

Adsorptive cathodic stripping voltammetry

Kinetic studies of nickel speciation in model solutions of a well-characterized humic acid using the competing ligand exchange method, 480 (2003) 157

Experimental designs in the development of a new method for the sensitive determination of cadmium in seawater by adsorptive cathodic stripping voltammetry, 487 (2003) 229

Application of adsorptive stripping voltammetry to the determination of bismuth and copper in the presence of morin, 491 (2003) 63

Determination of Pt, Pd and Rh in biological samples by electrothermal atomic absorption spectrometry as compared with adsorptive cathodic stripping voltammetry and total-reflection X-ray fluorescence analysis, 498 (2003) 93

Aerosol

Flow system to gas capture from a nebulized solution, 479 (2003) 167

Affinity biosensor

Affinity biosensors based on disposable screen-printed electrodes modified with DNA, 479 (2003) 125

AFM

Force mode atomic force microscopy as a tool for protein folding studies, 479 (2003) 87

Distance-dependent electron hopping conductivity and nanoscale lithography of chemically-linked gold monolayer protected cluster films, 496 (2003) 3

Ag₂-₆Se

Validation of the membrane composition effect on the flow-injection signal profile of chalcogenide-based ion-selective sensors: a model study using electrochemical approach. Hg(II) flow-injection detector case, 476 (2003) 55

Ag₂-₆Se_{1-x}Te_x-electroplated membrane

Validation of the membrane composition effect on the flow-injection signal profile of chalcogenide-based ion-selective sensors: a model study using electrochemical approach. Hg(II) flow-injection detector case, 476 (2003) 55

 β -Agonist

Zilpaterol—a new focus of concern in residue analysis, 493 (2003) 63

Agricultural product

Determination of napropamide in technical formulations, soil and vegetable samples by sensitised fluorescence: validation of the method, 491 (2003) 37

Ag₂Se

Validation of the membrane composition effect on the flow-injection signal profile of chalcogenide-based ion-selective sensors: a model study using electrochemical approach. Hg(II) flow-injection detector case, 476 (2003) 55

Ag₂Se_{1-x}Te_x

Validation of the membrane composition effect on the flow-injection signal profile of chalcogenide-based ion-selective sensors: a model study using electrochemical approach. Hg(II) flow-injection detector case, 476 (2003) 55

Air analysis

Determination of triacetoneperoxide in ambient air, 482 (2003) 183

Airborne particle

Analysis of polycyclic aromatic hydrocarbons in airborne particles using open-vessel focused microwave-assisted extraction, 495 (2003) 99

Akaganeite

Use of X-ray and other techniques to analyse the phase transformation induced in archaeological cast iron after its stabilisation by the electrolytic method, 494 (2003) 245

Al

Organic complexation of Al and Fe in acidic soil solutions. Comparison of diffusive gradients in thin films analyses with Models V and VI predictions, 498 (2003) 105

Alcohol

Determination of ethanol in distilled liquors using sequential injection analysis with spectrophotometric detection, 499 (2003) 123

Alcoholic beverages

Implementation of an automatic standard addition method in a flow-batch system: application to copper determination in an alcoholic beverage by atomic absorption spectrometry, 486 (2003) 143

Determination of ethanol in fuel ethanol and beverages by Fourier transform (FT)-near infrared and FT-Raman spectrometries, 493 (2003) 219

Alfalfa

Investigation of trace level binding of PtCl₆ and PtCl₄ to alfalfa biomass (*Medicago sativa*) using Zeeman graphite furnace atomic absorption spectrometry, 478 (2003) 139

Algorithm

New uniform algorithm to predict reversed phase retention values under different gradient conditions, 476 (2003) 123

Aliphatic carboxylic acids

Separation of C₁–C₅ aliphatic carboxylic acids on a highly sulfonated styrene–divinylbenzene copolymer resin column with a C₆ aliphatic carboxylic acid solution as the mobile phase, 481 (2003) 15

Alkali metal ion separation

Aluminum phosphate dispersed on a cellulose acetate fiber surface. Preparation, characterization and application for Li⁺, Na⁺ and K⁺ separation, 477 (2003) 305

Alkalimetric determination

Determination of ibuprofen and novocaine hydrochloride with the use of water–micellar solutions of surfactants, 481 (2003) 149

Alkaline phosphatase

Development of a biosensor for the quantitative detection of 2,4,6-trichloroanisole using screen printed electrodes, 484 (2003) 15

Free and sol–gel immobilized alkaline phosphatase-based biosensor for the determination of pesticides and inorganic compounds, 484 (2003) 45

Microfabricated bioreactor chips for immobilised enzyme assays, 486 (2003) 149

Alkoxysilane

Investigation of trialkoxysilane hydrolysis kinetics using liquid chromatography with inductively coupled plasma atomic emission spectrometric detection and non-linear regression modeling, 489 (2003) 103

Allantoin

Reactivation of inactivated horseradish peroxidase with ethyleneurea and allantoin for determination of hydrogen peroxide by micro-flow injection horseradish peroxidase-catalyzed chemiluminescence, 495 (2003) 233

Alternate domain regression

Multivariate calibration of spectral data using dual-domain regression analysis, 490 (2003) 291

Alternating least squares (ALS)

Application of modified alternating least squares regression to spectroscopic image analysis, 476 (2003) 93

Assessment of techniques for DOSY NMR data processing, 490 (2003) 231

Alumina

On-line preconcentration of palladium on alumina microcolumns and determination in urban waters by inductively coupled plasma mass spectrometry, 478 (2003) 209

Aluminium residual

Development of an on-line electrochemical analyser for trace level aluminium, 499 (2003) 173

Aluminum

Chelating resin sorption followed by supercritical fluid extraction and liquid chromatographic determination of aluminum in liquid samples, 494 (2003) 125

Aluminum electrode

Voltammetric and amperometric determination of sulfite using an aluminum electrode modified by nickel pentacyanonitrosylferate film. Application to the analysis of some real samples, 497 (2003) 133

Aluminum phosphate

Aluminum phosphate dispersed on a cellulose acetate fiber surface. Preparation, characterization and application for Li⁺, Na⁺ and K⁺ separation, 477 (2003) 305

Amberlite XAD-2

Amberlite XAD-2 functionalized with Nitroso R salt: synthesis and application in an online system for preconcentration of cobalt, 494 (2003) 87

Ambersorb 572

Atomic absorption spectrophotometric determination of trace copper in waters, aluminium foil and tea samples after preconcentration with 1-nitroso-2-naphthol-3,6-disulfonic acid on Ambersorb 572, 480 (2003) 259

Amino acid

Isocratic ion chromatographic determination of underivatized amino acids by electrochemical detection, 478 (2003) 179

Assay of amino acids in individual human lymphocytes by capillary zone electrophoresis with electrochemical detection, 478 (2003) 199

Selective determination of amino acids using flow injection analysis coupled with chemiluminescence detection, 480 (2003) 67

Colorimetric determination of amino acids using genipin from *Gardenia jasminoides*, 480 (2003) 267

Molecular recognition properties of peptide mixtures obtained by polymerisation of amino acids in the presence of estradiol, 481 (2003) 41

 α -Aminocephalosporins

Molecularly imprinted solid phase extraction for rapid screening of cephalixin in human plasma and serum, 481 (2003) 165

Aminoglycosides

Single biosensor immunoassay for the detection of five aminoglycosides in reconstituted skimmed milk, 488 (2003) 53

Aminopropylphosphinic acid

Determination of a small, highly polar aminopropylphosphinic acid as racemate in plasma and urine and as separated enantiomers in plasma by liquid chromatography and tandem mass spectrometry, 492 (2003) 261

Aminosilane

Simple test system for single molecule recognition force microscopy, 479 (2003) 59

Ammonia detection

"On line" mass spectrometric detection of ammonia oxidation products generated by polypyrrole based amperometric sensors, 489 (2003) 207

Ammonium electrode

Flow injection differential potentiometric determination of lysine by using a lysine biosensor, 477 (2003) 315

Amoxicillin

Liquid chromatography with fluorescence detection of amoxicillin and ampicillin in feeds using pre-column derivatization, 483 (2003) 69

Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

Determination of amoxicillin in pharmaceuticals using sequential injection analysis (SIA). Evaluation of the presence of interferents using multivariate curve resolution, 485 (2003) 195

Amperometric

Atrazine analysis using an amperometric immunosensor based on single-chain antibody fragments and regeneration-free multicalibrant measurement, 500 (2003) 287

Amperometric biosensor

Amperometric phenol biosensor based on sol-gel silicate/Nafion composite film, 479 (2003) 143

Dual amperometric biosensor device for analysis of binary mixtures of phenols by multivariate calibration using partial least squares, 485 (2003) 263

Amperometric detection

Evaluation of behaviour of linear monoamines $\text{CH}_3-(\text{CH}_2)_{n-1}-\text{NH}_2$ ($n = 1-6$) in ion chromatography, 477 (2003) 41

Determination of mono- and disaccharides in milk and milk products by high-performance anion-exchange chromatography with pulsed amperometric detection, 485 (2003) 43

Electrochemical oxidation of tiopronin at diamond film electrodes and its determination by amperometric flow injection analysis, 499 (2003) 183

Amperometric immunosensor

A renewable amperometric immunosensor for phytohormone β -indole acetic acid assay, 494 (2003) 177

Amperometric sensor

"On line" mass spectrometric detection of ammonia oxidation products generated by polypyrrole based amperometric sensors, 489 (2003) 207

Amperometry

Characterization of graphite electrodes modified with laccase from *Trametes versicolor* and their use for bioelectrochemical monitoring of phenolic compounds in flow injection analysis, 487 (2003) 3

Electrosynthesis and permselective characterisation of phenol-based polymers for biosensor applications, 495 (2003) 33

Voltammetric and amperometric determination of sulfite using an aluminum electrode modified by nickel pentacyanonitrosylferate film. Application to the analysis of some real samples, 497 (2003) 133

Development of an on-line electrochemical analyser for trace level aluminium, 499 (2003) 173

Portable instrument for electrochemical gas sensing, 500 (2003) 145

Ampicillin

Liquid chromatography with fluorescence detection of amoxicillin and ampicillin in feeds using pre-column derivatization, 483 (2003) 69

Micelle-mediated spectrofluorimetric determination of ampicillin based on metal ion-catalysed hydrolysis, 484 (2003) 223

Anabolic steroids

Faster analysis of anabolic steroids in kidney fat by downscaling the sample size and using gas chromatography-tandem mass spectrometry, 483 (2003) 269

Identification of anabolic steroids in serum, urine, sweat and hair. Comparison of metabolic patterns, 483 (2003) 299

Analyses

Performance of selected destruction methods for the determination of heavy metals in reed plants (*Phragmites australis*), 497 (2003) 191

Analytes

Separation of nonpolar analytes using methanol-water mixtures at elevated temperatures, 485 (2003) 51

Analytical applications

Room temperature phosphorescence in the liquid state as a tool in analytical chemistry, 488 (2003) 135

Analytical instrumentation

Analytical instrumentation based on force measurements: combinatorial atomic force microscopy, 496 (2003) 267

Analytical sciences

Flow analysis and its role and importance in the analytical sciences, 499 (2003) 5

Angiotensin converting enzyme inhibitors

Utility of copper(II) oxide as a packed reactor in flow injection assembly for rapid analysis of some angiotensin converting enzyme inhibitors, 489 (2003) 115

Animal feed

Analysis of zearalenone and α -zearalenol in animal feed using high-performance liquid chromatography, 487 (2003) 137

Animal plasma

Liquid chromatographic determination of levamisole in animal plasma: ultraviolet versus tandem mass spectrometric detection, 483 (2003) 215

Animal tissue

Determination of ractopamine in animal tissues by liquid chromatography-fluorescence and liquid chromatography/tandem mass spectrometry, 483 (2003) 137

Determination of Pt, Pd and Rh in biological samples by electrothermal atomic absorption spectrometry as compared with adsorptive cathodic stripping voltammetry and total-reflection X-ray fluorescence analysis, 498 (2003) 93

Anion influence on retention factors

Evaluation of behaviour of linear monoamines $\text{CH}_3-(\text{CH}_2)_{n-1}-\text{NH}_2$ ($n = 1-6$) in ion chromatography, 477 (2003) 41

Anion-exchange chromatography

Determination of mono- and disaccharides in milk and milk products by high-performance anion-exchange chromatography with pulsed amperometric detection, 485 (2003) 43

Anionic surfactants

Preparation of surfactant anion-selective electrodes with different selectivity coefficients and a trial to determine each component in binary surfactant mixtures, 481 (2003) 221

Anodic stripping voltammetry

Investigation into sorption processes in the anodic stripping voltammetric speciation of Cu in natural waters, 476 (2003) 33

Anodic stripping-differential pulse voltammetry

Column preconcentration of mercury as HgL_2^{2-} using methyltriethylammonium chloride-naphthalene adsorbent with subsequent anodic stripping-differential pulse voltammetric determination, 481 (2003) 23

Anthelmintic

Liquid chromatographic determination of levamisole in animal plasma: ultraviolet versus tandem mass spectrometric detection, 483 (2003) 215

Anthracycline

Determination of doxorubicin in human plasma by excitation-emission matrix fluorescence and multi-way analysis, 493 (2003) 69

Antibiotic residues

Influence of milking frequency on withdrawal period after application of β -lactam antibiotic-based drugs, 483 (2003) 241

Antibiotics

Simultaneous determination of 13 quinolones from feeds using accelerated solvent extraction and liquid chromatography, 483 (2003) 81

Determination of chloramphenicol in animal tissues and urine. Liquid chromatography-tandem mass spectrometry versus gas chromatography-mass spectrometry, 483 (2003) 125

Micelle-mediated spectrofluorimetric determination of ampicillin based on metal ion-catalysed hydrolysis, 484 (2003) 223

Immunochemical rapid test for multiresidue analysis of antimicrobial drugs in milk using monoclonal antibodies and hapten-glucose oxidase conjugates, 495 (2003) 11

Antibody

Bifunctional atomic force microscopy probes for molecular screening applications, 479 (2003) 77

Labelless and reversible immunosensor assay based upon an electrochemical current-transient protocol, 495 (2003) 21

Antibody immobilization

Direct oriented immobilization of F(ab') antibody fragments on gold, 496 (2003) 73

Antidepressant drugs

Liquid-phase microextraction of drugs from human breast milk, 491 (2003) 155

Antidoping

Determination of endogenous and synthetic glucocorticoids in human urine by gas chromatography-mass spectrometry following microwave-assisted derivatization, 489 (2003) 233

Antimony

Non-chromatographic speciation analysis of arsenic and antimony in milk hydride generation atomic fluorescence spectrometry, 493 (2003) 195

Antioxidant activity

Kinetic deoxyribose degradation assay and its application in assessing the antioxidant activities of phenolic compounds in a Fenton-type reaction system, 478 (2003) 129

Comparative studies on the antioxidant activity of aqueous extracts of olive oils and seed oils using chemiluminescence, 494 (2003) 41

Antipsychotic drugs

Meeting challenges in forensic toxicology in Japan by liquid chromatography/mass spectrometry, 492 (2003) 83

APCI

Quantitation of plasma thymidine by high-performance liquid chromatography-atmospheric pressure chemical ionization mass spectrometry and its application to pharmacodynamic studies in cancer patients, 486 (2003) 51

APCI-MS

Normal-phase liquid chromatographic separation of stratum corneum ceramides with detection by evaporative light scattering and atmospheric pressure chemical ionization mass spectrometry, 492 (2003) 233

APDC

Enrichment and determinations of nickel(II), cadmium(II), copper(II), cobalt(II) and lead(II) ions in natural waters, table salts, tea and urine samples as pyrrolydine dithiocarbamate chelates by membrane filtration-flame atomic absorption spectrometry combination, 493 (2003) 205

Apple

Comparison of indices and multivariate models to non-destructively predict the fruit chlorophyll by means of visible spectrometry in apple fruit, 481 (2003) 119

Apple juice

Quantitation determination of chlorogenic acid in cider apple juices by ^1H NMR spectrometry, 486 (2003) 269

Apple leaf

Determination of the insecticide fenoxycarb in apple leaf samples by an enzyme-linked immunosorbent assay, 478 (2003) 271

Aquaculture

Use of ion-trap liquid chromatography-mass spectrometry to screen and confirm drug residues in aquacultured products, 483 (2003) 373

Aqueous solutions

Acid-base chemistry of omeprazole in aqueous solutions, 481 (2003) 155

Archaeology

Characterization of thermally assisted hydrolysis and methylation products of polyphenols from modern and archaeological vine derivatives using gas chromatography-mass spectrometry, 493 (2003) 137

Archaeometry

- Investigation of roman age pigments found on pottery fragments, 478 (2003) 147
- Electrochemical lead separation from copper, copper alloy, silver and silver alloy for isotope ratio determination in archaeometric investigations, 497 (2003) 227

ARG

- Rapid simultaneous determination of arginine and methylated arginines in human urine by high-performance liquid chromatography-mass spectrometry, 487 (2003) 145

Aromatic amine

- Analysis of aromatic amines by high-performance liquid chromatography with pre-column derivatization by 2-(9-carbazole)-ethyl-chloroformate, 494 (2003) 141
- Analysis of carcinogenic aromatic amines in water samples by solid-phase microextraction coupled with high-performance liquid chromatography, 495 (2003) 109

Aromatic compounds

- β -Cyclodextrin epichlorohydrin copolymer as a solid-phase extraction adsorbent for aromatic compounds in water samples, 477 (2003) 93

Aromatics

- Characterization of the aromatic composition of some liquid foods by nuclear magnetic resonance spectrometry and liquid chromatography with nuclear magnetic resonance and mass spectrometric detection, 488 (2003) 35

Arsenate

- Preconcentration of phosphate and arsenate at sub-ng ml⁻¹ level with a chelating polymer-gel loaded with zirconium(IV), 494 (2003) 81

Arsenic

- Determination of As(III) and As(V) in soils using sequential extraction combined with flow injection hydride generation atomic fluorescence detection, 477 (2003) 139
- In situ preconcentration and determination of trace arsenic in botanical samples by hydride generation-graphite furnace atomic absorption spectrometry with Pd-Zr as chemical modifier, 491 (2003) 91
- Non-chromatographic speciation analysis of arsenic and antimony in milk hydride generation atomic fluorescence spectrometry, 493 (2003) 195

Arsenic determination

- Solid sample graphite furnace atomic absorption spectroscopy for supporting arsenic determination in sediments following a sequential extraction procedure, 476 (2003) 15

Arsenic speciation

- High performance liquid chromatography-atomic fluorescence spectrometric determination of arsenic species in beer samples, 482 (2003) 73
- Arsenic speciation in environmental and biological samples. Extraction and stability studies, 495 (2003) 85

Arsenic species

- Measurement of arsenic species in marine sediments by high-performance liquid chromatography-inductively coupled plasma mass spectrometry, 477 (2003) 279

Arsines

- Separation of arsines and trinitrotoluene by reversed phase high performance liquid chromatography and micellar electrokinetic capillary chromatography, 495 (2003) 239

Artificial neural network

- Rapid in situ determination of total oil concentration in water using ultraviolet fluorescence and light scattering coupled with artificial neural networks, 478 (2003) 245
- A kinetic spectrophotometric method for the determination of ternary mixtures of reducing sugars with the aid of artificial neural networks and multivariate calibration, 480 (2003) 53
- Prediction of bioconcentration factor using genetic algorithm and artificial neural network, 486 (2003) 101
- Simultaneous determination of methylene blue and new methylene blue by slab optical waveguide spectroscopy and artificial neural networks, 487 (2003) 109
- Selection of quasi-optimal inputs in chemometrics modeling by artificial neural network analysis, 490 (2003) 31
- Determination of the composition of human urinary calculi composed of whewellite, weddellite and carbonate apatite using artificial neural networks, 491 (2003) 211

Ascorbic acid

- Bead injection spectroscopic flow-through renewable surface sensors with commercial flow cells as an alternative to reusable flow-through sensors, 482 (2003) 209
- Electrochemical study of methylene blue incorporated into morde-nite type zeolite and its application for amperometric determination of ascorbic acid in real samples, 491 (2003) 193
- Using on-line solid phase extraction for simultaneous determination of ascorbic acid and rutin trihydrate by sequential injection analysis, 497 (2003) 165

Ascorbic acid interference

- Electrosynthesis and permselective characterisation of phenol-based polymers for biosensor applications, 495 (2003) 33

Ashing

- Ashing and microwave digestion of aerosol samples with a polypropylene fibrous filter matrix, 482 (2003) 129

Asia

- Bacterial *Lux-Fluoro* test for biological assessment of pollutants in water samples from urban and rural origin, 487 (2003) 51

Atmospheric aerosols

- Seasonal variations in diurnal concentrations of trace elements in atmospheric aerosols in Chicago, 496 (2003) 315

Atmospheric pressure chemical ionization (APCI) interface

- Rapid simultaneous determination of arginine and methylated arginines in human urine by high-performance liquid chromatography-mass spectrometry, 487 (2003) 145

Atomic absorption spectrometry

Implementation of an automatic standard addition method in a flow-batch system: application to copper determination in an alcoholic beverage by atomic absorption spectrometry, 486 (2003) 143

Electrothermal atomic absorption spectrometric determination of Cr(VI) in soil after leaching of Cr(VI) species with carbon dioxide, 491 (2003) 81

Atomic absorption spectroscopy

Evaluation of Pb-Spec[®] for flow-injection solid-phase extraction preconcentration for the determination of trace lead in water and wine by flame atomic absorption spectrometry, 485 (2003) 9

Atomic fluorescence

Multisyringe flow injection system for total inorganic selenium determination by hydride generation-atomic fluorescence spectrometry, 486 (2003) 217

Atomic force microscope

Heterobifunctional crosslinkers for tethering single ligand molecules to scanning probes, 497 (2003) 101

Atomic force microscopy (AFM)

Dynamic imaging of single DNA-protein interactions using atomic force microscopy, 479 (2003) 3

Chemical force microscopy: applications in surface characterisation of natural hydroxyapatite, 479 (2003) 39

Simple test system for single molecule recognition force microscopy, 479 (2003) 59

Probing direct binding affinity in electrochemical antibody-based sensors, 496 (2003) 103

Measurement of the chemical and morphological changes that occur on gold surfaces following thermal desorption and acid dissolution of adsorbed mercury, 496 (2003) 279

Applications of surface analysis in the environmental sciences: dehalogenation of chlorocarbons with zero-valent iron and iron-containing mineral surfaces, 496 (2003) 301

ATP measurement

Use of ATP measurements by bioluminescence to quantify yeast's sensitivity against a killer toxin, 495 (2003) 217

ATR

Selection of calibration set samples in determination of olive oil acidity by partial least squares-attenuated total reflectance-Fourier transform infrared spectroscopy, 489 (2003) 59

Atrazine

Probing direct binding affinity in electrochemical antibody-based sensors, 496 (2003) 103

Atrazine analysis using an amperometric immunosensor based on single-chain antibody fragments and regeneration-free multicalibrant measurement, 500 (2003) 287

AT-rich regions

Simple fluorimetric method for probing AT-rich regions in DNA based on the photoisomerization of distilbazolium ligand, 487 (2003) 221

Auger electron spectroscopy

Applications of surface analysis in the environmental sciences: dehalogenation of chlorocarbons with zero-valent iron and iron-containing mineral surfaces, 496 (2003) 301

Automated immunoassay

Zone fluidics in flow analysis: potentialities and applications, 499 (2003) 29

Automatic milking

Influence of milking frequency on withdrawal period after application of β -lactam antibiotic-based drugs, 483 (2003) 241

Automation

Multisyringe flow injection system for total inorganic selenium determination by hydride generation-atomic fluorescence spectrometry, 486 (2003) 217

Autoscaling

Discarding or downweighting high-noise variables in factor analytic models, 490 (2003) 277

Average molecular weight

Using solution equilibria to determine average molecular weight of the Suwannee River fulvic acids, 496 (2003) 325

Avidin

Simple test system for single molecule recognition force microscopy, 479 (2003) 59

B

Baby bottle

Liquid chromatographic determination of bisphenols based on intramolecular excimer-forming fluorescence derivatization, 488 (2003) 211

Baby food

Correlation study of enzyme-linked immunosorbent assay and high-performance liquid chromatography/tandem mass spectrometry for the determination of *N*-methylcarbamate insecticides in baby food, 495 (2003) 123

Background constraining

Mitigating model deficiency in three-way data analysis by the combination of background constraining and iterative correcting techniques, 487 (2003) 171

Background correction

Application of wavelet transform to background correction in inductively coupled plasma atomic emission spectrometry, 485 (2003) 233

Back-side contact transducer

Miniaturized back-side contact transducer for potentiometric sensors, 485 (2003) 103

Bacteria

SIMPLISMA applied to two-dimensional wavelet compressed ion mobility spectrometry data, 484 (2003) 75

Baicalein

Pressurized hot water extraction of berberine, baicalein and glycyrrhizin in medicinal plants, 482 (2003) 81

Banned substances

Validation of a multiresidue liquid chromatography–tandem mass spectrometric method for the quantitation and confirmation of corticosteroid residues in urine, according to the proposed SANCO 1085 criteria for banned substances, 483 (2003) 341

Basic compounds

Reversed-phase high-performance liquid chromatographic/mass spectrometric method for separation of 4-methylimidazole and 2-acetyl-4-(1,2,3,4-tetrahydroxybutyl)imidazole at pg levels, 477 (2003) 49

Basic proteins

Dynamically coating the capillary with 1-alkyl-3-methylimidazolium-based ionic liquids for separation of basic proteins by capillary electrophoresis, 479 (2003) 249

Batch injection

Zone fluidics in flow analysis: potentialities and applications, 499 (2003) 29

Batch process

Dynamic time warping of spectroscopic BATCH data, 498 (2003) 133

Batch reaction monitoring

Characterization of subcritical water oxidation with in situ monitoring and self-modeling curve resolution, 485 (2003) 73

Bayesian networks

Partial least-squares modeling of continuous nodes in Bayesian networks, 490 (2003) 355

BBSFG

Surface vibrational sum frequency and Raman studies of PAMAM G0, G1 and acylated PAMAM G0 dendrimers, 496 (2003) 117

BCR sequential extraction

Comparison of original and modified BCR sequential extraction procedures for the fractionation of copper, iron, lead, manganese and zinc in soils and sediments, 478 (2003) 111

Evaluation of capillary electrophoresis combined with a BCR sequential extraction for determining distribution of Fe, Zn, Cu, Mn, and Cd in airborne particulate matter, 498 (2003) 175

Bead injection (BI)

Automated sample preparation method for suspension arrays using renewable surface separations with multiplexed flow cytometry fluorescence detection, 478 (2003) 85

Sequential injection–bead injection–lab-on-valve schemes for on-line solid phase extraction and preconcentration of ultra-trace levels of heavy metals with determination by electrothermal atomic absorption spectrometry and inductively coupled plasma mass spectrometry, 499 (2003) 139

Exploiting sequential injection analysis with bead injection and lab-on-valve for determination of lead using electrothermal atomic absorption spectrometry, 499 (2003) 167

Bead injection spectroscopy

Bead injection spectroscopic flow-through renewable surface sensors with commercial flow cells as an alternative to reusable flow-through sensors, 482 (2003) 209

Beer

Characterization of the aromatic composition of some liquid foods by nuclear magnetic resonance spectrometry and liquid chromatography with nuclear magnetic resonance and mass spectrometric detection, 488 (2003) 73

Beer analysis

High performance liquid chromatography–atomic fluorescence spectrometric determination of arsenic species in beer samples, 482 (2003) 73

Benomyl

Gel-surface enhanced fluorescence sensing system coupled to a continuous-flow assembly for simultaneous monitoring of benomyl and carbendazim, 493 (2003) 35

Benzimidazoles

Development and optimisation of a method for the extraction of benzimidazoles from animal liver using supercritical carbon dioxide, 483 (2003) 313

Benzodiazepines

Potentiometric determination of diazepam, bromazepam and clonazepam using solid contact ion-selective electrodes, 498 (2003) 79

Benzoyl peroxide

Application of (2,2':6',2''-terpyridyl) copper(II) chloride complex in sensor construction for benzoyl peroxide determination in pharmaceutical samples, 494 (2003) 199

Benzo[a]pyrene

Immunoassays using capillary electrophoresis laser induced fluorescence detection for DNA adducts, 500 (2003) 13

Berberine

Pressurized hot water extraction of berberine, baicalein and glycyrrhizin in medicinal plants, 482 (2003) 81

Beta-agonists

Determination of ractopamine in animal tissues by liquid chromatography–fluorescence and liquid chromatography/tandem mass spectrometry, 483 (2003) 137

Biacore Q

Biosensor immunoassay for the detection of eight sulfonamides in chicken serum, 483 (2003) 171

Binary mixture

Preparation of surfactant anion-selective electrodes with different selectivity coefficients and a trial to determine each component in binary surfactant mixtures, 481 (2003) 221

Binding constants

Molecular recognition properties of peptide mixtures obtained by polymerisation of amino acids in the presence of estradiol, 481 (2003) 41

Binding medium

Nature and origin of black spots found on Miró paintings: a non-invasive study, 479 (2003) 255

Binding sites

Highly selective fenuron-imprinted polymer with a homogeneous binding site distribution prepared by precipitation polymerisation and its application to the clean-up of fenuron in plant samples, 482 (2003) 165

Binding stoichiometry

Immunoassays using capillary electrophoresis laser induced fluorescence detection for DNA adducts, 500 (2003) 13

Bioassay

Microplate-based microbial assay for risk assessment and (eco)toxic fingerprinting of chemicals, 485 (2003) 121

Bioavailability

Identification of anabolic steroids in serum, urine, sweat and hair. Comparison of metabolic patterns, 483 (2003) 299

Prediction of drug bioavailability based on molecular structure, 485 (2003) 89

Biochemical analysis

Resonance light scattering technique used for biochemical and pharmaceutical analysis, 500 (2003) 105

Biochip

Electronic concentration of negatively-charged molecules on a microfabricated biochip, 484 (2003) 1

Bioconcentration factor

Prediction of bioconcentration factor using genetic algorithm and artificial neural network, 486 (2003) 101

Biodection

Automated sample preparation method for suspension arrays using renewable surface separations with multiplexed flow cytometry fluorescence detection, 478 (2003) 85

Biofluid

NMR-based metabonomic toxicity classification: hierarchical cluster analysis and k-nearest-neighbour approaches, 490 (2003) 3

Biofluid NMR

Improved analysis of multivariate data by variable stability scaling: application to NMR-based metabolic profiling, 490 (2003) 265

Biological buffers

Challenges in modelling and optimisation of stability constants in the study of metal complexes with monoprotonated ligands. Part I. A glass electrode potentiometric and polarographic study of a Cu-TAPSO-OH system, 493 (2003) 105

Biological certified reference material

Multicapillary gas chromatography coupled to inductively coupled plasma-time-of-flight mass spectrometry for rapid mercury speciation analysis, 489 (2003) 45

Biological fluids

Extraction and preconcentration of manganese(II) from biological fluids (water, milk and blood serum) using supported liquid membrane and membrane probe methods, 485 (2003) 25

Simultaneous determination of ciprofloxacin and tetracycline in biological fluids based on dual-lanthanide sensitised luminescence using dry reagent chemical technology, 494 (2003) 55

Trace-element analysis in biological fluids: evaluation of contamination in samples collected with metallic needles, 494 (2003) 167

Biological processes

Flow injection system for on-line monitoring of fumaric acid in biological processes, 499 (2003) 71

Biological samples

Arsenic speciation in environmental and biological samples. Extraction and stability studies, 495 (2003) 85

Bioluminescence

Bacterial *Lux-Fluoro* test for biological assessment of pollutants in water samples from urban and rural origin, 487 (2003) 51

Use of ATP measurements by bioluminescence to quantify yeast's sensitivity against a killer toxin, 495 (2003) 217

Bio-markers

Oxidative stress as a bio-marker of estrogen exposure in healthy veal calves, 483 (2003) 281

Biomolecules

Force mode atomic force microscopy as a tool for protein folding studies, 479 (2003) 87

Resonance light scattering technique used for biochemical and pharmaceutical analysis, 500 (2003) 105

Bioreactor

Microfabricated bioreactor chips for immobilised enzyme assays, 486 (2003) 149

Milk lactate determination with a rotating bioreactor based on an electron transfer mediated by osmium complexes incorporating a continuous-flow/stopped-flow system, 498 (2003) 155

Biosensing

Coupled enzyme reaction microarrays based on pin-printing of sol-gel derived biomaterials, 500 (2003) 3

Biosensing platform

Covalent immobilization of an enzyme (glucose oxidase) onto a carbon sol-gel silicate composite surface as a biosensing platform, 478 (2003) 67

Biosensor

Electrochemical and catalytic investigation of carbon paste modified with Toluidine Blue O covalently immobilised on silica gel, 476 (2003) 43

Amperometric biosensor based on a nanoporous ZrO₂ matrix, 478 (2003) 59

Heavy metal-induced inhibition of *Aspergillus niger* nitrate reductase: applications for rapid contaminant detection in aqueous samples, 480 (2003) 131

Ceramic-based multisite microelectrode array for rapid choline measures in brain tissue, 481 (2003) 65

Adsorption: an easy and efficient immobilisation of acetylcholinesterase on screen-printed electrodes, 481 (2003) 209

Detection of levamisole residues in bovine liver and milk by immunobiosensor, 483 (2003) 181

Detection of multi- β -agonist residues in liver matrix by use of a surface plasma resonance biosensor, 483 (2003) 187

Potentialities of expanded natural graphite as a new transducer for NAD^+ -dependent dehydrogenase amperometric biosensors, 484 (2003) 25

Development of a biosensor for the quantitative detection of 2,4,6-trichloroanisole using screen printed electrodes, 484 (2003) 15

Amperometric biosensor for hydrogen peroxide based on hemoglobin entrapped in titania sol-gel film, 486 (2003) 209

Characterization of graphite electrodes modified with laccase from *Trametes versicolor* and their use for bioelectrochemical monitoring of phenolic compounds in flow injection analysis, 487 (2003) 3

Bacterial *Lux-Fluoro* test for biological assessment of pollutants in water samples from urban and rural origin, 487 (2003) 51

Probing direct binding affinity in electrochemical antibody-based sensors, 496 (2003) 103

Milk lactate determination with a rotating bioreactor based on an electron transfer mediated by osmium complexes incorporating a continuous-flow/stopped-flow system, 498 (2003) 155

Novel determination of cadmium ions using an enzyme self-assembled monolayer with surface plasmon resonance, 500 (2003) 119

Biosensor immunoassay

Biosensor immunoassay for the detection of eight sulfonamides in chicken serum, 483 (2003) 171

Single biosensor immunoassay for the detection of five aminoglycosides in reconstituted skimmed milk, 488 (2003) 53

Biotin

Simple test system for single molecule recognition force microscopy, 479 (2003) 59

Bis(crown ether)s

Conformational analysis of 12-crown-3 and sodium ion selectivity of electrodes based on bis(12-crown-3) derivatives with malonate spacers, 480 (2003) 291

1,2-bis(*o*-Aminophenylthio)ethane

Determination of mercury species with a resin functionalized with a 1,2-bis(*o*-aminophenylthio)ethane moiety, 477 (2003) 73

Bismuth

Application of adsorptive stripping voltammetry to the determination of bismuth and copper in the presence of morin, 491 (2003) 63

Bisphenol A

Chemical analysis for small amounts of horseradish peroxidase using "porphyrinogen" as a chromogenic reagent, 478 (2003) 37

Bisphenols

Liquid chromatographic determination of bisphenols based on intramolecular excimer-forming fluorescence derivatization, 488 (2003) 211

Bleaching cream

Optimisation of a flow injection system with electrochemical detection using the desirability function. Application to the determination of hydroquinone in cosmetics, 479 (2003) 173

β -Blockers

Validation of a method for detecting and quantifying tranquillisers and a β -blocker in pig tissues by liquid chromatography-tandem mass spectrometry, 483 (2003) 335

Boiling points

Use of boiling point-Lee retention index correlation for rapid review of gas chromatography-mass spectrometry data, 494 (2003) 235

Bonded capillary

Preparation and characterization of *p*-tert-butylcalix[8]arene bonded capillaries for open-tubular capillary electrochromatography, 478 (2003) 191

Borneol

Chiral recognition of borneol by association with zinc(II) and L-tryptophan in the gas phase, 482 (2003) 1

Boron-doped diamond thin film electrode

Electrochemical oxidation of tiopronin at diamond film electrodes and its determination by amperometric flow injection analysis, 499 (2003) 183

Botanical samples

In situ preconcentration and determination of trace arsenic in botanical samples by hydride generation-graphite furnace atomic absorption spectrometry with Pd-Zr as chemical modifier, 491 (2003) 91

Bound residues

Food processing effects on residues: penicillins in milk and yoghurt, 483 (2003) 73

Breast milk

Liquid-phase microextraction of drugs from human breast milk, 491 (2003) 155

Bromazepam

Potentiometric determination of diazepam, bromazepam and clonazepam using solid contact ion-selective electrodes, 498 (2003) 79

Bromhexine

Multi-pumping flow system for spectrophotometric determination of bromhexine, 499 (2003) 107

Bromomethyl

BrMOZPhC, a novel coumarin type reagent for the fluorescent derivatisation of carboxylic acids, 489 (2003) 153

6-Bromo-2-naphthol

Fluorescence and room temperature phosphorescence of 6-bromo-2-naphthol in β -cyclodextrin solution and its selective molecular recognition for cyclohexane, 494 (2003) 71

Brotizolam

Simple method for the determination of benzodiazepines in human body fluids by high-performance liquid chromatography-mass spectrometry, 492 (2003) 223

BSA

Labelless and reversible immunosensor assay based upon an electrochemical current-transient protocol, 495 (2003) 21

BTEX compounds

Liquid core waveguide-based optical spectrometry for field estimation of dissolved BTEX compounds in groundwater. A feasibility study, 485 (2003) 155

Bubble cell

Separation of selected metal-binding proteins with capillary zone electrophoresis, 477 (2003) 1

Butachlor

Production of antibodies and development of enzyme-linked immunosorbent assays for the herbicide butachlor, 491 (2003) 1

1-Butyl-3-methylimidazolium hexafluorophosphate

Room temperature ionic liquid as a novel medium for liquid/liquid extraction of metal ions, 488 (2003) 183

Butyltins

Determination of butyltin species in natural waters using aqueous phase ethylation and off-line room temperature trapping, 477 (2003) 103

 γ -Butyrolactone

Coulometric-potentiometric titration of bases and acids in γ -butyrolactone, 497 (2003) 143

Byproducts' toxicity

Toxicity biomonitoring of degradation byproducts using freeze-dried recombinant bioluminescent bacteria, 481 (2003) 229

C

C₆₀

Electrochemical oxidation of L-cysteine mediated by a fullerene-C₆₀-modified carbon electrode, 491 (2003) 181

C and N content

Decarbonation and preservation method for the analysis of organic C and N contents and stable isotope ratios of low-carbonated suspended particulate material, 491 (2003) 125

C₁₈ disk

Determination of colloiddally-associated polycyclic aromatic hydrocarbons (PAHs) in fresh water using C₁₈ solid phase extraction disks, 486 (2003) 159

C₁₈ precolumn

High performance liquid chromatography determination of chlorophenols in water samples after preconcentration by continuous flow liquid membrane extraction on-line coupled with a precolumn, 487 (2003) 129

Cadmium

Determination of chromium, cadmium and lead in food-packaging materials by axial inductively coupled plasma time-of-flight mass spectrometry, 479 (2003) 191

Dynamic ultrasound-assisted extraction of cadmium and lead from plants prior to electrothermal atomic absorption spectrometry, 480 (2003) 231

Experimental designs in the development of a new method for the sensitive determination of cadmium in seawater by adsorptive cathodic stripping voltammetry, 487 (2003) 229

Mercury-free simultaneous determination of cadmium and lead at a glassy carbon electrode modified with multi-wall carbon nanotubes, 489 (2003) 215

Determination of cadmium in human urine by electrothermal atomic absorption spectrometry, 491 (2003) 231

Bandpass reaction cell inductively coupled plasma mass spectrometry for the determination of silver and cadmium in samples in the presence of excess Zr, Nb and Mo, 493 (2003) 213

Novel determination of cadmium ions using an enzyme self-assembled monolayer with surface plasmon resonance, 500 (2003) 119

Cadmium pigments

Nature and origin of black spots found on Miró paintings: a non-invasive study, 479 (2003) 255

Calendering gasket materials

Neural-network modeling of hot-compression test curves for calendering gasket materials, 486 (2003) 237

Calf thymus DNA

Chemiluminescence determination of ultramicro DNA with a flow-injection method, 478 (2003) 31

Calibration

Correction function on biased results due to matrix effects. Application to the routine analysis of pesticide residues, 478 (2003) 281

Multivariate calibration of spectral data using dual-domain regression analysis, 490 (2003) 291

Calibration transfer

Standardization of SPE signals in multicomponent analysis of three benzimidazolic pesticides by spectrofluorimetry, 477 (2003) 211

Calix[4]resorcinarene

Thorium(IV) and uranium(VI) sorption studies on octacarboxymethyl-C-methylcalix[4]resorcinarene impregnated on a polymeric support, 485 (2003) 213

Calmodulin

Drug detection based on the conformational changes of calmodulin and the fluorescence of its enhanced green fluorescent protein fusion partner, 500 (2003) 237

Calves

Oxidative stress as a bio-marker of estrogen exposure in healthy veal calves, 483 (2003) 281

Canonical analysis

Optimisation of a flow injection system with electrochemical detection using the desirability function. Application to the determination of hydroquinone in cosmetics, 479 (2003) 173

Capability of discrimination

Multivariate analytical sensitivity in the determination of selenium, copper, lead and cadmium by stripping voltammetry when using soft calibration, 489 (2003) 85

Capillary array electrophoresis

Application of an integrated microchip system with capillary array electrophoresis to optimization of enzymatic reactions, 487 (2003) 75

Capillary electrophoresis

Simultaneous determination of flumequine and oxolinic acid in chicken tissues by solid phase extraction and capillary electrophoresis, 477 (2003) 21

Assay of amino acids in individual human lymphocytes by capillary zone electrophoresis with electrochemical detection, 478 (2003) 199

Dynamically coating the capillary with 1-alkyl-3-methylimidazolium-based ionic liquids for separation of basic proteins by capillary electrophoresis, 479 (2003) 249

Stability study on a Westöö-based methodology to determine organomercury compounds in polluted soil samples, 480 (2003) 219

Optimization in sample stacking for the measurement of short chain organic acids in serum of natural rubber latex by capillary electrophoresis, 482 (2003) 37

Capillary electrophoretic determination of lignin degradation products obtained by permanganate oxidation, 484 (2003) 181

Simultaneous, sensitive and selective on-line chemiluminescence determination of Cr(III) and Cr(VI) by capillary electrophoresis, 485 (2003) 169

Capillary electrophoretic profiling and pattern recognition analysis of urinary nucleosides from thyroid cancer patients, 486 (2003) 171

Large volume sample stacking capillary electrophoresis for metallothioneins analysis in eel liver, 486 (2003) 183

Determination of melatonin in commercial preparations by micellar electrokinetic chromatography and spectrofluorimetry, 488 (2003) 97

Liquid-phase microextraction of drugs from human breast milk, 491 (2003) 155

Large volume sample stacking in capillary electrophoresis of weakly acidic compounds using coated capillaries at high pH, 491 (2003) 173

Enantiomeric separation of *N*-nitrosonornicotine by capillary electrophoresis, 496 (2003) 177

Determination of trace iodide in seawater by capillary electrophoresis following transient isotachophoretic preconcentration. Comparison with ion chromatography, 497 (2003) 67

Determination of tumor marker CA125 by capillary electrophoretic enzyme immunoassay with electrochemical detection, 497 (2003) 75

Evaluation of capillary electrophoresis combined with a BCR sequential extraction for determining distribution of Fe, Zn, Cu, Mn, and Cd in airborne particulate matter, 498 (2003) 175

Quantitative determination of sulfonamide in meat by solid-phase extraction and capillary electrophoresis, 499 (2003) 215

Immunoassays using capillary electrophoresis laser induced fluorescence detection for DNA adducts, 500 (2003) 13

Capillary gas chromatography

Extraction of selected pollutants in open tubular capillary columns, 497 (2003) 199

Capillary gas chromatographic properties of three new cyclodextrin derivatives with acyl groups in the 6-position of β -cyclodextrin, 498 (2003) 39

Capillary liquid chromatography

Additivity of statistical moments in the exponentially modified Gaussian model of chromatography, 478 (2003) 99

Capillary zone electrophoresis

Study of the relationship between the structure and the relative mobility of chlorophenols in different buffers modified by different organic additives by capillary zone electrophoresis, 486 (2003) 191

Carbamate pesticides

Determination of carbaryl and carbofuran in fruits and tap water by β -cyclodextrin enhanced fluorimetric method, 488 (2003) 193

Carbaryl

Flow injection chemiluminescence determination of carbaryl using photolytic decomposition and photogenerated tris (2,2'-bipyridyl)ruthenium(III), 476 (2003) 141

Determination of carbaryl and carbofuran in fruits and tap water by β -cyclodextrin enhanced fluorimetric method, 488 (2003) 193

2-(9-Carbazole)-ethyl-chloroformate

Analysis of aromatic amines by high-performance liquid chromatography with pre-column derivatization by 2-(9-carbazole)-ethyl-chloroformate, 494 (2003) 141

Carbendazim

Gel-surface enhanced fluorescence sensing system coupled to a continuous-flow assembly for simultaneous monitoring of benomyl and carbendazim, 493 (2003) 35

Carbofuran

Determination of carbaryl and carbofuran in fruits and tap water by β -cyclodextrin enhanced fluorimetric method, 488 (2003) 193

Carbohydrate

Rapid estimation of global sugars by UV photodegradation and UV spectrophotometry, 477 (2003) 325

Evaluation of new strategies to prepare templated polymers with sufficient oligosaccharide recognition capacity, 484 (2003) 53

Carbon dioxide

- Lifetime-based optical sensor for high-level $p\text{CO}_2$ detection employing fluorescence resonance energy transfer, 480 (2003) 275
- Application of a gas-liquid entraining rotor to supercritical fluid extraction. Removal of iron(III) from water, 485 (2003) 1
- Electrothermal atomic absorption spectrometric determination of Cr(VI) in soil after leaching of Cr(VI) species with carbon dioxide, 491 (2003) 81

Carbon fibre microelectrode

- Contribution of migration current to the voltammetric deposition and stripping of lead with and without added supporting electrolyte at a mercury-free carbon fibre microdisc electrode, 500 (2003) 307

Carbon nanotubes

- Mercury-free simultaneous determination of cadmium and lead at a glassy carbon electrode modified with multi-wall carbon nanotubes, 489 (2003) 215

Carbon paste

- Electrochemical and catalytic investigation of carbon paste modified with Toluidine Blue O covalently immobilised on silica gel, 476 (2003) 43

Carbon paste modified electrodes

- Application of (2,2':6',2''-terpyridyl) copper(II) chloride complex in sensor construction for benzoyl peroxide determination in pharmaceutical samples, 494 (2003) 199

Carbon sol-gel silicate

- Covalent immobilization of an enzyme (glucose oxidase) onto a carbon sol-gel silicate composite surface as a biosensing platform, 478 (2003) 67

Carbonate

- Europium speciation by time-resolved laser-induced fluorescence, 478 (2003) 11
- Determination of carbonate and hydrogencarbonate by titration using sequential injection analysis, 485 (2003) 187

Carbonate apatite

- Determination of the composition of human urinary calculi composed of whewellite, weddellite and carbonate apatite using artificial neural networks, 491 (2003) 211

Carboxylic acid

- Dansylation of aromatic, aliphatic, and medicinal carboxylic acid compounds in 1 M Na_2CO_3 buffer, 488 (2003) 203

Carboxymethylamylose

- Bifunctional atomic force microscopy probes for molecular screening applications, 479 (2003) 77

Carrageenans

- Quantitation of κ -, ι - and λ -carrageenans by mid-infrared spectroscopy and PLS regression, 480 (2003) 23

Catalyst analysis

- Coated wire ion-selective electrode for palladium(II) and its application to catalyst analysis, 480 (2003) 299

Catechol

- Electrosynthesis and permselective characterisation of phenol-based polymers for biosensor applications, 495 (2003) 33

Cathepsin D

- Microplate assay for determination of cathepsin D activity based on quantification of a specific and stable peptide released from hemoglobin: VV-hemorphin-7, 486 (2003) 21

Cationic and anionic exchanger

- On-line collection/concentration of trace metals for spectroscopic detection via use of small-sized thin solid phase (STSP) column resin reactors. Application to speciation of Cr(III) and Cr(VI), 499 (2003) 149

Cattle

- Production of clenbuterol, diethylstilbestrol and trenbolone mass standards in lyophilised bovine urine, 483 (2003) 701

CCD

- Application of two-way decomposition methods in the simultaneous determination of cobalt, nickel and iron by coupling stopped-flow techniques and CCD detection, 491 (2003) 219

Cd

- Electrothermal vaporization inductively coupled plasma-mass spectrometry for the determination of Cr, Cu, Cd, Hg and Pb in rice flour, 495 (2003) 143

Cefquinome

- Influence of milking frequency on withdrawal period after application of β -lactam antibiotic-based drugs, 483 (2003) 241
- Detection of cefquinome in milk by liquid chromatography and screening methods, 483 (2003) 363

Cellular physiology

- Modification of the CytosensorTM microphysiometer to simultaneously measure extracellular acidification and oxygen consumption rates, 496 (2003) 93

Cellulose acetate

- Aluminum phosphate dispersed on a cellulose acetate fiber surface. Preparation, characterization and application for Li^+ , Na^+ and K^+ separation, 477 (2003) 305

Cellulose nitrate membrane

- Enrichment and determinations of nickel(II), cadmium(II), copper(II), cobalt(II) and lead(II) ions in natural waters, table salts, tea and urine samples as pyrrolydine dithiocarbamate chelates by membrane filtration-flame atomic absorption spectrometry combination, 493 (2003) 205

Cephalexin

- Molecularly imprinted solid phase extraction for rapid screening of cephalexin in human plasma and serum, 481 (2003) 165

Ceramic composite electrode

- Sol-gel derived metal dispersed ceramic-graphite composite electrode for amperometric determination of dopamine, 478 (2003) 321

Ceramides

Normal-phase liquid chromatographic separation of stratum corneum ceramides with detection by evaporative light scattering and atmospheric pressure chemical ionization mass spectrometry, 492 (2003) 233

Cerium(IV)

Chemiluminescence determination of ultramicro DNA with a flow-injection method, 478 (2003) 31

Chemiluminescence behavior based on oxidation reaction of rhodamine B with cerium(IV) in sulfuric acid medium, 489 (2003) 173

Cetirizine

Development and validation of a heart-cutting liquid chromatography-mass spectrometry method for the determination of process-related substances in cetirizine tablets, 492 (2003) 271

Cetyltrimethylammonium bromide (CTMAB)

Total internal reflected resonance light scattering detection of DNA at water/tetrachloromethane interface with acridine orange and cetyltrimethylammonium bromide, 494 (2003) 11

Characterization and validation

Optimization and validation of an enzyme immunoassay for the insect growth regulator fenoxycarb, 487 (2003) 15

Chelating cellulose

Cellulose functionalized with 8-hydroxyquinoline: new method of synthesis and applications as a solid phase extractant in the determination of metal ions by flame atomic absorption spectrometry, 485 (2003) 221

Chelating resin

Determination of mercury species with a resin functionalized with a 1,2-bis(*o*-aminophenylthio)ethane moiety, 477 (2003) 73

Organic complexation and total dissolved trace metal analysis in estuarine waters: comparison of solvent-extraction graphite furnace atomic absorption spectrometric and chelating resin flow injection inductively coupled plasma-mass spectrometric analysis, 481 (2003) 127

Chelest Fiber Iry

Solid phase extraction of lead by Chelest Fiber Iry (aminopolycarboxylic acid-type cellulose), 485 (2003) 19

Chelex resin

Performance of the diffusive gradients in thin films technique for measurement of trace metals in low ionic strength freshwaters, 478 (2003) 237

Chemical analysis

Investigation of roman age pigments found on pottery fragments, 478 (2003) 147

Chemical analysis by catalytic action

Chemical analysis for small amounts of horseradish peroxidase using "porphyrinogen" as a chromogenic reagent, 478 (2003) 37

Chemical force microscopy (CFM)

Chemical force microscopy: applications in surface characterisation of natural hydroxyapatite, 479 (2003) 39

Chemical force titration

Chemical force microscopy: applications in surface characterisation of natural hydroxyapatite, 479 (2003) 39

Chemical modification of silica gel surface

Thermal decomposition of surface compounds for the generation of small quantities of acetaldehyde. Calibration of a thermal desorption-gas chromatography-flame ionization detection, 488 (2003) 89

Chemical oxygen demand

Rapid determination of chemical oxygen demand using a focused microwave heating system featuring temperature control, 491 (2003) 99

Chemical sensor

Sol-gel based mid-infrared evanescent wave sensors for detection of organophosphate pesticides in aqueous solution, 496 (2003) 339

Chemical standard

Chemical standards in ion mobility spectrometry, 493 (2003) 185

Chemically modified electrodes

Mercury-free simultaneous determination of cadmium and lead at a glassy carbon electrode modified with multi-wall carbon nanotubes, 489 (2003) 215

Chemiluminescence

Microdialysis sampling and monitoring of uric acid *in vivo* by a chemiluminescence reaction and an enzyme on immobilized chitosan support membrane, 478 (2003) 23

Chemiluminescence determination of ultramicro DNA with a flow-injection method, 478 (2003) 31

Sensitive and selective determination of molybdenum by flow injection chemiluminescence method combined with controlled potential electrolysis technique, 481 (2003) 239

Lanthanide sensitized chemiluminescence determination of grepafloxacin in tablets and human urine, 482 (2003) 105

Chemiluminescence determination of citrate and pyruvate and their mixtures by the stopped-flow mixing technique, 485 (2003) 63

Simultaneous, sensitive and selective on-line chemiluminescence determination of Cr(III) and Cr(VI) by capillary electrophoresis, 485 (2003) 169

Sub-picogram determination of Vitamin B₁₂ in pharmaceuticals and human serum using flow injection with chemiluminescence detection, 488 (2003) 71

Flow injection-chemiluminescence determination of propranolol in pharmaceutical preparations, 488 (2003) 81

Analyser of chromium and/or cobalt, 488 (2003) 243

Chemiluminescence behavior based on oxidation reaction of rhodamine B with cerium(IV) in sulfuric acid medium, 489 (2003) 173

Flow injection chemiluminescence determination of epinephrine using epinephrine-imprinted polymer as recognition material, 489 (2003) 183

Determination of ozone in ambient air with a chemiluminescence reagent film detector, 491 (2003) 145

Determination of phenols by flow injection and liquid chromatography with on-line quinine-sensitized photo-oxidation and quenched luminol chemiluminescence detection, 493 (2003) 167

Comparative studies on the antioxidant activity of aqueous extracts of olive oils and seed oils using chemiluminescence, 494 (2003) 41

Chemiluminescence of dithiocarbamate fungicides based on the luminol reaction, 494 (2003) 49

Simultaneous determination of nitrite and nitrate in water by chemiluminescent flow-injection analysis, 495 (2003) 225

Reactivation of inactivated horseradish peroxidase with ethyleneurea and allantoin for determination of hydrogen peroxide by micro-flow injection horseradish peroxidase-catalyzed chemiluminescence, 495 (2003) 233

Monitoring the total phenolic/antioxidant levels in wine using flow injection analysis with acidic potassium permanganate chemiluminescence detection, 499 (2003) 47

Enhanced flow-injection-chemiluminometric determination of sulfonamides by on-line photochemical reaction, 499 (2003) 57

Flow-injection determination of cinnarizine using surfactant-enhanced permanganate chemiluminescence, 499 (2003) 223

Clinical applications of chemiluminescence, 500 (2003) 279

Chemiluminescence detection

Selective determination of amino acids using flow injection analysis coupled with chemiluminescence detection, 480 (2003) 67

Chemiluminescent

Flow-injection investigation of the chemiluminescent reaction of bis(2,4,6-(trichlorophenyl)oxalate) with free chlorine, 484 (2003) 101

Chemiluminescent analysis

Flow injection chemiluminescent immunoassay with *para*-phenylphenol and sodium tetraphenylborate as synergistic enhancers, 485 (2003) 57

Chemiluminescent detection

Flow injection chemiluminescence determination of carbaryl using photolytic decomposition and photogenerated tris (2,2'-bipyridyl)ruthenium(III), 476 (2003) 141

Chemiluminescent imaging

Direct chemiluminescent imaging detection of serum proteins in polyacrylamide gels, 497 (2003) 83

Chemometric

A kinetic spectrophotometric method for the determination of ternary mixtures of reducing sugars with the aid of artificial neural networks and multivariate calibration, 480 (2003) 53

Selection of quasi-optimal inputs in chemometrics modeling by artificial neural network analysis, 490 (2003) 31

Estimation of trace vapor concentration-pathlength in plumes for remote sensing applications from hyperspectral images, 490 (2003) 139

Classical least squares transformations of sensor array pattern vectors into vapor descriptors. Simulation of arrays of poly-

mer-coated surface acoustic wave sensors with mass-plus-volume transduction mechanisms, 490 (2003) 169

High-speed gas chromatographic separations with diaphragm valve-based injection and chemometric analysis as a gas chromatographic "sensor", 490 (2003) 223

Reliability of the contribution profiles obtained through the SIMPLISMA approach and used as reference in a calibration process. Application to Raman micro-analysis of dust particles, 495 (2003) 205

Chemometrics applied to unravel multicomponent processes and mixtures. Revisiting latest trends in multivariate resolution, 500 (2003) 195

Increasing the scope and power of flow-injection analysis through chemometric approaches, 500 (2003) 299

The evolution of chemometrics, 500 (2003) 365

Chemometrics^N

Real-time two-dimensional wavelet compression and its application to real-time modeling of ion mobility data, 490 (2003) 59

Chemosensing

Molecular sensing of 3-chloro-1,2-propanediol by molecular imprinting, 491 (2003) 15

Chenodioli

Simple and sensitive fluorimetric liquid chromatography for simultaneous analysis of chenodioli and ursodioli in pharmaceutical formulations, 493 (2003) 159

Chicken serum

Biosensor immunoassay for the detection of eight sulfonamides in chicken serum, 483 (2003) 171

Chip

Continuous-flow DNA and RNA amplification chip combined with laser-induced fluorescence detection, 494 (2003) 1

Chiral

Measuring melittin binding to planar supported lipid bilayer by chiral second harmonic generation, 496 (2003) 143

Chiral recognition

Chiral recognition of borneol by association with zinc(II) and L-tryptophan in the gas phase, 482 (2003) 1

Chiral selectivity

Study on the mechanism of chiral recognition with molecularly imprinted polymers, 489 (2003) 33

Chiral separation

Looking into the high efficiency of chiral separations using a chiral-polymer as pseudo stationary phase for micellar electrokinetic chromatography, 496 (2003) 185

Investigation of the chiral separation of cisapride on Chiralcel OJ and OJ-R columns, 498 (2003) 9

Chiral stationary phase

Chiral separation of novel chiral tetrahedron-type clusters on a cellulose tris(3,5-dimethylphenylcarbamate) chiral stationary phase, 495 (2003) 77

Chiral tetrahedron-type cluster

Chiral separation of novel chiral tetrahedron-type clusters on a cellulose tris(3,5-dimethylphenylcarbamate) chiral stationary phase, 495 (2003) 77

Chitosan

Microdialysis sampling and monitoring of uric acid in vivo by a chemiluminescence reaction and an enzyme on immobilized chitosan support membrane, 478 (2003) 23

Chitosan resin

Synthesis of novel chitosan resin derivatized with serine moiety for the column collection/concentration of uranium and the determination of uranium by ICP-MS, 480 (2003) 239

Chloramphenicol

Determination of chloramphenicol in animal tissues and urine. Liquid chromatography–tandem mass spectrometry versus gas chromatography–mass spectrometry, 483 (2003) 125

Screening and confirmation of chloramphenicol in shrimp tissue using ELISA in combination with GC-MS² and LC-MS², 483 (2003) 153

Evaluation of sample preparation for control of chloramphenicol residues in porcine tissues by enzyme-linked immunosorbent assay and liquid chromatography, 483 (2003) 307

Use of ion-trap liquid chromatography–mass spectrometry to screen and confirm drug residues in aquacultured products, 483 (2003) 373

Chlorides

Use of X-ray and other techniques to analyse the phase transformation induced in archaeological cast iron after its stabilisation by the electrolytic method, 494 (2003) 245

Chlorinated phenols

High performance liquid chromatography determination of chlorophenols in water samples after preconcentration by continuous flow liquid membrane extraction on-line coupled with a pre-column, 487 (2003) 129

3-Chloro-1,2-propanediol (3-MCPD)

Molecular sensing of 3-chloro-1,2-propanediol by molecular imprinting, 491 (2003) 15

Chloroacetanilides

Production of antibodies and development of enzyme-linked immunosorbent assays for the herbicide butachlor, 491 (2003) 1

Chlorogenic acid

Quantitation determination of chlorogenic acid in cider apple juices by ¹H NMR spectrometry, 486 (2003) 269

Chlorophenols

Study of the relationship between the structure and the relative mobility of chlorophenols in different buffers modified by different organic additives by capillary zone electrophoresis, 486 (2003) 191

Chlorophyll

Comparison of indices and multivariate models to non-destructively predict the fruit chlorophyll by means of visible spectrometry in apple fruit, 481 (2003) 119

Chloropropanediols

Molecular sensing of 3-chloro-1,2-propanediol by molecular imprinting, 491 (2003) 15

Cholesterol

Enzyme-based determination of cholesterol using the quartz crystal acoustic wave sensor, 487 (2003) 91

Cholesterol oxidase

Enzyme-based determination of cholesterol using the quartz crystal acoustic wave sensor, 487 (2003) 91

Choline

Ceramic-based multisite microelectrode array for rapid choline measures in brain tissue, 481 (2003) 65

Chromate

Immobilized poly-L-histidine for chelation of metal cations and metal oxyanions, 495 (2003) 151

Chromatographic analysis

Correction function on biased results due to matrix effects. Application to the routine analysis of pesticide residues, 478 (2003) 281

Chromatographic retention

Prediction of the chromatographic retention of saturated alcohols on stationary phases of different polarity applying the novel semi-empirical topological index, 477 (2003) 29

Chromatography

Additivity of statistical moments in the exponentially modified Gaussian model of chromatography, 478 (2003) 99

Catecholamines derivatized with 4-fluoro-7-nitro-2,1,3-benzoxadiazole: characterization of chemical structure and fluorescence properties, 478 (2003) 259

Looking into the high efficiency of chiral separations using a chiral-polymer as pseudo stationary phase for micellar electrokinetic chromatography, 496 (2003) 185

Chromium

Speciation of chromium in wastewater and sludge by extraction with liquid anion exchanger Amberlite LA-2 and electrothermal atomic absorption spectrometry, 478 (2003) 119

Determination of chromium, cadmium and lead in food-packaging materials by axial inductively coupled plasma time-of-flight mass spectrometry, 479 (2003) 191

Simultaneous, sensitive and selective on-line chemiluminescence determination of Cr(III) and Cr(VI) by capillary electrophoresis, 485 (2003) 169

Electrothermal atomic absorption spectrometric determination of Cr(VI) in soil after leaching of Cr(VI) species with carbon dioxide, 491 (2003) 81

Immobilized poly-L-histidine for chelation of metal cations and metal oxyanions, 495 (2003) 151

On-line collection/concentration of trace metals for spectroscopic detection via use of small-sized thin solid phase (STSP) column resin reactors. Application to speciation of Cr(III) and Cr(VI), 499 (2003) 149

Chromium and cobalt

Analysers of chromium and/or cobalt, 488 (2003) 243

Chromium reduction

Trace sulfide determination in oxic freshwaters, 477 (2003) 113

Chromium(III)

On-line sorption preconcentration of metals based on mixed micelle cloud point extraction prior to their determination with micellar chemiluminescence. Application to the determination of chromium at ng l^{-1} levels, 477 (2003) 223

Chronocoulometry

Electrochemical quartz crystal microbalance study of the electrodeposition mechanism of molybdenum oxide thin films from peroxy-poly-molybdate solution, 496 (2003) 39

Chronopotentiometry

Response to high acidity and basicity at a platinum electrode in chronopotentiometry, 478 (2003) 337

Cigarette

Electron spin resonance and spin trap investigation of free radicals in cigarette smoke: development of a quantification procedure, 481 (2003) 1

Cinnarizine

Flow-injection determination of cinnarizine using surfactant-enhanced permanganate chemiluminescence, 499 (2003) 223

Ciprofloxacin

Use of the diphasic dialysis as a new extraction procedure in the determination of enrofloxacin and ciprofloxacin in egg, 480 (2003) 123

Simultaneous determination of ciprofloxacin and tetracycline in biological fluids based on dual-lanthanide sensitised luminescence using dry reagent chemical technology, 494 (2003) 55

Circular dichroism

Novel determination of cadmium ions using an enzyme self-assembled monolayer with surface plasmon resonance, 500 (2003) 119

Cisapride

Investigation of the chiral separation of cisapride on Chiralcel OJ and OJ-R columns, 498 (2003) 9

Citrate

Chemiluminescence determination of citrate and pyruvate and their mixtures by the stopped-flow mixing technique, 485 (2003) 63

Citric acid

Effect of citric acid and hydrochloric acid on the polarographic behaviour of tin. Application to the determination of tin(II) in presence of tin(IV) in the activating solutions of the electrodeless plating of polymers, 484 (2003) 243

Citrus fruits

Simple and rapid determination of *N*-methylcarbamate pesticides in citrus fruits by electrospray ionization tandem mass spectrometry, 487 (2003) 201

Clark

Separation of arsines and trinitrotoluene by reversed phase high performance liquid chromatography and micellar electrokinetic capillary chromatography, 495 (2003) 239

Clark oxygen sensor

Assay of α -glucosidase inhibitory activity using flow-biosensor system, 479 (2003) 135

Classification

Comparison of supervised pattern recognition methods with McNemar's statistical test. Application to qualitative analysis of sugar beet by near-infrared spectroscopy, 477 (2003) 187

Clean-up

Analysis of zearalenone and α -zearalenol in animal feed using high-performance liquid chromatography, 487 (2003) 137

Clenbuterol

Screening procedures for clenbuterol residue determination in bovine urine and liver matrices using enzyme-linked immunosorbent assay and liquid chromatography, 483 (2003) 61

Clenbuterol food poisoning diagnosis by gas chromatography-mass spectrometric serum analysis, 483 (2003) 207

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 1. Endocrine ovarian function, 483 (2003) 225

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 2: ovarian morphology, 483 (2003) 233

Production of clenbuterol, diethylstilbestrol and trenbolone mass standards in lyophilised bovine urine, 483 (2003) 401

Determination of clenbuterol in pig liver by high-performance liquid chromatography with a coulometric electrode array system, 489 (2003) 95

Clindamycin

Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

Clonazepam

Potentiometric determination of diazepam, bromazepam and clonazepam using solid contact ion-selective electrodes, 498 (2003) 79

Closantel

Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

Cloud point extraction

On-line sorption preconcentration of metals based on mixed micelle cloud point extraction prior to their determination with micellar chemiluminescence. Application to the determination of chromium at ng l^{-1} levels, 477 (2003) 223

Cloud point preconcentration

Selective cloud point extraction and preconcentration of trace amounts of silver as a dithizone complex prior to flame atomic absorption spectrometric determination, 484 (2003) 155

CLOUDS

Toxicity classification from metabonomic data using a density superposition approach: 'CLOUDS', 490 (2003) 109

Cluster analysis

Selection of calibration set samples in determination of olive oil acidity by partial least squares–attenuated total reflectance–Fourier transform infrared spectroscopy, 489 (2003) 59

Clustering algorithm

SpaRef: a clustering algorithm for multispectral images, 490 (2003) 303

Clusters

Distance-dependent electron hopping conductivity and nanoscale lithography of chemically-linked gold monolayer protected cluster films, 496 (2003) 3

CNS

Ceramic-based multisite microelectrode array for rapid choline measures in brain tissue, 481 (2003) 65

CO₂

Flow system to gas capture from a nebulized solution, 479 (2003) 167

Co(bpy)₃³⁺-doped silica nanoparticles

Tris(2,2'-bipyridyl)cobalt(III)-doped silica nanoparticle DNA probe for the electrochemical detection of DNA hybridization, 481 (2003) 181

CO₂/modifier

Effect of the carbon dioxide modifier on the lipid composition of wool wax extracted from raw wool, 477 (2003) 233

Coated capillary

Large volume sample stacking in capillary electrophoresis of weakly acidic compounds using coated capillaries at high pH, 491 (2003) 173

Coated electrode

New flow injection potentiometric graphite coated ion-selective electrode for the determination of VO²⁺ ions, 481 (2003) 213

Coated graphite electrode

Polymeric membrane and coated graphite samarium(III)-selective electrodes based on isopropyl 2-[(isopropoxycarbothioyl)disulfanyl]ethanethioate, 486 (2003) 93

Coated wire ion-selective electrode

Coated wire ion-selective electrode for palladium(II) and its application to catalyst analysis, 480 (2003) 299

Cobalt

Simultaneous determination of copper, nickel, cobalt and zinc using zincon as a metallochromic indicator with partial least squares, 487 (2003) 181

Amberlite XAD-2 functionalized with Nitroso R salt: synthesis and application in an online system for preconcentration of cobalt, 494 (2003) 87

Coccidiostats

Simultaneous detection of five coccidiostats in eggs by liquid chromatography–tandem mass spectrometry, 483 (2003) 27

Coefficient of variation

Improved analysis of multivariate data by variable stability scaling: application to NMR-based metabolic profiling, 490 (2003) 265

Coextraction constant

Symmetrical electrochemical cell for determination of coextraction constants of metal salts for ion-selective polymeric membranes, 485 (2003) 253

Coffees

Simultaneous determination of methylxanthines in coffees and teas by UV-Vis spectrophotometry and partial least squares, 493 (2003) 83

Cold vapour atomic absorption spectrometry

Determination of mercury species with a resin functionalized with a 1,2-bis(*o*-aminophenylthio)ethane moiety, 477 (2003) 73

Collaborative study

Determination of uncertainty in analytical measurements from collaborative study results on the analysis of a phenoxymethylpenicillin sample, 481 (2003) 261

Collection/concentration

Synthesis of novel chitosan resin derivatized with serine moiety for the column collection/concentration of uranium and the determination of uranium by ICP-MS, 480 (2003) 239

Collisions

The effect of hydrogen-bonding and terminal group structure on the dynamics of Ar collisions with self-assembled monolayers, 496 (2003) 249

Colloids

Development of magnetic split-flow thin fractionation for continuous particle separation, 497 (2003) 115

Colorimetric–solid-phase extraction

Rapid, low level determination of silver(I) in drinking water by colorimetric–solid-phase extraction, 482 (2003) 197

Column efficiency

Comparison of elution strength, column efficiency, and peak symmetry in subcritical water chromatography and traditional reversed-phase liquid chromatography, 494 (2003) 157

Column liquid chromatography

Chiral separation of novel chiral tetrahedron-type clusters on a cellulose tris(3,5-dimethylphenylcarbamate) chiral stationary phase, 495 (2003) 77

Column preconcentration

Column preconcentration of mercury as HgI₄²⁻ using methyltriocetylammmonium chloride-naphthalene adsorbent with subsequent anodic stripping-differential pulse voltammetric determination, 481 (2003) 23

Column-switching LC–MS

Measurement of 4-nonylphenol and 4-*tert*-octylphenol in human urine by column-switching liquid chromatography–mass spectrometry, 486 (2003) 41

Combinatorial atomic force microscopy

Analytical instrumentation based on force measurements: combinatorial atomic force microscopy, 496 (2003) 267

Competing ligand exchange method

Kinetic studies of nickel speciation in model solutions of a well-characterized humic acid using the competing ligand exchange method, 480 (2003) 157

Complementary metal-oxide semiconductor microchip

Application of an integrated microchip system with capillary array electrophoresis to optimization of enzymatic reactions, 487 (2003) 75

Complementary stationary phases

Parallel column liquid chromatography with a single multi-wavelength absorbance detector for enhanced selectivity using chemometric analysis, 490 (2003) 197

Completion

New convergence criterion for multi-variable curve resolution, 495 (2003) 195

Complex formation equilibria

Rank annihilation factor analysis for spectrophotometric study of complex formation equilibria, 486 (2003) 109

Complexation capacity

Lability of metal ion-fulvic acid complexes as probed by FIA and DGT: a comparative study, 499 (2003) 17

Complexometric titration

Development of a method for estimating an accurate equivalence point in nickel titration of cyanide ions, 476 (2003) 159

Comprehensive Nuclear Test Ban Treaty

Ashing and microwave digestion of aerosol samples with a polypropylene fibrous filter matrix, 482 (2003) 129

Computational chemistry

Conformational analysis of 12-crown-3 and sodium ion selectivity of electrodes based on bis(12-crown-3) derivatives with malonate spacers, 480 (2003) 291

Conformational change

Novel determination of cadmium ions using an enzyme self-assembled monolayer with surface plasmon resonance, 500 (2003) 119

Drug detection based on the conformational changes of calmodulin and the fluorescence of its enhanced green fluorescent protein fusion partner, 500 (2003) 237

Computer simulations

Evaluation of synthetic liquid chromatography—diode array detection—mass spectrometry data for the determination of enzyme kinetics, 490 (2003) 17

Conductimetric detection

Separation of C₁–C₅ aliphatic carboxylic acids on a highly sulfonated styrene-divinylbenzene copolymer resin column with a C₆ aliphatic carboxylic acid solution as the mobile phase, 481 (2003) 15

Conductivity

Distance-dependent electron hopping conductivity and nanoscale lithography of chemically-linked gold monolayer protected cluster films, 496 (2003) 3

Langmuir monolayers of gold nanoparticles: from ohmic to rectifying charge transfer, 496 (2003) 29

Conference history

Flow analysis and its role and importance in the analytical sciences, 499 (2003) 5

Conformational analysis

Conformational analysis of 12-crown-3 and sodium ion selectivity of electrodes based on bis(12-crown-3) derivatives with malonate spacers, 480 (2003) 291

Consensus

Validation of consensus between proteomic and clinical chemistry datasets by applying a new randomisation *F*-test for generalised procrustes analysis, 490 (2003) 365

Conservation, iron objects

Use of X-ray and other techniques to analyse the phase transformation induced in archaeological cast iron after its stabilisation by the electrolytic method, 494 (2003) 245

Constant current stripping chronopotentiometry

Stripping chronopotentiometric detection of copper using screen-printed three-electrode system—application to acetic-acid bioavailable fraction from soil samples, 493 (2003) 95

Contaminants

Experimental design applied to the determination of several contaminants in Duero River by solid-phase microextraction, 477 (2003) 257

CONTIN

Assessment of techniques for DOSY NMR data processing, 490 (2003) 231

Continuous flow

Continuous-flow protease assay based on fluorescence resonance energy transfer, 478 (2003) 1

Continuous flow liquid membrane extraction

High performance liquid chromatography determination of chlorophenols in water samples after preconcentration by continuous flow liquid membrane extraction on-line coupled with a pre-column, 487 (2003) 129

Continuous particle separation

Development of magnetic split-flow thin fractionation for continuous particle separation, 497 (2003) 115

Continuous sampling

Membrane in tandem with a helical sorbent trap as continuous sampling technique of the polyvinyl chloride thermo-oxidative degradation products for their on-line gas chromatographic monitoring, 491 (2003) 163

Continuous ultrasound-assisted extraction system

On-line determination of manganese in solid seafood samples by flame atomic absorption spectrometry, 477 (2003) 149

Continuous wavelet transform

Wavelet frequency spectrum and its application in analyzing an oscillating chemical system, 484 (2003) 201

Continuous-flow

Continuous-flow DNA and RNA amplification chip combined with laser-induced fluorescence detection, 494 (2003) 1

Controlled pore glass

Microfabricated bioreactor chips for immobilised enzyme assays, 486 (2003) 149

Immobilized poly-L-histidine for chelation of metal cations and metal oxyanions, 495 (2003) 151

Conventional water treatment

Development of an on-line electrochemical analyser for trace level aluminium, 499 (2003) 173

Convergence criterion

New convergence criterion for multi-variable curve resolution, 495 (2003) 195

Convex hull

The Law of Mixtures method for multivariate calibration, 476 (2003) 73

Coordination

Picolinamide-Cu(Ac)₂-imprinted polymer with high potential for recognition of picolinamide-copper acetate complex, 482 (2003) 175

Coordination structure

The utility of ion-molecule reactions in a quadrupole ion trap mass spectrometer for analyzing metal complex coordination structure, 496 (2003) 233

Copper

Investigation into sorption processes in the anodic stripping voltammetric speciation of Cu in natural waters, 476 (2003) 33

Atomic absorption spectrophotometric determination of trace copper in waters, aluminium foil and tea samples after preconcentration with 1-nitroso-2-naphthol-3,6-disulfonic acid on Ambersorb 572, 480 (2003) 259

Reversed flow injection and sandwich sequential injection methods for the spectrophotometric determination of copper(II) with cuprizone, 486 (2003) 227

Simultaneous determination of copper, nickel, cobalt and zinc using zincon as a metallochromic indicator with partial least squares, 487 (2003) 181

Application of adsorptive stripping voltammetry to the determination of bismuth and copper in the presence of morin, 491 (2003) 63

Stripping chronopotentiometric detection of copper using screen-printed three-electrode system—application to acetic-acid bioavailable fraction from soil samples, 493 (2003) 95

Challenges in modelling and optimisation of stability constants in the study of metal complexes with monoprotated ligands.

Part I. A glass electrode potentiometric and polarographic study of a Cu-TAPSO-OH system, 493 (2003) 105

Trace-element analysis in biological fluids: evaluation of contamination in samples collected with metallic needles, 494 (2003) 167

Flow-injection simultaneous determination of copper and iron in patient sera with 2-(5-bromo-2-pyridylazo)-5-(*N*-propyl-*N*-sulfopropylamino)aniline and its application to disease diagnosis, 499 (2003) 91

Copper alloys

On-line electrolytic dissolution for lead determination in high-purity copper by isotope dilution inductively coupled plasma mass spectrometry, 485 (2003) 145

Copper complexes

Application of (2,2':6',2''-terpyridyl) copper(II) chloride complex in sensor construction for benzoyl peroxide determination in pharmaceutical samples, 494 (2003) 199

Copper compounds

Nature and origin of black spots found on Miró paintings: a non-invasive study, 479 (2003) 255

Copper determination

Preconcentration of copper on ion-selective imprinted polymer microbeads, 480 (2003) 251

Luminescent hexanuclear Cu(I)-cluster for the selective determination of copper, 486 (2003) 11

Implementation of an automatic standard addition method in a flow-batch system: application to copper determination in an alcoholic beverage by atomic absorption spectrometry, 486 (2003) 143

Copper ion

Voltammetric study on the complex of thiram-copper(II) and its application, 482 (2003) 29

Copper ion-selective electrode

Copper(II)-selective membrane electrode based on hydrotris(3-iso-propylpyrazolyl)methane in a poly(vinyl chloride) matrix, 494 (2003) 207

Copper oxide

Utility of copper(II) oxide as a packed reactor in flow injection assembly for rapid analysis of some angiotensin converting enzyme inhibitors, 489 (2003) 115

Copper(I)-cluster

Luminescent hexanuclear Cu(I)-cluster for the selective determination of copper, 486 (2003) 11

Copper(II)

Adsorption of lead(II) and copper(II) on activated carbon by complexation with surface functional groups, 480 (2003) 171

Copper(II) complex

Evaluation of new strategies to prepare templated polymers with sufficient oligosaccharide recognition capacity, 484 (2003) 53

Core-shell

Fluorescence nonradiative energy transfer analysis of crosslinker heterogeneity in core-shell hydrogel nanoparticles, 496 (2003) 53

Correction

Investigation into sorption processes in the anodic stripping voltammetric speciation of Cu in natural waters, 476 (2003) 33

Correction function

Correction function on biased results due to matrix effects. Application to the routine analysis of pesticide residues, 478 (2003) 281

Correlation

Use of boiling point-Lee retention index correlation for rapid review of gas chromatography-mass spectrometry data, 494 (2003) 235

Correlation study

Correlation study of enzyme-linked immunosorbent assay and high-performance liquid chromatography/tandem mass spectrometry for the determination of *N*-methylcarbamate insecticides in baby food, 495 (2003) 123

Correspondence analysis

Factor analytical approaches for evaluating groundwater trace element chemistry data, 490 (2003) 123

Corticosteroids

Application of neutral loss mode in liquid chromatography-mass spectrometry for the determination of corticosteroids in bovine urine, 483 (2003) 259

Validation of a multiresidue liquid chromatography-tandem mass spectrometric method for the quantitation and confirmation of corticosteroid residues in urine, according to the proposed SANCO 1085 criteria for banned substances, 483 (2003) 341

Cosmetic

Identification of iron(III) oxides and hydroxy-oxides by voltammetry of immobilised microparticles, 477 (2003) 157

Indirect spectrophotometric determination of *p*-aminobenzoic acid in sunscreen formulations by sequential injection analysis, 493 (2003) 233

Cosmochemical samples

Separation of rare earth elements from scandium by extraction chromatography. Application to radiochemical neutron activation analysis for trace rare earth elements in geological samples, 498 (2003) 25

Coulometry

Coulometric-potentiometric titration of bases and acids in γ -butyrolactone, 497 (2003) 143

Coumarin

BrMOZPhC, a novel coumarin type reagent for the fluorescent derivatisation of carboxylic acids, 489 (2003) 153

Covalent immobilization

Covalent immobilization of an enzyme (glucose oxidase) onto a carbon sol-gel silicate composite surface as a biosensing platform, 478 (2003) 67

Covalent modification

Fourier-transform mass spectrometry for detection of thioester-bound intermediates in unfractionated proteolytic mixtures of 80 and 191 kDa portions of Bacitracin A synthetase, 496 (2003) 217

Cr

Electrothermal vaporization inductively coupled plasma-mass spectrometry for the determination of Cr, Cu, Cd, Hg and Pb in rice flour, 495 (2003) 143

Cross validation

Cross validation and uncertainty estimates in independent component analysis, 490 (2003) 341

Cross-reactivity

Evaluation of the structure/cross-reactivity relationship of polycyclic aromatic compounds using an enzyme-linked immunosorbent assay kit, 487 (2003) 43

Production of antibodies and development of enzyme-linked immunosorbent assays for the herbicide butachlor, 491 (2003) 1

12-Crown-3

Conformational analysis of 12-crown-3 and sodium ion selectivity of electrodes based on bis(12-crown-3) derivatives with malonate spacers, 480 (2003) 291

Cryogenic modulation

Chemometric analysis of comprehensive two-dimensional gas chromatography data using cryogenic modulation, 500 (2003) 211

Crystallization

Crystallization monitoring in supersaturated solution with a quartz crystal sensor, 491 (2003) 71

Cu

Electrothermal vaporization inductively coupled plasma-mass spectrometry for the determination of Cr, Cu, Cd, Hg and Pb in rice flour, 495 (2003) 143

Cuprizone

Reversed flow injection and sandwich sequential injection methods for the spectrophotometric determination of copper(II) with cuprizone, 486 (2003) 227

Curve resolution

Comparison of several curve resolution methods for drug impurity profiling using high-performance liquid chromatography with diode array detection, 487 (2003) 155

Multivariate resolution of NMR labile signals by means of hard- and soft-modelling methods, 490 (2003) 253

Chemometrics applied to unravel multicomponent processes and mixtures. Revisiting latest trends in multivariate resolution, 500 (2003) 195

Curvilinear calibration

Estimation of the minimum detectable value for the determination of PCBs in fatty food samples by GC-ECD: a curvilinear calibration case, 483 (2003) 413

CVAFS

Speciation analysis of mercury in seafood by using high-performance liquid chromatography on-line coupled with cold-vapor atomic fluorescence spectrometry via a post column microwave digestion, 477 (2003) 131

CWFP

Continuous wave free precession. Practical analytical tool for low-resolution nuclear magnetic resonance measurements, 478 (2003) 313

Cyanide determination

Room temperature phosphorimetric determination of cyanide based on triplet state energy transfer, 491 (2003) 27

Cyanide ion

Development of a method for estimating an accurate equivalence point in nickel titration of cyanide ions, 476 (2003) 159

 β -Cyclodextrin

Investigation of six-membered carbocyclic compounds as a molecular switch block of room temperature phosphorescence in nondeoxygenated β -cyclodextrin solution, 484 (2003) 111

Fluorescence and room temperature phosphorescence of 6-bromo-2-naphthol in β -cyclodextrin solution and its selective molecular recognition for cyclohexane, 494 (2003) 71

Cyclodextrin

Determination of carbaryl and carbofuran in fruits and tap water by β -cyclodextrin enhanced fluorimetric method, 488 (2003) 193

Enantiomeric separation of *N'*-nitrosonornicotine by capillary electrophoresis, 496 (2003) 177

 β -Cyclodextrin bonded silica

On-line selective solid-phase extraction of 4-nitrophenol with β -cyclodextrin bonded silica, 484 (2003) 145

Cyclodextrin derivatives

Capillary gas chromatographic properties of three new cyclodextrin derivatives with acyl groups in the 6-position of β -cyclodextrin, 498 (2003) 39

 β -Cyclodextrin epichlorohydrin copolymer

β -Cyclodextrin epichlorohydrin copolymer as a solid-phase extraction adsorbent for aromatic compounds in water samples, 477 (2003) 93

Cyclohexane

Fluorescence and room temperature phosphorescence of 6-bromo-2-naphthol in β -cyclodextrin solution and its selective molecular recognition for cyclohexane, 494 (2003) 71

Cysteine

Stability study on a Westöö-based methodology to determine organomercury compounds in polluted soil samples, 480 (2003) 219

Cytokinins

Quantitative analysis of cytokinins in plants by liquid chromatography–single-quadrupole mass spectrometry, 480 (2003) 207

CytosensorTM

Modification of the CytosensorTM microphysiometer to simultaneously measure extracellular acidification and oxygen consumption rates, 496 (2003) 93

Cytosol

Large volume sample stacking capillary electrophoresis for metallothioneins analysis in eel liver, 486 (2003) 183

Cytotoxicity

Bacterial *Lux-Fluoro* test for biological assessment of pollutants in water samples from urban and rural origin, 487 (2003) 51

CZE

Separation of selected metal-binding proteins with capillary zone electrophoresis, 477 (2003) 1

D**Dairy products**

Determination of mono- and disaccharides in milk and milk products by high-performance anion-exchange chromatography with pulsed amperometric detection, 485 (2003) 43

Dansyl chloride

Dansylation of aromatic, aliphatic, and medicinal carboxylic acid compounds in 1 M Na₂CO₃ buffer, 488 (2003) 203

Data mining

Data mining of the relationship between volatile organic components and transient high ozone formation, 490 (2003) 153

Data pre-processing

Improved analysis of multivariate data by variable stability scaling: application to NMR-based metabolic profiling, 490 (2003) 265

DC polarography

Challenges in modelling and optimisation of stability constants in the study of metal complexes with monoprotonated ligands. Part I. A glass electrode potentiometric and polarographic study of a Cu–TAPSO–OH system, 493 (2003) 105

Debye–Hückel equation

Thermodynamic dissociation constants of silychristin, silybin, silydianin and mycophenolate by the regression analysis of spectrophotometric data, 486 (2003) 125

Decarbonation

Decarbonation and preservation method for the analysis of organic C and N contents and stable isotope ratios of low-carbonated suspended particulate material, 491 (2003) 125

Decision limit (CC α)

Validation of analytical methods based on mass spectrometric detection according to the "2002/657/EC" European decision: guideline and application, 483 (2003) 325

Decomposition of absorbance matrix

Determination of the number of light-absorbing species in the protonation equilibria of selected drugs, 489 (2003) 137

Deconvolution

Chemometric analysis of comprehensive two-dimensional gas chromatography data using cryogenic modulation, 500 (2003) 211

DECRA

Assessment of techniques for DOSY NMR data processing, 490 (2003) 231

Degradation

Food processing effects on residues: penicillins in milk and yoghurt, 483 (2003) 73

Delaunay triangulation

Delaunay triangulation method for multivariate calibration, 488 (2003) 1

DEMS

"On line" mass spectrometric detection of ammonia oxidation products generated by polypyrrole based amperometric sensors, 489 (2003) 207

Dendrimers

Surface vibrational sum frequency and Raman studies of PAMAM G0, G1 and acylated PAMAM G0 dendrimers, 496 (2003) 117

Dengue virus

Development of immunochips for the detection of dengue viral antigens, 479 (2003) 117

Deoxyribose

Engineering DNA-electrode connectivities: manipulation of linker length and structure, 496 (2003) 81

Engineering DNA-electrode connectivities: manipulation of linker length and structure, 496 (2003) 92

Derivatization

Pervaporation-flow injection analysis of phenol after on-line derivatisation to phenyl acetate, 485 (2003) 37

Simple and sensitive fluorimetric liquid chromatography for simultaneous analysis of chenodiol and ursodiol in pharmaceutical formulations, 493 (2003) 159

Dermanyssus gallinae

Determination of propoxur residues in eggs by liquid chromatography-diode array detection after treatment of stocked housing facilities for the poultry red mite (*Dermanyssus gallinae*), 483 (2003) 19

Desirability

Optimisation using a surface response methodology of a system with drift. Application to a flow analysis system with electrochemical detection, 498 (2003) 119

Desirability functions

Optimisation of a flow injection system with electrochemical detection using the desirability function. Application to the determination of hydroquinone in cosmetics, 479 (2003) 173

Destruction procedures

Performance of selected destruction methods for the determination of heavy metals in reed plants (*Phragmites australis*), 497 (2003) 191

Detection

Gas chromatographic detection of organometallic compounds by reactive-flow photometry, 477 (2003) 269

Development of immunochips for the detection of dengue viral antigens, 479 (2003) 117

Detection capability (CC β)

Validation of analytical methods based on mass spectrometric detection according to the "2002/657/EC" European decision: guideline and application, 483 (2003) 325

Detection in surface water

Development of a non-labeled immunosensor for the herbicide trifluralin via optical waveguide lightmode spectroscopic detection, 487 (2003) 31

Detection limits

Influence of selectivity and sensitivity parameters on detection limits in multivariate curve resolution of chromatographic second-order data, 476 (2003) 111

Detection of specific nucleic acids

Duplex probes: a new approach for the detection of specific nucleic acids in homogenous assays, 491 (2003) 135

Determination

Determination of ozone in ambient air with a chemiluminescence reagent film detector, 491 (2003) 145

Performance of selected destruction methods for the determination of heavy metals in reed plants (*Phragmites australis*), 497 (2003) 191

Determination of anthranilic acid derivatives

Investigation of the luminescent properties of terbium-anthranilate complexes and application to the determination of anthranilic acid derivatives in aqueous solutions, 476 (2003) 149

Determination of antioxidants

Review role of liquid chromatography-mass spectrometry in the analysis of oxidation products and antioxidants in biological systems, 492 (2003) 17

Determination of oxygen

Remote determination of oxygen and water at millimetre wave frequencies using a fibre optic communications network, 476 (2003) 25

Determination of water

Remote determination of oxygen and water at millimetre wave frequencies using a fibre optic communications network, 476 (2003) 25

Determining the number of components

Determination of the number of light-absorbing species in the protonation equilibria of selected drugs, 489 (2003) 137

Dexamethasone

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 1. Endocrine ovarian function, 483 (2003) 225

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 2: ovarian morphology, 483 (2003) 233

Development and validation of chemometrics-assisted spectrophotometry and micellar electrokinetic chromatography for the determination of four-component pharmaceuticals, 489 (2003) 77

DGT

Performance of the diffusive gradients in thin films technique for measurement of trace metals in low ionic strength freshwaters, 478 (2003) 237

Organic complexation of Al and Fe in acidic soil solutions. Comparison of diffusive gradients in thin films analyses with Models V and VI predictions, 498 (2003) 105

Di(2-ethylhexyl) phthalate

Gas chromatographic-mass spectrometric analysis of di(2-ethylhexyl) phthalate and its metabolites in hepatic microsomal incubations, 480 (2003) 1

Di-, tetra-, and hexa-imidepyridine ionophores

Novel thiocyanate-selective membrane sensors based on di-, tetra-, and hexa-imidepyridine ionophores, 482 (2003) 9

Diagnostic of biotreatment results

Toxicity biomonitoring of degradation byproducts using freeze-dried recombinant bioluminescent bacteria, 481 (2003) 229

Diaminobenzidine

Enzyme-based determination of cholesterol using the quartz crystal acoustic wave sensor, 487 (2003) 91

1,8-Diaminonaphthalene

New flow injection potentiometric graphite coated ion-selective electrode for the determination of VO^{2+} ions, 481 (2003) 213

Diamond thin films

Spectroelectrochemical responsiveness of a freestanding, boron-doped diamond, optically transparent electrode toward ferrocene, 500 (2003) 137

Diazepam

Potentiometric determination of diazepam, bromazepam and clonazepam using solid contact ion-selective electrodes, 498 (2003) 79

2,6-Dichlorophenol

Electrosynthesis and permselective characterisation of phenol-based polymers for biosensor applications, 495 (2003) 33

Diethylstilbestrol

Production of clenbuterol, diethylstilbestrol and trenbolone mass standards in lyophilised bovine urine, 483 (2003) 401

Difference mobility spectrum

Detection of perfluorocarbons using ion mobility spectrometry, 484 (2003) 63

Differential kinetic method

A kinetic spectrophotometric method for the determination of ternary mixtures of reducing sugars with the aid of artificial neural networks and multivariate calibration, 480 (2003) 53

Differential potentiometry

Flow injection differential potentiometric determination of lysine by using a lysine biosensor, 477 (2003) 315

Differential pulse polarography

Effect of citric acid and hydrochloric acid on the polarographic behaviour of tin. Application to the determination of tin(II) in presence of tin(IV) in the activating solutions of the electroless plating of polymers, 484 (2003) 243

Differential pulse polarography: a suitable technique for monitoring drug release from polymeric nanoparticle dispersions, 491 (2003) 57

Differential pulse voltammetry

Determination of naproxen in pharmaceuticals by differential pulse voltammetry at a platinum electrode, 495 (2003) 69

Differential pulsed elution

Molecularly imprinted solid phase extraction for rapid screening of cephalexin in human plasma and serum, 481 (2003) 165

Diffuse reflectance spectroscopy

Rapid, low level determination of silver(I) in drinking water by colorimetric-solid-phase extraction, 482 (2003) 197

Diffusion NMR

Assessment of techniques for DOSY NMR data processing, 490 (2003) 231

Diffusive gradients

Lability of metal ion-fulvic acid complexes as probed by FIA and DGT: a comparative study, 499 (2003) 17

2,6-Difluorophenol

Electrosynthesis and permselective characterisation of phenol-based polymers for biosensor applications, 495 (2003) 33

Digital filtering

Evaluation of selectivity and robustness of near-infrared glucose measurements based on short-scan Fourier transform infrared interferograms, 490 (2003) 325

Digoxin

Labelless and reversible immunosensor assay based upon an electrochemical current-transient protocol, 495 (2003) 21

Dihydrostreptomycin

Single biosensor immunoassay for the detection of five aminoglycosides in reconstituted skimmed milk, 488 (2003) 53

5-(*p*-Dimethylaminobenzylidene) rhodanine

Rapid, low level determination of silver(I) in drinking water by colorimetric-solid-phase extraction, 482 (2003) 197

Dimethyl methylphosphonate

Decomposition of dimethyl methylphosphonate on $\text{TiO}_2(110)$: principal component analysis applied to X-ray photoelectron spectroscopy, 496 (2003) 289

2,6-Dimethylphenol

Electrosynthesis and permselective characterisation of phenol-based polymers for biosensor applications, 495 (2003) 33

Dimetridazole

Production and characterisation of polyclonal antibodies to a range of nitroimidazoles, 483 (2003) 193

4,4'-Dinitrocarbanilide (DNC)

Surface plasmon resonance biosensor screening of poultry liver and eggs for nicarbazin residues, 483 (2003) 165

Diode array detection

Determination of propoxur residues in eggs by liquid chromatography–diode array detection after treatment of stocked housing facilities for the poultry red mite (*Dermanyssus gallinae*), 483 (2003) 19

Comparison of several curve resolution methods for drug impurity profiling using high-performance liquid chromatography with diode array detection, 487 (2003) 155

Dioxetane

Clinical applications of chemiluminescence, 500 (2003) 279

Diphasic dialysis

Use of the diphasic dialysis as a new extraction procedure in the determination of enrofloxacin and ciprofloxacin in egg, 480 (2003) 123

Diphosphene

Raman excitation profile of a sterically protected diphosphene [ArP=PAr], 496 (2003) 155

Direct electrochemistry

Heme protein–gluten films: voltammetric studies and their electrocatalytic properties, 481 (2003) 91

Direct quantification

Direct quantification of γ -globulin in human blood serum by resonance light scattering techniques without separation of human serum albumin, 493 (2003) 179

Direct-EI interface

Nano-high-performance liquid chromatography–electron ionization mass spectrometry approach for environmental analysis, 493 (2003) 125

Disaccharides

Determination of mono- and disaccharides in milk and milk products by high-performance anion-exchange chromatography with pulsed amperometric detection, 485 (2003) 43

Dissociation constant

Spectrophotometric, potentiometric and chromatographic pK_a values of polyphenolic acids in water and acetonitrile–water media, 484 (2003) 253

Thermodynamic dissociation constants of silychristin, silybin, silydianin and mycophenolate by the regression analysis of spectrophotometric data, 486 (2003) 125

Dissolved oxygen

Characterization of a fluorescent sol–gel encapsulated erythrosin B dissolved oxygen sensor, 487 (2003) 101

Distilbazolium ligand

Simple fluorimetric method for probing AT-rich regions in DNA based on the photoisomerization of distilbazolium ligand, 487 (2003) 221

Distilled liquors

Determination of ethanol in distilled liquors using sequential injection analysis with spectrophotometric detection, 499 (2003) 123

Dithiocarbamate fungicides

Chemiluminescence of dithiocarbamate fungicides based on the luminol reaction, 494 (2003) 49

Dithionite

A wall-jet disc electrode for simultaneous and continuous on-line measurement of sodium dithionite, sulfite and indigo concentrations by means of multistep chronoamperometry, 486 (2003) 73

Dithizone

Selective cloud point extraction and preconcentration of trace amounts of silver as a dithizone complex prior to flame atomic absorption spectrometric determination, 484 (2003) 155

DNA

Chemiluminescence determination of ultramicro DNA with a flow-injection method, 478 (2003) 31

Dynamic imaging of single DNA–protein interactions using atomic force microscopy, 479 (2003) 3

Tris(2,2'-bipyridyl)cobalt(III)-doped silica nanoparticle DNA probe for the electrochemical detection of DNA hybridization, 481 (2003) 181

Simple fluorimetric method for probing AT-rich regions in DNA based on the photoisomerization of distilbazolium ligand, 487 (2003) 221

Total internal reflected resonance light scattering detection of DNA at water/tetrachloromethane interface with acridine orange and cetyltrimethylammonium bromide, 494 (2003) 11

Nanoparticle-based electrochemical DNA detection, 500 (2003) 247

DNA adducts

Immunoassays using capillary electrophoresis laser induced fluorescence detection for DNA adducts, 500 (2003) 13

DNA amplification

Continuous-flow DNA and RNA amplification chip combined with laser-induced fluorescence detection, 494 (2003) 1

DNA antibodies

Affinity biosensors based on disposable screen-printed electrodes modified with DNA, 479 (2003) 125

DNA hybridization

Particle-based detection of DNA hybridization using electrochemical stripping measurements of an iron tracer, 482 (2003) 149

DNA oxidation

Review role of liquid chromatography–mass spectrometry in the analysis of oxidation products and antioxidants in biological systems, 492 (2003) 17

DNA repair

Immunoassays using capillary electrophoresis laser induced fluorescence detection for DNA adducts, 500 (2003) 13

DNA sensor

Affinity biosensors based on disposable screen-printed electrodes modified with DNA, 479 (2003) 125

DNA-drug interaction

Electrochemical study of the interaction of levofloxacin with DNA, 495 (2003) 61

DNAL/PPP

Optical membrane for *o*-nitroaniline based on fluorescence energy transfer between a small molecule and a conjugated polymer, 481 (2003) 109

DNA-modified electrode

Electrochemical study of the interaction of levofloxacin with DNA, 495 (2003) 61

DOM

Organic complexation of Al and Fe in acidic soil solutions. Comparison of diffusive gradients in thin films analyses with Models V and VI predictions, 498 (2003) 105

0.5-Donating ionophore

Polymeric membrane and coated graphite samarium(III)-selective electrodes based on isopropyl 2-[(isopropoxycarbothioyl)disulfanyl]ethanethioate, 486 (2003) 93

Dopamine

Catecholamines derivatized with 4-fluoro-7-nitro-2,1,3-benzoxadiazole: characterization of chemical structure and fluorescence properties, 478 (2003) 259

Sol-gel derived metal dispersed ceramic-graphite composite electrode for amperometric determination of dopamine, 478 (2003) 321

Fluorimetric determination of dopamine in pharmaceutical products and urine using ethylene diamine as the fluorogenic reagent, 497 (2003) 93

Dortmund

Element determination in medieval soil samples by total reflection X-ray fluorescence analysis, 480 (2003) 327

DOSY NMR

Assessment of techniques for DOSY NMR data processing, 490 (2003) 231

Doxorubicin

Determination of doxorubicin in human plasma by excitation-emission matrix fluorescence and multi-way analysis, 493 (2003) 69

Drift correction

Optimisation using a surface response methodology of a system with drift. Application to a flow analysis system with electrochemical detection, 498 (2003) 119

Drinking water

Use of pseudo-first order kinetics in flow injection for determination of trace inorganic iodine, 499 (2003) 115

Drug analysis

Solid-phase microextraction and liquid chromatography/mass spectrometry in drug analysis, 492 (2003) 49

Drug liberation

Fully automated drug liberation apparatus for semisolid preparations based on sequential injection analysis, 499 (2003) 9

Drug monitoring

Improved screening capabilities in forensic toxicology by application of liquid chromatography-tandem mass spectrometry, 492 (2003) 171

Drug residue analysis

Liquid chromatographic-electrospray tandem mass spectrometric method for the determination of mebendazole and its hydrolysed and reduced metabolites in sheep muscle, 483 (2003) 111

Drug residue depletion

Liquid chromatographic-electrospray tandem mass spectrometric method for the determination of mebendazole and its hydrolysed and reduced metabolites in sheep muscle, 483 (2003) 111

Drug stability

High-performance liquid chromatography-atmospheric pressure chemical ionization/tandem mass spectrometry for the determination of a thiol compound in plasma, 492 (2003) 215

Drug substance

Validated liquid chromatography method for assay of tizanidine in drug substance and formulated products, 478 (2003) 171

Drugs

Electrospray ionisation mass spectrometric behaviour of selected drugs and their metabolites, 492 (2003) 1

Determination of doxorubicin in human plasma by excitation-emission matrix fluorescence and multi-way analysis, 493 (2003) 69

Drugs of abuse

SIMPLISMA applied to two-dimensional wavelet compressed ion mobility spectrometry data, 484 (2003) 75

Dry reagent strips

Simultaneous determination of ciprofloxacin and tetracycline in biological fluids based on dual-lanthanide sensitised luminescence using dry reagent chemical technology, 494 (2003) 55

Drying oil

Nature and origin of black spots found on Miró paintings: a non-invasive study, 479 (2003) 255

Dual-light source

Dual-light source excitation for mode-filtered light detection, 481 (2003) 301

Duchenne muscular dystrophy

Developments toward a complete micro-total analysis system for Duchenne muscular dystrophy diagnosis, 500 (2003) 223

Duplex probe

Duplex probes: a new approach for the detection of specific nucleic acids in homogenous assays, 491 (2003) 135

Dust particles

Reliability of the contribution profiles obtained through the SIM-PLISMA approach and used as reference in a calibration process. Application to Raman micro-analysis of dust particles, 495 (2003) 205

Dynamic force spectroscopy

Analytical descriptions of dynamic force spectroscopy: behaviour of multiple connections, 479 (2003) 107

Dynamic reaction cell

Electrothermal vaporization inductively coupled plasma-mass spectrometry for the determination of Cr, Cu, Cd, Hg and Pb in rice flour, 495 (2003) 143

Dynamic Reaction CellTM inductively coupled plasma mass spectrometry

Bandpass reaction cell inductively coupled plasma mass spectrometry for the determination of silver and cadmium in samples in the presence of excess Zr, Nb and Mo, 493 (2003) 213

Dynamic time warping

Dynamic time warping of spectroscopic BATCH data, 498 (2003) 133

Dynamic ultrasound

Dynamic ultrasound-assisted extraction of cadmium and lead from plants prior to electrothermal atomic absorption spectrometry, 480 (2003) 231

Dynamical coating

Dynamically coating the capillary with 1-alkyl-3-methylimidazolium-based ionic liquids for separation of basic proteins by capillary electrophoresis, 479 (2003) 249

Dynamics

Dynamic imaging of single DNA-protein interactions using atomic force microscopy, 479 (2003) 3

Dysprosium ion

Ion imprinted polymer particles: synthesis, characterization and dysprosium ion uptake properties suitable for analytical applications, 478 (2003) 43

E

Eastman-AQ55D

Electrochemiluminescence sensor using tris(2,2'-bipyridyl)ruthenium(II) immobilized in Eastman-AQ55D-silica composite thin-films, 480 (2003) 285

2002/657/EC

Validation of analytical methods based on mass spectrometric detection according to the "2002/657/EC" European decision: guideline and application, 483 (2003) 325

Ecotoxicity testing

Microplate-based microbial assay for risk assessment and (eco)toxic fingerprinting of chemicals, 485 (2003) 121

EDDS

Solubility products for aminocarboxylate ligands: determination, validation and speciation uses, 480 (2003) 119

EDXRF

Extraction of brominated flame retardants from polymeric waste material using different solvents and supercritical carbon dioxide, 491 (2003) 111

Eel liver

Large volume sample stacking capillary electrophoresis for metallothioneins analysis in eel liver, 486 (2003) 183

Egg

Use of the diphasic dialysis as a new extraction procedure in the determination of enrofloxacin and ciprofloxacin in egg, 480 (2003) 123

Rapid high-performance liquid chromatographic determining technique of sulfamonomethoxine, sulfadimethoxine, and sulfaquinolaxine in eggs without use of organic solvents, 481 (2003) 255

Simultaneous detection of five coccidiostats in eggs by liquid chromatography-tandem mass spectrometry, 483 (2003) 27

Surface plasmon resonance biosensor screening of poultry liver and eggs for nicarbazin residues, 483 (2003) 165

Egg yolk

Sub-picogram determination of Vitamin B₁₂ in pharmaceuticals and human serum using flow injection with chemiluminescence detection, 488 (2003) 71

Electroanalysis

A mechanistic evaluation of the amperometric response of reduced thiols in quinone mediated systems, 491 (2003) 203

Electrocatalysis

Sol-gel derived metal dispersed ceramic-graphite composite electrode for amperometric determination of dopamine, 478 (2003) 321

Heme protein-gluten films: voltammetric studies and their electrocatalytic properties, 481 (2003) 91

Electrochemical oxidation of L-cysteine mediated by a fullerene-C₆₀-modified carbon electrode, 491 (2003) 181

Electrocatalytic oxidation

Electrochemical study of methylene blue incorporated into morde-nite type zeolite and its application for amperometric determination of ascorbic acid in real samples, 491 (2003) 193

Voltammetric and amperometric determination of sulfite using an aluminum electrode modified by nickel pentacyanonitrosylferate film. Application to the analysis of some real samples, 497 (2003) 133

Electrocatalytic reduction

Assembly of multilayer films containing iron(III)-substituted Dawson-type heteropolyanions and its electrocatalytic properties: cyclic voltammetry, electrochemical impedance spectroscopy and UV-Vis spectrometry, 486 (2003) 85

Electrochemical coding

Nanoparticle-based electrochemical DNA detection, 500 (2003) 247

Electrochemical detection

Isocratic ion chromatographic determination of underivatized amino acids by electrochemical detection, 478 (2003) 179

Assay of amino acids in individual human lymphocytes by capillary zone electrophoresis with electrochemical detection, 478 (2003) 199

Optimisation of a flow injection system with electrochemical detection using the desirability function. Application to the determination of hydroquinone in cosmetics, 479 (2003) 173

Determination of triacetone triperoxide in ambient air, 482 (2003) 183

Determination of tumor marker CA125 by capillary electrophoretic enzyme immunoassay with electrochemical detection, 497 (2003) 75

Characterisation of a simple electrochemical detector for high-performance liquid chromatography and flow-injection analysis based on carbon microcylinder electrodes, 497 (2003) 175

Electrochemical determination

Electrochemical determination of triclosan at a mercury electrode, 494 (2003) 225

Electrochemical hydride generation

Flow injection electrochemical hydride generation inductively coupled plasma time-of-flight mass spectrometry for the simultaneous determination of hydride forming elements and its application to the analysis of fresh water samples, 479 (2003) 203

Electrochemical impedance spectroscopy

Assembly of multilayer films containing iron(III)-substituted Dawson-type heteropolyanions and its electrocatalytic properties: cyclic voltammetry, electrochemical impedance spectroscopy and UV-Vis spectrometry, 486 (2003) 85

Probing direct binding affinity in electrochemical antibody-based sensors, 496 (2003) 103

Electrochemical lead isolation

Electrochemical lead separation from copper, copper alloy, silver and silver alloy for isotope ratio determination in archaeometric investigations, 497 (2003) 227

Electrochemical method

Determination of clenbuterol in pig liver by high-performance liquid chromatography with a coulometric electrode array system, 489 (2003) 95

Electrochemical oxidation

Electrochemical oxidation of tiopronin at diamond film electrodes and its determination by amperometric flow injection analysis, 499 (2003) 183

Electrochemical quartz crystal microbalance

Electrosynthesis and permselective characterisation of phenol-based polymers for biosensor applications, 495 (2003) 33

Electrochemical quartz crystal microbalance study of the electro-deposition mechanism of molybdenum oxide thin films from peroxy-polymolybdate solution, 496 (2003) 39

Electrochemical reduction

Trace determination of nitrated polycyclic aromatic hydrocarbons using liquid chromatography with on-line electrochemical reduction and fluorescence detection, 482 (2003) 219

Electrochemiluminescence

Electrochemiluminescence sensor using tris(2,2'-bipyridyl)ruthenium(II) immobilized in Eastman-AQ55D-silica composite thin-films, 480 (2003) 285

Flow injection analysis of glucose based on its inhibition of electrochemiluminescence in a $\text{Ru}(\text{bpy})_3^{2+}$ -tripropylamine system, 498 (2003) 61

Current status of modern analytical luminescence methods, 500 (2003) 21

Electrochemistry

Electrochemical ELISA for the screening of DDT related compounds: analysis in waste waters, 487 (2003) 83

Nanoparticle-based electrochemical DNA detection, 500 (2003) 247

Electrodeposition

Electrochemical quartz crystal microbalance study of the electro-deposition mechanism of molybdenum oxide thin films from peroxy-polymolybdate solution, 496 (2003) 39

Electroless plating of polymers

Effect of citric acid and hydrochloric acid on the polarographic behaviour of tin. Application to the determination of tin(II) in presence of tin(IV) in the activating solutions of the electroless plating of polymers, 484 (2003) 243

Electrolytic dissolution

On-line electrolytic dissolution for lead determination in high-purity copper by isotope dilution inductively coupled plasma mass spectrometry, 485 (2003) 145

Electron capture detector

Estimation of the minimum detectable value for the determination of PCBs in fatty food samples by GC-ECD: a curvilinear calibration case, 483 (2003) 413

Electron ionization

Nano-high-performance liquid chromatography-electron ionization mass spectrometry approach for environmental analysis, 493 (2003) 125

Electron spin resonance

Chemiluminescence of dithiocarbamate fungicides based on the luminol reaction, 494 (2003) 49

Electron spin resonance (ESR) spectroscopy

Electron spin resonance and spin trap investigation of free radicals in cigarette smoke: development of a quantification procedure, 481 (2003) 1

Electron transfer

Langmuir monolayers of gold nanoparticles: from ohmic to rectifying charge transfer, 496 (2003) 29

Electronic concentration

Electronic concentration of negatively-charged molecules on a microfabricated biochip, 484 (2003) 1

Electronic tongue

Evaluation of Italian wine by the electronic tongue: recognition, quantitative analysis and correlation with human sensory perception, 484 (2003) 33

Electrophoresis

Detection of metalloproteins in human liver cytosol by synchrotron radiation X-ray fluorescence after sodium dodecyl sulphate polyacrylamide gel electrophoresis, 485 (2003) 131

Electrophoretic separation

Optically gated vacancy electrophoresis in microfluidic devices, 496 (2003) 195

Electropolymerization

Electrocatalytic activity of a new nanostructured polymeric tetra-ruthenated porphyrin film for nitrite detection, 480 (2003) 97

Electrospray

Fourier-transform mass spectrometry for detection of thioester-bound intermediates in unfractionated proteolytic mixtures of 80 and 191 kDa portions of Bacitracin A synthetase, 496 (2003) 217

Electrospray ionisation mass spectrometry

Electrospray ionisation mass spectrometric behaviour of selected drugs and their metabolites, 492 (2003) 1

Electrospray mass spectrometry

Review role of liquid chromatography-mass spectrometry in the analysis of oxidation products and antioxidants in biological systems, 492 (2003) 17

Electrothermal atomic absorption spectrometry

Speciation of chromium in wastewater and sludge by extraction with liquid anion exchanger Amberlite LA-2 and electrothermal atomic absorption spectrometry, 478 (2003) 119

Dynamic ultrasound-assisted extraction of cadmium and lead from plants prior to electrothermal atomic absorption spectrometry, 480 (2003) 231

Evaluation of Rh, Ir, Ru, W-Rh, W-Ir and W-Ru as permanent modifiers for the determination of lead in ashes, coals, sediments, sludges, soils, and freshwaters by electrothermal atomic absorption spectrometry, 484 (2003) 233

Determination of cadmium in human urine by electrothermal atomic absorption spectrometry, 491 (2003) 231

Automated on-line separation-preconcentration system for platinum determination by electrothermal atomic absorption spectrometry, 494 (2003) 97

On-line preconcentration system coupled to electrothermal atomic absorption spectrometry for the simultaneous determination of bismuth, cadmium, and lead in urine, 495 (2003) 165

Determination of Pt, Pd and Rh in biological samples by electrothermal atomic absorption spectrometry as compared with adsorptive cathodic stripping voltammetry and total-reflection X-ray fluorescence analysis, 498 (2003) 93

Exploiting sequential injection analysis with bead injection and lab-on-valve for determination of lead using electrothermal atomic absorption spectrometry, 499 (2003) 167

Electrothermal vaporization

Solid phase extraction for analysis of biogenic carbonates by electrothermal vaporization inductively coupled plasma mass spectrometry (ETV-ICP-MS): an investigation of rare earth element signatures in otolith microchemistry, 476 (2003) 1

Electrothermal vaporization inductively coupled plasma-mass spectrometry for the determination of Cr, Cu, Cd, Hg and Pb in rice flour, 495 (2003) 143

ELISA

Determination of the insecticide fenoxycarb in apple leaf samples by an enzyme-linked immunosorbent assay, 478 (2003) 271

Quantitative analysis of cytokinins in plants by liquid chromatography-single-quadrupole mass spectrometry, 480 (2003) 207

Screening procedures for clenbuterol residue determination in bovine urine and liver matrices using enzyme-linked immunosorbent assay and liquid chromatography, 483 (2003) 61

Microplate assay for determination of cathepsin D activity based on quantification of a specific and stable peptide released from hemoglobin: VV-hemorphin-7, 486 (2003) 21

Comparison of immunoassay and gas chromatography-mass spectrometry for measurement of polycyclic aromatic hydrocarbons in contaminated soil, 486 (2003) 31

Optimization and validation of an enzyme immunoassay for the insect growth regulator fenoxycarb, 487 (2003) 15

Development of a non-labeled immunosensor for the herbicide trifluralin via optical waveguide lightmode spectroscopic detection, 487 (2003) 31

Evaluation of the structure/cross-reactivity relationship of polycyclic aromatic compounds using an enzyme-linked immunosorbent assay kit, 487 (2003) 43

Electrochemical ELISA for the screening of DDT related compounds: analysis in waste waters, 487 (2003) 83

Extraction procedure for sulfachloropyridazine in porcine tissues and detection in a sulfonamide-specific enzyme-linked immunosorbent assay (ELISA), 494 (2003) 21

Immunochemical rapid test for multiresidue analysis of antimicrobial drugs in milk using monoclonal antibodies and hapten-glucose oxidase conjugates, 495 (2003) 11

Correlation study of enzyme-linked immunosorbent assay and high-performance liquid chromatography/tandem mass spectrometry for the determination of *N*-methylcarbamate insecticides in baby food, 495 (2003) 123

Ellipsometry

Polarization characterization in surface second harmonic generation by nonlinear optical null ellipsometry, 496 (2003) 133

ELSD

Normal-phase liquid chromatographic separation of stratum corneum ceramides with detection by evaporative light scattering and atmospheric pressure chemical ionization mass spectrometry, 492 (2003) 233

Elution strength

Comparison of elution strength, column efficiency, and peak symmetry in subcritical water chromatography and traditional reversed-phase liquid chromatography, 494 (2003) 157

Embedded polar group phase

Reversed-phase high-performance liquid chromatographic/mass spectrometric method for separation of 4-methylimidazole and 2-acetyl-4-(1,2,3,4-tetrahydroxybutyl)imidazole at pg levels, 477 (2003) 49

Emission spectroscopy

Investigation of trialkoxysilane hydrolysis kinetics using liquid chromatography with inductively coupled plasma atomic emission spectrometric detection and non-linear regression modeling, 489 (2003) 103

Enantiomeric separation

Chiral separation of novel chiral tetrahedron-type clusters on a cellulose tris(3,5-dimethylphenylcarbamate) chiral stationary phase, 495 (2003) 77

Enantiomeric separation of *N*'-nitrososornicotine by capillary electrophoresis, 496 (2003) 177

Enantiomers

Determination of a small, highly polar aminopropylphosphonic acid as racemate in plasma and urine and as separated enantiomers in plasma by liquid chromatography and tandem mass spectrometry, 492 (2003) 261

Enantioseparation

Capillary gas chromatographic properties of three new cyclodextrin derivatives with acyl groups in the 6-position of β -cyclodextrin, 498 (2003) 39

Endocrine ovarian function

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 1. Endocrine ovarian function, 483 (2003) 225

Endogenous

Analysis for endogenous and recombinant porcine somatotropine in serum, 483 (2003) 201

Endothelial cells

Solid-state pH ultramicrosensor based on a tungstic oxide film fabricated on a tungsten nanoelectrode and its application to the study of endothelial cells, 480 (2003) 109

End-point determination

Study of lactol activation by trifluoroacetic anhydride via in situ Fourier transform infrared spectroscopy, 497 (2003) 155

Energy dispersive

Investigation of roman age pigments found on pottery fragments, 478 (2003) 147

Energy dispersive X-ray fluorescence

Pigment and terracotta analyses of Hellenistic figurines in Crete, 497 (2003) 209

Energy dispersive X-ray fluorescence spectrometry

Study of metal-loaded activated charcoals for the separation and determination of selenium species by energy dispersive X-ray fluorescence analysis, 478 (2003) 229

Energy transfer

Energy transfer—room temperature phosphorescence for the opto-sensing of transition metal ions, 486 (2003) 1

Room temperature phosphorimetric determination of cyanide based on triplet state energy transfer, 491 (2003) 27

Fluorescence nonradiative energy transfer analysis of crosslinker heterogeneity in core-shell hydrogel nanoparticles, 496 (2003) 53

Enhanced chemiluminescence

Flow injection analysis of uric acid with a uricase- and horseradish peroxidase-coupled Sepharose column based luminol chemiluminescence system, 499 (2003) 41

Enhanced coagulation

Development of an on-line electrochemical analyser for trace level aluminium, 499 (2003) 173

Enhanced green fluorescent protein

Drug detection based on the conformational changes of calmodulin and the fluorescence of its enhanced green fluorescent protein fusion partner, 500 (2003) 237

Enrichment

Cellulose functionalized with 8-hydroxyquinoline: new method of synthesis and applications as a solid phase extractant in the determination of metal ions by flame atomic absorption spectrometry, 485 (2003) 221

Enrofloxacin

Use of the diphasic dialysis as a new extraction procedure in the determination of enrofloxacin and ciprofloxacin in egg, 480 (2003) 123

Environmental applications

Nano-high-performance liquid chromatography-electron ionization mass spectrometry approach for environmental analysis, 493 (2003) 125

Environmental carcinogen

Immunoassays using capillary electrophoresis laser induced fluorescence detection for DNA adducts, 500 (2003) 13

Environmental flow injection analysis

Gel-surface enhanced fluorescence sensing system coupled to a continuous-flow assembly for simultaneous monitoring of benomyl and carbendazim, 493 (2003) 35

Environmental samples

Evaluation of Rh, Ir, Ru, W-Rh, W-Ir and W-Ru as permanent modifiers for the determination of lead in ashes, coals, sediments, sludges, soils, and freshwaters by electrothermal atomic absorption spectrometry, 484 (2003) 233

Bacterial *Lux-Fluoro* test for biological assessment of pollutants in water samples from urban and rural origin, 487 (2003) 51

On the determination of platinum group elements in environmental materials by inductively coupled plasma mass spectrometry and microwave digestion, 489 (2003) 245

Environmental water analysis

Production of antibodies and development of enzyme-linked immunosorbent assays for the herbicide butachlor, 491 (2003) 1

Enzymatic reaction

Application of an integrated microchip system with capillary array electrophoresis to optimization of enzymatic reactions, 487 (2003) 75

Enzyme immunoassay

Chemical analysis for small amounts of horseradish peroxidase using "porphyrinogen" as a chromogenic reagent, 478 (2003) 37

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 1. Endocrine ovarian function, 483 (2003) 225

Flow injection electrochemical enzyme immunoassay based on the use of an immunoelectrode strip integrate immunosorbent layer and a screen-printed carbon electrode, 488 (2003) 61

Production of antibodies and development of enzyme-linked immunosorbent assays for the herbicide butachlor, 491 (2003) 1

Enzyme inhibition

Heavy metal-induced inhibition of *Aspergillus niger* nitrate reductase: applications for rapid contaminant detection in aqueous samples, 480 (2003) 131

Enzyme kinetics

Evaluation of synthetic liquid chromatography—diode array detection—mass spectrometry data for the determination of enzyme kinetics, 490 (2003) 17

Enzyme-linked immunosorbent assay

Screening and confirmation of chloramphenicol in shrimp tissue using ELISA in combination with GC-MS² and LC-MS², 483 (2003) 153

Evaluation of sample preparation for control of chloramphenicol residues in porcine tissues by enzyme-linked immunosorbent assay and liquid chromatography, 483 (2003) 307

Comparison of immunoassay and gas chromatography—mass spectrometry for measurement of polycyclic aromatic hydrocarbons in contaminated soil, 486 (2003) 31

Synthesis of haptens of organophosphorus pesticides and development of enzyme-linked immunosorbent assays for parathion-methyl, 493 (2003) 47

Investigation of the effect of hapten heterology on immunoassay sensitivity and development of an enzyme-linked immunosorbent assay for the organophosphorus insecticide fenthion, 494 (2003) 29

Epinephrine

Catecholamines derivatized with 4-fluoro-7-nitro-2,1,3-benzoxadiazole: characterization of chemical structure and fluorescence properties, 478 (2003) 259

Flow injection chemiluminescence determination of epinephrine using epinephrine-imprinted polymer as recognition material, 489 (2003) 183

4-Epixytetracycline

Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

Equilibria

Analyses of three-way data from equilibrium and kinetic investigations, 490 (2003) 99

Equilibrium

Comparative study of binding strengths and thermodynamic aspects of Cu(II) and Ni(II) with humic acid by Schubert's ion-exchange method, 497 (2003) 235

Equilibrium constant

Using solution equilibria to determine average molecular weight of the Suwannee River fulvic acids, 496 (2003) 325

Equivalence point

Development of a method for estimating an accurate equivalence point in nickel titration of cyanide ions, 476 (2003) 159

Error-budget

Comparison of different approaches to estimate the uncertainty of a liquid chromatographic assay, 480 (2003) 39

Error-propagation

Comparison of different approaches to estimate the uncertainty of a liquid chromatographic assay, 480 (2003) 39

Erythromycin

Determination of macrolide antibiotics in meat and fish by liquid chromatography—electrospray mass spectrometry, 492 (2003) 187

Erythrosin B

Characterization of a fluorescent sol-gel encapsulated erythrosin B dissolved oxygen sensor, 487 (2003) 101

Estradiol

Molecular recognition properties of peptide mixtures obtained by polymerisation of amino acids in the presence of estradiol, 481 (2003) 41

Modification of 17 β -estradiol metabolite profile in steer edible tissues after estradiol implant administration, 483 (2003) 289

17 β -Estradiol

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 1. Endocrine ovarian function, 483 (2003) 225

Oxidative stress as a bio-marker of estrogen exposure in healthy veal calves, 483 (2003) 281

Estuarine water

Sensitive determination of iodine species, including organo-iodine, for freshwater and seawater samples using high performance liquid chromatography and spectrophotometric detection, 482 (2003) 59

ETAAS

Exploratory analysis of L'vov platform surfaces for electrothermal atomic absorption spectrometry by using three-way chemometric tools, 495 (2003) 177

Sequential injection—bead injection—lab-on-valve schemes for on-line solid phase extraction and preconcentration of ultra-trace levels of heavy metals with determination by electrothermal atomic absorption spectrometry and inductively coupled plasma mass spectrometry, 499 (2003) 139

Ethanol

Determination of ethanol in fuel ethanol and beverages by Fourier transform (FT)-near infrared and FT-Raman spectrometries, 493 (2003) 219

Determination of ethanol in distilled liquors using sequential injection analysis with spectrophotometric detection, 499 (2003) 123

Ethanolamine

Simple test system for single molecule recognition force microscopy, 479 (2003) 59

Ethoxylated alkylphenol and ethoxylated alcohol

Analysis of polyethoxylated surfactants in microemulsion-oil-water systems. III. Fractionation and partitioning of polyethoxylated alcohol surfactants, 477 (2003) 293

Ethyl 2-(4-phenoxyphenoxy)ethylcarbamate

Determination of the insecticide fenoxycarb in apple leaf samples by an enzyme-linked immunosorbent assay, 478 (2003) 271

Ethyl glucuronide

Meeting challenges in forensic toxicology in Japan by liquid chromatography/mass spectrometry, 492 (2003) 83

9-Ethyladenine

Evaluation of the recognition ability of molecularly imprinted materials by surface plasmon resonance (SPR) spectroscopy, 489 (2003) 191

Ethylation

Determination of butyltin species in natural waters using aqueous phase ethylation and off-line room temperature trapping, 477 (2003) 103

Ethylene diamine

Fluorimetric determination of dopamine in pharmaceutical products and urine using ethylene diamine as the fluorogenic reagent, 497 (2003) 93

Ethylenediaminodibutanedioic acid

Solubility products for aminocarboxylate ligands: determination, validation and speciation uses, 480 (2003) 119

Ethyleneurea

Reactivation of inactivated horseradish peroxidase with ethyleneurea and allantoin for determination of hydrogen peroxide by micro-flow injection horseradish peroxidase-catalyzed chemiluminescence, 495 (2003) 233

2-Ethylphenol

Electrosynthesis and permselective characterisation of phenol-based polymers for biosensor applications, 495 (2003) 33

Etizolam

Simple method for the determination of benzodiazepines in human body fluids by high-performance liquid chromatography-mass spectrometry, 492 (2003) 223

Europium

Europium speciation by time-resolved laser-induced fluorescence, 478 (2003) 11

Europium(III)

Simultaneous determination of ciprofloxacin and tetracycline in biological fluids based on dual-lanthanide sensitised luminescence using dry reagent chemical technology, 494 (2003) 55

Evaluation

Evaluation of Italian wine by the electronic tongue: recognition, quantitative analysis and correlation with human sensory perception, 484 (2003) 33

Evaporation/concentration

Ultratrace determination of phosphorus in ultrapurified water by a slope comparison method, 481 (2003) 311

Exadecylpyridinium bromide

Coated wire ion-selective electrode for palladium(II) and its application to catalyst analysis, 480 (2003) 299

Excimer fluorescence

Liquid chromatographic determination of bisphenols based on intramolecular excimer-forming fluorescence derivatization, 488 (2003) 211

Excitation-emission fluorescence

Determination of doxorubicin in human plasma by excitation-emission matrix fluorescence and multi-way analysis, 493 (2003) 69

Excitation-emission matrix fluorescence

Determination of carbendazim, fuberidazole and thiabendazole by three-dimensional excitation-emission matrix fluorescence and parallel factor analysis, 491 (2003) 47

Expanded natural graphite

Potentialities of expanded natural graphite as a new transducer for NAD⁺-dependent dehydrogenase amperometric biosensors, 484 (2003) 25

Experimental design

Experimental design applied to the determination of several contaminants in Duero River by solid-phase microextraction, 477 (2003) 257

Optimisation of a flow injection system with electrochemical detection using the desirability function. Application to the determination of hydroquinone in cosmetics, 479 (2003) 173

Analysis of nine rhubarb anthraquinones and bianthrone by micellar electrokinetic chromatography using experimental design, 482 (2003) 47

Routine analysis of mercury species using commercially available instrumentation: chemometric optimisation of the instrumental variables, 486 (2003) 255

Investigation of the chiral separation of cisapride on Chiralcel OJ and OJ-R columns, 498 (2003) 9

Increasing the scope and power of flow-injection analysis through chemometric approaches, 500 (2003) 299

Exploratory

Multivariate calibration. What is in chemometrics for the analytical chemist?, 500 (2003) 185

Explosives

Determination of triacetoneperoxide in ambient air, 482 (2003) 183

On-line electrochemical monitoring of (TNT) 2,4,6-trinitrotoluene in natural waters, 485 (2003) 139

Real-time two-dimensional wavelet compression and its application to real-time modeling of ion mobility data, 490 (2003) 59

Exponentially modified Gaussian equation

Additivity of statistical moments in the exponentially modified Gaussian model of chromatography, 478 (2003) 99

Extended least-squares

Estimation of trace vapor concentration-pathlength in plumes for remote sensing applications from hyperspectral images, 490 (2003) 139

Extractable trace metals

Comparison of original and modified BCR sequential extraction procedures for the fractionation of copper, iron, lead, manganese and zinc in soils and sediments, 478 (2003) 111

Extraction

Selective extraction of thallium(III) in the presence of gallium(III), indium(III), bismuth(III) and antimony(III) by salting-out of an aqueous mixture of 2-propanol, 477 (2003) 243

Element determination in medieval soil samples by total reflection X-ray fluorescence analysis, 480 (2003) 327

Microwave enhanced extraction of wool wax from solid wool scour wastes, 494 (2003) 255

Arsenic speciation in environmental and biological samples. Extraction and stability studies, 495 (2003) 85

Extraction chromatography

Separation of rare earth elements from scandium by extraction chromatography. Application to radiochemical neutron activation analysis for trace rare earth elements in geological samples, 498 (2003) 25

Extraction methods

Pressurized hot water extraction of berberine, baicalin and glycyrrhizin in medicinal plants, 482 (2003) 81

Extraction procedure

Solid sample graphite furnace atomic absorption spectroscopy for supporting arsenic determination in sediments following a sequential extraction procedure, 476 (2003) 15

Extraction procedure for sulfachloropyridazine in porcine tissues and detection in a sulfonamide-specific enzyme-linked immunosorbent assay (ELISA), 494 (2003) 21

F**F(ab') antibody fragments**

Direct oriented immobilization of F(ab') antibody fragments on gold, 496 (2003) 73

FAAS

On-line preconcentration system using a minicolumn of polyurethane foam loaded with Me-BTABr for zinc determination by Flame Atomic Absorption Spectrometry, 481 (2003) 283

Factor analysis

Determination of the number of light-absorbing species in the protonation equilibria of selected drugs, 489 (2003) 137

Assessment of techniques for DOSY NMR data processing, 490 (2003) 231

Factorial design

Chelating resin sorption followed by supercritical fluid extraction and liquid chromatographic determination of aluminum in liquid samples, 494 (2003) 125

Fast non-negative least squares (FNNLS)

Application of modified alternating least squares regression to spectroscopic image analysis, 476 (2003) 93

Fatty acid methyl esters

Spectral transformations for deconvolution methods applied on gas chromatography-mass spectrometry data, 488 (2003) 231

Chemometric analysis of comprehensive two-dimensional gas chromatography data using cryogenic modulation, 500 (2003) 211

Fe

Organic complexation of Al and Fe in acidic soil solutions. Comparison of diffusive gradients in thin films analyses with Models V and VI predictions, 498 (2003) 105

Feed

Liquid chromatography with fluorescence detection of amoxicillin and ampicillin in feeds using pre-column derivatization, 483 (2003) 69

Simultaneous determination of 13 quinolones from feeds using accelerated solvent extraction and liquid chromatography, 483 (2003) 81

Liquid chromatographic-tandem mass spectrometric detection of banned antibacterial growth promoters in animal feed, 483 (2003) 99

Feedback-based control

Determination of dissociation constants of weak acids by feedback-based flow radiometry, 499 (2003) 199

Fenoxycarb

Determination of the insecticide fenoxycarb in apple leaf samples by an enzyme-linked immunosorbent assay, 478 (2003) 271

Optimization and validation of an enzyme immunoassay for the insect growth regulator fenoxycarb, 487 (2003) 15

Fenthion

Investigation of the effect of hapten heterology on immunoassay sensitivity and development of an enzyme-linked immunosorbent assay for the organophosphorus insecticide fenthion, 494 (2003) 29

Fenton-type reaction

Kinetic deoxyribose degradation assay and its application in assessing the antioxidant activities of phenolic compounds in a Fenton-type reaction system, 478 (2003) 129

Fenuron

Highly selective fenuron-imprinted polymer with a homogeneous binding site distribution prepared by precipitation polymerisation and its application to the clean-up of fenuron in plant samples, 482 (2003) 165

Fertilizer

Novel monohydrogenphosphate sensor based on vanadyl salophen, 481 (2003) 85

FIA

'In situ' preparation of nitrous acid solutions by photoreduction in a flow assembly for analysis of pharmaceuticals, 476 (2003) 131
Continuous-flow protease assay based on fluorescence resonance energy transfer, 478 (2003) 1

Morpholinoethanesulfonic acid-based buffer system for improved detection limit and stability of the fluoride ion selective electrode, 478 (2003) 77

Optimisation of a flow injection system with electrochemical detection using the desirability function. Application to the determination of hydroquinone in cosmetics, 479 (2003) 173

Simultaneous determination of Folpet and Metalaxyl in pesticide formulations by flow injection Fourier transform infrared spectrometry, 480 (2003) 11

Micelle-mediated spectrofluorimetric determination of ampicillin based on metal ion-catalysed hydrolysis, 484 (2003) 223

Simultaneous determination of nitrite and nitrate in water by chemiluminescent flow-injection analysis, 495 (2003) 225

Characterisation of a simple electrochemical detector for high-performance liquid chromatography and flow-injection analysis based on carbon microcylinder electrodes, 497 (2003) 175

Sensitive flow-injection system for nafcillin determination based on non-protected room temperature phosphorescence, 498 (2003) 69

Enhanced flow-injection-chemiluminometric determination of sulfonamides by on-line photochemical reaction, 499 (2003) 57

FIA manifold

On-line sorption preconcentration of metals based on mixed micelle cloud point extraction prior to their determination with micellar chemiluminescence. Application to the determination of chromium at ng l⁻¹ levels, 477 (2003) 223

Fiber-optic probes

Characterization of subcritical water oxidation with in situ monitoring and self-modeling curve resolution, 485 (2003) 73

Fibre optic links

Remote determination of oxygen and water at millimetre wave frequencies using a fibre optic communications network, 476 (2003) 25

Field spectroscopy

The potential of field spectroscopy for the assessment of sediment properties in river floodplains, 484 (2003) 189

Figures of merit

Comparison between different data pre-treatment methods in the analysis of forage samples using near-infrared diffuse reflectance spectroscopy and partial least-squares multivariate calibration method, 484 (2003) 121

Determination of carbendazim, fuberidazole and thiabendazole by three-dimensional excitation-emission matrix fluorescence and parallel factor analysis, 491 (2003) 47

FI-HG-AFS

Determination of As(III) and As(V) in soils using sequential extraction combined with flow injection hydride generation atomic fluorescence detection, 477 (2003) 139

Film measurement

Quantitation of κ -, ι - and λ -carrageenans by mid-infrared spectroscopy and PLS regression, 480 (2003) 23

FIR

Real-time two-dimensional wavelet compression and its application to real-time modeling of ion mobility data, 490 (2003) 59

Fish

Determination of macrolide antibiotics in meat and fish by liquid chromatography-electrospray mass spectrometry, 492 (2003) 187

Fish otoliths

Solid phase extraction for analysis of biogenic carbonates by electrothermal vaporization inductively coupled plasma mass spectrometry (ETV-ICP-MS): an investigation of rare earth element signatures in otolith microchemistry, 476 (2003) 1

Fish tissue

Sub-picogram determination of Vitamin B₁₂ in pharmaceuticals and human serum using flow injection with chemiluminescence detection, 488 (2003) 71

Fission products

Liquid-liquid microbatch extraction system for rapid mutual separation of fission products, 484 (2003) 139

Flame atomic absorption spectrometer

Cellulose functionalized with 8-hydroxyquinoline: new method of synthesis and applications as a solid phase extractant in the determination of metal ions by flame atomic absorption spectrometry, 485 (2003) 221

Flame atomic absorption spectrometry

On-line determination of manganese in solid seafood samples by flame atomic absorption spectrometry, 477 (2003) 149

Preconcentration of copper on ion-selective imprinted polymer microbeads, 480 (2003) 251

Atomic absorption spectrophotometric determination of trace copper in waters, aluminium foil and tea samples after preconcentration with 1-nitroso-2-naphthol-3,6-disulfonic acid on Ambersorb 572, 480 (2003) 259

Flow injection on-line dilution for flame atomic absorption spectrometry by micro-sample introduction and dispersion using syringe pumps, 481 (2003) 273

Selective cloud point extraction and preconcentration of trace amounts of silver as a dithizone complex prior to flame atomic absorption spectrometric determination, 484 (2003) 155

Enrichment and determinations of nickel(II), cadmium(II), copper(II), cobalt(II) and lead(II) ions in natural waters, table salts, tea and urine samples as pyrrolydine dithiocarbamate chelates by membrane filtration-flame atomic absorption spectrometry combination, 493 (2003) 205

Amberlite XAD-2 functionalized with Nitroso R salt: synthesis and application in an online system for preconcentration of cobalt, 494 (2003) 87

Immobilized poly-L-histidine for chelation of metal cations and metal oxyanions, 495 (2003) 151

Flame retarded polymers

Extraction of brominated flame retardants from polymeric waste material using different solvents and supercritical carbon dioxide, 491 (2003) 111

Flavonoids

Advantages and disadvantages of nuclear magnetic resonance spectroscopy as a hyphenated technique, 497 (2003) 1

Flavourings

Determination of flavour components in natural vanilla extracts and synthetic flavourings by mixed micellar electrokinetic capillary chromatography, 485 (2003) 179

Floodplains

The potential of field spectroscopy for the assessment of sediment properties in river floodplains, 484 (2003) 189

Florfenicol

Identification of "unknown analytes" in injection sites: a semi-quantitative interpretation, 483 (2003) 387

Flow analysis

Liquid-liquid extraction procedure exploiting multicommutation in flow system for the determination of molybdenum in plants, 479 (2003) 185

Flow analysis and its role and importance in the analytical sciences, 499 (2003) 5

Determination of dissociation constants of weak acids by feedback-based flow ratiometry, 499 (2003) 199

Flow cell

Flow injection spectroelectroanalytical method for the determination of promethazine hydrochloride in pharmaceutical preparations, 494 (2003) 215

Flow cytometry

Automated sample preparation method for suspension arrays using renewable surface separations with multiplexed flow cytometry fluorescence detection, 478 (2003) 85

Flow detection

On-line electrochemical monitoring of (TNT) 2,4,6-trinitrotoluene in natural waters, 485 (2003) 139

Flow injection

Mass distribution in a dynamic sample zone inside a flow injection manifold: modelling integrated conductimetric profiles, 477 (2003) 59

On-line sorption preconcentration of metals based on mixed micelle cloud point extraction prior to their determination with micellar chemiluminescence. Application to the determination of chromium at ng l^{-1} levels, 477 (2003) 223

Flow injection potentiometric detection of trimethylamine in sea-food using tungsten oxide electrode, 478 (2003) 53

Flow injection electrochemical hydride generation inductively coupled plasma time-of-flight mass spectrometry for the simultaneous determination of hydride forming elements and its application to the analysis of fresh water samples, 479 (2003) 203

Valves and flow injection manifolds: an excellent marriage with unlimited versatility, 480 (2003) 181

Sensitive and selective determination of molybdenum by flow injection chemiluminescence method combined with controlled potential electrolysis technique, 481 (2003) 239

Flow injection on-line dilution for flame atomic absorption spectrometry by micro-sample introduction and dispersion using syringe pumps, 481 (2003) 273

Novel flow injection spectrophotometric determination of fosinopril using UV-assisted digestion and an orthophosphates calibration graph, 481 (2003) 321

Pervaporation-flow injection analysis of phenol after on-line derivatisation to phenyl acetate, 485 (2003) 37

On-line electrolytic dissolution for lead determination in high-purity copper by isotope dilution inductively coupled plasma mass spectrometry, 485 (2003) 145

Energy transfer—room temperature phosphorescence for the opto-sensing of transition metal ions, 486 (2003) 1

Characterization of graphite electrodes modified with laccase from *Trametes versicolor* and their use for bioelectrochemical monitoring of phenolic compounds in flow injection analysis, 487 (2003) 3

Flow injection electrochemical enzyme immunoassay based on the use of an immunoelectrode strip integrate immunosorbent layer and a screen-printed carbon electrode, 488 (2003) 61

Sub-picogram determination of Vitamin B₁₂ in pharmaceuticals and human serum using flow injection with chemiluminescence detection, 488 (2003) 71

Flow injection-chemiluminescence determination of propranolol in pharmaceutical preparations, 488 (2003) 81

Flow injection manifolds for liquid-liquid extraction without phase separation assisted by ultrasound, 489 (2003) 1

Utility of copper(II) oxide as a packed reactor in flow injection assembly for rapid analysis of some angiotensin converting enzyme inhibitors, 489 (2003) 115

Chemiluminescence behavior based on oxidation reaction of rhodamine B with cerium(IV) in sulfuric acid medium, 489 (2003) 173

Flow injection chemiluminescence determination of epinephrine using epinephrine-imprinted polymer as recognition material, 489 (2003) 183

Possibilities and limits of the simultaneous determination of As, Bi, Ge, Sb, Se, and Sn by flow injection-hydride generation-

- inductively coupled plasma-time-of-flight mass spectrometry (FI-HG-ICP-TOFMS), 493 (2003) 13
- Determination of phenols by flow injection and liquid chromatography with on-line quinine-sensitized photo-oxidation and quenched luminol chemiluminescence detection, 493 (2003) 167
- Mushroom tissue-based flow-injection fluorescence system for the determination of isoprenaline, 494 (2003) 63
- Automated on-line separation-preconcentration system for platinum determination by electrothermal atomic absorption spectrometry, 494 (2003) 97
- Lability of metal ion-fulvic acid complexes as probed by FIA and DGT: a comparative study, 499 (2003) 17
- Flow injection system for on-line monitoring of fumaric acid in biological processes, 499 (2003) 71
- Multi-reflection photometric flow cell for use in flow injection analysis of estuarine waters, 499 (2003) 81
- Use of pseudo-first order kinetics in flow injection for determination of trace inorganic iodine, 499 (2003) 115

Flow injection analysis (FIA)

- Flow injection chemiluminescence determination of carbaryl using photolytic decomposition and photogenerated tris (2,2'-bipyridyl)ruthenium(III), 476 (2003) 141
- Flow injection differential potentiometric determination of lysine by using a lysine biosensor, 477 (2003) 315
- Continuous-flow protease assay based on fluorescence resonance energy transfer, 478 (2003) 1
- Selective determination of amino acids using flow injection analysis coupled with chemiluminescence detection, 480 (2003) 67
- Bead injection spectroscopic flow-through renewable surface sensors with commercial flow cells as an alternative to reusable flow-through sensors, 482 (2003) 209
- Flow injection chemiluminescent immunoassay with *para*-phenylphenol and sodium tetraphenylborate as synergistic enhancers, 485 (2003) 57
- Reversed flow injection and sandwich sequential injection methods for the spectrophotometric determination of copper(II) with cuprizone, 486 (2003) 227
- Electrochemical ELISA for the screening of DDT related compounds: analysis in waste waters, 487 (2003) 83
- Simultaneous determination of methylene blue and new methylene blue by slab optical waveguide spectroscopy and artificial neural networks, 487 (2003) 109
- Chemiluminescence of dithiocarbamate fungicides based on the luminol reaction, 494 (2003) 49
- Flow injection spectroelectroanalytical method for the determination of promethazine hydrochloride in pharmaceutical preparations, 494 (2003) 215
- Immobilized poly-L-histidine for chelation of metal cations and metal oxyanions, 495 (2003) 151
- Zone fluidics in flow analysis: potentialities and applications, 499 (2003) 29
- Monitoring the total phenolic/antioxidant levels in wine using flow injection analysis with acidic potassium permanganate chemiluminescence detection, 499 (2003) 47
- Flow injection analysis of tetracycline in pharmaceutical formulation with pulsed amperometric detection, 499 (2003) 191

- Increasing the scope and power of flow-injection analysis through chemometric approaches, 500 (2003) 299

Flow injection potentiometry

- New flow injection potentiometric graphite coated ion-selective electrode for the determination of VO^{2+} ions, 481 (2003) 213

Flow injection system

- Electrochemical oxidation of tiopronin at diamond film electrodes and its determination by amperometric flow injection analysis, 499 (2003) 183

Flow ratiometry

- Determination of dissociation constants of weak acids by feedback-based flow ratiometry, 499 (2003) 199

Flow system

- Flow system to gas capture from a nebulized solution, 479 (2003) 167
- Milk lactate determination with a rotating bioreactor based on an electron transfer mediated by osmium complexes incorporating a continuous-flow/stopped-flow system, 498 (2003) 155

Flow-based analysis

- Zone fluidics in flow analysis: potentialities and applications, 499 (2003) 29

Flow-batch system

- Implementation of an automatic standard addition method in a flow-batch system: application to copper determination in an alcoholic beverage by atomic absorption spectrometry, 486 (2003) 143

Flowing systems

- Amperometric flow-injection determination of phenolic compounds at self-assembled monolayer-based tyrosinase biosensors, 494 (2003) 187

Flow-injection

- Evaluation of Pb-Spec[®] for flow-injection solid-phase extraction preconcentration for the determination of trace lead in water and wine by flame atomic absorption spectrometry, 485 (2003) 9

Flow-injection analysis

- Chemiluminescence determination of ultramicro DNA with a flow-injection method, 478 (2003) 31
- Lanthanide sensitized chemiluminescence determination of grepafloxacin in tablets and human urine, 482 (2003) 105
- Flow-injection determination of cinnarizine using surfactant-enhanced permanganate chemiluminescence, 499 (2003) 223

Flow-injection ESI-MS/MS

- Simple and rapid determination of *N*-methylcarbamate pesticides in citrus fruits by electrospray ionization tandem mass spectrometry, 487 (2003) 201

Flow-through renewable surface sensors

- Bead injection spectroscopic flow-through renewable surface sensors with commercial flow cells as an alternative to reusable flow-through sensors, 482 (2003) 209

Flumequine

Simultaneous determination of flumequine and oxolinic acid in chicken tissues by solid phase extraction and capillary electrophoresis, 477 (2003) 21

Flunixin

Determination of flunixin and ketoprofen in milk by liquid chromatography–tandem mass spectrometry, 488 (2003) 25

Fluorenes

Study of the substituent groups effect on the room-temperature phosphorescent emission of fluorene derivatives in solution, 489 (2003) 165

Fluorescence

Rapid in situ determination of total oil concentration in water using ultraviolet fluorescence and light scattering coupled with artificial neural networks, 478 (2003) 245

Catecholamines derivatized with 4-fluoro-7-nitro-2,1,3-benzoxadiazole: characterization of chemical structure and fluorescence properties, 478 (2003) 259

Lifetime-based optical sensor for high-level $p\text{CO}_2$ detection employing fluorescence resonance energy transfer, 480 (2003) 275

Sol–gel derived urease-based optical biosensor for the rapid determination of heavy metals, 481 (2003) 75

Multiresidue determination of fluoroquinolone antibiotics in eggs using liquid chromatography–fluorescence–mass spectrometry, 483 (2003) 39

Free and sol–gel immobilized alkaline phosphatase-based biosensor for the determination of pesticides and inorganic compounds, 484 (2003) 45

Characterization of a fluorescent sol–gel encapsulated erythrosin B dissolved oxygen sensor, 487 (2003) 101

Determination of napropamide in technical formulations, soil and vegetable samples by sensitised fluorescence: validation of the method, 491 (2003) 37

Mushroom tissue-based flow-injection fluorescence system for the determination of isoprenaline, 494 (2003) 63

Fluorescence and room temperature phosphorescence of 6-bromo-2-naphthol in β -cyclodextrin solution and its selective molecular recognition for cyclohexane, 494 (2003) 71

Fully time-resolved near-field scanning optical microscopy fluorescence imaging, 496 (2003) 259

Fully automated drug liberation apparatus for semisolid preparations based on sequential injection analysis, 499 (2003) 9

Coupled enzyme reaction microarrays based on pin-printing of sol–gel derived biomaterials, 500 (2003) 3

Light emitting diode-based detectors. Absorbance, fluorescence and spectroelectrochemical measurements in a planar flow-through cell, 500 (2003) 337

Fluorescence derivatization

BrMOZPhC, a novel coumarin type reagent for the fluorescent derivatisation of carboxylic acids, 489 (2003) 153

Analysis of aromatic amines by high-performance liquid chromatography with pre-column derivatization by 2-(9-carbazole)-ethyl-chloroformate, 494 (2003) 141

Fluorescence detection

Trace determination of nitrated polycyclic aromatic hydrocarbons using liquid chromatography with on-line electrochemical reduction and fluorescence detection, 482 (2003) 219

Liquid chromatography with fluorescence detection of amoxicillin and ampicillin in feeds using pre-column derivatization, 483 (2003) 69

Determination of ractopamine in animal tissues by liquid chromatography–fluorescence and liquid chromatography/tandem mass spectrometry, 483 (2003) 137

Dansylation of aromatic, aliphatic, and medicinal carboxylic acid compounds in 1 M Na_2CO_3 buffer, 488 (2003) 203

Fluorescence energy transfer

Optical membrane for *o*-nitroaniline based on fluorescence energy transfer between a small molecule and a conjugated polymer, 481 (2003) 109

Fluorescence enhancement

Simple fluorimetric method for probing AT-rich regions in DNA based on the photoisomerization of distilbazolium ligand, 487 (2003) 221

Fluorescence spectroscopy

Standardization of SPE signals in multicomponent analysis of three benzimidazole pesticides by spectrofluorimetry, 477 (2003) 211

Gel-surface enhanced fluorescence sensing system coupled to a continuous-flow assembly for simultaneous monitoring of benomyl and carbendazim, 493 (2003) 35

Time-resolved fluorescence spectroscopy for illuminating complex systems, 500 (2003) 71

Fluorescent probe

Development of a fluorescent probe for nitric oxide detection based on difluoroboradiazas-indacene fluorophore, 481 (2003) 101

Fluoride-selective electrode

Morpholinoethanesulfonic acid-based buffer system for improved detection limit and stability of the fluoride ion selective electrode, 478 (2003) 77

Fluorimetric determination

Determination of carbaryl and carbofuran in fruits and tap water by β -cyclodextrin enhanced fluorimetric method, 488 (2003) 193

Fluorimetry

Luminescent hexanuclear Cu(I) -cluster for the selective determination of copper, 486 (2003) 11

Simple and sensitive fluorimetric liquid chromatography for simultaneous analysis of chenodiol and ursodiol in pharmaceutical formulations, 493 (2003) 159

Fluorimetric determination of dopamine in pharmaceutical products and urine using ethylene diamine as the fluorogenic reagent, 497 (2003) 93

Fluorogenic substrate

Mn(II) –sodium dodecyl sulphate complex mimic enzyme-catalyzed fluorescence quenching of Pyronine B by hydrogen peroxide, 480 (2003) 143

Fluoroquinolone

Use of the diphasic dialysis as a new extraction procedure in the determination of enrofloxacin and ciprofloxacin in egg, 480 (2003) 123

Multiresidue determination of fluoroquinolone antibiotics in eggs using liquid chromatography–fluorescence–mass spectrometryⁿ, 483 (2003) 39

Use of ion-trap liquid chromatography–mass spectrometry to screen and confirm drug residues in aquacultured products, 483 (2003) 373

Focused microwave oven

Rapid determination of chemical oxygen demand using a focused microwave heating system featuring temperature control, 491 (2003) 99

Focused microwave-assisted extraction

Analysis of polycyclic aromatic hydrocarbons in airborne particles using open-vessel focused microwave-assisted extraction, 495 (2003) 99

Folic acid

Simultaneous analysis of folic acid and pantothenic acid in foods enriched with vitamins by stable isotope dilution assays, 495 (2003) 133

Folpet

Simultaneous determination of Folpet and Metalaxyl in pesticide formulations by flow injection Fourier transform infrared spectrometry, 480 (2003) 11

Food analysis

Quantitative determination of sulfonamide in meat by solid-phase extraction and capillary electrophoresis, 499 (2003) 215

Food-packaging materials

Determination of chromium, cadmium and lead in food-packaging materials by axial inductively coupled plasma time-of-flight mass spectrometry, 479 (2003) 191

Food-producing animals

Zilpaterol—a new focus of concern in residue analysis, 493 (2003) 63

Forage

Comparison between different data pre-treatment methods in the analysis of forage samples using near-infrared diffuse reflectance spectroscopy and partial least-squares multivariate calibration method, 484 (2003) 121

Force quantization

Analytical descriptions of dynamic force spectroscopy: behaviour of multiple connections, 479 (2003) 107

Force spectroscopy

Bifunctional atomic force microscopy probes for molecular screening applications, 479 (2003) 77

Forced zero point ALS

Application of modified alternating least squares regression to spectroscopic image analysis, 476 (2003) 93

Forensic toxicology

Improved screening capabilities in forensic toxicology by application of liquid chromatography–tandem mass spectrometry, 492 (2003) 171

Formaldoxime method

Preconcentration of manganese(II) from natural and sea water on a palmitoyl quinolin-8-ol functionalized XAD copolymer resin and spectrophotometric determination with the formaldoxime reagent, 485 (2003) 205

Formulated products

Validated liquid chromatography method for assay of tizanidine in drug substance and formulated products, 478 (2003) 171

Fosinopril

Novel flow injection spectrophotometric determination of fosinopril using UV-assisted digestion and an orthophosphates calibration graph, 481 (2003) 321

Fourier transform infrared

Simultaneous determination of Folpet and Metalaxyl in pesticide formulations by flow injection Fourier transform infrared spectrometry, 480 (2003) 11

Fourier transform infrared spectroscopy

Investigation of roman age pigments found on pottery fragments, 478 (2003) 147

Pigment and terracotta analyses of Hellenistic figurines in Crete, 497 (2003) 209

Fourier transform Raman spectrometry

Direct, reagent-free determination of free fatty acid content in olive oil and olives by Fourier transform Raman spectrometry, 487 (2003) 211

Fourier-transform mass spectrometry

Fourier-transform mass spectrometry for detection of thioester-bound intermediates in unfractionated proteolytic mixtures of 80 and 191 kDa portions of Bacitracin A synthetase, 496 (2003) 217

Fractionation

Evaluation of capillary electrophoresis combined with a BCR sequential extraction for determining distribution of Fe, Zn, Cu, Mn, and Cd in airborne particulate matter, 498 (2003) 175

Fragmentation patterns

Electrospray ionisation mass spectrometric behaviour of selected drugs and their metabolites, 492 (2003) 1

Free chlorine

Flow-injection investigation of the chemiluminescent reaction of bis(2,4,6-(trichlorophenyl)oxalate) with free chlorine, 484 (2003) 101

Free drug

Measurement of free drug and clinical end-point by high-performance liquid chromatography–mass spectrometry. Applications and implications for pharmacokinetic and pharmacodynamic studies, 492 (2003) 157

Free fatty acids

Direct, reagent-free determination of free fatty acid content in olive oil and olives by Fourier transform Raman spectrometry, 487 (2003) 211

Freeze-dried bioluminescent bacteria

Toxicity biomonitoring of degradation byproducts using freeze-dried recombinant bioluminescent bacteria, 481 (2003) 229

Fresh water samples

Flow injection electrochemical hydride generation inductively coupled plasma time-of-flight mass spectrometry for the simultaneous determination of hydride forming elements and its application to the analysis of fresh water samples, 479 (2003) 203

Freshwater

Performance of the diffusive gradients in thin films technique for measurement of trace metals in low ionic strength freshwaters, 478 (2003) 237

Sensitive determination of iodine species, including organo-iodine, for freshwater and seawater samples using high performance liquid chromatography and spectrophotometric detection, 482 (2003) 59

FRET

Continuous-flow protease assay based on fluorescence resonance energy transfer, 478 (2003) 1

Freundlich, Langmuir, *N* and *PO* equations (models of sorption isotherms)

Application of thermodynamics in a specific force field to the adsorption of Al^{3+} ions on the chelating resins Otsorb Oxin, Otsorb Salicyl, Spheron Oxin, and Spheron Salicyl. Mathematical analysis of sorption isotherms using nonlinear mean square software, 488 (2003) 12

Friction force microscopy

Friction force microscopy of self-assembled monolayers: probing molecular organisation at the nanometre scale, 479 (2003) 17

Fruit quality

Comparison of indices and multivariate models to non-destructively predict the fruit chlorophyll by means of visible spectrometry in apple fruit, 481 (2003) 119

Fruits and vegetables

Evaluation of sample processing and sub-sampling performance, 477 (2003) 169

Evaluation of the analytical method performance for incurred samples, 485 (2003) 241

***F*-test**

Validation of consensus between proteomic and clinical chemistry datasets by applying a new randomisation *F*-test for generalised procrustes analysis, 490 (2003) 365

FTIR

Multivariate curve resolution applied to Fourier transform infrared spectra of macromolecules: structural characterisation of the acid form and the salt form of humic acids in interaction with lead, 477 (2003) 201

Selection of calibration set samples in determination of olive oil acidity by partial least squares–attenuated total reflectance–Fourier transform infrared spectroscopy, 489 (2003) 59

Study of lactol activation by trifluoroacetic anhydride via in situ Fourier transform infrared spectroscopy, 497 (2003) 155

FT-MIR

Quantitation of κ -, ι - and λ -carrageenans by mid-infrared spectroscopy and PLS regression, 480 (2003) 23

FT-NIR spectrometry

Determination of ethanol in fuel ethanol and beverages by Fourier transform (FT)-near infrared and FT-Raman spectrometries, 493 (2003) 219

FT-Raman spectrometry

Determination of ethanol in fuel ethanol and beverages by Fourier transform (FT)-near infrared and FT-Raman spectrometries, 493 (2003) 219

FT-Raman spectroscopy

Non-destructive and clean prediction of aviation fuel characteristics through Fourier transform-Raman spectroscopy and multivariate calibration, 482 (2003) 115

Fulvic acid

Using solution equilibria to determine average molecular weight of the Suwannee River fulvic acids, 496 (2003) 325

Labiality of metal ion-fulvic acid complexes as probed by FIA and DGT: a comparative study, 499 (2003) 17

Fumaric acid

Flow injection system for on-line monitoring of fumaric acid in biological processes, 499 (2003) 71

Functionalized nano-PbS

Direct quantification of γ -globulin in human blood serum by resonance light scattering techniques without separation of human serum albumin, 493 (2003) 179

Fundamental error

Gy sampling theory in environmental studies. 2. Subsampling error estimates, 490 (2003) 159

G

GABA receptor

Determination of a small, highly polar aminopropylphosphonic acid as racemate in plasma and urine and as separated enantiomers in plasma by liquid chromatography and tandem mass spectrometry, 492 (2003) 261

Gamma-ray spectrometry

Liquid-liquid microbatch extraction system for rapid mutual separation of fission products, 484 (2003) 139

Gas analysis

Detection of perfluorocarbons using ion mobility spectrometry, 484 (2003) 63

Gas chromatography

Gas chromatographic detection of organometallic compounds by reactive-flow photometry, 477 (2003) 269

Headspace solvent microextraction and gas chromatographic determination of some polycyclic aromatic hydrocarbons in water samples, 489 (2003) 21

High-speed gas chromatographic separations with diaphragm valve-based injection and chemometric analysis as a gas chromatographic "sensor", 490 (2003) 223

Use of boiling point-Lee retention index correlation for rapid review of gas chromatography-mass spectrometry data, 494 (2003) 235

Gas chromatography-mass spectrometric

Clenbuterol food poisoning diagnosis by gas chromatography-mass spectrometric serum analysis, 483 (2003) 207

Gas chromatography-mass spectrometry

Spectral transformations for deconvolution methods applied on gas chromatography-mass spectrometry data, 488 (2003) 231

Determination of endogenous and synthetic glucocorticoids in human urine by gas chromatography-mass spectrometry following microwave-assisted derivatization, 489 (2003) 233

Gas chromatography-tandem mass spectrometry

Screening and confirmation of chloramphenicol in shrimp tissue using ELISA in combination with GC-MS² and LC-MS², 483 (2003) 153

Gas diffusion

Flow injection potentiometric detection of trimethylamine in sea-food using tungsten oxide electrode, 478 (2003) 53

Gas phase Fourier transform infrared spectra

Comparison of partial least squares regression and multi-layer neural networks for quantification of nonlinear systems and application to gas phase Fourier transform infrared spectra, 489 (2003) 125

Gas sensor

Portable instrument for electrochemical gas sensing, 500 (2003) 145

Gaseous standard mixtures

Thermal decomposition of surface compounds for the generation of small quantities of acetaldehyde. Calibration of a thermal desorption-gas chromatography-flame ionization detection, 488 (2003) 89

Gasket material formula

Neural-network modeling of hot-compression test curves for calendering gasket materials, 486 (2003) 237

Gas-liquid entrainment

Application of a gas-liquid entraining rotor to supercritical fluid extraction. Removal of iron(III) from water, 485 (2003) 1

Gas-liquid partitioning

Study of gas-liquid partitioning of alkane solutes in several organic solvents by using principal component analysis and linear solvation energy relationships, 488 (2003) 107

GC

Determination of butyltin species in natural waters using aqueous phase ethylation and off-line room temperature trapping, 477 (2003) 103

Routine analysis of mercury species using commercially available instrumentation: chemometric optimisation of the instrumental variables, 486 (2003) 255

GC monitoring

Membrane in tandem with a helical sorbent trap as continuous sampling technique of the polyvinyl chloride thermo-oxidative degradation products for their on-line gas chromatographic monitoring, 491 (2003) 163

GC×GC

Chemometric analysis of comprehensive two-dimensional gas chromatography data using cryogenic modulation, 500 (2003) 211

GC-MS

β-Cyclodextrin epichlorohydrin copolymer as a solid-phase extraction adsorbent for aromatic compounds in water samples, 477 (2003) 93

Experimental design applied to the determination of several contaminants in Duero River by solid-phase microextraction, 477 (2003) 257

Comparison of immunoassay and gas chromatography-mass spectrometry for measurement of polycyclic aromatic hydrocarbons in contaminated soil, 486 (2003) 31

Optimization and validation of an enzyme immunoassay for the insect growth regulator fenoxycarb, 487 (2003) 15

Development of a non-labeled immunosensor for the herbicide trifluralin via optical waveguide lightmode spectroscopic detection, 487 (2003) 31

Application of liquid chromatography-mass spectrometry in the determination of oxazaphosphorines and their metabolites, 492 (2003) 147

Characterization of thermally assisted hydrolysis and methylation products of polyphenols from modern and archaeological vine derivatives using gas chromatography-mass spectrometry, 493 (2003) 137

Separation of arsines and trinitrotoluene by reversed phase high performance liquid chromatography and micellar electrokinetic capillary chromatography, 495 (2003) 239

GC-MS²

Faster analysis of anabolic steroids in kidney fat by downscaling the sample size and using gas chromatography-tandem mass spectrometry, 483 (2003) 269

GC-MS analysis

Gas chromatographic-mass spectrometric analysis of di(2-ethylhexyl) phthalate and its metabolites in hepatic microsomal incubations, 480 (2003) 1

GC-MS-MS

Determination of 81 multiclass pesticides in fresh foodstuffs by a single injection analysis using gas chromatography-chemical ionization and electron ionization tandem mass spectrometry, 484 (2003) 167

Gd(III) ion-selective electrode

Novel gadolinium poly(vinyl chloride) membrane sensor based on a new S-N Schiff's base, 495 (2003) 51

Gel permeation chromatography (GPC)

Simple and rapid determination of *N*-methylcarbamate pesticides in citrus fruits by electrospray ionization tandem mass spectrometry, 487 (2003) 201

Generalised procrustes analysis

Validation of consensus between proteomic and clinical chemistry datasets by applying a new randomisation *F*-test for generalised procrustes analysis, 490 (2003) 365

Generalized least-squares

Estimation of trace vapor concentration-pathlength in plumes for remote sensing applications from hyperspectral images, 490 (2003) 139

Generalized rank annihilation method

Parallel column liquid chromatography with a single multi-wavelength absorbance detector for enhanced selectivity using chemometric analysis, 490 (2003) 197

Generation of H⁺ and bases

Coulometric-potentiometric titration of bases and acids in γ -butyrolactone, 497 (2003) 143

Genetic algorithm

Comparison of different partial least-squares methods in quantitative structure-activity relationships, 476 (2003) 85

The potential of field spectroscopy for the assessment of sediment properties in river floodplains, 484 (2003) 189

Prediction of bioconcentration factor using genetic algorithm and artificial neural network, 486 (2003) 101

Peak alignment of NMR signals by means of a genetic algorithm, 487 (2003) 189

Hybrid genetic algorithm-tabu search approach for optimising multilayer optical coatings, 490 (2003) 211

Genetic programming

Comparison of different partial least-squares methods in quantitative structure-activity relationships, 476 (2003) 85

Genipin

Colorimetric determination of amino acids using genipin from *Gardenia jasminoides*, 480 (2003) 267

Geniposide

Colorimetric determination of amino acids using genipin from *Gardenia jasminoides*, 480 (2003) 267

Genotoxicity

Bacterial *Lux-Fluoro* test for biological assessment of pollutants in water samples from urban and rural origin, 487 (2003) 51

Gentamicin

Single biosensor immunoassay for the detection of five aminoglycosides in reconstituted skimmed milk, 488 (2003) 53

GENTLE

Spectral transformations for deconvolution methods applied on gas chromatography-mass spectrometry data, 488 (2003) 231

Geological samples

Separation of rare earth elements from scandium by extraction chromatography. Application to radiochemical neutron activation analysis for trace rare earth elements in geological samples, 498 (2003) 25

Gestagens

Screening for gestagens in kidney fat using accelerated solvent extraction and liquid chromatography electrospray tandem mass spectrometry, 483 (2003) 51

Ginsenoside

Liquid chromatography-electrospray ionization mass spectrometry for metabolism and pharmacokinetic studies of ginsenoside Rg3, 492 (2003) 283

Givens rotations

Discarding or downweighting high-noise variables in factor analytic models, 490 (2003) 277

Glass

Rapid prototyping of glass microchannels, 496 (2003) 205

Glassy carbon electrode

Voltammetric study on the complex of thiram-copper(II) and its application, 482 (2003) 29

Global sugar

Rapid estimation of global sugars by UV photodegradation and UV spectrophotometry, 477 (2003) 325

 γ -Globulin

Direct quantification of γ -globulin in human blood serum by resonance light scattering techniques without separation of human serum albumin, 493 (2003) 179

Glucocorticoids

Determination of endogenous and synthetic glucocorticoids in human urine by gas chromatography-mass spectrometry following microwave-assisted derivatization, 489 (2003) 233

Glucose

Evaluation of selectivity and robustness of near-infrared glucose measurements based on short-scan Fourier transform infrared interferograms, 490 (2003) 325

Glucose biosensor

Assay of α -glucosidase inhibitory activity using flow-biosensor system, 479 (2003) 135

Glucose oxidase

Electrosynthesis and permselective characterisation of phenol-based polymers for biosensor applications, 495 (2003) 33

Flow injection analysis of glucose based on its inhibition of electrochemiluminescence in a $\text{Ru}(\text{bpy})_3^{2+}$ -tripropylamine system, 498 (2003) 61

α -Glucosidase (AGH) inhibitory activity

Assay of α -glucosidase inhibitory activity using flow-biosensor system, 479 (2003) 135

Glutathione

A mechanistic evaluation of the amperometric response of reduced thiols in quinone mediated systems, 491 (2003) 203

Seeking connectivity between engineered proteins and transducers: connection for glutathione S-transferase fusion proteins on surface plasmon resonance devices, 500 (2003) 323

Glutathione S-transferase

Seeking connectivity between engineered proteins and transducers: connection for glutathione S-transferase fusion proteins on surface plasmon resonance devices, 500 (2003) 323

Gluten

Heme protein-gluten films: voltammetric studies and their electrocatalytic properties, 481 (2003) 91

Glycyrrhizin

Pressurized hot water extraction of berberine, baicalein and glycyrrhizin in medicinal plants, 482 (2003) 81

Gold

Distance-dependent electron hopping conductivity and nanoscale lithography of chemically-linked gold monolayer protected cluster films, 496 (2003) 3

Measurement of the chemical and morphological changes that occur on gold surfaces following thermal desorption and acid dissolution of adsorbed mercury, 496 (2003) 279

Gold disk electrode

Amperometric flow-injection determination of phenolic compounds at self-assembled monolayer-based tyrosinase biosensors, 494 (2003) 187

Gold electrode

Flow injection spectroelectroanalytical method for the determination of promethazine hydrochloride in pharmaceutical preparations, 494 (2003) 215

Flow injection analysis of tetracycline in pharmaceutical formulation with pulsed amperometric detection, 499 (2003) 191

Gold nanoparticles

Gold and alloy nanoparticles in solution and thin film assembly: spectrophotometric determination of molar absorptivity, 496 (2003) 17

Gold-silver alloy

Gold and alloy nanoparticles in solution and thin film assembly: spectrophotometric determination of molar absorptivity, 496 (2003) 17

GPT sensor

Determination of glutamate pyruvate transaminase activity in clinical specimens using a biosensor composed of immobilized

L-glutamate oxidase in a photo-crosslinkable polymer membrane on a palladium-deposited screen-printed carbon electrode, 481 (2003) 199

Gradient elution

New uniform algorithm to predict reversed phase retention values under different gradient conditions, 476 (2003) 123

GRAM

Second-order bilinear calibration for determining polycyclic aromatic compounds in marine sediments by solvent extraction and liquid chromatography with diode-array detection, 498 (2003) 47

Chemometric analysis of comprehensive two-dimensional gas chromatography data using cryogenic modulation, 500 (2003) 211

Grape seeds

Characterization of thermally assisted hydrolysis and methylation products of polyphenols from modern and archaeological vine derivatives using gas chromatography-mass spectrometry, 493 (2003) 137

Graphite atomic absorption spectrophotometry

Determination of ultra-trace gold in natural water by graphite furnace atomic absorption spectrophotometry after in situ enrichment with thiol cotton fiber, 479 (2003) 225

Graphite furnace atomic absorption spectrometry

Investigation of trace level binding of PtCl_6 and PtCl_4 to alfalfa biomass (*Medicago sativa*) using Zeeman graphite furnace atomic absorption spectrometry, 478 (2003) 139

Selenium speciation analysis in a sediment using strong anion exchange and reversed phase chromatography coupled with inductively coupled plasma-mass spectrometry, 478 (2003) 219

Study of metal-loaded activated charcoals for the separation and determination of selenium species by energy dispersive X-ray fluorescence analysis, 478 (2003) 229

Kinetic studies of nickel speciation in model solutions of a well-characterized humic acid using the competing ligand exchange method, 480 (2003) 157

In situ preconcentration and determination of trace arsenic in botanical samples by hydride generation-graphite furnace atomic absorption spectrometry with Pd-Zr as chemical modifier, 491 (2003) 91

Graphite furnace atomic absorption spectroscopy

Solid sample graphite furnace atomic absorption spectroscopy for supporting arsenic determination in sediments following a sequential extraction procedure, 476 (2003) 15

Grease

Microwave enhanced extraction of wool wax from solid wool scour wastes, 494 (2003) 255

Green fluorescent protein

Bacterial *Lux-Fluoro* test for biological assessment of pollutants in water samples from urban and rural origin, 487 (2003) 51

Green tea

Feasibility study for the use of near infrared spectroscopy in the qualitative and quantitative analysis of green tea, *Camellia sinensis* (L.), 478 (2003) 303

Grepafloxacin

Lanthanide sensitized chemiluminescence determination of grepafloxacin in tablets and human urine, 482 (2003) 105

Groove binder

Simple fluorimetric method for probing AT-rich regions in DNA based on the photoisomerization of distilbazolium ligand, 487 (2003) 221

Groundwater sample

Solid phase extraction of lead by Chelest Fiber Iry (aminopolycarboxylic acid-type cellulose), 485 (2003) 19

Growing neural networks

Growing neural networks for a multivariate calibration and variable selection of time-resolved measurements, 490 (2003) 71

Growth hormone

Analysis for endogenous and recombinant porcine somatotropin in serum, 483 (2003) 201

Growth inhibition

Microplate-based microbial assay for risk assessment and (eco)toxic fingerprinting of chemicals, 485 (2003) 121

Growth phases

Monitoring of yeast fermentation by ion mobility spectrometry measurement and data visualisation with Self-Organizing Maps, 484 (2003) 93

Growth promoter

Modification of 17 β -estradiol metabolite profile in steer edible tissues after estradiol implant administration, 483 (2003) 289

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 1. Endocrine ovarian function, 483 (2003) 225

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 2: ovarian morphology, 483 (2003) 233

Application of neutral loss mode in liquid chromatography-mass spectrometry for the determination of corticosteroids in bovine urine, 483 (2003) 259

GS-MS

Effect of the carbon dioxide modifier on the lipid composition of wool wax extracted from raw wool, 477 (2003) 233

Guanosine

Evaluation of the recognition ability of molecularly imprinted materials by surface plasmon resonance (SPR) spectroscopy, 489 (2003) 191

GUM approach

Comparison of different approaches to estimate the uncertainty of a liquid chromatographic assay, 480 (2003) 39

H

H/D exchange

The accuracy and precision of a new H/D exchange- and mass spectrometry-based technique for measuring the thermodynamic stability of proteins, 496 (2003) 225

Haar transform

Multiresolution analysis for quantification of optical properties in scattering media using pulsed photon time-of-flight measurements, 490 (2003) 185

Hair

Value of alternative sample matrices in residue analysis for stanozolol, 483 (2003) 11

Hair analysis

Identification of anabolic steroids in serum, urine, sweat and hair. Comparison of metabolic patterns, 483 (2003) 299

Improved screening capabilities in forensic toxicology by application of liquid chromatography-tandem mass spectrometry, 492 (2003) 171

Handy ultrasonic-homogenizer

Rapid high-performance liquid chromatographic determining technique of sulfamonomethoxine, sulfadimethoxine, and sulfaquinolaxine in eggs without use of organic solvents, 481 (2003) 255

Hapten heterology

Investigation of the effect of hapten heterology on immunoassay sensitivity and development of an enzyme-linked immunosorbent assay for the organophosphorus insecticide fenthion, 494 (2003) 29

Hapten-protein conjugation

A renewable amperometric immunosensor for phytohormone β -indole acetic acid assay, 494 (2003) 177

Haptoglobin

Direct chemiluminescent imaging detection of serum proteins in polyacrylamide gels, 497 (2003) 83

Hardness determination

Characterisation of a transparent optical test strip for quantification of water hardness, 481 (2003) 139

hHCG

Bifunctional atomic force microscopy probes for molecular screening applications, 479 (2003) 77

HCT test

Neural-network modeling of hot-compression test curves for calendering gasket materials, 486 (2003) 237

Headspace solvent microextraction

Headspace solvent microextraction and gas chromatographic determination of some polycyclic aromatic hydrocarbons in water samples, 489 (2003) 21

Heart-cutting

Development and validation of a heart-cutting liquid chromatography-mass spectrometry method for the determination of process-related substances in cetirizine tablets, 492 (2003) 271

Heavy atom induced (HAI)

Study of the substituent groups effect on the room-temperature phosphorescent emission of fluorene derivatives in solution, 489 (2003) 165

Heavy metals

Heavy metal-induced inhibition of *Aspergillus niger* nitrate reductase: applications for rapid contaminant detection in aqueous samples, 480 (2003) 131

Sol-gel derived urease-based optical biosensor for the rapid determination of heavy metals, 481 (2003) 75

Performance of selected destruction methods for the determination of heavy metals in reed plants (*Phragmites australis*), 497 (2003) 191

Hellenistic pigments

Pigment and terracotta analyses of Hellenistic figurines in Crete, 497 (2003) 209

Hemoglobin

Heme protein-gluten films: voltammetric studies and their electrocatalytic properties, 481 (2003) 91

Microplate assay for determination of cathepsin D activity based on quantification of a specific and stable peptide released from hemoglobin: VV-hemorphin-7, 486 (2003) 21

Amperometric biosensor for hydrogen peroxide based on hemoglobin entrapped in titania sol-gel film, 486 (2003) 209

Hemoglobin probe

Direct chemiluminescent imaging detection of serum proteins in polyacrylamide gels, 497 (2003) 83

Hemorphin

Microplate assay for determination of cathepsin D activity based on quantification of a specific and stable peptide released from hemoglobin: VV-hemorphin-7, 486 (2003) 21

Hepatic microsomal incubations

Gas chromatographic-mass spectrometric analysis of di(2-ethylhexyl) phthalate and its metabolites in hepatic microsomal incubations, 480 (2003) 1

Herring sperm DNA

Chemiluminescence determination of ultramicro DNA with a flow-injection method, 478 (2003) 31

Heterobifunctional crosslinker

Heterobifunctional crosslinkers for tethering single ligand molecules to scanning probes, 497 (2003) 101

Heterogeneous

Gy sampling theory in environmental studies. 2. Subsampling error estimates, 490 (2003) 159

Heteroscedasticity

Estimation of the minimum detectable value for the determination of PCBs in fatty food samples by GC-ECD: a curvilinear calibration case, 483 (2003) 413

Hexapole collision cell

Determination of arsenic, iron and selenium in moss samples using hexapole collision cell, inductively coupled plasma-mass spectrometry, 493 (2003) 3

Hg

Electrothermal vaporization inductively coupled plasma-mass spectrometry for the determination of Cr, Cu, Cd, Hg and Pb in rice flour, 495 (2003) 143

Hg(II) flow-injection potentiometric detector

Validation of the membrane composition effect on the flow-injection signal profile of chalcogenide-based ion-selective sensors: a model study using electrochemical approach. Hg(II) flow-injection detector case, 476 (2003) 55

HG-AFS

Arsenic speciation in environmental and biological samples. Extraction and stability studies, 495 (2003) 85

Hierarchical cluster analysis

NMR-based metabonomic toxicity classification: hierarchical cluster analysis and k-nearest-neighbour approaches, 490 (2003) 3

High performance liquid chromatography

Trace determination of nitrated polycyclic aromatic hydrocarbons using liquid chromatography with on-line electrochemical reduction and fluorescence detection, 482 (2003) 219

High pH

Large volume sample stacking in capillary electrophoresis of weakly acidic compounds using coated capillaries at high pH, 491 (2003) 173

High speed HPLC

Fast high performance liquid chromatography method for in-process control of sulbactam, 498 (2003) 1

High temporal resolution

Seasonal variations in diurnal concentrations of trace elements in atmospheric aerosols in Chicago, 496 (2003) 315

High throughput screening

Current status of modern analytical luminescence methods, 500 (2003) 21

Drug detection based on the conformational changes of calmodulin and the fluorescence of its enhanced green fluorescent protein fusion partner, 500 (2003) 237

Highly sulfonated styrene-divinylbenzene copolymer resin column

Separation of C₁-C₅ aliphatic carboxylic acids on a highly sulfonated styrene-divinylbenzene copolymer resin column with a C₆ aliphatic carboxylic acid solution as the mobile phase, 481 (2003) 15

High-performance liquid chromatography

Comparison of several curve resolution methods for drug impurity profiling using high-performance liquid chromatography with diode array detection, 487 (2003) 155

Simple method for the determination of benzodiazepines in human body fluids by high-performance liquid chromatography-mass spectrometry, 492 (2003) 223

Analysis of aromatic amines by high-performance liquid chromatography with pre-column derivatization by 2-(9-carbazole)-ethyl-chloroformate, 494 (2003) 141

Analysis of carcinogenic aromatic amines in water samples by solid-phase microextraction coupled with high-performance liquid chromatography, 495 (2003) 109

Investigation of the chiral separation of cisapride on Chiralcel OJ and OJ-R columns, 498 (2003) 9

High-performance liquid chromatography with ultraviolet detection (HPLC-UV)

Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

High-performance liquid chromatography/mass spectrometry

Reversed-phase high-performance liquid chromatographic/mass spectrometric method for separation of 4-methylimidazole and 2-acetyl-4-(1,2,3,4-tetrahydroxybutyl)imidazole at pg levels, 477 (2003) 49

High-speed

High-speed gas chromatographic separations with diaphragm valve-based injection and chemometric analysis as a gas chromatographic "sensor", 490 (2003) 223

High-temperature liquid chromatography (HTLC)

Separation of nonpolar analytes using methanol-water mixtures at elevated temperatures, 485 (2003) 51

High-temperature water chromatography

Comparison of elution strength, column efficiency, and peak symmetry in subcritical water chromatography and traditional reversed-phase liquid chromatography, 494 (2003) 157

HIV Protease Substrate 1

Continuous-flow protease assay based on fluorescence resonance energy transfer, 478 (2003) 1

H₂O₂

Electrochemical and catalytic investigation of carbon paste modified with Toluidine Blue O covalently immobilised on silica gel, 476 (2003) 43

Flow injection analysis of glucose based on its inhibition of electrochemiluminescence in a Ru(bpy)₃²⁺-tripropylamine system, 498 (2003) 61

H₂O₂ determination

Prussian Blue and enzyme bulk-modified screen-printed electrodes for hydrogen peroxide and glucose determination with improved storage and operational stability, 485 (2003) 111

Hollow fibers

Liquid-phase microextraction of drugs from human breast milk, 491 (2003) 155

Home-made flow cell

New flow injection potentiometric graphite coated ion-selective electrode for the determination of VO²⁺ ions, 481 (2003) 213

Homogeneous ternary solvent system

Direct voltammetric determination of Mo(VI) in plants: the need for a multivariate study of interferences, 487 (2003) 243

Horseradish peroxidase

Heme protein-gluten films: voltammetric studies and their electrocatalytic properties, 481 (2003) 91

Milk lactate determination with a rotating bioreactor based on an electron transfer mediated by osmium complexes incorporating a continuous-flow/stopped-flow system, 498 (2003) 155

HPLC

Speciation analysis of mercury in seafood by using high-performance liquid chromatography on-line coupled with cold-vapor atomic fluorescence spectrometry via a post column microwave digestion, 477 (2003) 131

Measurement of arsenic species in marine sediments by high-performance liquid chromatography-inductively coupled plasma mass spectrometry, 477 (2003) 279

Sensitive determination of iodine species, including organo-iodine, for freshwater and seawater samples using high performance liquid chromatography and spectrophotometric detection, 482 (2003) 59

Pressurized hot water extraction of berberine, baicalein and glycyrrhizin in medicinal plants, 482 (2003) 81

Determination of triacetone triperoxide in ambient air, 482 (2003) 183

Determination of flavour components in natural vanilla extracts and synthetic flavourings by mixed micellar electrokinetic capillary chromatography, 485 (2003) 179

Analysis of zearalenone and α -zearalenol in animal feed using high-performance liquid chromatography, 487 (2003) 137

Rapid simultaneous determination of arginine and methylated arginines in human urine by high-performance liquid chromatography-mass spectrometry, 487 (2003) 145

Determination of clenbuterol in pig liver by high-performance liquid chromatography with a coulometric electrode array system, 489 (2003) 95

BrMOZPhC, a novel coumarin type reagent for the fluorescent derivatisation of carboxylic acids, 489 (2003) 153

Mutual peak matching in a series of HPLC-DAD mixture analyses, 490 (2003) 41

Parallel column liquid chromatography with a single multi-wavelength absorbance detector for enhanced selectivity using chemometric analysis, 490 (2003) 197

Multi-walled carbon nanotubes packed cartridge for the solid-phase extraction of several phthalate esters from water samples and their determination by high performance liquid chromatography, 494 (2003) 149

Characterisation of a simple electrochemical detector for high-performance liquid chromatography and flow-injection analysis based on carbon microcylinder electrodes, 497 (2003) 175

HPLC separation

Analysis of polyethoxylated surfactants in microemulsion-oil-water systems. III. Fractionation and partitioning of polyethoxylated alcohol surfactants, 477 (2003) 293

HPLC/MS/MS

Correlation study of enzyme-linked immunosorbent assay and high-performance liquid chromatography/tandem mass spectrometry for the determination of *N*-methylcarbamate insecticides in baby food, 495 (2003) 123

HPLC-APCI/MS/MS assay

High-performance liquid chromatography-atmospheric pressure chemical ionization/tandem mass spectrometry for the determination of a thiol compound in plasma, 492 (2003) 215

HPLC-DAD

Multi-walled carbon nanotubes packed cartridge for the solid-phase extraction of several phthalate esters from water samples and their determination by high performance liquid chromatography, 494 (2003) 149

Second-order bilinear calibration for determining polycyclic aromatic compounds in marine sediments by solvent extraction and liquid chromatography with diode-array detection, 498 (2003) 47

HPLC-ED

Analysis of hydroxyurea in human plasma by high performance liquid chromatography with electrochemical detection, 488 (2003) 223

HPLC-HG-AFS

High performance liquid chromatography—atomic fluorescence spectrometric determination of arsenic species in beer samples, 482 (2003) 73

HPLC-ICP MS

Arsenic speciation in environmental and biological samples. Extraction and stability studies, 495 (2003) 85

Methodological advances for selenium speciation analysis in yeast, 500 (2003) 171

HPLC-mass spectrometry

Measurement of free drug and clinical end-point by high-performance liquid chromatography-mass spectrometry. Applications and implications for pharmacokinetic and pharmacodynamic studies, 492 (2003) 157

HPMBP

Synergistic extraction of lanthanum(III) from chloride medium by mixtures of 1-phenyl-3-methyl-4-benzoyl-pyrazalone-5 and triisobutylphosphine sulphide, 477 (2003) 251

HPSAM

Analyser of chromium and/or cobalt, 488 (2003) 243

HRP

Flow injection analysis of uric acid with a uricase- and horseradish peroxidase-coupled Sepharose column based luminol chemiluminescence system, 499 (2003) 41

HSA

Bifunctional atomic force microscopy probes for molecular screening applications, 479 (2003) 77

HS-SPME

High extraction efficiency solid-phase microextraction fibers coated with open crown ether stationary phase using sol-gel technique, 486 (2003) 63

Human liver cytosol

Detection of metalloproteins in human liver cytosol by synchrotron radiation X-ray fluorescence after sodium dodecyl sulphate polyacrylamide gel electrophoresis, 485 (2003) 131

Human plasma

Determination of doxorubicin in human plasma by excitation-emission matrix fluorescence and multi-way analysis, 493 (2003) 69

Human rhinovirus

Heterobifunctional crosslinkers for tethering single ligand molecules to scanning probes, 497 (2003) 101

Human serum

Separation of selected metal-binding proteins with capillary zone electrophoresis, 477 (2003) 1

Sub-picogram determination of Vitamin B₁₂ in pharmaceuticals and human serum using flow injection with chemiluminescence detection, 488 (2003) 71

Human serum albumin

Direct chemiluminescent imaging detection of serum proteins in polyacrylamide gels, 497 (2003) 83

Human urine

Determination of cadmium in human urine by electrothermal atomic absorption spectrometry, 491 (2003) 231

Humic acid

Multivariate curve resolution applied to Fourier transform infrared spectra of macromolecules: structural characterisation of the acid form and the salt form of humic acids in interaction with lead, 477 (2003) 201

Comparative study of binding strengths and thermodynamic aspects of Cu(II) and Ni(II) with humic acid by Schubert's ion-exchange method, 497 (2003) 235

Humic substances

Europium speciation by time-resolved laser-induced fluorescence, 478 (2003) 11

Determination of colloiddally-associated polycyclic aromatic hydrocarbons (PAHs) in fresh water using C₁₈ solid phase extraction disks, 486 (2003) 159

Hybrid organic/inorganic materials

A sol-gel synthesis of polyether-based proton conducting electrolytes, 496 (2003) 65

Hybrid TiO₂ sol-gel

A sensitive mediator-free tyrosinase biosensor based on an inorganic-organic hybrid titania sol-gel matrix, 489 (2003) 199

Hybridization

Tris(2,2'-bipyridyl)cobalt(III)-doped silica nanoparticle DNA probe for the electrochemical detection of DNA hybridization, 481 (2003) 181

Hydride generation

High performance liquid chromatography—atomic fluorescence spectrometric determination of arsenic species in beer samples, 482 (2003) 73

In situ preconcentration and determination of trace arsenic in botanical samples by hydride generation-graphite furnace atomic absorption spectrometry with Pd-Zr as chemical modifier, 491 (2003) 91

Possibilities and limits of the simultaneous determination of As, Bi, Ge, Sb, Se, and Sn by flow injection-hydride generation-inductively coupled plasma-time-of-flight mass spectrometry (FI-HG-ICP-TOFMS), 493 (2003) 13

Hydride generation atomic fluorescence

Hydride generation atomic fluorescence spectrometric determination of ultratrace selenium and tellurium in cow milk, 481 (2003) 291

Hydrogel

Performance of the diffusive gradients in thin films technique for measurement of trace metals in low ionic strength freshwaters, 478 (2003) 237

Hydrogen peroxide

Portable flow-injection analyzer with liquid-core waveguide based fluorescence quenching of Pyronine B by hydrogen peroxide, 479 (2003) 151

Mn(II)-sodium dodecyl sulphate complex mimic enzyme-catalyzed fluorescence quenching of Pyronine B by hydrogen peroxide, 480 (2003) 143

Direct evidence of singlet molecular oxygen [$O_2(^1\Delta_g)$] production in the reaction of acetonitrile with hydrogen peroxide in alkaline solutions, 482 (2003) 99

Amperometric biosensor for hydrogen peroxide based on hemoglobin entrapped in titania sol-gel film, 486 (2003) 209

Electrosynthesis and permselective characterisation of phenol-based polymers for biosensor applications, 495 (2003) 33

Reactivation of inactivated horseradish peroxidase with ethyleneurea and allantoin for determination of hydrogen peroxide by micro-flow injection horseradish peroxidase-catalyzed chemiluminescence, 495 (2003) 233

Hydrogen-bonding

The effect of hydrogen-bonding and terminal group structure on the dynamics of Ar collisions with self-assembled monolayers, 496 (2003) 249

Hydrogencarbonate

Determination of carbonate and hydrogencarbonate by titration using sequential injection analysis, 485 (2003) 187

Hydrolysing enzyme

Characterisation of the substituent distribution in starch and cellulose derivatives, 497 (2003) 27

Hydrolysis

Investigation of trialkoxysilane hydrolysis kinetics using liquid chromatography with inductively coupled plasma atomic emission spectrometric detection and non-linear regression modeling, 489 (2003) 103

Hydrophobic bulk optodes

Plasticizer-free microspheres for ionophore-based sensing and extraction based on a methyl methacrylate-decyl methacrylate copolymer matrix, 500 (2003) 127

Hydroquinone

Optimisation of a flow injection system with electrochemical detection using the desirability function. Application to the determination of hydroquinone in cosmetics, 479 (2003) 173

Hydroxide

Europium speciation by time-resolved laser-induced fluorescence, 478 (2003) 11

Hydroxyapatite

Chemical force microscopy: applications in surface characterisation of natural hydroxyapatite, 479 (2003) 39

2-Hydroxyphenylacetic acid

Electrosynthesis and permselective characterisation of phenol-based polymers for biosensor applications, 495 (2003) 33

8-Hydroxyquinoline

Cellulose functionalized with 8-hydroxyquinoline: new method of synthesis and applications as a solid phase extractant in the determination of metal ions by flame atomic absorption spectrometry, 485 (2003) 221

Hydroxyurea

Analysis of hydroxyurea in human plasma by high performance liquid chromatography with electrochemical detection, 488 (2003) 223

Hyperpolarizability

Polarization characterization in surface second harmonic generation by nonlinear optical null ellipsometry, 496 (2003) 133

Hyperspectral imaging

Estimation of trace vapor concentration-pathlength in plumes for remote sensing applications from hyperspectral images, 490 (2003) 139

Hyphenated analytical techniques

Advantages and disadvantages of nuclear magnetic resonance spectroscopy as a hyphenated technique, 497 (2003) 1

Hypnotics

Meeting challenges in forensic toxicology in Japan by liquid chromatography/mass spectrometry, 492 (2003) 83

Hypochlorite

Indirect spectrophotometric determination of *p*-aminobenzoic acid in sunscreen formulations by sequential injection analysis, 493 (2003) 233

I

Ibuprofen

Determination of ibuprofen and novocaine hydrochloride with the use of water-micellar solutions of surfactants, 481 (2003) 149

IC monoamines separation

Evaluation of behaviour of linear monoamines $CH_3-(CH_2)_{n-1}-NH_2$ ($n = 1-6$) in ion chromatography, 477 (2003) 41

ICP

Flow injection electrochemical hydride generation inductively coupled plasma time-of-flight mass spectrometry for the simultaneous determination of hydride forming elements and its application to the analysis of fresh water samples, 479 (2003) 203

ICP-AES

Electrochemical lead separation from copper, copper alloy, silver and silver alloy for isotope ratio determination in archaeometric investigations, 497 (2003) 227

ICP-MS

Measurement of arsenic species in marine sediments by high-performance liquid chromatography-inductively coupled plasma mass spectrometry, 477 (2003) 279

On-line preconcentration of palladium on alumina microcolumns and determination in urban waters by inductively coupled plasma mass spectrometry, 478 (2003) 209

Synthesis of novel chitosan resin derivatized with serine moiety for the column collection/concentration of uranium and the determination of uranium by ICP-MS, 480 (2003) 239

On-line electrolytic dissolution for lead determination in high-purity copper by isotope dilution inductively coupled plasma mass spectrometry, 485 (2003) 145

On the determination of platinum group elements in environmental materials by inductively coupled plasma mass spectrometry and microwave digestion, 489 (2003) 245

Electrochemical lead separation from copper, copper alloy, silver and silver alloy for isotope ratio determination in archaeometric investigations, 497 (2003) 227

Sequential injection-bead injection-lab-on-valve schemes for on-line solid phase extraction and preconcentration of ultra-trace levels of heavy metals with determination by electrothermal atomic absorption spectrometry and inductively coupled plasma mass spectrometry, 499 (2003) 139

Identity confirmation

Criteria for the identification of compounds by liquid chromatography-mass spectrometry and liquid chromatography-multiple mass spectrometry in forensic toxicology and doping analysis, 492 (2003) 69

IgG

Development of a biosensor for the quantitative detection of 2,4,6-trichloroanisole using screen printed electrodes, 484 (2003) 15

Image PCA

Exploratory analysis of L'vov platform surfaces for electrothermal atomic absorption spectrometry by using three-way chemometric tools, 495 (2003) 177

Imidazole derivatives

Reversed-phase high-performance liquid chromatographic/mass spectrometric method for separation of 4-methylimidazole and 2-acetyl-4-(1,2,3,4-tetrahydroxybutyl)imidazole at pg levels, 477 (2003) 49

Immobilization

Microdialysis sampling and monitoring of uric acid in vivo by a chemiluminescence reaction and an enzyme on immobilized chitosan support membrane, 478 (2003) 23

Development of immunochips for the detection of dengue viral antigens, 479 (2003) 117

Whole cell immobilised biosensors for toxicity assessment of a wastewater treatment plant treating phenolics-containing waste, 487 (2003) 61

Immobilized fumarase and malic dehydrogenase

Flow injection system for on-line monitoring of fumaric acid in biological processes, 499 (2003) 71

Immobilized ligands

Spectroscopic studies of proton-transfer and metal-ion binding of a solution-phase model for silica-immobilized 8-hydroxyquinoline, 494 (2003) 105

Immunoassay

Determination of the insecticide fenoxycarb in apple leaf samples by an enzyme-linked immunosorbent assay, 478 (2003) 271

Flow injection chemiluminescent immunoassay with *para*-phenylphenol and sodium tetraphenylborate as synergistic enhancers, 485 (2003) 57

Comparison of immunoassay and gas chromatography-mass spectrometry for measurement of polycyclic aromatic hydrocarbons in contaminated soil, 486 (2003) 31

Development of a non-labeled immunosensor for the herbicide trifluralin via optical waveguide lightmode spectroscopic detection, 487 (2003) 31

Evaluation of the structure/cross-reactivity relationship of polycyclic aromatic compounds using an enzyme-linked immunosorbent assay kit, 487 (2003) 43

A renewable amperometric immunosensor for phytohormone β -indole acetic acid assay, 494 (2003) 177

Labelless and reversible immunosensor assay based upon an electrochemical current-transient protocol, 495 (2003) 21

Direct oriented immobilization of F(ab') antibody fragments on gold, 496 (2003) 73

Determination of tumor marker CA125 by capillary electrophoretic enzyme immunoassay with electrochemical detection, 497 (2003) 75

Immunoassays using capillary electrophoresis laser induced fluorescence detection for DNA adducts, 500 (2003) 13

Clinical applications of chemiluminescence, 500 (2003) 279

Immunoassay optimization

Optimization and validation of an enzyme immunoassay for the insect growth regulator fenoxycarb, 487 (2003) 15

Immunochip

Development of immunochips for the detection of dengue viral antigens, 479 (2003) 117

Immunohistochemistry

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 2: ovarian morphology, 483 (2003) 233

Immunosensor

- Development of a biosensor for the quantitative detection of 2,4,6-trichloroanisole using screen printed electrodes, 484 (2003) 15
- Development of a non-labeled immunosensor for the herbicide trifluralin via optical waveguide lightmode spectroscopic detection, 487 (2003) 31

Immunosuppressants

- Liquid chromatography/mass spectrometry for therapeutic drug monitoring of immunosuppressants, 492 (2003) 133
- Measurement of free drug and clinical end-point by high-performance liquid chromatography-mass spectrometry. Applications and implications for pharmacokinetic and pharmacodynamic studies, 492 (2003) 157

Impregnated resin

- Thorium(IV) and uranium(VI) sorption studies on octacarboxymethyl-C-methylcalix[4]resorcinarene impregnated on a polymeric support, 485 (2003) 213

Imprinted polymer

- Preconcentration of copper on ion-selective imprinted polymer microbeads, 480 (2003) 251
- Highly selective fenuron-imprinted polymer with a homogeneous binding site distribution prepared by precipitation polymerisation and its application to the clean-up of fenuron in plant samples, 482 (2003) 165

Impurity profiles

- Development and validation of a heart-cutting liquid chromatography-mass spectrometry method for the determination of process-related substances in cetirizine tablets, 492 (2003) 271

Impurity profiling

- Comparison of several curve resolution methods for drug impurity profiling using high-performance liquid chromatography with diode array detection, 487 (2003) 155

In situ

- Study of lactol activation by trifluoroacetic anhydride via in situ Fourier transform infrared spectroscopy, 497 (2003) 155

In situ concentration

- In situ preconcentration and determination of trace arsenic in botanical samples by hydride generation-graphite furnace atomic absorption spectrometry with Pd-Zr as chemical modifier, 491 (2003) 91

In situ enrichment

- Determination of ultra-trace gold in natural water by graphite furnace atomic absorption spectrophotometry after in situ enrichment with thiol cotton fiber, 479 (2003) 225

In situ filtration

- An in situ filtration system for trace element determination in suspended particulate matter, 498 (2003) 165

in situ reagent preparation

- Zone fluidics in flow analysis: potentialities and applications, 499 (2003) 29

In situ sensor

- Sol-gel based mid-infrared evanescent wave sensors for detection of organophosphate pesticides in aqueous solution, 496 (2003) 339

In vitro oxidative metabolism

- Gas chromatographic-mass spectrometric analysis of di(2-ethylhexyl) phthalate and its metabolites in hepatic microsomal incubations, 480 (2003) 1

Inactivation

- Detection of cefquinome in milk by liquid chromatography and screening methods, 483 (2003) 363

In-capillary reaction

- Simultaneous, sensitive and selective on-line chemiluminescence determination of Cr(III) and Cr(VI) by capillary electrophoresis, 485 (2003) 169

Incurred samples

- Evaluation of the analytical method performance for incurred samples, 485 (2003) 241

Independent component analysis (ICA)

- Cross validation and uncertainty estimates in independent component analysis, 490 (2003) 341

Indigo

- A wall-jet disc electrode for simultaneous and continuous on-line measurement of sodium dithionite, sulfite and indigo concentrations by means of multistep chronoamperometry, 486 (2003) 73

Indium phosphide wafer

- Determination of trace iron in indium phosphide wafer by on-line matrix separation and inductively coupled plasma mass spectrometry, 482 (2003) 189

 β -Indole acetic acid

- A renewable amperometric immunosensor for phytohormone β -indole acetic acid assay, 494 (2003) 177

Indomethacin

- Fully automated drug liberation apparatus for semisolid preparations based on sequential injection analysis, 499 (2003) 9

Inductive coupled plasma mass spectrometry

- Investigation of equilibration and uncertainty contributions for the determination of inorganic mercury and methylmercury by isotope dilution inductively coupled plasma mass spectrometry, 500 (2003) 155

Inductively coupled plasma atomic emission spectrometry

- Application of wavelet transform to background correction in inductively coupled plasma atomic emission spectrometry, 485 (2003) 233

Inductively coupled plasma-atomic emission spectrometry (ICP-AES)

- Selenium speciation analysis in a sediment using strong anion exchange and reversed phase chromatography coupled with inductively coupled plasma-mass spectrometry, 478 (2003) 219

Ashing and microwave digestion of aerosol samples with a polypropylene fibrous filter matrix, 482 (2003) 129

On-line collection/concentration of trace metals for spectroscopic detection via use of small-sized thin solid phase (STSP) column resin reactors. Application to speciation of Cr(III) and Cr(VI), 499 (2003) 149

Inductively coupled plasma mass spectrometry

Solid phase extraction for analysis of biogenic carbonates by electrothermal vaporization inductively coupled plasma mass spectrometry (ETV-ICP-MS): an investigation of rare earth element signatures in otolith microchemistry, 476 (2003) 1

Selenium speciation analysis in a sediment using strong anion exchange and reversed phase chromatography coupled with inductively coupled plasma-mass spectrometry, 478 (2003) 219

Organic complexation and total dissolved trace metal analysis in estuarine waters: comparison of solvent-extraction graphite furnace atomic absorption spectrometric and chelating resin flow injection inductively coupled plasma-mass spectrometric analysis, 481 (2003) 127

Determination of trace iron in indium phosphide wafer by on-line matrix separation and inductively coupled plasma mass spectrometry, 482 (2003) 189

Determination of arsenic, iron and selenium in moss samples using hexapole collision cell, inductively coupled plasma-mass spectrometry, 493 (2003) 3

Electrothermal vaporization inductively coupled plasma-mass spectrometry for the determination of Cr, Cu, Cd, Hg and Pb in rice flour, 495 (2003) 143

Determination of trace metals in seawater by on-line column pre-concentration inductively coupled plasma mass spectrometry using metal alkoxide glass immobilized 8-quinolinol, 499 (2003) 157

Inductively coupled plasma time-of-flight mass spectrometry (ICP-TOF-MS)

Determination of chromium, cadmium and lead in food-packaging materials by axial inductively coupled plasma time-of-flight mass spectrometry, 479 (2003) 191

Multicapillary gas chromatography coupled to inductively coupled plasma-time-of-flight mass spectrometry for rapid mercury speciation analysis, 489 (2003) 45

Possibilities and limits of the simultaneous determination of As, Bi, Ge, Sb, Se, and Sn by flow injection-hydride generation-inductively coupled plasma-time-of-flight mass spectrometry (FI-HG-ICP-TOFMS), 493 (2003) 13

Infrared spectroscopy

Determination of the composition of human urinary calculi composed of whewellite, weddellite and carbonate apatite using artificial neural networks, 491 (2003) 211

Inhibition effect

Flow injection analysis of glucose based on its inhibition of electrochemiluminescence in a $\text{Ru}(\text{bpy})_3^{2+}$ -tripropylamine system, 498 (2003) 61

Inhibitors

Free and sol-gel immobilized alkaline phosphatase-based biosensor for the determination of pesticides and inorganic compounds, 484 (2003) 45

Injection

Fluorimetric determination of dopamine in pharmaceutical products and urine using ethylene diamine as the fluorogenic reagent, 497 (2003) 93

Inorganic-organic hybrid materials

Synthesis of molecular imprinted organic-inorganic hybrid polymer binding caffeine, 481 (2003) 175

Inosine 5'-monophosphate dehydrogenase

Determination of 18 nucleobases, nucleosides and nucleotides in human peripheral blood mononuclear cells by isocratic solvent-generated ion-pair chromatography, 481 (2003) 245

In-process control

Fast high performance liquid chromatography method for in-process control of sulbactam, 498 (2003) 1

Input selection

Selection of quasi-optimal inputs in chemometrics modeling by artificial neural network analysis, 490 (2003) 31

Insecticide

Determination of the insecticide fenoxycarb in apple leaf samples by an enzyme-linked immunosorbent assay, 478 (2003) 271

Insegar

Determination of the insecticide fenoxycarb in apple leaf samples by an enzyme-linked immunosorbent assay, 478 (2003) 271

Instrumental error of spectrophotometer

Determination of the number of light-absorbing species in the protonation equilibria of selected drugs, 489 (2003) 137

Instrumentation

Characterisation of the substituent distribution in starch and cellulose derivatives, 497 (2003) 27

Integrated conductimetric detection

Mass distribution in a dynamic sample zone inside a flow injection manifold: modelling integrated conductimetric profiles, 477 (2003) 59

Integrated microdevices

Developments toward a complete micro-total analysis system for Duchenne muscular dystrophy diagnosis, 500 (2003) 223

Interactions

Dynamic imaging of single DNA-protein interactions using atomic force microscopy, 479 (2003) 3

Interferences

On-line preconcentration of palladium on alumina microcolumns and determination in urban waters by inductively coupled plasma mass spectrometry, 478 (2003) 209

Interferents

Multivariate calibration. What is in chemometrics for the analytical chemist?, 500 (2003) 185

Interferogram

Evaluation of selectivity and robustness of near-infrared glucose measurements based on short-scan Fourier transform infrared interferograms, 490 (2003) 325

Internal standardization

Determination of trace iron in indium phosphide wafer by on-line matrix separation and inductively coupled plasma mass spectrometry, 482 (2003) 189

Interpretative power

Spectral similarity versus structural similarity: infrared spectroscopy, 490 (2003) 313

InterVal

Performance of a matrix-comprehensive in-house validation study by means of an especially designed software, 483 (2003) 351

In-tube SPME

Solid-phase microextraction and liquid chromatography/mass spectrometry in drug analysis, 492 (2003) 49

Inverse calibration

Partial least-squares modeling of continuous nodes in Bayesian networks, 490 (2003) 355

Inverted AFM design

Analytical instrumentation based on force measurements: combinatorial atomic force microscopy, 496 (2003) 267

Iodide

Sensitive determination of iodine species, including organo-iodine, for freshwater and seawater samples using high performance liquid chromatography and spectrophotometric detection, 482 (2003) 59

Use of pseudo-first order kinetics in flow injection for determination of trace inorganic iodine, 499 (2003) 115

Iodide

Sensitive determination of iodine species, including organo-iodine, for freshwater and seawater samples using high performance liquid chromatography and spectrophotometric detection, 482 (2003) 59

Determination of trace iodide in seawater by capillary electrophoresis following transient isotachophoretic preconcentration. Comparison with ion chromatography, 497 (2003) 67

Use of pseudo-first order kinetics in flow injection for determination of trace inorganic iodine, 499 (2003) 115

Ion associate

Ultratrace determination of phosphorus in ultrapurified water by a slope comparison method, 481 (2003) 311

Ion chromatography

Determination of trace iodide in seawater by capillary electrophoresis following transient isotachophoretic preconcentration. Comparison with ion chromatography, 497 (2003) 67

Ion cyclotron resonance

Chiral recognition of borneol by association with zinc(II) and L-tryptophan in the gas phase, 482 (2003) 1

Ion exchange

Aluminum phosphate dispersed on a cellulose acetate fiber surface.

Preparation, characterization and application for Li^+ , Na^+ and K^+ separation, 477 (2003) 305

Immobilized poly-L-histidine for chelation of metal cations and metal oxyanions, 495 (2003) 151

Ion exchange process

Morpholinoethanesulfonic acid-based buffer system for improved detection limit and stability of the fluoride ion selective electrode, 478 (2003) 77

Ion imprinting polymer particles

Ion imprinted polymer particles: synthesis, characterization and dysprosium ion uptake properties suitable for analytical applications, 478 (2003) 43

Synthesis of imprinted polymer material with palladium ion nanopores and its analytical application, 488 (2003) 173

Ion mobility spectrometry

Detection of perfluorocarbons using ion mobility spectrometry, 484 (2003) 63

SIMPLISMA applied to two-dimensional wavelet compressed ion mobility spectrometry data, 484 (2003) 75

Monitoring of yeast fermentation by ion mobility spectrometry measurement and data visualisation with Self-Organizing Maps, 484 (2003) 93

Real-time two-dimensional wavelet compression and its application to real-time modeling of ion mobility data, 490 (2003) 59

Chemical standards in ion mobility spectrometry, 493 (2003) 185

Ion optode

Molecular design, characterization, and application of multiinformation dyes for optical chemical sensing. IV. Multiinformation dyes with extended spectral sensitivity in the near-infrared spectral range, 482 (2003) 19

Ion-exchange

Electrochemiluminescence sensor using tris(2,2'-bipyridyl)ruthenium(II) immobilized in Eastman-AQ55D-silica composite thin-films, 480 (2003) 285

Ion-exchange chromatographic

Isocratic ion chromatographic determination of underivatized amino acids by electrochemical detection, 478 (2003) 179

Ionic liquids

Dynamically coating the capillary with 1-alkyl-3-methylimidazolium-based ionic liquids for separation of basic proteins by capillary electrophoresis, 479 (2003) 249

Ionic strength

Performance of the diffusive gradients in thin films technique for measurement of trace metals in low ionic strength freshwaters, 478 (2003) 237

Ion-molecule reactions

The utility of ion-molecule reactions in a quadrupole ion trap mass spectrometer for analyzing metal complex coordination structure, 496 (2003) 233

Ionophore-based sensing

Plasticizer-free microspheres for ionophore-based sensing and extraction based on a methyl methacrylate-decyl methacrylate copolymer matrix, 500 (2003) 127

Ionophore-chromionophore system

Characterisation of a transparent optical test strip for quantification of water hardness, 481 (2003) 139

Ion-pair chromatography

Determination of 18 nucleobases, nucleosides and nucleotides in human peripheral blood mononuclear cells by isocratic solvent-generated ion-pair chromatography, 481 (2003) 245

Ion-pair liquid chromatography

Fast high performance liquid chromatography method for in-process control of sulbactam, 498 (2003) 1

Ion-selective

New flow injection potentiometric graphite coated ion-selective electrode for the determination of VO^{2+} ions, 481 (2003) 213

Ion-selective electrode

Conformational analysis of 12-crown-3 and sodium ion selectivity of electrodes based on bis(12-crown-3) derivatives with malonate spacers, 480 (2003) 291

Preparation of surfactant anion-selective electrodes with different selectivity coefficients and a trial to determine each component in binary surfactant mixtures, 481 (2003) 221

Chemical sensor for lanthanum(III) determination using aza-crown as ionophore in poly(vinyl chloride) matrix, 486 (2003) 199

Potentiometric determination of diazepam, bromazepam and clonazepam using solid contact ion-selective electrodes, 498 (2003) 79

Ion-selective microspheres

Plasticizer-free microspheres for ionophore-based sensing and extraction based on a methyl methacrylate-decyl methacrylate copolymer matrix, 500 (2003) 127

Ion-trap mass spectrometry

Use of ion-trap liquid chromatography-mass spectrometry to screen and confirm drug residues in aquacultured products, 483 (2003) 373

IR spectra

Spectral similarity versus structural similarity: infrared spectroscopy, 490 (2003) 313

Iron

Particle-based detection of DNA hybridization using electrochemical stripping measurements of an iron tracer, 482 (2003) 149

Bead injection spectroscopic flow-through renewable surface sensors with commercial flow cells as an alternative to reusable flow-through sensors, 482 (2003) 209

Applications of surface analysis in the environmental sciences: dehalogenation of chlorocarbons with zero-valent iron and iron-containing mineral surfaces, 496 (2003) 301

Flow-injection simultaneous determination of copper and iron in patient sera with 2-(5-bromo-2-pyridylazo)-5-(*N*-propyl-*N*-sulfo-propylamino)aniline and its application to disease diagnosis, 499 (2003) 91

Iron(III)

Application of a gas-liquid entraining rotor to supercritical fluid extraction. Removal of iron(III) from water, 485 (2003) 1

Iron(III) oxides

Identification of iron(III) oxides and hydroxy-oxides by voltammetry of immobilised microparticles, 477 (2003) 157

Iron(III)-substituted heteropolytungstate anions

Assembly of multilayer films containing iron(III)-substituted Dawson-type heteropolyanions and its electrocatalytic properties: cyclic voltammetry, electrochemical impedance spectroscopy and UV-Vis spectrometry, 486 (2003) 85

iso-Caproic acid

Separation of C_1 - C_5 aliphatic carboxylic acids on a highly sulfonated styrene-divinylbenzene copolymer resin column with a C_6 aliphatic carboxylic acid solution as the mobile phase, 481 (2003) 15

Isoprenaline

Mushroom tissue-based flow-injection fluorescence system for the determination of isoprenaline, 494 (2003) 63

Isotope dilution

On-line electrolytic dissolution for lead determination in high-purity copper by isotope dilution inductively coupled plasma mass spectrometry, 485 (2003) 145

Isotope dilution analysis

Investigation of equilibration and uncertainty contributions for the determination of inorganic mercury and methylmercury by isotope dilution inductively coupled plasma mass spectrometry, 500 (2003) 155

Isotopic ratios

Electrochemical lead separation from copper, copper alloy, silver and silver alloy for isotope ratio determination in archaeometric investigations, 497 (2003) 227

Italian wines

Evaluation of Italian wine by the electronic tongue: recognition, quantitative analysis and correlation with human sensory perception, 484 (2003) 33

Iterative correcting

Mitigating model deficiency in three-way data analysis by the combination of background constraining and iterative correcting techniques, 487 (2003) 171

J

Jack-knifing

Cross validation and uncertainty estimates in independent component analysis, 490 (2003) 341

Japan

Meeting challenges in forensic toxicology in Japan by liquid chromatography/mass spectrometry, 492 (2003) 83

Josamycin

Determination of macrolide antibiotics in meat and fish by liquid chromatography-electrospray mass spectrometry, 492 (2003) 187

Juices

Characterization of the aromatic composition of some liquid foods by nuclear magnetic resonance spectrometry and liquid chromatography with nuclear magnetic resonance and mass spectrometric detection, 488 (2003) 35

K**K⁺ aqueous electrolyte**

Electrochemical oxidation of L-cysteine mediated by a fullerene-C₆₀-modified carbon electrode, 491 (2003) 181

Kanamycin

Single biosensor immunoassay for the detection of five aminoglycosides in reconstituted skimmed milk, 488 (2003) 53

Kerosene

Non-destructive and clean prediction of aviation fuel characteristics through Fourier transform-Raman spectroscopy and multivariate calibration, 482 (2003) 115

Ketoprofen

Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

Determination of flunixin and ketoprofen in milk by liquid chromatography-tandem mass spectrometry, 488 (2003) 25

Kidney

Evaluation of sample preparation for control of chloramphenicol residues in porcine tissues by enzyme-linked immunosorbent assay and liquid chromatography, 483 (2003) 307

Kidney fat

Screening for gestagens in kidney fat using accelerated solvent extraction and liquid chromatography electrospray tandem mass spectrometry, 483 (2003) 51

Faster analysis of anabolic steroids in kidney fat by downscaling the sample size and using gas chromatography-tandem mass spectrometry, 483 (2003) 269

Killer effect quantification

Use of ATP measurements by bioluminescence to quantify yeast's sensitivity against a killer toxin, 495 (2003) 217

Killer toxin

Use of ATP measurements by bioluminescence to quantify yeast's sensitivity against a killer toxin, 495 (2003) 217

Kinetic deoxyribose assay

Kinetic deoxyribose degradation assay and its application in assessing the antioxidant activities of phenolic compounds in a Fenton-type reaction system, 478 (2003) 129

Kinetic determination

Use of pseudo-first order kinetics in flow injection for determination of trace inorganic iodine, 499 (2003) 115

Kinetic enzymatic determination

Kinetic determination of L(-)-malic acid in wines using sequential injection analysis, 499 (2003) 99

Kinetic method

Chemiluminescence determination of citrate and pyruvate and their mixtures by the stopped-flow mixing technique, 485 (2003) 63

Kinetics

Investigation of trialkoxysilane hydrolysis kinetics using liquid chromatography with inductively coupled plasma atomic emission spectrometric detection and non-linear regression modeling, 489 (2003) 103

Analyses of three-way data from equilibrium and kinetic investigations, 490 (2003) 99

Kinetics and retention characteristics

Kinetics and retention characteristics of some nitrophenols onto polyurethane foams, 487 (2003) 249

Kitasamycin

Determination of macrolide antibiotics in meat and fish by liquid chromatography-electrospray mass spectrometry, 492 (2003) 187

k-Nearest-neighbour

NMR-based metabonomic toxicity classification: hierarchical cluster analysis and k-nearest-neighbour approaches, 490 (2003) 3

L**La³⁺-selective electrode**

Chemical sensor for lanthanum(III) determination using aza-crown as ionophore in poly(vinyl chloride) matrix, 486 (2003) 199

Labile-inert

Multivariate resolution of NMR labile signals by means of hard- and soft-modelling methods, 490 (2003) 253

Lab-on-valve (LOV)

Sequential injection-bead injection-lab-on-valve schemes for on-line solid phase extraction and preconcentration of ultra-trace levels of heavy metals with determination by electrothermal atomic absorption spectrometry and inductively coupled plasma mass spectrometry, 499 (2003) 139

Laccase

Characterization of graphite electrodes modified with laccase from *Trametes versicolor* and their use for bioelectrochemical

monitoring of phenolic compounds in flow injection analysis, 487 (2003) 3

β -Lactamases

Detection of cefquinome in milk by liquid chromatography and screening methods, 483 (2003) 363

Lactate

Milk lactate determination with a rotating bioreactor based on an electron transfer mediated by osmium complexes incorporating a continuous-flow/stopped-flow system, 498 (2003) 155

Lactate oxidase

Milk lactate determination with a rotating bioreactor based on an electron transfer mediated by osmium complexes incorporating a continuous-flow/stopped-flow system, 498 (2003) 155

Lactol

Study of lactol activation by trifluoroacetic anhydride via in situ Fourier transform infrared spectroscopy, 497 (2003) 155

Langmuir monolayer

Langmuir monolayers of gold nanoparticles: from ohmic to rectifying charge transfer, 496 (2003) 29

Lanolin

Effect of the carbon dioxide modifier on the lipid composition of wool wax extracted from raw wool, 477 (2003) 233

Lanthanides

Room temperature phosphorescence in the liquid state as a tool in analytical chemistry, 488 (2003) 135

Lanthanum

Synergistic extraction of lanthanum(III) from chloride medium by mixtures of 1-phenyl-3-methyl-4-benzoyl-pyrazolone-5 and triisobutylphosphine sulphide, 477 (2003) 251

Large volume stacking

Large volume sample stacking in capillary electrophoresis of weakly acidic compounds using coated capillaries at high pH, 491 (2003) 173

Laser diode

Multiresolution analysis for quantification of optical properties in scattering media using pulsed photon time-of-flight measurements, 490 (2003) 185

Laser-induced fluorescence

Europium speciation by time-resolved laser-induced fluorescence, 478 (2003) 11

Continuous-flow DNA and RNA amplification chip combined with laser-induced fluorescence detection, 494 (2003) 1

Optically gated vacancy electrophoresis in microfluidic devices, 496 (2003) 195

Immunoassays using capillary electrophoresis laser induced fluorescence detection for DNA adducts, 500 (2003) 13

Lateral force microscopy

Friction force microscopy of self-assembled monolayers: probing molecular organisation at the nanometre scale, 479 (2003) 17

Latex

Optimization in sample stacking for the measurement of short chain organic acids in serum of natural rubber latex by capillary electrophoresis, 482 (2003) 37

Layer-by-layer assembly

Assembly of multilayer films containing iron(III)-substituted Dawson-type heteropolyanions and its electrocatalytic properties: cyclic voltammetry, electrochemical impedance spectroscopy and UV-Vis spectrometry, 486 (2003) 85

Laying hens

Determination of propoxur residues in eggs by liquid chromatography—diode array detection after treatment of stocked housing facilities for the poultry red mite (*Dermanyssus gallinae*), 483 (2003) 19

LC

Determination of macrolide antibiotics in meat and fish by liquid chromatography—electrospray mass spectrometry, 492 (2003) 187

Simple and sensitive fluorimetric liquid chromatography for simultaneous analysis of chenodiol and ursodiol in pharmaceutical formulations, 493 (2003) 159

LC/MS

Meeting challenges in forensic toxicology in Japan by liquid chromatography/mass spectrometry, 492 (2003) 83

Liquid chromatography/mass spectrometry for therapeutic drug monitoring of immunosuppressants, 492 (2003) 133

Rapid analysis of pentazocine in human plasma by liquid chromatography/mass spectrometry with sonic spray ionization, 492 (2003) 249

LC/MS-MS

Liquid chromatography/mass spectrometry for therapeutic drug monitoring of immunosuppressants, 492 (2003) 133

LC-DAD-MS data

Evaluation of synthetic liquid chromatography—diode array detection—mass spectrometry data for the determination of enzyme kinetics, 490 (2003) 17

LC-ESI-MS/MS

Quantitative multi-residue analysis of tetracyclines and their 4-epimers in pig tissues by high-performance liquid chromatography combined with positive-ion electrospray ionization mass spectrometry, 492 (2003) 199

LC-MS

Use of the diphasic dialysis as a new extraction procedure in the determination of enrofloxacin and ciprofloxacin in egg, 480 (2003) 123

Analysis for endogenous and recombinant porcine somatotropine in serum, 483 (2003) 201

Quantitation of plasma thymidine by high-performance liquid chromatography—atmospheric pressure chemical ionization mass spectrometry and its application to pharmacodynamic studies in cancer patients, 486 (2003) 51

Application of liquid chromatography-mass spectrometry in the determination of oxazaphosphorines and their metabolites, 492 (2003) 147

Determination of macrolide antibiotics in meat and fish by liquid chromatography-electrospray mass spectrometry, 492 (2003) 187

Normal-phase liquid chromatographic separation of stratum corneum ceramides with detection by evaporative light scattering and atmospheric pressure chemical ionization mass spectrometry, 492 (2003) 233

Simultaneous determination of sibutramine and its *N*-desmethyl metabolites in human plasma by liquid chromatography-electrospray ionization-mass spectrometry. Method and clinical applications, 492 (2003) 241

Development and validation of a heart-cutting liquid chromatography-mass spectrometry method for the determination of process-related substances in cetirizine tablets, 492 (2003) 271

Liquid chromatography-electrospray ionization mass spectrometry for metabolism and pharmacokinetic studies of ginsenoside Rg3, 492 (2003) 283

LC-MS/MS

Liquid chromatographic-electrospray tandem mass spectrometric method for the determination of mebendazole and its hydrolysed and reduced metabolites in sheep muscle, 483 (2003) 111

Validation of a method for detecting and quantifying tranquillizers and a β -blocker in pig tissues by liquid chromatography-tandem mass spectrometry, 483 (2003) 335

Determination of a small, highly polar aminopropylphosphonic acid as racemate in plasma and urine and as separated enantiomers in plasma by liquid chromatography and tandem mass spectrometry, 492 (2003) 261

LC-MS-MS

Application of neutral loss mode in liquid chromatography-mass spectrometry for the determination of corticosteroids in bovine urine, 483 (2003) 259

Determination of veterinary drug residues by liquid chromatography and tandem mass spectrometry, 492 (2003) 105

Application of liquid chromatography-mass spectrometry in the determination of oxazaphosphorines and their metabolites, 492 (2003) 147

Determination of ropivacaine and its metabolites in patient urine: Advantage of liquid chromatography-tandem mass spectrometry over liquid chromatography-UV detection and liquid chromatography-mass spectrometry, 492 (2003) 253

LC-MS-NMR

Advantages and disadvantages of nuclear magnetic resonance spectroscopy as a hyphenated technique, 497 (2003) 1

LC-NMR

Advantages and disadvantages of nuclear magnetic resonance spectroscopy as a hyphenated technique, 497 (2003) 1

LC-NMR/MS

Characterization of the aromatic composition of some liquid foods by nuclear magnetic resonance spectrometry and liquid chromatography with nuclear magnetic resonance and mass spectrometric detection, 488 (2003) 35

LC-UV

Determination of ropivacaine and its metabolites in patient urine: Advantage of liquid chromatography-tandem mass spectrometry over liquid chromatography-UV detection and liquid chromatography-mass spectrometry, 492 (2003) 253

L-Cysteine

Electrochemical oxidation of L-cysteine mediated by a fullerene- C_{60} -modified carbon electrode, 491 (2003) 181

Lead

Multivariate curve resolution applied to Fourier transform infrared spectra of macromolecules: structural characterisation of the acid form and the salt form of humic acids in interaction with lead, 477 (2003) 201

Determination of chromium, cadmium and lead in food-packaging materials by axial inductively coupled plasma time-of-flight mass spectrometry, 479 (2003) 191

Dynamic ultrasound-assisted extraction of cadmium and lead from plants prior to electrothermal atomic absorption spectrometry, 480 (2003) 231

Evaluation of Rh, Ir, Ru, W-Rh, W-Ir and W-Ru as permanent modifiers for the determination of lead in ashes, coals, sediments, sludges, soils, and freshwaters by electrothermal atomic absorption spectrometry, 484 (2003) 233

Evaluation of Pb-Spec[®] for flow-injection solid-phase extraction preconcentration for the determination of trace lead in water and wine by flame atomic absorption spectrometry, 485 (2003) 9

Solid phase extraction of lead by Chelest Fiber Iry (aminopolycarboxylic acid-type cellulose), 485 (2003) 19

Mercury-free simultaneous determination of cadmium and lead at a glassy carbon electrode modified with multi-wall carbon nanotubes, 489 (2003) 215

Exploiting sequential injection analysis with bead injection and lab-on-valve for determination of lead using electrothermal atomic absorption spectrometry, 499 (2003) 167

Contribution of migration current to the voltammetric deposition and stripping of lead with and without added supporting electrolyte at a mercury-free carbon fibre microdisc electrode, 500 (2003) 307

Lead(II)

Adsorption of lead(II) and copper(II) on activated carbon by complexation with surface functional groups, 480 (2003) 171

Lee retention index

Use of boiling point-Lee retention index correlation for rapid review of gas chromatography-mass spectrometry data, 494 (2003) 235

Levamisole

Detection of levamisole residues in bovine liver and milk by immunobiosensor, 483 (2003) 181

Liquid chromatographic determination of levamisole in animal plasma: ultraviolet versus tandem mass spectrometric detection, 483 (2003) 215

Levofloxacin

Electrochemical study of the interaction of levofloxacin with DNA, 495 (2003) 61

L-Glutamate oxidase

Determination of glutamate pyruvate transaminase activity in clinical specimens using a biosensor composed of immobilized L-glutamate oxidase in a photo-crosslinkable polymer membrane on a palladium-deposited screen-printed carbon electrode, 481 (2003) 199

Lifetime

Lifetime-based optical sensor for high-level $p\text{CO}_2$ detection employing fluorescence resonance energy transfer, 480 (2003) 275

Light emitting diode

Liquid-liquid extraction procedure exploiting multicommutation in flow system for the determination of molybdenum in plants, 479 (2003) 185

Light emitting diode-based detectors. Absorbance, fluorescence and spectroelectrochemical measurements in a planar flow-through cell, 500 (2003) 337

Light scattering

Rapid in situ determination of total oil concentration in water using ultraviolet fluorescence and light scattering coupled with artificial neural networks, 478 (2003) 245

Lignin

Capillary electrophoretic determination of lignin degradation products obtained by permanganate oxidation, 484 (2003) 181

Lignin oxidation products

Capillary electrophoretic determination of lignin degradation products obtained by permanganate oxidation, 484 (2003) 181

Limit of detection

Estimation of the minimum detectable value for the determination of PCBs in fatty food samples by GC-ECD: a curvilinear calibration case, 483 (2003) 413

Linear solvation energy relationships

Study of gas-liquid partitioning of alkane solutes in several organic solvents by using principal component analysis and linear solvation energy relationships, 488 (2003) 107

Lipid oxidation

Review role of liquid chromatography-mass spectrometry in the analysis of oxidation products and antioxidants in biological systems, 492 (2003) 17

Liquid chromatography

Thiocalix[4]arenetetrasulfonate as specific pre-column chelating reagent for nickel(II) ion in kinetic differentiation mode high-performance liquid chromatography, 478 (2003) 163

Validated liquid chromatography method for assay of tizanidine in drug substance and formulated products, 478 (2003) 171

Separation of C_1 - C_5 aliphatic carboxylic acids on a highly sulfonated styrene-divinylbenzene copolymer resin column with a C_6 aliphatic carboxylic acid solution as the mobile phase, 481 (2003) 15

Rapid method for the determination of stanozolol in meat with supercritical fluid extraction and liquid chromatography-mass spectrometry, 483 (2003) 1

Determination of propoxur residues in eggs by liquid chromatography-diode array detection after treatment of stocked housing facilities for the poultry red mite (*Dermanyssus gallinae*), 483 (2003) 19

Multiresidue determination of fluoroquinolone antibiotics in eggs using liquid chromatography-fluorescence-mass spectrometry^{II}, 483 (2003) 39

Screening for gestagens in kidney fat using accelerated solvent extraction and liquid chromatography electrospray tandem mass spectrometry, 483 (2003) 51

Screening procedures for clenbuterol residue determination in bovine urine and liver matrices using enzyme-linked immunosorbent assay and liquid chromatography, 483 (2003) 61

Liquid chromatography with fluorescence detection of amoxicillin and ampicillin in feeds using pre-column derivatization, 483 (2003) 69

Simultaneous determination of 13 quinolones from feeds using accelerated solvent extraction and liquid chromatography, 483 (2003) 81

Isolation of bound residues of nitrofurans from tissue by solid-phase extraction with determination by liquid chromatography with UV and tandem mass spectrometric detection, 483 (2003) 91

Liquid chromatographic-tandem mass spectrometric detection of banned antibacterial growth promoters in animal feed, 483 (2003) 99

Determination of ractopamine in animal tissues by liquid chromatography-fluorescence and liquid chromatography/tandem mass spectrometry, 483 (2003) 137

Application of size-exclusion chromatography to the analysis of shrimp for sulfonamide residues, 483 (2003) 147

Evaluation of sample preparation for control of chloramphenicol residues in porcine tissues by enzyme-linked immunosorbent assay and liquid chromatography, 483 (2003) 307

Detection of cefquinome in milk by liquid chromatography and screening methods, 483 (2003) 363

Spectrophotometric, potentiometric and chromatographic pK_a values of polyphenolic acids in water and acetonitrile-water media, 484 (2003) 253

Liquid chromatographic determination of bisphenols based on intramolecular excimer-forming fluorescence derivatization, 488 (2003) 211

Investigation of trialkoxysilane hydrolysis kinetics using liquid chromatography with inductively coupled plasma atomic emission spectrometric detection and non-linear regression modeling, 489 (2003) 103

Determination of phenols by flow injection and liquid chromatography with on-line quinine-sensitized photo-oxidation and quenched luminol chemiluminescence detection, 493 (2003) 167

Liquid chromatography coupled to tandem mass spectrometry (LC-MS/MS)

Oxidative stress as a bio-marker of estrogen exposure in healthy veal calves, 483 (2003) 281

Liquid chromatography with mass spectrometry (LC-MS^{II})

Identification of "unknown analytes" in injection sites: a semi-quantitative interpretation, 483 (2003) 387

Liquid chromatography-mass spectrometry (LC-MS)

Quantitative analysis of cytokinins in plants by liquid chromatography-single-quadrupole mass spectrometry, 480 (2003) 207

Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

Solid-phase microextraction and liquid chromatography/mass spectrometry in drug analysis, 492 (2003) 49

Liquid chromatography-mass spectrometry/mass spectrometry

Validation of a multiresidue liquid chromatography-tandem mass spectrometric method for the quantitation and confirmation of corticosteroid residues in urine, according to the proposed SANCO 1085 criteria for banned substances, 483 (2003) 341

Liquid chromatography-mass spectrometry/MS

Liquid chromatographic determination of levamisole in animal plasma: ultraviolet versus tandem mass spectrometric detection, 483 (2003) 215

Liquid chromatography-tandem mass spectrometry

Value of alternative sample matrices in residue analysis for stanozolol, 483 (2003) 11

Screening and confirmation of chloramphenicol in shrimp tissue using ELISA in combination with GC-MS² and LC-MS², 483 (2003) 153

Improved screening capabilities in forensic toxicology by application of liquid chromatography-tandem mass spectrometry, 492 (2003) 171

Simultaneous analysis of folic acid and pantothenic acid in foods enriched with vitamins by stable isotope dilution assays, 495 (2003) 133

Liquid chromatography-ultraviolet

Liquid chromatographic determination of levamisole in animal plasma: ultraviolet versus tandem mass spectrometric detection, 483 (2003) 215

Liquid core waveguide

Liquid core waveguide-based optical spectrometry for field estimation of dissolved BTEX compounds in groundwater. A feasibility study, 485 (2003) 155

Liquid state

Room temperature phosphorescence in the liquid state as a tool in analytical chemistry, 488 (2003) 135

Liquid-core waveguide

Portable flow-injection analyzer with liquid-core waveguide based fluorescence, luminescence, and long path length absorbance detector, 479 (2003) 151

Liquid-liquid extraction

Liquid-liquid extraction procedure exploiting multicommution in flow system for the determination of molybdenum in plants, 479 (2003) 185

Flow injection manifolds for liquid-liquid extraction without phase separation assisted by ultrasound, 489 (2003) 1

Ultrasound-assisted continuous liquid-liquid extraction without phase separation and hydrolysis of paracetamol in suppositories, 489 (2003) 223

Liquid-phase microextraction

Liquid-phase microextraction of drugs from human breast milk, 491 (2003) 155

Lithography

Distance-dependent electron hopping conductivity and nanoscale lithography of chemically-linked gold monolayer protected cluster films, 496 (2003) 3

Litter

Simultaneous extraction of organotin, organolead and organomercury species from soils and litter, 493 (2003) 23

Liver

Screening procedures for clenbuterol residue determination in bovine urine and liver matrices using enzyme-linked immunosorbent assay and liquid chromatography, 483 (2003) 61

Surface plasmon resonance biosensor screening of poultry liver and eggs for nicarbazin residues, 483 (2003) 165

Detection of levamisole residues in bovine liver and milk by immunobiosensor, 483 (2003) 181

Development and optimisation of a method for the extraction of benzimidazoles from animal liver using supercritical carbon dioxide, 483 (2003) 313

Liver matrix

Detection of multi- β -agonist residues in liver matrix by use of a surface plasma resonance biosensor, 483 (2003) 187

Local methods

Delaunay triangulation method for multivariate calibration, 488 (2003) 1

Long path length

Multi-reflection photometric flow cell for use in flow injection analysis of estuarine waters, 499 (2003) 81

Flow-injection simultaneous determination of copper and iron in patient sera with 2-(5-bromo-2-pyridylazo)-5-(*N*-propyl-*N*-sulfopropylamino)aniline and its application to disease diagnosis, 499 (2003) 91

Long path length absorbance

Portable flow-injection analyzer with liquid-core waveguide based fluorescence, luminescence, and long path length absorbance detector, 479 (2003) 151

Lorazepam

Simple method for the determination of benzodiazepines in human body fluids by high-performance liquid chromatography-mass spectrometry, 492 (2003) 223

Low dispersion

Multi-reflection photometric flow cell for use in flow injection analysis of estuarine waters, 499 (2003) 81

Low-pressure valves

Valves and flow injection manifolds: an excellent marriage with unlimited versatility, 480 (2003) 181

4-*l*-Phenylalanyl-amino-pyridine

Study on the mechanism of chiral recognition with molecularly imprinted polymers, 489 (2003) 33

Luminescence

Room temperature phosphorescence in the liquid state as a tool in analytical chemistry, 488 (2003) 135

Luminescent properties

Investigation of the luminescent properties of terbium-anthranilate complexes and application to the determination of anthranilic acid derivatives in aqueous solutions, 476 (2003) 149

Luminol

On-line sorption preconcentration of metals based on mixed micelle cloud point extraction prior to their determination with micellar chemiluminescence. Application to the determination of chromium at ng l⁻¹ levels, 477 (2003) 223

Chemiluminescence of dithiocarbamate fungicides based on the luminol reaction, 494 (2003) 49

Reactivation of inactivated horseradish peroxidase with ethyleneurea and allantoin for determination of hydrogen peroxide by micro-flow injection horseradish peroxidase-catalyzed chemiluminescence, 495 (2003) 233

Clinical applications of chemiluminescence, 500 (2003) 279

Luminol-peroxide

Flow injection analysis of uric acid with a uricase- and horseradish peroxidase-coupled Sepharose column based luminol chemiluminescence system, 499 (2003) 41

L'vov platforms

Exploratory analysis of L'vov platform surfaces for electrothermal atomic absorption spectrometry by using three-way chemometric tools, 495 (2003) 177

Lymphocyte

Assay of amino acids in individual human lymphocytes by capillary zone electrophoresis with electrochemical detection, 478 (2003) 199

Lysine analysis

Flow injection differential potentiometric determination of lysine by using a lysine biosensor, 477 (2003) 315

Lysine biosensor

Flow injection differential potentiometric determination of lysine by using a lysine biosensor, 477 (2003) 315

M

Macrolide antibiotics

Determination of macrolide antibiotics in meat and fish by liquid chromatography-electrospray mass spectrometry, 492 (2003) 187

Macromolecules

Multivariate curve resolution applied to Fourier transform infrared spectra of macromolecules: structural characterisation of the acid form and the salt form of humic acids in interaction with lead, 477 (2003) 201

MAF-8HQ

Determination of trace metals in seawater by on-line column preconcentration inductively coupled plasma mass spectrometry using metal alkoxide glass immobilized 8-quinolinol, 499 (2003) 157

Magnetic beads

Particle-based detection of DNA hybridization using electrochemical stripping measurements of an iron tracer, 482 (2003) 149

Magnetic bio-nanoparticle

Piezoelectric immunosensor based on magnetic nanoparticles with simple immobilization procedures, 481 (2003) 191

Magnetoelastic sensor

A mass-sensitive pH sensor based on a stimuli-responsive polymer, 497 (2003) 123

Major and trace elements

Elemental fractionation of Si, Al, Ti, Fe, Ca, Mn, P, and Ba in five marine sedimentary reference materials: results from sequential extractions, 487 (2003) 117

Malachite Green

Ultratrace determination of phosphorus in ultrapurified water by a slope comparison method, 481 (2003) 311

Malic acid

Kinetic determination of L(-)-malic acid in wines using sequential injection analysis, 499 (2003) 99

Manganese

Extraction and preconcentration of manganese(II) from biological fluids (water, milk and blood serum) using supported liquid membrane and membrane probe methods, 485 (2003) 25

Manganese determination

On-line determination of manganese in solid seafood samples by flame atomic absorption spectrometry, 477 (2003) 149

Marine sediment

Elemental fractionation of Si, Al, Ti, Fe, Ca, Mn, P, and Ba in five marine sedimentary reference materials: results from sequential extractions, 487 (2003) 117

Second-order bilinear calibration for determining polycyclic aromatic compounds in marine sediments by solvent extraction and liquid chromatography with diode-array detection, 498 (2003) 47

Measurement of arsenic species in marine sediments by high-performance liquid chromatography-inductively coupled plasma mass spectrometry, 477 (2003) 279

Mass spectral library

Use of boiling point-Lee retention index correlation for rapid review of gas chromatography-mass spectrometry data, 494 (2003) 235

Mass spectrometry

- Rapid method for the determination of stanozolol in meat with supercritical fluid extraction and liquid chromatography-mass spectrometry, 483 (2003) 1
- Simultaneous detection of five coccidiostats in eggs by liquid chromatography-tandem mass spectrometry, 483 (2003) 27
- Multiresidue determination of fluoroquinolone antibiotics in eggs using liquid chromatography-fluorescence-mass spectrometry, 483 (2003) 39
- Determination of chloramphenicol in animal tissues and urine. Liquid chromatography-tandem mass spectrometry versus gas chromatography-mass spectrometry, 483 (2003) 125
- Validation of analytical methods based on mass spectrometric detection according to the "2002/657/EC" European decision: guideline and application, 483 (2003) 325
- Supersonic jet/multiphoton ionization/time-of-flight mass spectrometry for dioxin analysis. Effect of solvent in solution inlet/laser vaporization technique, 484 (2003) 163
- Capillary electrophoretic determination of lignin degradation products obtained by permanganate oxidation, 484 (2003) 181
- Rapid simultaneous determination of arginine and methylated arginines in human urine by high-performance liquid chromatography-mass spectrometry, 487 (2003) 145
- Determination of flunixin and ketoprofen in milk by liquid chromatography-tandem mass spectrometry, 488 (2003) 25
- Criteria for the identification of compounds by liquid chromatography-mass spectrometry and liquid chromatography-multiple mass spectrometry in forensic toxicology and doping analysis, 492 (2003) 69
- Determination of macrolide antibiotics in meat and fish by liquid chromatography-electrospray mass spectrometry, 492 (2003) 187
- Simple method for the determination of benzodiazepines in human body fluids by high-performance liquid chromatography-mass spectrometry, 492 (2003) 223
- Methanol controllable chromophoric supramolecular switch investigated by electrospray mass spectrometry, 495 (2003) 1
- Methodological advances for selenium speciation analysis in yeast, 500 (2003) 171

Material homogeneity

- Rare-earth glass reference materials for near-infrared spectrometry: sources of x-axis location variability, 490 (2003) 85

Mathematical model

- Mass distribution in a dynamic sample zone inside a flow injection manifold: modelling integrated conductimetric profiles, 477 (2003) 59

Mathematic-statistical concept

- Performance of a matrix-comprehensive in-house validation study by means of an especially designed software, 483 (2003) 351

Matrix

- Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

Matrix effect

- Correction function on biased results due to matrix effects. Application to the routine analysis of pesticide residues, 478 (2003) 281

Matrix-comprehensive in-house validation

- Performance of a matrix-comprehensive in-house validation study by means of an especially designed software, 483 (2003) 351

Maximum residue limit (MRL)

- Identification of "unknown analytes" in injection sites: a semi-quantitative interpretation, 483 (2003) 387

McNemar's test

- Comparison of supervised pattern recognition methods with McNemar's statistical test. Application to qualitative analysis of sugar beet by near-infrared spectroscopy, 477 (2003) 187

MCR

- Determination of amoxicillin in pharmaceuticals using sequential injection analysis (SIA). Evaluation of the presence of interferences using multivariate curve resolution, 485 (2003) 195

Measurement of acidity

- Response to high acidity and basicity at a platinum electrode in chronopotentiometry, 478 (2003) 337

Measurement uncertainty

- Comparison of different approaches to estimate the uncertainty of a liquid chromatographic assay, 480 (2003) 39

Meat

- Rapid method for the determination of stanozolol in meat with supercritical fluid extraction and liquid chromatography-mass spectrometry, 483 (2003) 1
- Determination of macrolide antibiotics in meat and fish by liquid chromatography-electrospray mass spectrometry, 492 (2003) 187

Mebendazole

- Liquid chromatographic-electrospray tandem mass spectrometric method for the determination of mebendazole and its hydrolysed and reduced metabolites in sheep muscle, 483 (2003) 111

Me-BTABr

- On-line preconcentration system using a minicolumn of polyurethane foam loaded with Me-BTABr for zinc determination by Flame Atomic Absorption Spectrometry, 481 (2003) 283

Mechanical unfolding

- Force mode atomic force microscopy as a tool for protein folding studies, 479 (2003) 87

Mediator

- A mechanistic evaluation of the amperometric response of reduced thiols in quinone mediated systems, 491 (2003) 203

Medicinal plants

- Pressurized hot water extraction of berberine, baicalein and glycyrrhizin in medicinal plants, 482 (2003) 81

Medieval soil

Element determination in medieval soil samples by total reflection X-ray fluorescence analysis, 480 (2003) 327

MEKC

Analysis of nine rhubarb anthraquinones and bianthrone by micellar electrokinetic chromatography using experimental design, 482 (2003) 47

Determination of melatonin in commercial preparations by micellar electrokinetic chromatography and spectrofluorimetry, 488 (2003) 97

Separation of arsines and trinitrotoluene by reversed phase high performance liquid chromatography and micellar electrokinetic capillary chromatography, 495 (2003) 239

Melatonin

Determination of melatonin in commercial preparations by micellar electrokinetic chromatography and spectrofluorimetry, 488 (2003) 97

Melittin

Measuring melittin binding to planar supported lipid bilayer by chiral second harmonic generation, 496 (2003) 143

Membrane and helical sorbent trap

Membrane in tandem with a helical sorbent trap as continuous sampling technique of the polyvinyl chloride thermo-oxidative degradation products for their on-line gas chromatographic monitoring, 491 (2003) 163

Membrane composition factors

Validation of the membrane composition effect on the flow-injection signal profile of chalcogenide-based ion-selective sensors: a model study using electrochemical approach. Hg(II) flow-injection detector case, 476 (2003) 55

Membrane probe

Extraction and preconcentration of manganese(II) from biological fluids (water, milk and blood serum) using supported liquid membrane and membrane probe methods, 485 (2003) 25

Mercury

Speciation analysis of mercury in seafood by using high-performance liquid chromatography on-line coupled with cold-vapor atomic fluorescence spectrometry via a post column microwave digestion, 477 (2003) 131

New triiodomercurate-modified carbon paste electrode for the potentiometric determination of mercury, 478 (2003) 329

Selective extractions to assess the biogeochemically relevant fractionation of inorganic mercury in sediments and soils, 479 (2003) 233

Column preconcentration of mercury as HgI_4^{2-} using methyltriocetylammmonium chloride-naphthalene adsorbent with subsequent anodic stripping-differential pulse voltammetric determination, 481 (2003) 23

Measurement of the chemical and morphological changes that occur on gold surfaces following thermal desorption and acid dissolution of adsorbed mercury, 496 (2003) 279

Mercury film

Stripping chronopotentiometric detection of copper using screen-printed three-electrode system—application to acetic-acid bioavailable fraction from soil samples, 493 (2003) 95

Mercury speciation

Determination of mercury species with a resin functionalized with a 1,2-bis(*o*-aminophenylthio)ethane moiety, 477 (2003) 73

Investigation of equilibration and uncertainty contributions for the determination of inorganic mercury and methylmercury by isotope dilution inductively coupled plasma mass spectrometry, 500 (2003) 155

Mercury speciation analysis

Multicapillary gas chromatography coupled to inductively coupled plasma-time-of-flight mass spectrometry for rapid mercury speciation analysis, 489 (2003) 45

Mercury species

Routine analysis of mercury species using commercially available instrumentation: chemometric optimisation of the instrumental variables, 486 (2003) 255

Mercury species degradation

Stability study on a Westöo-based methodology to determine organomercury compounds in polluted soil samples, 480 (2003) 219

Metabolism

Modification of 17 β -estradiol metabolite profile in steer edible tissues after estradiol implant administration, 483 (2003) 289

Identification of anabolic steroids in serum, urine, sweat and hair. Comparison of metabolic patterns, 483 (2003) 299

Liquid chromatography-electrospray ionization mass spectrometry for metabolism and pharmacokinetic studies of ginsenoside Rg3, 492 (2003) 283

Metabolite

Application of liquid chromatography-mass spectrometry in the determination of oxazaphosphorines and their metabolites, 492 (2003) 147

Electrospray ionisation mass spectrometric behaviour of selected drugs and their metabolites, 492 (2003) 1

Simultaneous determination of sibutramine and its *N*-desmethyl metabolites in human plasma by liquid chromatography-electrospray ionization-mass spectrometry. Method and clinical applications, 492 (2003) 241

Advantages and disadvantages of nuclear magnetic resonance spectroscopy as a hyphenated technique, 497 (2003) 1

Metabolomics

Improved analysis of multivariate data by variable stability scaling: application to NMR-based metabolic profiling, 490 (2003) 265

Metabonomics

NMR-based metabonomic toxicity classification: hierarchical cluster analysis and *k*-nearest-neighbour approaches, 490 (2003) 3

Toxicity classification from metabonomic data using a density superposition approach: 'CLOUDS', 490 (2003) 109

Improved analysis of multivariate data by variable stability scaling: application to NMR-based metabolic profiling, 490 (2003) 265

Metal

Free and sol-gel immobilized alkaline phosphatase-based biosensor for the determination of pesticides and inorganic compounds, 484 (2003) 45

Metal complexation

Analyses of three-way data from equilibrium and kinetic investigations, 490 (2003) 99

Comparative study of binding strengths and thermodynamic aspects of Cu(II) and Ni(II) with humic acid by Schubert's ion-exchange method, 497 (2003) 235

Metal ion

Novel thiocyanate-selective membrane sensors based on di-, tetra-, and hexa-imidepyridine ionophores, 482 (2003) 9

Enhancing microdialysis recovery of metal ions by incorporating poly-L-aspartic acid and poly-L-histidine in the perfusion liquid, 482 (2003) 91

Cellulose functionalized with 8-hydroxyquinoline: new method of synthesis and applications as a solid phase extractant in the determination of metal ions by flame atomic absorption spectrometry, 485 (2003) 221

Metal ions extraction

Room temperature ionic liquid as a novel medium for liquid/liquid extraction of metal ions, 488 (2003) 183

Metal ions preconcentration

Room temperature ionic liquid as a novel medium for liquid/liquid extraction of metal ions, 488 (2003) 183

Metal modification

Study of metal-loaded activated charcoals for the separation and determination of selenium species by energy dispersive X-ray fluorescence analysis, 478 (2003) 229

Metal speciation

Heavy metal-induced inhibition of *Aspergillus niger* nitrate reductase: applications for rapid contaminant detection in aqueous samples, 480 (2003) 131

Metalaxyl

Simultaneous determination of Folpet and Metalaxyl in pesticide formulations by flow injection Fourier transform infrared spectrometry, 480 (2003) 11

Metal-binding proteins

Separation of selected metal-binding proteins with capillary zone electrophoresis, 477 (2003) 1

Metal-containing proteins

Detection of metalloproteins in human liver cytosol by synchrotron radiation X-ray fluorescence after sodium dodecyl sulphate polyacrylamide gel electrophoresis, 485 (2003) 131

Metal-ion complexation

Spectroscopic studies of proton-transfer and metal-ion binding of a solution-phase model for silica-immobilized 8-hydroxyquinoline, 494 (2003) 105

Metallothioneins

Large volume sample stacking capillary electrophoresis for metallothioneins analysis in eel liver, 486 (2003) 183

Metals

Multivariate analytical sensitivity in the determination of selenium, copper, lead and cadmium by stripping voltammetry when using soft calibration, 489 (2003) 85

Metanephrine

Catecholamines derivatized with 4-fluoro-7-nitro-2,1,3-benzoxadiazole: characterization of chemical structure and fluorescence properties, 478 (2003) 259

Methanol

Methanol controllable chromophoric supramolecular switch investigated by electrospray mass spectrometry, 495 (2003) 1

Method validation

Liquid chromatographic-electrospray tandem mass spectrometric method for the determination of mebendazole and its hydrolysed and reduced metabolites in sheep muscle, 483 (2003) 111

Development and optimisation of a method for the extraction of benzimidazoles from animal liver using supercritical carbon dioxide, 483 (2003) 313

3-Methyl-2-benzothiazolinone hydrazone

Multi-pumping flow system for spectrophotometric determination of bromhexine, 499 (2003) 107

Methylbenzo[a]pyrene isomers

Separation of methylated isomers of benzo[a]pyrene using micellar electrokinetic chromatography, 496 (2003) 165

Methylene blue

Trace sulfide determination in oxic freshwaters, 477 (2003) 113

Simultaneous determination of methylene blue and new methylene blue by slab optical waveguide spectroscopy and artificial neural networks, 487 (2003) 109

Electrochemical study of methylene blue incorporated into mordeite type zeolite and its application for amperometric determination of ascorbic acid in real samples, 491 (2003) 193

Methylmercury

Stability study on a Westöo-based methodology to determine organomercury compounds in polluted soil samples, 480 (2003) 219

Methylparaben

Monolithic columns—a new concept of separation in the sequential injection technique, 499 (2003) 205

2-Methylphenol

Electrosynthesis and permselective characterisation of phenol-based polymers for biosensor applications, 495 (2003) 33

Methylsalicylate

Coupling of monolithic columns with sequential injection technique. A new separation approach in flow methods, 494 (2003) 133

Methylxanthines

Simultaneous determination of methylxanthines in coffees and teas by UV-Vis spectrophotometry and partial least squares, 493 (2003) 83

Metronidazole

Production and characterisation of polyclonal antibodies to a range of nitroimidazoles, 483 (2003) 193

Micellar electrokinetic chromatography

Development and validation of chemometrics-assisted spectrophotometry and micellar electrokinetic chromatography for the determination of four-component pharmaceuticals, 489 (2003) 77

Separation of methylated isomers of benzo[a]pyrene using micellar electrokinetic chromatography, 496 (2003) 165

Micellar media

Micellar microwave-assisted extraction combined with solid-phase microextraction for the determination of polycyclic aromatic hydrocarbons in a certified marine sediment, 477 (2003) 81

Micelle-mediated spectrofluorimetric determination of ampicillin based on metal ion-catalysed hydrolysis, 484 (2003) 223

Micellar medium

Determination of napropamide in technical formulations, soil and vegetable samples by sensitised fluorescence: validation of the method, 491 (2003) 37

Micellar-enhanced chemiluminescence detection

On-line sorption preconcentration of metals based on mixed micelle cloud point extraction prior to their determination with micellar chemiluminescence. Application to the determination of chromium at ng l^{-1} levels, 477 (2003) 223

Microarray

Electronic concentration of negatively-charged molecules on a microfabricated biochip, 484 (2003) 1

Microchip detection

Optimisation of thermal lens microscopic measurements in a microchip, 480 (2003) 79

Microchip electrophoresis

Developments toward a complete micro-total analysis system for Duchenne muscular dystrophy diagnosis, 500 (2003) 223

Microcolumn

Automated on-line separation-preconcentration system for platinum determination by electrothermal atomic absorption spectrometry, 494 (2003) 97

Microcylinder electrodes

Characterisation of a simple electrochemical detector for high-performance liquid chromatography and flow-injection analysis based on carbon microcylinder electrodes, 497 (2003) 175

Microdialysis

Enhancing microdialysis recovery of metal ions by incorporating poly-L-aspartic acid and poly-L-histidine in the perfusion liquid, 482 (2003) 91

Microdialysis sampling

Microdialysis sampling and monitoring of uric acid in vivo by a chemiluminescence reaction and an enzyme on immobilized chitosan support membrane, 478 (2003) 23

Microelectrodes

Characterisation of a simple electrochemical detector for high-performance liquid chromatography and flow-injection analysis based on carbon microcylinder electrodes, 497 (2003) 175

Microextraction

Liquid-liquid microbatch extraction system for rapid mutual separation of fission products, 484 (2003) 139

Microfabricated device

Microfabricated bioreactor chips for immobilised enzyme assays, 486 (2003) 149

Microfabrication

Electronic concentration of negatively-charged molecules on a microfabricated biochip, 484 (2003) 1

Rapid prototyping of glass microchannels, 496 (2003) 205

Microfluidic device

Continuous-flow DNA and RNA amplification chip combined with laser-induced fluorescence detection, 494 (2003) 1

Optically gated vacancy electrophoresis in microfluidic devices, 496 (2003) 195

Microfluidics

Rapid prototyping of glass microchannels, 496 (2003) 205

Microgel

Fluorescence nonradiative energy transfer analysis of crosslinker heterogeneity in core-shell hydrogel nanoparticles, 496 (2003) 53

Microhotplate sensor array

Selection of quasi-optimal inputs in chemometrics modeling by artificial neural network analysis, 490 (2003) 31

Micro-organism

Microplate-based microbial assay for risk assessment and (eco)toxic fingerprinting of chemicals, 485 (2003) 121

Microphysiometer

Modification of the CytosensorTM microphysiometer to simultaneously measure extracellular acidification and oxygen consumption rates, 496 (2003) 93

Micro-sampling

Flow injection on-line dilution for flame atomic absorption spectrometry by micro-sample introduction and dispersion using syringe pumps, 481 (2003) 273

Micro-total analysis system

Developments toward a complete micro-total analysis system for Duchenne muscular dystrophy diagnosis, 500 (2003) 223

Microwave

Microwave enhanced extraction of wool wax from solid wool scour wastes, 494 (2003) 255

Microwave digestion

Speciation analysis of mercury in seafood by using high-performance liquid chromatography on-line coupled with cold-vapor

atomic fluorescence spectrometry via a post column microwave digestion, 477 (2003) 131

Ashing and microwave digestion of aerosol samples with a polypropylene fibrous filter matrix, 482 (2003) 129

Rapid determination of chemical oxygen demand using a focused microwave heating system featuring temperature control, 491 (2003) 99

Microwave irradiation

Determination of endogenous and synthetic glucocorticoids in human urine by gas chromatography-mass spectrometry following microwave-assisted derivatization, 489 (2003) 233

Microwave-assisted digestion

Hydride generation atomic fluorescence spectrometric determination of ultratracess of selenium and tellurium in cow milk, 481 (2003) 291

Microwave-assisted extraction

Micellar microwave-assisted extraction combined with solid-phase microextraction for the determination of polycyclic aromatic hydrocarbons in a certified marine sediment, 477 (2003) 81

Mid-infrared

Quantitation of κ -, ι - and λ -carrageenans by mid-infrared spectroscopy and PLS regression, 480 (2003) 23

Mid-infrared evanescent wave sensor

Sol-gel based mid-infrared evanescent wave sensors for detection of organophosphate pesticides in aqueous solution, 496 (2003) 339

Milk

Detection of levamisole residues in bovine liver and milk by immunobiosensor, 483 (2003) 181

Detection of cefquinome in milk by liquid chromatography and screening methods, 483 (2003) 363

Determination of mono- and disaccharides in milk and milk products by high-performance anion-exchange chromatography with pulsed amperometric detection, 485 (2003) 43

Determination of flunixin and ketoprofen in milk by liquid chromatography-tandem mass spectrometry, 488 (2003) 25

Non-chromatographic speciation analysis of arsenic and antimony in milk hydride generation atomic fluorescence spectrometry, 493 (2003) 195

Milk lactate determination with a rotating bioreactor based on an electron transfer mediated by osmium complexes incorporating a continuous-flow/stopped-flow system, 498 (2003) 155

Milk analysis

Hydride generation atomic fluorescence spectrometric determination of ultratracess of selenium and tellurium in cow milk, 481 (2003) 291

Milk processing

Food processing effects on residues: penicillins in milk and yoghurt, 483 (2003) 73

Milking frequency

Influence of milking frequency on withdrawal period after application of β -lactam antibiotic-based drugs, 483 (2003) 241

Mimic enzyme

Mn(II)-sodium dodecyl sulphate complex mimic enzyme-catalyzed fluorescence quenching of Pyronine B by hydrogen peroxide, 480 (2003) 143

Mineral soil

Simultaneous extraction of organotin, organolead and organomercury species from soils and litter, 493 (2003) 23

Miniaturization

Sensitive miniature single-particle immunoassay of prostate-specific antigen using time-resolved fluorescence, 482 (2003) 157
Continuous-flow DNA and RNA amplification chip combined with laser-induced fluorescence detection, 494 (2003) 1

Miniaturized ion-selective electrode

Miniaturized back-side contact transducer for potentiometric sensors, 485 (2003) 103

Minimum detectable value

Estimation of the minimum detectable value for the determination of PCBs in fatty food samples by GC-ECD: a curvilinear calibration case, 483 (2003) 413

MIP

Synthesis of molecular imprinted organic-inorganic hybrid polymer binding caffeine, 481 (2003) 175

MIP/AES

Routine analysis of mercury species using commercially available instrumentation: chemometric optimisation of the instrumental variables, 486 (2003) 255

Mirosamicin

Determination of macrolide antibiotics in meat and fish by liquid chromatography-electrospray mass spectrometry, 492 (2003) 187

MISPE

Highly selective fenuron-imprinted polymer with a homogeneous binding site distribution prepared by precipitation polymerisation and its application to the clean-up of fenuron in plant samples, 482 (2003) 165

Mixed MECC

Determination of flavour components in natural vanilla extracts and synthetic flavourings by mixed micellar electrokinetic capillary chromatography, 485 (2003) 179

Mixture resolution

The evolution of chemometrics, 500 (2003) 365

Mn determination

Preconcentration of manganese(II) from natural and sea water on a palmitoyl quinolin-8-ol functionalized XAD copolymer resin and spectrophotometric determination with the formaldoxime reagent, 485 (2003) 205

Mn(II)

Speciation of Mn(II) and Mn(VII) by on-line spectrophotometric sequential injection analysis, 499 (2003) 129

Mn(II)-SDS complex

Mn(II)-sodium dodecyl sulphate complex mimic enzyme-catalyzed fluorescence quenching of Pyronine B by hydrogen peroxide, 480 (2003) 143

Mn(VII)

Speciation of Mn(II) and Mn(VII) by on-line spectrophotometric sequential injection analysis, 499 (2003) 129

Mo(VI) determination

Direct voltammetric determination of Mo(VI) in plants: the need for a multivariate study of interferences, 487 (2003) 243

Mode-filtered light

Dual-light source excitation for mode-filtered light detection, 481 (2003) 301

Model deficiency

Mitigating model deficiency in three-way data analysis by the combination of background constraining and iterative correcting techniques, 487 (2003) 171

Model systems

Sorption-scintillation determination of ^{90}Sr in natural water, 480 (2003) 151

Model V

Organic complexation of Al and Fe in acidic soil solutions. Comparison of diffusive gradients in thin films analyses with Models V and VI predictions, 498 (2003) 105

Model VI

Organic complexation of Al and Fe in acidic soil solutions. Comparison of diffusive gradients in thin films analyses with Models V and VI predictions, 498 (2003) 105

Modified alternating least squares (MALS)

Application of modified alternating least squares regression to spectroscopic image analysis, 476 (2003) 93

Modified carbon paste electrode

New triiodomercurate-modified carbon paste electrode for the potentiometric determination of mercury, 478 (2003) 329

Modified electrode

Electrochemical oxidation of L-cysteine mediated by a fullerene- C_{60} -modified carbon electrode, 491 (2003) 181

Voltammetric and amperometric determination of sulfite using an aluminum electrode modified by nickel pentacyanonitrosylferate film. Application to the analysis of some real samples, 497 (2003) 133

Electrocatalytic activity of a new nanostructured polymeric tetra-ruthenated porphyrin film for nitrite detection, 480 (2003) 97

modifier

One-step pressurized liquid extraction method for the analysis of polycyclic aromatic hydrocarbons, 498 (2003) 55

Moisture analysis

Continuous wave free precession. Practical analytical tool for low-resolution nuclear magnetic resonance measurements, 478 (2003) 313

Molar absorptivity

Colorimetric determination of amino acids using genipin from *Gardenia jasminoides*, 480 (2003) 267

Gold and alloy nanoparticles in solution and thin film assembly: spectrophotometric determination of molar absorptivity, 496 (2003) 17

Mole ratio method

Rank annihilation factor analysis for spectrophotometric study of complex formation equilibria, 486 (2003) 109

Molecular imprinting

Molecular recognition properties of peptide mixtures obtained by polymerisation of amino acids in the presence of estradiol, 481 (2003) 41

Study on the mechanism of chiral recognition with molecularly imprinted polymers, 489 (2003) 33

Evaluation of the recognition ability of molecularly imprinted materials by surface plasmon resonance (SPR) spectroscopy, 489 (2003) 191

Molecular recognition

Molecular recognition properties of peptide mixtures obtained by polymerisation of amino acids in the presence of estradiol, 481 (2003) 41

Evaluation of new strategies to prepare templated polymers with sufficient oligosaccharide recognition capacity, 484 (2003) 53

Evaluation of the recognition ability of molecularly imprinted materials by surface plasmon resonance (SPR) spectroscopy, 489 (2003) 191

Fluorescence and room temperature phosphorescence of 6-bromo-2-naphthol in β -cyclodextrin solution and its selective molecular recognition for cyclohexane, 494 (2003) 71

Molecular weight

Using solution equilibria to determine average molecular weight of the Suwannee River fulvic acids, 496 (2003) 325

Molecularly imprinted polymer

Molecularly imprinted solid phase extraction for rapid screening of cephalixin in human plasma and serum, 481 (2003) 165

Picolinamide- $\text{Cu}(\text{Ac})_2$ -imprinted polymer with high potential for recognition of picolinamide-copper acetate complex, 482 (2003) 175

Flow injection chemiluminescence determination of epinephrine using epinephrine-imprinted polymer as recognition material, 489 (2003) 183

Molecular sensing of 3-chloro-1,2-propanediol by molecular imprinting, 491 (2003) 15

Molybdenum

Sensitive and selective determination of molybdenum by flow injection chemiluminescence method combined with controlled potential electrolysis technique, 481 (2003) 239

Molybdenum in plant

Liquid-liquid extraction procedure exploiting multicommutation in flow system for the determination of molybdenum in plants, 479 (2003) 185

Molybdenum oxide

Electrochemical quartz crystal microbalance study of the electro-deposition mechanism of molybdenum oxide thin films from peroxy-polymolybdate solution, 496 (2003) 39

Molybdophosphate

Ultratrace determination of phosphorus in ultrapurified water by a slope comparison method, 481 (2003) 311

Monoaza-12-crown-4

Chemical sensor for lanthanum(III) determination using aza-crown as ionophore in poly(vinyl chloride) matrix, 486 (2003) 199

Monoclonal antibody

Probing direct binding affinity in electrochemical antibody-based sensors, 496 (2003) 103

Monohydrogenphosphate

Novel monohydrogenphosphate sensor based on vanadyl salophen, 481 (2003) 85

Monolayers

The effect of hydrogen-bonding and terminal group structure on the dynamics of Ar collisions with self-assembled monolayers, 496 (2003) 249

Monolithic column

Coupling of monolithic columns with sequential injection technique. A new separation approach in flow methods, 494 (2003) 133

Monolithic columns—a new concept of separation in the sequential injection technique, 499 (2003) 205

Monosaccharides

Determination of mono- and disaccharides in milk and milk products by high-performance anion-exchange chromatography with pulsed amperometric detection, 485 (2003) 43

Mono-segmentation

Zone fluidics in flow analysis: potentialities and applications, 499 (2003) 29

Mordenite zeolite

Electrochemical study of methylene blue incorporated into mordenite type zeolite and its application for amperometric determination of ascorbic acid in real samples, 491 (2003) 193

Morin

Application of adsorptive stripping voltammetry to the determination of bismuth and copper in the presence of morin, 491 (2003) 63

Moss samples

Determination of arsenic, iron and selenium in moss samples using hexapole collision cell, inductively coupled plasma-mass spectrometry, 493 (2003) 3

MRLs

Immunochemical rapid test for multiresidue analysis of antimicrobial drugs in milk using monoclonal antibodies and hapten-glucose oxidase conjugates, 495 (2003) 11

Multi-calibrant analysis

Atrazine analysis using an amperometric immunosensor based on single-chain antibody fragments and regeneration-free multi-calibrant measurement, 500 (2003) 287

MS spectra

Separation of selected metal-binding proteins with capillary zone electrophoresis, 477 (2003) 1

MSFIA

Multisyringe flow injection system for total inorganic selenium determination by hydride generation-atomic fluorescence spectrometry, 486 (2003) 217

MSPC

Dynamic time warping of spectroscopic BATCH data, 498 (2003) 133

Multi- β -agonist

Detection of multi- β -agonist residues in liver matrix by use of a surface plasma resonance biosensor, 483 (2003) 187

Multianalyte testing

Immunochemical rapid test for multiresidue analysis of antimicrobial drugs in milk using monoclonal antibodies and hapten-glucose oxidase conjugates, 495 (2003) 11

Multicapillary gas chromatography

Multicapillary gas chromatography coupled to inductively coupled plasma-time-of-flight mass spectrometry for rapid mercury speciation analysis, 489 (2003) 45

Multichannel

Dual amperometric biosensor device for analysis of binary mixtures of phenols by multivariate calibration using partial least squares, 485 (2003) 263

Multi-channel detection

Dual-light source excitation for mode-filtered light detection, 481 (2003) 301

Multi-channel stopped-flow system

Assay of α -glucosidase inhibitory activity using flow-biosensor system, 479 (2003) 135

Multicommution

Liquid-liquid extraction procedure exploiting multicommution in flow system for the determination of molybdenum in plants, 479 (2003) 185

Analysers of chromium and/or cobalt, 488 (2003) 243

Zone fluidics in flow analysis: potentialities and applications, 499 (2003) 29

Multicomponent system

Chemometrics applied to unravel multicomponent processes and mixtures. Revisiting latest trends in multivariate resolution, 500 (2003) 195

Multicriteria decision making approach

Investigation of the chiral separation of cisapride on Chiralcel OJ and OJ-R columns, 498 (2003) 9

Multi-dimensional

Real-time two-dimensional wavelet compression and its application to real-time modeling of ion mobility data, 490 (2003) 59

Multidimensional wavelet compression

SIMPLISMA applied to two-dimensional wavelet compressed ion mobility spectrometry data, 484 (2003) 75

Multi-layer neural networks

Comparison of partial least squares regression and multi-layer neural networks for quantification of nonlinear systems and application to gas phase Fourier transform infrared spectra, 489 (2003) 125

Multilayer optical coatings

Hybrid genetic algorithm-tabu search approach for optimising multilayer optical coatings, 490 (2003) 211

Multiparametric probe

An in situ filtration system for trace element determination in suspended particulate matter, 498 (2003) 165

Multiphoton ionization

Supersonic jet/multiphoton ionization/time-of-flight mass spectrometry for dioxin analysis. Effect of solvent in solution inlet/laser vaporization technique, 484 (2003) 163

Multiple linear regression

Prediction of bioconcentration factor using genetic algorithm and artificial neural network, 486 (2003) 101

Study of the relationship between the structure and the relative mobility of chlorophenols in different buffers modified by different organic additives by capillary zone electrophoresis, 486 (2003) 191

Multiple-step equilibria

Spectroscopic studies of proton-transfer and metal-ion binding of a solution-phase model for silica-immobilized 8-hydroxyquinoline, 494 (2003) 105

Multi-pumping flow system

Multi-pumping flow system for spectrophotometric determination of bromhexine, 499 (2003) 107

Multipurpose LED-based absorbance/fluorescence detector

Portable flow-injection analyzer with liquid-core waveguide based fluorescence, luminescence, and long path length absorbance detector, 479 (2003) 151

MultiSimplex

Routine analysis of mercury species using commercially available instrumentation: chemometric optimisation of the instrumental variables, 486 (2003) 255

Multi-species

Microplate-based microbial assay for risk assessment and (eco)toxic fingerprinting of chemicals, 485 (2003) 121

Multispectral image segmentation

SpaRef: a clustering algorithm for multispectral images, 490 (2003) 303

Multistep chronoamperometry

A wall-jet disc electrode for simultaneous and continuous on-line measurement of sodium dithionite, sulfite and indigo concentrations by means of multistep chronoamperometry, 486 (2003) 73

Multivariable curve resolution

New convergence criterion for multi-variable curve resolution, 495 (2003) 195

Multivariable least-squares analysis

Spectroscopic studies of proton-transfer and metal-ion binding of a solution-phase model for silica-immobilized 8-hydroxyquinoline, 494 (2003) 105

Multivariate

High-speed gas chromatographic separations with diaphragm valve-based injection and chemometric analysis as a gas chromatographic "sensor", 490 (2003) 223

Multivariate analysis

Peak alignment of NMR signals by means of a genetic algorithm, 487 (2003) 189

Multivariate analytical sensitivity

Multivariate analytical sensitivity in the determination of selenium, copper, lead and cadmium by stripping voltammetry when using soft calibration, 489 (2003) 85

Multivariate calibration

Standardization of SPE signals in multicomponent analysis of three benzimidazolic pesticides by spectrofluorimetry, 477 (2003) 211

A kinetic spectrophotometric method for the determination of ternary mixtures of reducing sugars with the aid of artificial neural networks and multivariate calibration, 480 (2003) 53

Dual amperometric biosensor device for analysis of binary mixtures of phenols by multivariate calibration using partial least squares, 485 (2003) 263

Delaunay triangulation method for multivariate calibration, 488 (2003) 1

Development and validation of chemometrics-assisted spectrophotometry and micellar electrokinetic chromatography for the determination of four-component pharmaceuticals, 489 (2003) 77

Increasing the scope and power of flow-injection analysis through chemometric approaches, 500 (2003) 299

The evolution of chemometrics, 500 (2003) 365

Multivariate curve resolution

Influence of selectivity and sensitivity parameters on detection limits in multivariate curve resolution of chromatographic second-order data, 476 (2003) 111

Multivariate curve resolution applied to Fourier transform infrared spectra of macromolecules: structural characterisation of the acid form and the salt form of humic acids in interaction with lead, 477 (2003) 201

SIMPLISMA applied to two-dimensional wavelet compressed ion mobility spectrometry data, 484 (2003) 75

Spectral transformations for deconvolution methods applied on gas chromatography-mass spectrometry data, 488 (2003) 231

Assessment of techniques for DOSY NMR data processing, 490 (2003) 231

Multivariate curve resolution—alternating least squares (MCR-ALS)

Evaluation of synthetic liquid chromatography—diode array detection—mass spectrometry data for the determination of enzyme kinetics, 490 (2003) 17

Multivariate data analysis

Mutual peak matching in a series of HPLC–DAD mixture analyses, 490 (2003) 41

Multivariate calibration. What is in chemometrics for the analytical chemist?, 500 (2003) 185

Multivariate resolution

Chemometrics applied to unravel multicomponent processes and mixtures. Revisiting latest trends in multivariate resolution, 500 (2003) 195

Multivitamin products

Simultaneous analysis of folic acid and pantothenic acid in foods enriched with vitamins by stable isotope dilution assays, 495 (2003) 133

Multi-walled carbon nanotubes

Multi-walled carbon nanotubes packed cartridge for the solid-phase extraction of several phthalate esters from water samples and their determination by high performance liquid chromatography, 494 (2003) 149

Multi-way analysis

Multivariate calibration. What is in chemometrics for the analytical chemist?, 500 (2003) 185

Murexide

Development of a method for estimating an accurate equivalence point in nickel titration of cyanide ions, 476 (2003) 159

Muscle

Determination of chloramphenicol in animal tissues and urine. Liquid chromatography–tandem mass spectrometry versus gas chromatography–mass spectrometry, 483 (2003) 125

Evaluation of sample preparation for control of chloramphenicol residues in porcine tissues by enzyme-linked immunosorbent assay and liquid chromatography, 483 (2003) 307

Muscle relaxants

Meeting challenges in forensic toxicology in Japan by liquid chromatography/mass spectrometry, 492 (2003) 83

Mushroom tissue

Mushroom tissue-based flow-injection fluorescence system for the determination of isoprenaline, 494 (2003) 63

Mutation

Detection of β -thalassaemia by a DNA piezoelectric biosensor coupled with polymerase chain reaction, 481 (2003) 55

Mycophenolate

Thermodynamic dissociation constants of silychristin, silybin, silydianin and mycophenolate by the regression analysis of spectrophotometric data, 486 (2003) 125

Mycophenolic acid

Determination of 18 nucleobases, nucleosides and nucleotides in human peripheral blood mononuclear cells by isocratic solvent-generated ion-pair chromatography, 481 (2003) 245

Myoglobin

Heme protein–gluten films: voltammetric studies and their electrocatalytic properties, 481 (2003) 91

N**NAD⁺-dependent dehydrogenase**

Potentialities of expanded natural graphite as a new transducer for NAD⁺-dependent dehydrogenase amperometric biosensors, 484 (2003) 25

NADH

Electrochemical and catalytic investigation of carbon paste modified with Toluidine Blue O covalently immobilised on silica gel, 476 (2003) 43

NADH sensor

Potentialities of expanded natural graphite as a new transducer for NAD⁺-dependent dehydrogenase amperometric biosensors, 484 (2003) 25

Na₄EDTA

One-step pressurized liquid extraction method for the analysis of polycyclic aromatic hydrocarbons, 498 (2003) 55

Nafcillin

Sensitive flow-injection system for nafcillin determination based on non-protected room temperature phosphorescence, 498 (2003) 69

Nafion

Modification of the CytosensorTM microphysiometer to simultaneously measure extracellular acidification and oxygen consumption rates, 496 (2003) 93

Naltrexone

Spectrofluorimetric determination of naltrexone by a kinetic method using the stopped-flow technique, 495 (2003) 249

Nandrolone

Identification of anabolic steroids in serum, urine, sweat and hair. Comparison of metabolic patterns, 483 (2003) 299

Nano-liquid chromatography–mass spectrometry

Nano-high-performance liquid chromatography–electron ionization mass spectrometry approach for environmental analysis, 493 (2003) 125

Nanoparticle

Particle-based detection of DNA hybridization using electrochemical stripping measurements of an iron tracer, 482 (2003) 149
Sensitive miniature single-particle immunoassay of prostate-specific antigen using time-resolved fluorescence, 482 (2003) 157

Differential pulse polarography: a suitable technique for monitoring drug release from polymeric nanoparticle dispersions, 491 (2003) 57

Distance-dependent electron hopping conductivity and nanoscale lithography of chemically-linked gold monolayer protected cluster films, 496 (2003) 3

Langmuir monolayers of gold nanoparticles: from ohmic to rectifying charge transfer, 496 (2003) 29

Nanoparticle-based electrochemical DNA detection, 500 (2003) 247

Nanoporous ZrO₂ matrix

Amperometric biosensor based on a nanoporous ZrO₂ matrix, 478 (2003) 59

Nanotechnology

Nanoparticle-based electrochemical DNA detection, 500 (2003) 247

Napropamide

Determination of napropamide in technical formulations, soil and vegetable samples by sensitised fluorescence: validation of the method, 491 (2003) 37

Naproxen

Determination of naproxen in pharmaceuticals by differential pulse voltammetry at a platinum electrode, 495 (2003) 69

Natural organic matter

Trace sulfide determination in oxic freshwaters, 477 (2003) 113

Development of an on-line electrochemical analyser for trace level aluminium, 499 (2003) 173

Natural toxins

Meeting challenges in forensic toxicology in Japan by liquid chromatography/mass spectrometry, 492 (2003) 83

Natural water

Determination of mercury species with a resin functionalized with a 1,2-bis(*o*-aminophenylthio)ethane moiety, 477 (2003) 73

Determination of butyltin species in natural waters using aqueous phase ethylation and off-line room temperature trapping, 477 (2003) 103

Determination of ultra-trace gold in natural water by graphite furnace atomic absorption spectrophotometry after in situ enrichment with thiol cotton fiber, 479 (2003) 225

NBD-F

Catecholamines derivatized with 4-fluoro-7-nitro-2,1,3-benzoxadiazole: characterization of chemical structure and fluorescence properties, 478 (2003) 259

N-Di-desmethylsibutramine

Simultaneous determination of sibutramine and its *N*-desmethyl metabolites in human plasma by liquid chromatography-electrospray ionization-mass spectrometry. Method and clinical applications, 492 (2003) 241

Near-infrared

Molecular design, characterization, and application of multiinformation dyes for optical chemical sensing. IV. Multiinformation dyes with extended spectral sensitivity in the near-infrared spectral range, 482 (2003) 19

Evaluation of selectivity and robustness of near-infrared glucose measurements based on short-scan Fourier transform infrared interferograms, 490 (2003) 325

Near-infrared emission

Direct evidence of singlet molecular oxygen [O₂ (¹Δ_g)] production in the reaction of acetonitrile with hydrogen peroxide in alkaline solutions, 482 (2003) 99

Nebulization

Flow system to gas capture from a nebulized solution, 479 (2003) 167

Negative, positive, and concurrent lens effect

Influence of the variable wall thickness of the sample tubes and a quartz Dewar on the EPR signal intensity in a single TE₁₀₂ and double TE₁₀₄ rectangular cavity, 482 (2003) 229

Neomycin

Single biosensor immunoassay for the detection of five aminoglycosides in reconstituted skimmed milk, 488 (2003) 53

Net analyte signal

Optimisation using a surface response methodology of a system with drift. Application to a flow analysis system with electrochemical detection, 498 (2003) 119

***N*-ethyl-*N'*-methylsulfonfylthiourea**

Luminescent hexanuclear Cu(I)-cluster for the selective determination of copper, 486 (2003) 11

Neural network topology

Growing neural networks for a multivariate calibration and variable selection of time-resolved measurements, 490 (2003) 71

Neural networks

Neural-network modeling of hot-compression test curves for calendaring gasket materials, 486 (2003) 237

Neurotransmitters

Ceramic-based multisite microelectrode array for rapid choline measures in brain tissue, 481 (2003) 65

Neutral carrier

Copper(II)-selective membrane electrode based on hydrotris(3-isopropylpyrazolyl)methane in a poly(vinyl chloride) matrix, 494 (2003) 207

Neutral loss

Application of neutral loss mode in liquid chromatography-mass spectrometry for the determination of corticosteroids in bovine urine, 483 (2003) 259

New chromogenic reagent

Chemical analysis for small amounts of horseradish peroxidase using "porphyrinogen" as a chromogenic reagent, 478 (2003) 37

New flow-cell

Flow-injection simultaneous determination of copper and iron in patient sera with 2-(5-bromo-2-pyridylazo)-5-(*N*-propyl-*N*-sulfopropylamino)aniline and its application to disease diagnosis, 499 (2003) 91

New methylene blue

Simultaneous determination of methylene blue and new methylene blue by slab optical waveguide spectroscopy and artificial neural networks, 487 (2003) 109

Nicarbazin

Surface plasmon resonance biosensor screening of poultry liver and eggs for nicarbazin residues, 483 (2003) 165

Nickel

Thiacalix[4]arenetetrakisulfonate as specific pre-column chelating reagent for nickel(II) ion in kinetic differentiation mode high-performance liquid chromatography, 478 (2003) 163

Simultaneous determination of copper, nickel, cobalt and zinc using zincon as a metallochromic indicator with partial least squares, 487 (2003) 181

Nickel binding to humic and fulvic acid

Kinetic studies of nickel speciation in model solutions of a well-characterized humic acid using the competing ligand exchange method, 480 (2003) 157

Nickel ion

Development of a method for estimating an accurate equivalence point in nickel titration of cyanide ions, 476 (2003) 159

Nickel pentacyanonitrosylferrate

Voltammetric and amperometric determination of sulfite using an aluminum electrode modified by nickel pentacyanonitrosylferrate film. Application to the analysis of some real samples, 497 (2003) 133

Nicotine

Enantiomeric separation of *N'*-nitrosornicotine by capillary electrophoresis, 496 (2003) 177

Ninhydrin

Colorimetric determination of amino acids using genipin from *Gardenia jasminoides*, 480 (2003) 267

NIR spectroscopy

Feasibility study for the use of near infrared spectroscopy in the qualitative and quantitative analysis of green tea, *Camellia sinensis* (L.), 478 (2003) 303

NIR spectroscopy

Comparison between different data pre-treatment methods in the analysis of forage samples using near-infrared diffuse reflectance spectroscopy and partial least-squares multivariate calibration method, 484 (2003) 121

NIRS

Comparison of supervised pattern recognition methods with McNeemar's statistical test. Application to qualitative analysis of sugar beet by near-infrared spectroscopy, 477 (2003) 187

NIST 1648 Urban Air Particulate Matter

Evaluation of capillary electrophoresis combined with a BCR sequential extraction for determining distribution of Fe, Zn, Cu, Mn, and Cd in airborne particulate matter, 498 (2003) 175

Nitrate

'In situ' preparation of nitrous acid solutions by photoreduction in a flow assembly for analysis of pharmaceuticals, 476 (2003) 131
Simultaneous determination of nitrite and nitrate in water by chemiluminescent flow-injection analysis, 495 (2003) 225

Nitrate determination

Simplified version of the sodium salicylate method for analysis of nitrate in drinking waters, 477 (2003) 125

Nitrate reductase

Heavy metal-induced inhibition of *Aspergillus niger* nitrate reductase: applications for rapid contaminant detection in aqueous samples, 480 (2003) 131

Nitrated polycyclic aromatic hydrocarbons

Trace determination of nitrated polycyclic aromatic hydrocarbons using liquid chromatography with on-line electrochemical reduction and fluorescence detection, 482 (2003) 219

Nitric oxide

Development of a fluorescent probe for nitric oxide detection based on difluoroboradiazas-indacene fluorophore, 481 (2003) 101

Nitrite

'In situ' preparation of nitrous acid solutions by photoreduction in a flow assembly for analysis of pharmaceuticals, 476 (2003) 131

Electrocatalytic activity of a new nanostructured polymeric tetra-ruthenated porphyrin film for nitrite detection, 480 (2003) 97

Simultaneous determination of nitrite and nitrate in water by chemiluminescent flow-injection analysis, 495 (2003) 225

***o*-Nitroaniline**

Optical membrane for *o*-nitroaniline based on fluorescence energy transfer between a small molecule and a conjugated polymer, 481 (2003) 109

Nitrofurans metabolites

Isolation of bound residues of nitrofurans from tissue by solid-phase extraction with determination by liquid chromatography with UV and tandem mass spectrometric detection, 483 (2003) 91

Nitrogen heterocyclic compounds

Investigation of six-membered carbocyclic compounds as a molecular switch block of room temperature phosphorescence in nondeoxygenated β -cyclodextrin solution, 484 (2003) 111

Nitroimidazoles

Production and characterisation of polyclonal antibodies to a range of nitroimidazoles, 483 (2003) 193

4-Nitrophenol

On-line selective solid-phase extraction of 4-nitrophenol with β -cyclodextrin bonded silica, 484 (2003) 145

Nitrophenols

Kinetics and retention characteristics of some nitrophenols onto polyurethane foams, 487 (2003) 249

Nitroso R salt

Amberlite XAD-2 functionalized with Nitroso R salt: synthesis and application in an online system for preconcentration of cobalt, 494 (2003) 87

Nitrososonornicotine

Enantiomeric separation of *N'*-nitrososonornicotine by capillary electrophoresis, 496 (2003) 177

***N*-methylcarbamate insecticides**

Correlation study of enzyme-linked immunosorbent assay and high-performance liquid chromatography/tandem mass spectrometry for the determination of *N*-methylcarbamate insecticides in baby food, 495 (2003) 123

***N*-Methylcarbamate pesticides**

Simple and rapid determination of *N*-methylcarbamate pesticides in citrus fruits by electrospray ionization tandem mass spectrometry, 487 (2003) 201

***N*-Mono-desmethyisbutramine**

Simultaneous determination of sibutramine and its *N*-desmethyl metabolites in human plasma by liquid chromatography-electrospray ionization-mass spectrometry. Method and clinical applications, 492 (2003) 241

NMR

Continuous wave free precession. Practical analytical tool for low-resolution nuclear magnetic resonance measurements, 478 (2003) 313

Peak alignment of NMR signals by means of a genetic algorithm, 487 (2003) 189

Characterization of the aromatic composition of some liquid foods by nuclear magnetic resonance spectrometry and liquid chromatography with nuclear magnetic resonance and mass spectrometric detection, 488 (2003) 35

NMR-based metabonomic toxicity classification: hierarchical cluster analysis and *k*-nearest-neighbour approaches, 490 (2003) 3

Multivariate resolution of NMR labile signals by means of hard- and soft-modelling methods, 490 (2003) 253

Advantages and disadvantages of nuclear magnetic resonance spectroscopy as a hyphenated technique, 497 (2003) 1

Non-destructive

Comparison of indices and multivariate models to non-destructively predict the fruit chlorophyll by means of visible spectrometry in apple fruit, 481 (2003) 119

Non-destructive analysis

Identification of iron(III) oxides and hydroxy-oxides by voltammetry of immobilised microparticles, 477 (2003) 157

Non-destructive in situ determination of pigments in 15th century wall paintings by Raman microscopy, 480 (2003) 317

Nonlinear mean square mathematical analysis

Application of thermodynamics in a specific force field to the adsorption of Al^{3+} ions on the chelating resins Ostsorb Oxin, Ostsorb Salicyl, Spheron Oxin, and Spheron Salicyl. Mathematical analysis of sorption isotherms using nonlinear mean square software, 488 (2003) 123

Nonlinear optics

Polarization characterization in surface second harmonic generation by nonlinear optical null ellipsometry, 496 (2003) 133

Nonlinear spectroscopy

Measuring melittin binding to planar supported lipid bilayer by chiral second harmonic generation, 496 (2003) 143

Non-linearity

Comparison of partial least squares regression and multi-layer neural networks for quantification of nonlinear systems and application to gas phase Fourier transform infrared spectra, 489 (2003) 125

Non-negativity

Application of modified alternating least squares regression to spectroscopic image analysis, 476 (2003) 93

Non-protected room temperature phosphorescence

Sensitive flow-injection system for nafcillin determination based on non-protected room temperature phosphorescence, 498 (2003) 69

Nonylphenol

Measurement of 4-nonylphenol and 4-*tert*-octylphenol in human urine by column-switching liquid chromatography-mass spectrometry, 486 (2003) 41

Norepinephrine

Catecholamines derivatized with 4-fluoro-7-nitro-2,1,3-benzoxadiazole: characterization of chemical structure and fluorescence properties, 478 (2003) 259

Norfloxacin

Simultaneous determination of flumequine and oxolinic acid in chicken tissues by solid phase extraction and capillary electrophoresis, 477 (2003) 21

Normal-phase separation

Normal-phase liquid chromatographic separation of stratum corneum ceramides with detection by evaporative light scattering and atmospheric pressure chemical ionization mass spectrometry, 492 (2003) 233

Normetanephrine

Catecholamines derivatized with 4-fluoro-7-nitro-2,1,3-benzoxadiazole: characterization of chemical structure and fluorescence properties, 478 (2003) 259

Normicotine

Enantiomeric separation of *N'*-nitrososonornicotine by capillary electrophoresis, 496 (2003) 177

No-use of organic solvents

Rapid high-performance liquid chromatographic determining technique of sulfamonomethoxine, sulfadimethoxine, and sulfaquinoxaline in eggs without use of organic solvents, 481 (2003) 255

Novocaine hydrochloride

Determination of ibuprofen and novocaine hydrochloride with the use of water-micellar solutions of surfactants, 481 (2003) 149

NRPS

Fourier-transform mass spectrometry for detection of thioester-bound intermediates in unfractionated proteolytic mixtures of 80 and 191 kDa portions of Bacitracin A synthetase, 496 (2003) 217

NSOM

Fully time-resolved near-field scanning optical microscopy fluorescence imaging, 496 (2003) 259

Nuclear magnetic resonance

Quantitation determination of chlorogenic acid in cider apple juices by ^1H NMR spectrometry, 486 (2003) 269

Nucleic acid assay

Clinical applications of chemiluminescence, 500 (2003) 279

Nucleotides

Multivariate resolution of NMR labile signals by means of hard- and soft-modelling methods, 490 (2003) 253

Number of species

Determination of the number of light-absorbing species in the protonation equilibria of selected drugs, 489 (2003) 137

O**Oasis HLB cartridge column**

Rapid analysis of pentazocine in human plasma by liquid chromatography/mass spectrometry with sonic spray ionization, 492 (2003) 249

Octylphenol

Measurement of 4-nonylphenol and 4-*tert*-octylphenol in human urine by column-switching liquid chromatography-mass spectrometry, 486 (2003) 41

Ohmic

Langmuir monolayers of gold nanoparticles: from ohmic to rectifying charge transfer, 496 (2003) 29

Oil analysis

Continuous wave free precession. Practical analytical tool for low-resolution nuclear magnetic resonance measurements, 478 (2003) 313

Selection of calibration set samples in determination of olive oil acidity by partial least squares-attenuated total reflectance-Fourier transform infrared spectroscopy, 489 (2003) 59

Oil contamination

Rapid in situ determination of total oil concentration in water using ultraviolet fluorescence and light scattering coupled with artificial neural networks, 478 (2003) 245

Oil content monitor

Rapid in situ determination of total oil concentration in water using ultraviolet fluorescence and light scattering coupled with artificial neural networks, 478 (2003) 245

Olaquinox

Liquid chromatographic-tandem mass spectrometric detection of banned antibacterial growth promoters in animal feed, 483 (2003) 99

Oleandomycin

Determination of macrolide antibiotics in meat and fish by liquid chromatography-electrospray mass spectrometry, 492 (2003) 187

Oligonucleotide

Electronic concentration of negatively-charged molecules on a microfabricated biochip, 484 (2003) 1

Olive oil

Direct, reagent-free determination of free fatty acid content in olive oil and olives by Fourier transform Raman spectrometry, 487 (2003) 211

Comparative studies on the antioxidant activity of aqueous extracts of olive oils and seed oils using chemiluminescence, 494 (2003) 41

Olives

Direct, reagent-free determination of free fatty acid content in olive oil and olives by Fourier transform Raman spectrometry, 487 (2003) 211

Omeprazole

Acid-base chemistry of omeprazole in aqueous solutions, 481 (2003) 155

On-line

On-line sorption preconcentration of metals based on mixed micelle cloud point extraction prior to their determination with micellar chemiluminescence. Application to the determination of chromium at ng l^{-1} levels, 477 (2003) 223

Amberlite XAD-2 functionalized with Nitroso R salt: synthesis and application in an online system for preconcentration of cobalt, 494 (2003) 87

Study of lactol activation by trifluoroacetic anhydride via in situ Fourier transform infrared spectroscopy, 497 (2003) 155

Speciation of Mn(II) and Mn(VII) by on-line spectrophotometric sequential injection analysis, 499 (2003) 129

On-line column preconcentration

Determination of trace metals in seawater by on-line column preconcentration inductively coupled plasma mass spectrometry using metal alkoxide glass immobilized 8-quinolinol, 499 (2003) 157

On-line dilution

Flow injection on-line dilution for flame atomic absorption spectrometry by micro-sample introduction and dispersion using syringe pumps, 481 (2003) 273

On-line matrix separation

Determination of trace iron in indium phosphide wafer by on-line matrix separation and inductively coupled plasma mass spectrometry, 482 (2003) 189

On-line photoreduction

'In situ' preparation of nitrous acid solutions by photoreduction in a flow assembly for analysis of pharmaceuticals, 476 (2003) 131

On-line preconcentration

On-line preconcentration system coupled to electrothermal atomic absorption spectrometry for the simultaneous determination of bismuth, cadmium, and lead in urine, 495 (2003) 165

On-line collection/concentration of trace metals for spectroscopic detection via use of small-sized thin solid phase (STSP) column resin reactors. Application to speciation of Cr(III) and Cr(VI), 499 (2003) 149

On-line selective solid-phase extraction

On-line selective solid-phase extraction of 4-nitrophenol with β -cyclodextrin bonded silica, 484 (2003) 145

Open tubular extraction

Extraction of selected pollutants in open tubular capillary columns, 497 (2003) 199

Open-tubular capillary electrophoresis

Preparation and characterization of *p*-tert-butylcalix[8]arene bonded capillaries for open-tubular capillary electrochromatography, 478 (2003) 191

Open-vessel

Analysis of polycyclic aromatic hydrocarbons in airborne particles using open-vessel focused microwave-assisted extraction, 495 (2003) 99

Operational

Comparison of original and modified BCR sequential extraction procedures for the fractionation of copper, iron, lead, manganese and zinc in soils and sediments, 478 (2003) 111

Optic biosensor

Free and sol-gel immobilized alkaline phosphatase-based biosensor for the determination of pesticides and inorganic compounds, 484 (2003) 45

Optical biosensor

Sol-gel derived urease-based optical biosensor for the rapid determination of heavy metals, 481 (2003) 75

Optical filters

Rare-earth glass reference materials for near-infrared spectrometry: sources of *x*-axis location variability, 490 (2003) 85

Optical membrane

Optical membrane for *o*-nitroaniline based on fluorescence energy transfer between a small molecule and a conjugated polymer, 481 (2003) 109

Optical properties

Multiresolution analysis for quantification of optical properties in scattering media using pulsed photon time-of-flight measurements, 490 (2003) 185

Optical scheme—design optimisation

Optimisation of thermal lens microscopic measurements in a microchip, 480 (2003) 79

Optical sensor

Molecular design, characterization, and application of multiinformation dyes for optical chemical sensing. IV. Multiinformation

dyes with extended spectral sensitivity in the near-infrared spectral range, 482 (2003) 19

Optical sensors, pH

Fast and long term optical sensors for pH based on sol-gels, 495 (2003) 45

Optical test strip

Characterisation of a transparent optical test strip for quantification of water hardness, 481 (2003) 139

Optically gated injection

Optically gated vacancy electrophoresis in microfluidic devices, 496 (2003) 195

Optically transparent electrodes

Spectroelectrochemical responsiveness of a freestanding, boron-doped diamond, optically transparent electrode toward ferrocene, 500 (2003) 137

Optimisation

Optimisation of a flow injection system with electrochemical detection using the desirability function. Application to the determination of hydroquinone in cosmetics, 479 (2003) 173

Routine analysis of mercury species using commercially available instrumentation: chemometric optimisation of the instrumental variables, 486 (2003) 255

Hybrid genetic algorithm-tabu search approach for optimising multilayer optical coatings, 490 (2003) 211

Optimisation using a surface response methodology of a system with drift. Application to a flow analysis system with electrochemical detection, 498 (2003) 119

Optosensing

Energy transfer—room temperature phosphorescence for the optosensing of transition metal ions, 486 (2003) 1

Organic acids

Optimization in sample stacking for the measurement of short chain organic acids in serum of natural rubber latex by capillary electrophoresis, 482 (2003) 37

Organic complexation

Organic complexation and total dissolved trace metal analysis in estuarine waters: comparison of solvent-extraction graphite furnace atomic absorption spectrometric and chelating resin flow injection inductively coupled plasma-mass spectrometric analysis, 481 (2003) 127

Organic iodine

Sensitive determination of iodine species, including organo-iodine, for freshwater and seawater samples using high performance liquid chromatography and spectrophotometric detection, 482 (2003) 59

Organic soil

Simultaneous extraction of organotin, organolead and organomercury species from soils and litter, 493 (2003) 23

Organically modified sol-gels

Sol-gel based mid-infrared evanescent wave sensors for detection of organophosphate pesticides in aqueous solution, 496 (2003) 339

Organohalide

Applications of surface analysis in the environmental sciences: dehalogenation of chlorocarbons with zero-valent iron and iron-containing mineral surfaces, 496 (2003) 301

Organolead

Simultaneous extraction of organotin, organolead and organomercury species from soils and litter, 493 (2003) 23

Organomercury

Simultaneous extraction of organotin, organolead and organomercury species from soils and litter, 493 (2003) 23

Organometallic

Gas chromatographic detection of organometallic compounds by reactive-flow photometry, 477 (2003) 269

Organophosphates

Sol-gel based mid-infrared evanescent wave sensors for detection of organophosphate pesticides in aqueous solution, 496 (2003) 339

Organophosphorus insecticide

Synthesis of haptens of organophosphorus pesticides and development of enzyme-linked immunosorbent assays for parathion-methyl, 493 (2003) 47

Investigation of the effect of hapten heterology on immunoassay sensitivity and development of an enzyme-linked immunosorbent assay for the organophosphorus insecticide fenitrothion, 494 (2003) 29

Organotin

Simultaneous extraction of organotin, organolead and organomercury species from soils and litter, 493 (2003) 23

Orthogonal signal correction

Improved analysis of multivariate data by variable stability scaling: application to NMR-based metabolic profiling, 490 (2003) 265

Oscillating chemical signal

Wavelet frequency spectrum and its application in analyzing an oscillating chemical system, 484 (2003) 201

Osmium

Milk lactate determination with a rotating bioreactor based on an electron transfer mediated by osmium complexes incorporating a continuous-flow/stopped-flow system, 498 (2003) 155

Ovarian morphology

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 2: ovarian morphology, 483 (2003) 233

OWLS

Development of a non-labeled immunosensor for the herbicide trifluralin via optical waveguide lightmode spectroscopic detection, 487 (2003) 31

Oxazaphosphorine

Application of liquid chromatography-mass spectrometry in the determination of oxazaphosphorines and their metabolites, 492 (2003) 147

Oxic waters

Trace sulfide determination in oxic freshwaters, 477 (2003) 113

Oxidase biosensors

Prussian Blue and enzyme bulk-modified screen-printed electrodes for hydrogen peroxide and glucose determination with improved storage and operational stability, 485 (2003) 111

Oxidative stress

Oxidative stress as a bio-marker of estrogen exposure in healthy veal calves, 483 (2003) 281

A mechanistic evaluation of the amperometric response of reduced thiols in quinone mediated systems, 491 (2003) 203

Oxide interferences

Bandpass reaction cell inductively coupled plasma mass spectrometry for the determination of silver and cadmium in samples in the presence of excess Zr, Nb and Mo, 493 (2003) 213

Oxolinic acid

Simultaneous determination of flumequine and oxolinic acid in chicken tissues by solid phase extraction and capillary electrophoresis, 477 (2003) 21

Oxygen

Modification of the CytosensorTM microphysiometer to simultaneously measure extracellular acidification and oxygen consumption rates, 496 (2003) 93

Oxytetracycline

Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

Ozone

Determination of ozone in ambient air with a chemiluminescence reagent film detector, 491 (2003) 145

P

Packed reactor

Utility of copper(II) oxide as a packed reactor in flow injection assembly for rapid analysis of some angiotensin converting enzyme inhibitors, 489 (2003) 115

PAHs

Comparison of immunoassay and gas chromatography-mass spectrometry for measurement of polycyclic aromatic hydrocarbons in contaminated soil, 486 (2003) 31

Determination of colloidal-associated polycyclic aromatic hydrocarbons (PAHs) in fresh water using C₁₈ solid phase extraction disks, 486 (2003) 159

Evaluation of the structure/cross-reactivity relationship of polycyclic aromatic compounds using an enzyme-linked immunosorbent assay kit, 487 (2003) 43

One-step pressurized liquid extraction method for the analysis of polycyclic aromatic hydrocarbons, 498 (2003) 55

Paintings

Nature and origin of black spots found on Miró paintings: a non-invasive study, 479 (2003) 255

Palladium

On-line preconcentration of palladium on alumina microcolumns and determination in urban waters by inductively coupled plasma mass spectrometry, 478 (2003) 209

Determination of Pt, Pd and Rh in biological samples by electrothermal atomic absorption spectrometry as compared with adsorptive cathodic stripping voltammetry and total-reflection X-ray fluorescence analysis, 498 (2003) 93

Palladium ion

Synthesis of imprinted polymer material with palladium ion nanopores and its analytical application, 488 (2003) 173

Palladium(II)

Coated wire ion-selective electrode for palladium(II) and its application to catalyst analysis, 480 (2003) 299

Palladium-deposited screen-printed carbon electrode

Determination of glutamate pyruvate transaminase activity in clinical specimens using a biosensor composed of immobilized L-glutamate oxidase in a photo-crosslinkable polymer membrane on a palladium-deposited screen-printed carbon electrode, 481 (2003) 199

Palmitoyl quinolin-8-ol functionalized XAD resin

Preconcentration of manganese(II) from natural and sea water on a palmitoyl quinolin-8-ol functionalized XAD copolymer resin and spectrophotometric determination with the formaldoxime reagent, 485 (2003) 205

PAMAM

Surface vibrational sum frequency and Raman studies of PAMAM G0, G1 and acylated PAMAM G0 dendrimers, 496 (2003) 117

p-Aminobenzoic acid (PABA)

Indirect spectrophotometric determination of *p*-aminobenzoic acid in sunscreen formulations by sequential injection analysis, 493 (2003) 233

p-Aminophenyl phosphate

Development of a biosensor for the quantitative detection of 2,4,6-trichloroanisole using screen printed electrodes, 484 (2003) 15

Pantothenic acid

Simultaneous analysis of folic acid and pantothenic acid in foods enriched with vitamins by stable isotope dilution assays, 495 (2003) 133

Paracetamol

Ultrasound-assisted continuous liquid-liquid extraction without phase separation and hydrolysis of paracetamol in suppositories, 489 (2003) 223

PARAFAC

Mitigating model deficiency in three-way data analysis by the combination of background constraining and iterative correcting techniques, 487 (2003) 171

Determination of carbendazim, fuberidazole and thiabendazole by three-dimensional excitation-emission matrix fluorescence and parallel factor analysis, 491 (2003) 47

Determination of doxorubicin in human plasma by excitation-emission matrix fluorescence and multi-way analysis, 493 (2003) 69

Exploratory analysis of L'vov platform surfaces for electrothermal atomic absorption spectrometry by using three-way chemometric tools, 495 (2003) 177

Parallel column

Parallel column liquid chromatography with a single multi-wavelength absorbance detector for enhanced selectivity using chemometric analysis, 490 (2003) 197

para-Phenylphenol

Flow injection chemiluminescent immunoassay with *para*-phenylphenol and sodium tetraphenylborate as synergistic enhancers, 485 (2003) 57

Parathion-methyl

Synthesis of haptens of organophosphorus pesticides and development of enzyme-linked immunosorbent assays for parathion-methyl, 493 (2003) 47

Partial least squares

Comparison of different partial least-squares methods in quantitative structure-activity relationships, 476 (2003) 85

Simultaneous determination of copper, nickel, cobalt and zinc using zincon as a metallochromic indicator with partial least squares, 487 (2003) 181

Selection of calibration set samples in determination of olive oil acidity by partial least squares-attenuated total reflectance-Fourier transform infrared spectroscopy, 489 (2003) 59

High-speed gas chromatographic separations with diaphragm valve-based injection and chemometric analysis as a gas chromatographic "sensor", 490 (2003) 223

Evaluation of selectivity and robustness of near-infrared glucose measurements based on short-scan Fourier transform infrared interferograms, 490 (2003) 325

Partial least squares (PLS) regression

Flow injection differential potentiometric determination of lysine by using a lysine biosensor, 477 (2003) 315

Direct, reagent-free determination of free fatty acid content in olive oil and olives by Fourier transform Raman spectrometry, 487 (2003) 211

Multivariate analytical sensitivity in the determination of selenium, copper, lead and cadmium by stripping voltammetry when using soft calibration, 489 (2003) 85

Comparison of partial least squares regression and multi-layer neural networks for quantification of nonlinear systems and application to gas phase Fourier transform infrared spectra, 489 (2003) 125

Partial least squares discriminant analysis

NMR-based metabonomic toxicity classification: hierarchical cluster analysis and k-nearest-neighbour approaches, 490 (2003) 3

Improved analysis of multivariate data by variable stability scaling: application to NMR-based metabolic profiling, 490 (2003) 265

Particulate organic matter (POM)

Decarbonation and preservation method for the analysis of organic C and N contents and stable isotope ratios of low-carbonated suspended particulate material, 491 (2003) 125

Particulates

Gy sampling theory in environmental studies. 2. Subsampling error estimates, 490 (2003) 159

Partition coefficients

Determination of colloiddally-associated polycyclic aromatic hydrocarbons (PAHs) in fresh water using C_{18} solid phase extraction disks, 486 (2003) 159

Partitioning

Analysis of polyethoxylated surfactants in microemulsion-oil-water systems. III. Fractionation and partitioning of polyethoxylated alcohol surfactants, 477 (2003) 293

Patients

Analysis of hydroxyurea in human plasma by high performance liquid chromatography with electrochemical detection, 488 (2003) 223

Pattern recognition

Capillary electrophoretic profiling and pattern recognition analysis of urinary nucleosides from thyroid cancer patients, 486 (2003) 171

The evolution of chemometrics, 500 (2003) 365

Pb

Electrothermal vaporization inductively coupled plasma-mass spectrometry for the determination of Cr, Cu, Cd, Hg and Pb in rice flour, 495 (2003) 143

PCR

Detection of β -thalassaemia by a DNA piezoelectric biosensor coupled with polymerase chain reaction, 481 (2003) 55

Application of two-way decomposition methods in the simultaneous determination of cobalt, nickel and iron by coupling stopped-flow techniques and CCD detection, 491 (2003) 219

Continuous-flow DNA and RNA amplification chip combined with laser-induced fluorescence detection, 494 (2003) 1

Pd-Zr

In situ preconcentration and determination of trace arsenic in botanical samples by hydride generation-graphite furnace atomic absorption spectrometry with Pd-Zr as chemical modifier, 491 (2003) 91

Peak alignment

Peak alignment of NMR signals by means of a genetic algorithm, 487 (2003) 189

Peak matching

Mutual peak matching in a series of HPLC-DAD mixture analyses, 490 (2003) 41

Peak symmetry

Comparison of elution strength, column efficiency, and peak symmetry in subcritical water chromatography and traditional reversed-phase liquid chromatography, 494 (2003) 157

Penicillin

Liquid chromatography with fluorescence detection of amoxicillin and ampicillin in feeds using pre-column derivatization, 483 (2003) 69

Influence of milking frequency on withdrawal period after application of β -lactam antibiotic-based drugs, 483 (2003) 241

Penicillin G benzathine

Identification of "unknown analytes" in injection sites: a semi-quantitative interpretation, 483 (2003) 387

Penicillin residues

Food processing effects on residues: penicillins in milk and yoghurt, 483 (2003) 73

Penillic acid

Food processing effects on residues: penicillins in milk and yoghurt, 483 (2003) 73

Pentazocine

Rapid analysis of pentazocine in human plasma by liquid chromatography/mass spectrometry with sonic spray ionization, 492 (2003) 249

Pepper

Determination of napropamide in technical formulations, soil and vegetable samples by sensitised fluorescence: validation of the method, 491 (2003) 37

Peptides

Molecular recognition properties of peptide mixtures obtained by polymerisation of amino acids in the presence of estradiol, 481 (2003) 41

Perfluorocarbons

Detection of perfluorocarbons using ion mobility spectrometry, 484 (2003) 63

Peripheral blood mononuclear cells

Determination of 18 nucleobases, nucleosides and nucleotides in human peripheral blood mononuclear cells by isocratic solvent-generated ion-pair chromatography, 481 (2003) 245

Permanent and conventional chemical modifiers

Exploratory analysis of L'vov platform surfaces for electrothermal atomic absorption spectrometry by using three-way chemometric tools, 495 (2003) 177

Permanent modifiers

Evaluation of Rh, Ir, Ru, W-Rh, W-Ir and W-Ru as permanent modifiers for the determination of lead in ashes, coals, sediments, sludges, soils, and freshwaters by electrothermal atomic absorption spectrometry, 484 (2003) 233

Permanganate

Flow-injection determination of cinnarizine using surfactant-enhanced permanganate chemiluminescence, 499 (2003) 223

Permanganate oxidation

Capillary electrophoretic determination of lignin degradation products obtained by permanganate oxidation, 484 (2003) 181

Peroxidase

Electrochemical and catalytic investigation of carbon paste modified with Toluidine Blue O covalently immobilised on silica gel, 476 (2003) 43

Chemical analysis for small amounts of horseradish peroxidase using "porphyrinogen" as a chromogenic reagent, 478 (2003) 37

Peroxo-polymolybdate solution

Electrochemical quartz crystal microbalance study of the electro-deposition mechanism of molybdenum oxide thin films from peroxo-polymolybdate solution, 496 (2003) 39

Pervaporation

Pervaporation-flow injection analysis of phenol after on-line derivatisation to phenyl acetate, 485 (2003) 37

Pesticide formulations

Simultaneous determination of Folpet and Metalaxyl in pesticide formulations by flow injection Fourier transform infrared spectrometry, 480 (2003) 11

Pesticide residues

Evaluation of sample processing and sub-sampling performance, 477 (2003) 169

Determination of 81 multiclass pesticides in fresh foodstuffs by a single injection analysis using gas chromatography-chemical ionization and electron ionization tandem mass spectrometry, 484 (2003) 167

Evaluation of the analytical method performance for incurred samples, 485 (2003) 241

Pesticides

Free and sol-gel immobilized alkaline phosphatase-based biosensor for the determination of pesticides and inorganic compounds, 484 (2003) 45

Meeting challenges in forensic toxicology in Japan by liquid chromatography/mass spectrometry, 492 (2003) 83

Gel-surface enhanced fluorescence sensing system coupled to a continuous-flow assembly for simultaneous monitoring of benomyl and carbendazim, 493 (2003) 35

Pesticides residues

Correlation study of enzyme-linked immunosorbent assay and high-performance liquid chromatography/tandem mass spectrometry for the determination of *N*-methylcarbamate insecticides in baby food, 495 (2003) 123

Petroleum products

Rapid in situ determination of total oil concentration in water using ultraviolet fluorescence and light scattering coupled with artificial neural networks, 478 (2003) 245

pH

Multivariate curve resolution applied to Fourier transform infrared spectra of macromolecules: structural characterisation of the acid form and the salt form of humic acids in interaction with lead, 477 (2003) 201

Modification of the CytosensorTM microphysiometer to simultaneously measure extracellular acidification and oxygen consumption rates, 496 (2003) 93

pH indicator

Molecular design, characterization, and application of multiinformation dyes for optical chemical sensing. IV. Multiinformation dyes with extended spectral sensitivity in the near-infrared spectral range, 482 (2003) 19

pH sensor

A mass-sensitive pH sensor based on a stimuli-responsive polymer, 497 (2003) 123

Pharmaceutical analysis

Resonance light scattering technique used for biochemical and pharmaceutical analysis, 500 (2003) 105

Pharmaceutical formulations

Flow injection-chemiluminescence determination of propranolol in pharmaceutical preparations, 488 (2003) 81

Pharmaceutical preparations

Potentiometric determination of diazepam, bromazepam and clonazepam using solid contact ion-selective electrodes, 498 (2003) 79

Pharmaceuticals

'In situ' preparation of nitrous acid solutions by photoreduction in a flow assembly for analysis of pharmaceuticals, 476 (2003) 131

Novel flow injection spectrophotometric determination of fosinopril using UV-assisted digestion and an orthophosphates calibration graph, 481 (2003) 321

Micelle-mediated spectrofluorimetric determination of ampicillin based on metal ion-catalysed hydrolysis, 484 (2003) 223

Sub-picogram determination of Vitamin B₁₂ in pharmaceuticals and human serum using flow injection with chemiluminescence detection, 488 (2003) 71

Utility of copper(II) oxide as a packed reactor in flow injection assembly for rapid analysis of some angiotensin converting enzyme inhibitors, 489 (2003) 115

Electrochemical study of methylene blue incorporated into morde-nite type zeolite and its application for amperometric determination of ascorbic acid in real samples, 491 (2003) 193

Enhanced flow-injection-chemiluminometric determination of sulphonamides by on-line photochemical reaction, 499 (2003) 57

Pharmacodynamics

Measurement of free drug and clinical end-point by high-performance liquid chromatography-mass spectrometry. Applications and implications for pharmacokinetic and pharmacodynamic studies, 492 (2003) 157

Pharmacokinetic study

Liquid chromatography–electrospray ionization mass spectrometry for metabolism and pharmacokinetic studies of ginsenoside Rg3, 492 (2003) 283

Pharmacokinetics

Liquid chromatographic determination of levamisole in animal plasma: ultraviolet versus tandem mass spectrometric detection, 483 (2003) 215

Simultaneous determination of sibutramine and its *N*-desmethyl metabolites in human plasma by liquid chromatography–electrospray ionization–mass spectrometry. Method and clinical applications, 492 (2003) 241

Pharmacological treatment

Determination of endogenous and synthetic glucocorticoids in human urine by gas chromatography–mass spectrometry following microwave-assisted derivatization, 489 (2003) 233

Phenol analysis

Pervaporation–flow injection analysis of phenol after on-line derivatisation to phenyl acetate, 485 (2003) 37

Phenol red

Fast and long term optical sensors for pH based on sol–gels, 495 (2003) 45

Phenolic compounds

Kinetic deoxyribose degradation assay and its application in assessing the antioxidant activities of phenolic compounds in a Fenton-type reaction system, 478 (2003) 129

Amperometric phenol biosensor based on sol–gel silicate/Nafion composite film, 479 (2003) 143

Dual amperometric biosensor device for analysis of binary mixtures of phenols by multivariate calibration using partial least squares, 485 (2003) 263

Optimisation using a surface response methodology of a system with drift. Application to a flow analysis system with electrochemical detection, 498 (2003) 119

Phenolics

Whole cell immobilised biosensors for toxicity assessment of a wastewater treatment plant treating phenolics-containing waste, 487 (2003) 61

Phenols

Characterization of graphite electrodes modified with laccase from *Trametes versicolor* and their use for bioelectrochemical monitoring of phenolic compounds in flow injection analysis, 487 (2003) 3

Determination of phenols by flow injection and liquid chromatography with on-line quinine-sensitized photo-oxidation and quenched luminol chemiluminescence detection, 493 (2003) 167

Comparative studies on the antioxidant activity of aqueous extracts of olive oils and seed oils using chemiluminescence, 494 (2003) 41

Extraction of selected pollutants in open tubular capillary columns, 497 (2003) 199

Photophysics

Time-resolved fluorescence spectroscopy for illuminating complex systems, 500 (2003) 71

Phenosafuranine

Determination of ozone in ambient air with a chemiluminescence reagent film detector, 491 (2003) 145

Phenoxymethylpenicillin

Determination of uncertainty in analytical measurements from collaborative study results on the analysis of a phenoxymethylpenicillin sample, 481 (2003) 261

Phenylbutazone

Identification of "unknown analytes" in injection sites: a semi-quantitative interpretation, 483 (2003) 387

Phenylmercury

Stability study on a Westöb-based methodology to determine organomercury compounds in polluted soil samples, 480 (2003) 219

Phenylmethylsulfonyl fluoride

High-performance liquid chromatography–atmospheric pressure chemical ionization/tandem mass spectrometry for the determination of a thiol compound in plasma, 492 (2003) 215

Phosphate

Preconcentration of phosphate and arsenate at sub-ng ml⁻¹ level with a chelating polymer-gel loaded with zirconium(IV), 494 (2003) 81

Phospholipase A₂

Measuring melittin binding to planar supported lipid bilayer by chiral second harmonic generation, 496 (2003) 143

Photochemical reaction

Enhanced flow-injection–chemiluminometric determination of sulfonamides by on-line photochemical reaction, 499 (2003) 57

Photochemistry

Raman excitation profile of a sterically protected diphosphene [ArP=PAr], 496 (2003) 155

Photo-crosslinkable polymer

Determination of glutamate pyruvate transaminase activity in clinical specimens using a biosensor composed of immobilized L-glutamate oxidase in a photo-crosslinkable polymer membrane on a palladium-deposited screen-printed carbon electrode, 481 (2003) 199

Photodegradation

Rapid estimation of global sugars by UV photodegradation and UV spectrophotometry, 477 (2003) 325

Photoionisation cross-section

Measurement of K, L and higher shell photoionisation cross-sections at 59.5 keV, 491 (2003) 239

Photoisomerization

Simple fluorimetric method for probing AT-rich regions in DNA based on the photoisomerization of distilbazolium ligand, 487 (2003) 221

Photolysis

Flow injection chemiluminescence determination of carbaryl using photolytic decomposition and photogenerated tris (2,2'-bipyridyl)ruthenium(III), 476 (2003) 141

Photo-oxidation

Determination of phenols by flow injection and liquid chromatography with on-line quinine-sensitized photo-oxidation and quenched luminol chemiluminescence detection, 493 (2003) 167

Photo-reduction

Simultaneous determination of nitrite and nitrate in water by chemiluminescent flow-injection analysis, 495 (2003) 225

Photosensitizer

Determination of phenols by flow injection and liquid chromatography with on-line quinine-sensitized photo-oxidation and quenched luminol chemiluminescence detection, 493 (2003) 167

Phragmites australis

Performance of selected destruction methods for the determination of heavy metals in reed plants (*Phragmites australis*), 497 (2003) 191

pH-responsive hydrogel

A mass-sensitive pH sensor based on a stimuli-responsive polymer, 497 (2003) 123

Phthalate

Experimental design applied to the determination of several contaminants in Duero River by solid-phase microextraction, 477 (2003) 257

Multi-walled carbon nanotubes packed cartridge for the solid-phase extraction of several phthalate esters from water samples and their determination by high performance liquid chromatography, 494 (2003) 149

Physical dispersion

Mass distribution in a dynamic sample zone inside a flow injection manifold: modelling integrated conductimetric profiles, 477 (2003) 59

Picolinamide-copper acetate complex

Picolinamide-Cu(Ac)₂-imprinted polymer with high potential for recognition of picolinamide-copper acetate complex, 482 (2003) 175

Piecewise direct standardization

Standardization of SPE signals in multicomponent analysis of three benzimidazolic pesticides by spectrofluorimetry, 477 (2003) 211

Pierre Gy

Gy sampling theory in environmental studies. 2. Subsampling error estimates, 490 (2003) 159

Piezoelectric biosensor

Detection of β -thalassaemia by a DNA piezoelectric biosensor coupled with polymerase chain reaction, 481 (2003) 55

Piezoelectric chemical sensor

Investigation of the reliability of piezoelectric chemical sensors, 480 (2003) 307

Piezoelectric immunosensor

Piezoelectric immunosensor based on magnetic nanoparticles with simple immobilization procedures, 481 (2003) 191

Pig liver

Isolation of bound residues of nitrofurans from tissue by solid-phase extraction with determination by liquid chromatography with UV and tandem mass spectrometric detection, 483 (2003) 91

Pigments

Non-destructive in situ determination of pigments in 15th century wall paintings by Raman microscopy, 480 (2003) 317

Piroxicam

Development and validation of chemometrics-assisted spectrophotometry and micellar electrokinetic chromatography for the determination of four-component pharmaceuticals, 489 (2003) 77

pK_a determination

Multivariate resolution of NMR labile signals by means of hard- and soft-modelling methods, 490 (2003) 253

Planar supported lipid bilayer

Measuring melittin binding to planar supported lipid bilayer by chiral second harmonic generation, 496 (2003) 143

Plant analysis

Direct voltammetric determination of Mo(VI) in plants: the need for a multivariate study of interferences, 487 (2003) 243

Plants

Dynamic ultrasound-assisted extraction of cadmium and lead from plants prior to electrothermal atomic absorption spectrometry, 480 (2003) 231

Plasma

Determination of a small, highly polar aminopropylphosphonic acid as racemate in plasma and urine and as separated enantiomers in plasma by liquid chromatography and tandem mass spectrometry, 492 (2003) 261

Plasma emission

Self-assembled monolayers of crown ethers for solid phase extraction in flow-injection analysis, 489 (2003) 13

Plasticizer-free optodes

Plasticizer-free microspheres for ionophore-based sensing and extraction based on a methyl methacrylate-decyl methacrylate copolymer matrix, 500 (2003) 127

Platinum

Investigation of trace level binding of PtCl₆ and PtCl₄ to alfalfa biomass (*Medicago sativa*) using Zeeman graphite furnace atomic absorption spectrometry, 478 (2003) 139

Automated on-line separation–preconcentration system for platinum determination by electrothermal atomic absorption spectrometry, 494 (2003) 97

Determination of Pt, Pd and Rh in biological samples by electrothermal atomic absorption spectrometry as compared with adsorptive cathodic stripping voltammetry and total-reflection X-ray fluorescence analysis, 498 (2003) 93

Platinum disc electrode

A wall-jet disc electrode for simultaneous and continuous on-line measurement of sodium dithionite, sulfite and indigo concentrations by means of multistep chronoamperometry, 486 (2003) 73

Platinum electrode

Response to high acidity and basicity at a platinum electrode in chronopotentiometry, 478 (2003) 337

Determination of naproxen in pharmaceuticals by differential pulse voltammetry at a platinum electrode, 495 (2003) 69

Modification of the CytosensorTM microphysiometer to simultaneously measure extracellular acidification and oxygen consumption rates, 496 (2003) 93

Platinum group elements

On the determination of platinum group elements in environmental materials by inductively coupled plasma mass spectrometry and microwave digestion, 489 (2003) 245

PLS

Quantitation of κ -, ι - and λ -carrageenans by mid-infrared spectroscopy and PLS regression, 480 (2003) 23

Non-destructive and clean prediction of aviation fuel characteristics through Fourier transform-Raman spectroscopy and multivariate calibration, 482 (2003) 115

Analysers of chromium and/or cobalt, 488 (2003) 243

Multivariate calibration of spectral data using dual-domain regression analysis, 490 (2003) 291

Partial least-squares modeling of continuous nodes in Bayesian networks, 490 (2003) 355

Application of two-way decomposition methods in the simultaneous determination of cobalt, nickel and iron by coupling stopped-flow techniques and CCD detection, 491 (2003) 219

Simultaneous determination of methylxanthines in coffees and teas by UV-Vis spectrophotometry and partial least squares, 493 (2003) 83

Determination of ethanol in fuel ethanol and beverages by Fourier transform (FT)-near infrared and FT-Raman spectrometries, 493 (2003) 219

Reliability of the contribution profiles obtained through the SIM-PLISMA approach and used as reference in a calibration process. Application to Raman micro-analysis of dust particles, 495 (2003) 205

PLSR

Comparison between different data pre-treatment methods in the analysis of forage samples using near-infrared diffuse reflectance spectroscopy and partial least-squares multivariate calibration method, 484 (2003) 121

PM3

Picolinamide–Cu(Ac)₂-imprinted polymer with high potential for recognition of picolinamide–copper acetate complex, 482 (2003) 175

Point-of-care

Current status of modern analytical luminescence methods, 500 (2003) 21

Poisson analysis

Analytical descriptions of dynamic force spectroscopy: behaviour of multiple connections, 479 (2003) 107

Poisson distribution

Determination of ozone in ambient air with a chemiluminescence reagent film detector, 491 (2003) 145

Poly(acrylic acid-co-isooctyl acrylate)

A mass-sensitive pH sensor based on a stimuli-responsive polymer, 497 (2003) 123

Poly(ethylene glycol)

Heterobifunctional crosslinkers for tethering single ligand molecules to scanning probes, 497 (2003) 101

Poly(sodium undecenyl sulfate)

Separation of methylated isomers of benzo[a]pyrene using micellar electrokinetic chromatography, 496 (2003) 165

Poly(vinyl chloride) membranes

Novel thiocyanate-selective membrane sensors based on di-, tetra-, and hexa-imidepyridine ionophores, 482 (2003) 9

Polyacrylamide gel electrophoresis (PAGE)

Direct chemiluminescent imaging detection of serum proteins in polyacrylamide gels, 497 (2003) 83

Polyaromatic hydrocarbons

Investigation of six-membered carbocyclic compounds as a molecular switch block of room temperature phosphorescence in nondeoxygenated β -cyclodextrin solution, 484 (2003) 111

Polychlorinated biphenyls (PCBs)

Separation of nonpolar analytes using methanol–water mixtures at elevated temperatures, 485 (2003) 51

Polyclonal antibodies

Detection of levamisole residues in bovine liver and milk by immunobiosensor, 483 (2003) 181

Production and characterisation of polyclonal antibodies to a range of nitroimidazoles, 483 (2003) 193

Polycyclic aromatic hydrocarbon

Separation of nonpolar analytes using methanol–water mixtures at elevated temperatures, 485 (2003) 51

Analysis of polycyclic aromatic hydrocarbons in airborne particles using open-vessel focused microwave-assisted extraction, 495 (2003) 99

Comparison of immunoassay and gas chromatography–mass spectrometry for measurement of polycyclic aromatic hydrocarbons in contaminated soil, 486 (2003) 31

Headspace solvent microextraction and gas chromatographic determination of some polycyclic aromatic hydrocarbons in water samples, 489 (2003) 21

Extraction of selected pollutants in open tubular capillary columns, 497 (2003) 199

Second-order bilinear calibration for determining polycyclic aromatic compounds in marine sediments by solvent extraction and liquid chromatography with diode-array detection, 498 (2003) 47

Polycyclic aromatic sulfur heterocycles

Second-order bilinear calibration for determining polycyclic aromatic compounds in marine sediments by solvent extraction and liquid chromatography with diode-array detection, 498 (2003) 47

Poly-L-aspartic acid

Enhancing microdialysis recovery of metal ions by incorporating poly-L-aspartic acid and poly-L-histidine in the perfusion liquid, 482 (2003) 91

Poly-L-histidine

Enhancing microdialysis recovery of metal ions by incorporating poly-L-aspartic acid and poly-L-histidine in the perfusion liquid, 482 (2003) 91

Immobilized poly-L-histidine for chelation of metal cations and metal oxyanions, 495 (2003) 151

Polymer

Evaluation of new strategies to prepare templated polymers with sufficient oligosaccharide recognition capacity, 484 (2003) 53

Differential pulse polarography: a suitable technique for monitoring drug release from polymeric nanoparticle dispersions, 491 (2003) 57

Polymeric membrane electrode

Polymeric membrane and coated graphite samarium(III)-selective electrodes based on isopropyl 2-[(isopropoxycarbothioyl)disulfanyl]ethanethioate, 486 (2003) 93

Polymeric reversed phase

Quantitative multi-residue analysis of tetracyclines and their 4-epimers in pig tissues by high-performance liquid chromatography combined with positive-ion electrospray ionization mass spectrometry, 492 (2003) 199

Polymer-modified Pt electrode

Electrosynthesis and permselective characterisation of phenol-based polymers for biosensor applications, 495 (2003) 33

Polymer-zirconium complex

Preconcentration of phosphate and arsenate at sub-ng ml⁻¹ level with a chelating polymer-gel loaded with zirconium(IV), 494 (2003) 81

Polynuclear aromatic hydrocarbons

Micellar microwave-assisted extraction combined with solid-phase microextraction for the determination of polycyclic aromatic hydrocarbons in a certified marine sediment, 477 (2003) 81

Separation of methylated isomers of benzo[a]pyrene using micellar electrokinetic chromatography, 496 (2003) 165

Polyphenol

Electrosynthesis and permselective characterisation of phenol-based polymers for biosensor applications, 495 (2003) 33

Polyphenolic acids

Spectrophotometric, potentiometric and chromatographic pK_a values of polyphenolic acids in water and acetonitrile-water media, 484 (2003) 253

Polypropylene fibrous filters

Ashing and microwave digestion of aerosol samples with a polypropylene fibrous filter matrix, 482 (2003) 129

Polypyrazolylmethanes

Copper(II)-selective membrane electrode based on hydrotris(3-iso-propylpyrazolyl)methane in a poly(vinyl chloride) matrix, 494 (2003) 207

Polypyrrole

"On line" mass spectrometric detection of ammonia oxidation products generated by polypyrrole based amperometric sensors, 489 (2003) 207

Labelless and reversible immunosensor assay based upon an electrochemical current-transient protocol, 495 (2003) 21

Polysaccharide analysis

Characterisation of the substituent distribution in starch and cellulose derivatives, 497 (2003) 27

Polyurethane

Retention and thermodynamic characteristics of mercury(II) complexes onto polyurethane foams, 481 (2003) 29

On-line preconcentration system using a minicolumn of polyurethane foam loaded with Me-BTABr for zinc determination by Flame Atomic Absorption Spectrometry, 481 (2003) 283

Polyurethane foams

Retention and thermodynamic characteristics of mercury(II) complexes onto polyurethane foams, 481 (2003) 29

Kinetics and retention characteristics of some nitrophenols onto polyurethane foams, 487 (2003) 249

Poplar

Quantitative analysis of cytokinins in plants by liquid chromatography-single-quadrupole mass spectrometry, 480 (2003) 207

Porcine tissues

Extraction procedure for sulfachloropyridazine in porcine tissues and detection in a sulfonamide-specific enzyme-linked immunosorbent assay (ELISA), 494 (2003) 21

Porous scintillator

Sorption-scintillation determination of ⁹⁰Sr in natural water, 480 (2003) 151

Porphyrin

Chemical analysis for small amounts of horseradish peroxidase using "porphyrinogen" as a chromogenic reagent, 478 (2003) 37

Porphyrinogen

Chemical analysis for small amounts of horseradish peroxidase using "porphyrinogen" as a chromogenic reagent, 478 (2003) 37

Portable device

Portable instrument for electrochemical gas sensing, 500 (2003) 145

Positive matrix factorization

Discarding or downweighting high-noise variables in factor analytic models, 490 (2003) 277

Potassium dichromate

Determination of ethanol in distilled liquors using sequential injection analysis with spectrophotometric detection, 499 (2003) 123

Potassium dihydrogen citrate

Effect of citrate impurities on the reference pH value of potassium dihydrogen buffer solution, 482 (2003) 137

Potentiometric sensors

Novel thiocyanate-selective membrane sensors based on di-, tetra-, and hexa-imidepyridine ionophores, 482 (2003) 9

Potentiometry

New triiodomercurate-modified carbon paste electrode for the potentiometric determination of mercury, 478 (2003) 329

Novel monohydrogenphosphate sensor based on vanadyl salophen, 481 (2003) 85

Preparation of surfactant anion-selective electrodes with different selectivity coefficients and a trial to determine each component in binary surfactant mixtures, 481 (2003) 221

Spectrophotometric, potentiometric and chromatographic pK_a values of polyphenolic acids in water and acetonitrile-water media, 484 (2003) 253

Polymeric membrane and coated graphite samarium(III)-selective electrodes based on isopropyl 2-[(isopropoxycarbothioyl)disulfanyl]ethanethioate, 486 (2003) 93

Challenges in modelling and optimisation of stability constants in the study of metal complexes with monoprotonated ligands. Part I. A glass electrode potentiometric and polarographic study of a Cu-TAPSO-OH system, 493 (2003) 105

Trace-element analysis in biological fluids: evaluation of contamination in samples collected with metallic needles, 494 (2003) 167

Copper(II)-selective membrane electrode based on hydrotris(3-isopropylpyrazolyl)methane in a poly(vinyl chloride) matrix, 494 (2003) 207

Novel gadolinium poly(vinyl chloride) membrane sensor based on a new S-N Schiff's base, 495 (2003) 51

Coulometric-potentiometric titration of bases and acids in γ -butyrolactone, 497 (2003) 143

Potentiometric determination of diazepam, bromazepam and clonazepam using solid contact ion-selective electrodes, 498 (2003) 79

Precipitation polymerisation

Highly selective fenuron-imprinted polymer with a homogeneous binding site distribution prepared by precipitation polymerisation

and its application to the clean-up of fenuron in plant samples, 482 (2003) 165

Preconcentration

On-line preconcentration of palladium on alumina microcolumns and determination in urban waters by inductively coupled plasma mass spectrometry, 478 (2003) 209

Study of metal-loaded activated charcoals for the separation and determination of selenium species by energy dispersive X-ray fluorescence analysis, 478 (2003) 229

Preconcentration of copper on ion-selective imprinted polymer microbeads, 480 (2003) 251

Atomic absorption spectrophotometric determination of trace copper in waters, aluminium foil and tea samples after preconcentration with 1-nitroso-2-naphthol-3,6-disulfonic acid on Amborsorb 572, 480 (2003) 259

On-line preconcentration system using a minicolumn of polyurethane foam loaded with Me-BTABr for zinc determination by Flame Atomic Absorption Spectrometry, 481 (2003) 283

Evaluation of Pb-Spec[®] for flow-injection solid-phase extraction preconcentration for the determination of trace lead in water and wine by flame atomic absorption spectrometry, 485 (2003) 9

Extraction and preconcentration of manganese(II) from biological fluids (water, milk and blood serum) using supported liquid membrane and membrane probe methods, 485 (2003) 25

Cellulose functionalized with 8-hydroxyquinoline: new method of synthesis and applications as a solid phase extractant in the determination of metal ions by flame atomic absorption spectrometry, 485 (2003) 221

High performance liquid chromatography determination of chlorophenols in water samples after preconcentration by continuous flow liquid membrane extraction on-line coupled with a pre-column, 487 (2003) 129

Synthesis of imprinted polymer material with palladium ion nanopores and its analytical application, 488 (2003) 173

Self-assembled monolayers of crown ethers for solid phase extraction in flow-injection analysis, 489 (2003) 13

Enrichment and determinations of nickel(II), cadmium(II), copper(II), cobalt(II) and lead(II) ions in natural waters, table salts, tea and urine samples as pyrrolydine dithiocarbamate chelates by membrane filtration-flame atomic absorption spectrometry combination, 493 (2003) 205

Preconcentration of phosphate and arsenate at sub-ng ml⁻¹ level with a chelating polymer-gel loaded with zirconium(IV), 494 (2003) 81

Amberlite XAD-2 functionalized with Nitroso R salt: synthesis and application in an online system for preconcentration of cobalt, 494 (2003) 87

Automated on-line separation-preconcentration system for platinum determination by electrothermal atomic absorption spectrometry, 494 (2003) 97

Prediction

Delaunay triangulation method for multivariate calibration, 488 (2003) 1

Predictive toxicology

Validation of consensus between proteomic and clinical chemistry datasets by applying a new randomisation *F*-test for generalised procrustes analysis, 490 (2003) 365

Preservation

Decarbonation and preservation method for the analysis of organic C and N contents and stable isotope ratios of low-carbonated suspended particulate material, 491 (2003) 125

Pressurized hot water extraction

Pressurized hot water extraction of berberine, baicalein and glycyrrhizin in medicinal plants, 482 (2003) 81

Pressurized liquid extraction (PLE)

Pressurized hot water extraction of berberine, baicalein and glycyrrhizin in medicinal plants, 482 (2003) 81

One-step pressurized liquid extraction method for the analysis of polycyclic aromatic hydrocarbons, 498 (2003) 55

Pre-treatment methods

Comparison between different data pre-treatment methods in the analysis of forage samples using near-infrared diffuse reflectance spectroscopy and partial least-squares multivariate calibration method, 484 (2003) 121

Pre-wash optimisation

Separation of selected metal-binding proteins with capillary zone electrophoresis, 477 (2003) 1

Primary pH buffer standards

Effect of citrate impurities on the reference pH value of potassium dihydrogen buffer solution, 482 (2003) 137

Principal components

Optimisation using a surface response methodology of a system with drift. Application to a flow analysis system with electrochemical detection, 498 (2003) 119

Principal components analysis (PCA)

Study of gas-liquid partitioning of alkane solutes in several organic solvents by using principal component analysis and linear solvation energy relationships, 488 (2003) 107

Determination of the number of light-absorbing species in the protonation equilibria of selected drugs, 489 (2003) 137

NMR-based metabonomic toxicity classification: hierarchical cluster analysis and k-nearest-neighbour approaches, 490 (2003) 3

Rare-earth glass reference materials for near-infrared spectrometry: sources of x-axis location variability, 490 (2003) 85

Factor analytical approaches for evaluating groundwater trace element chemistry data, 490 (2003) 123

Discarding or downweighting high-noise variables in factor analytic models, 490 (2003) 277

Decomposition of dimethyl methylphosphonate on TiO₂(110): principal component analysis applied to X-ray photoelectron spectroscopy, 496 (2003) 289

Probabilistic classification

Toxicity classification from metabonomic data using a density superposition approach: 'CLOUDS', 490 (2003) 109

Probabilistic neural networks

Toxicity classification from metabonomic data using a density superposition approach: 'CLOUDS', 490 (2003) 109

Progesterone

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 1. Endocrine ovarian function, 483 (2003) 225

Prohormones

Identification of anabolic steroids in serum, urine, sweat and hair. Comparison of metabolic patterns, 483 (2003) 299

Promethazine hydrochloride

Flow injection spectroelectroanalytical method for the determination of promethazine hydrochloride in pharmaceutical preparations, 494 (2003) 215

Prophylaxis of diabetes

Assay of α -glucosidase inhibitory activity using flow-biosensor system, 479 (2003) 135

Propoxur

Determination of propoxur residues in eggs by liquid chromatography-diode array detection after treatment of stocked housing facilities for the poultry red mite (*Dermanyssus gallinae*), 483 (2003) 19

Propranolol

Flow injection-chemiluminescence determination of propranolol in pharmaceutical preparations, 488 (2003) 81

Propylparaben

Monolithic columns—a new concept of separation in the sequential injection technique, 499 (2003) 205

Protease activity

Microplate assay for determination of cathepsin D activity based on quantification of a specific and stable peptide released from hemoglobin: VV-hemorphin-7, 486 (2003) 21

Protein

Dynamic imaging of single DNA-protein interactions using atomic force microscopy, 479 (2003) 3

Protein binding

Chemical force microscopy: applications in surface characterisation of natural hydroxyapatite, 479 (2003) 39

Protein expression

Validation of consensus between proteomic and clinical chemistry datasets by applying a new randomisation *F*-test for generalised procrustes analysis, 490 (2003) 365

Protein folding

Force mode atomic force microscopy as a tool for protein folding studies, 479 (2003) 87

Protein immobilization

Piezoelectric immunosensor based on magnetic nanoparticles with simple immobilization procedures, 481 (2003) 191

Protein microarray

Coupled enzyme reaction microarrays based on pin-printing of sol-gel derived biomaterials, 500 (2003) 3

Protein oxidation

Review role of liquid chromatography-mass spectrometry in the analysis of oxidation products and antioxidants in biological systems, 492 (2003) 17

Protein-binding

Measurement of free drug and clinical end-point by high-performance liquid chromatography-mass spectrometry. Applications and implications for pharmacokinetic and pharmacodynamic studies, 492 (2003) 157

Proteomics

Validation of consensus between proteomic and clinical chemistry datasets by applying a new randomisation *F*-test for generalised procrustes analysis, 490 (2003) 365

Proton conductivity

A sol-gel synthesis of polyether-based proton conducting electrolytes, 496 (2003) 65

Protonation

Thermodynamic dissociation constants of silychristin, silybin, silydianin and mycophenolate by the regression analysis of spectrophotometric data, 486 (2003) 125

Protonation equilibria

Multivariate resolution of NMR labile signals by means of hard- and soft-modelling methods, 490 (2003) 253

Prussian Blue

Prussian Blue and enzyme bulk-modified screen-printed electrodes for hydrogen peroxide and glucose determination with improved storage and operational stability, 485 (2003) 111

PSA

Sensitive miniature single-particle immunoassay of prostate-specific antigen using time-resolved fluorescence, 482 (2003) 157

Pseudo stationary phase

Looking into the high efficiency of chiral separations using a chiral-polymer as pseudo stationary phase for micellar electrokinetic chromatography, 496 (2003) 185

***p*-tert-Butylcalix[8]arene**

Preparation and characterization of *p*-tert-butylcalix[8]arene bonded capillaries for open-tubular capillary electrochromatography, 478 (2003) 191

Pulsed amperometric detection

Flow injection analysis of tetracycline in pharmaceutical formulation with pulsed amperometric detection, 499 (2003) 191

Pulsed flow

Multi-pumping flow system for spectrophotometric determination of bromhexine, 499 (2003) 107

Punjab rivers' basin

Bacterial *Lux-Fluoro* test for biological assessment of pollutants in water samples from urban and rural origin, 487 (2003) 51

Purge-and-trap

Trace sulfide determination in oxic freshwaters, 477 (2003) 113

Purge-and-trap injection

Multicapillary gas chromatography coupled to inductively coupled plasma-time-of-flight mass spectrometry for rapid mercury speciation analysis, 489 (2003) 45

Purity assessment

Effect of citrate impurities on the reference pH value of potassium dihydrogen buffer solution, 482 (2003) 137

Purity testing

Separation of selected metal-binding proteins with capillary zone electrophoresis, 477 (2003) 1

PVA capillary

Separation of selected metal-binding proteins with capillary zone electrophoresis, 477 (2003) 1

PVA hydrogel

Whole cell immobilised biosensors for toxicity assessment of a wastewater treatment plant treating phenolics-containing waste, 487 (2003) 61

PVA-SbQ

Determination of glutamate pyruvate transaminase activity in clinical specimens using a biosensor composed of immobilized L-glutamate oxidase in a photo-crosslinkable polymer membrane on a palladium-deposited screen-printed carbon electrode, 481 (2003) 199

PVC

Potentiometric determination of diazepam, bromazepam and clonazepam using solid contact ion-selective electrodes, 498 (2003) 79

PVC membrane

Copper(II)-selective membrane electrode based on hydrotris(3-isopropylpyrazolyl)methane in a poly(vinyl chloride) matrix, 494 (2003) 207

Novel gadolinium poly(vinyl chloride) membrane sensor based on a new S-N Schiff's base, 495 (2003) 51

PVC thermo-oxidative degradation

Membrane in tandem with a helical sorbent trap as continuous sampling technique of the polyvinyl chloride thermo-oxidative degradation products for their on-line gas chromatographic monitoring, 491 (2003) 163

4-(1-Pyrene)butyryl chloride

Liquid chromatographic determination of bisphenols based on intramolecular excimer-forming fluorescence derivatization, 488 (2003) 211

4-(2-Pyridylazo) resorcinol

Speciation of Mn(II) and Mn(VII) by on-line spectrophotometric sequential injection analysis, 499 (2003) 129

Pyronine B

Mn(II)-sodium dodecyl sulphate complex mimic enzyme-catalyzed fluorescence quenching of Pyronine B by hydrogen peroxide, 480 (2003) 143

Pyroxicam

Differential pulse polarography: a suitable technique for monitoring drug release from polymeric nanoparticle dispersions, 491 (2003) 57

Pyruvate

Chemiluminescence determination of citrate and pyruvate and their mixtures by the stopped-flow mixing technique, 485 (2003) 63

Q

Q-mode factor analysis

Factor analytical approaches for evaluating groundwater trace element chemistry data, 490 (2003) 123

QSAR

Comparison of different partial least-squares methods in quantitative structure-activity relationships, 476 (2003) 85

QSPR

Prediction of drug bioavailability based on molecular structure, 485 (2003) 89

QSRR

Prediction of the chromatographic retention of saturated alcohols on stationary phases of different polarity applying the novel semi-empirical topological index, 477 (2003) 29

Quadrupole ion trap mass spectrometry

The utility of ion-molecule reactions in a quadrupole ion trap mass spectrometer for analyzing metal complex coordination structure, 496 (2003) 233

Qualitative analysis

Criteria for the identification of compounds by liquid chromatography-mass spectrometry and liquid chromatography-multiple mass spectrometry in forensic toxicology and doping analysis, 492 (2003) 69

Quality criteria

Criteria for the identification of compounds by liquid chromatography-mass spectrometry and liquid chromatography-multiple mass spectrometry in forensic toxicology and doping analysis, 492 (2003) 69

Quantification

Optimization in sample stacking for the measurement of short chain organic acids in serum of natural rubber latex by capillary electrophoresis, 482 (2003) 37

Estimation of trace vapor concentration-pathlength in plumes for remote sensing applications from hyperspectral images, 490 (2003) 139

Quantitative multi-residue analysis of tetracyclines and their 4-epimers in pig tissues by high-performance liquid chromatography combined with positive-ion electrospray ionization mass spectrometry, 492 (2003) 199

Quantitative EPR spectrometry

Influence of the variable wall thickness of the sample tubes and a quartz Dewar on the EPR signal intensity in a single TE₁₀₂ and double TE₁₀₄ rectangular cavity, 482 (2003) 229

Quantitative millimetre wavelength spectrometry

Remote determination of oxygen and water at millimetre wave frequencies using a fibre optic communications network, 476 (2003) 25

Quantitative structure-activity relationships

Prediction of bioconcentration factor using genetic algorithm and artificial neural network, 486 (2003) 101

Quantum yield

Catecholamines derivatized with 4-fluoro-7-nitro-2,1,3-benzoxadiazole: characterization of chemical structure and fluorescence properties, 478 (2003) 259

Quartz crystal acoustic wave sensor

Enzyme-based determination of cholesterol using the quartz crystal acoustic wave sensor, 487 (2003) 91

Quartz crystal microbalance (QCM)

Development of immunochips for the detection of dengue viral antigens, 479 (2003) 117

Direct oriented immobilization of F(ab') antibody fragments on gold, 496 (2003) 73

Probing direct binding affinity in electrochemical antibody-based sensors, 496 (2003) 103

Quartz crystal sensor

Crystallization monitoring in supersaturated solution with a quartz crystal sensor, 491 (2003) 71

Quartz Dewar

Influence of the variable wall thickness of the sample tubes and a quartz Dewar on the EPR signal intensity in a single TE₁₀₂ and double TE₁₀₄ rectangular cavity, 482 (2003) 229

Quinine

Determination of phenols by flow injection and liquid chromatography with on-line quinine-sensitized photo-oxidation and quenched luminol chemiluminescence detection, 493 (2003) 167

Quinolones

Simultaneous determination of 13 quinolones from feeds using accelerated solvent extraction and liquid chromatography, 483 (2003) 81

R

Ractopamine

Determination of ractopamine in animal tissues by liquid chromatography-fluorescence and liquid chromatography/tandem mass spectrometry, 483 (2003) 137

Radial basis function neural network

Study of the relationship between the structure and the relative mobility of chlorophenols in different buffers modified by different organic additives by capillary zone electrophoresis, 486 (2003) 191

Radiochemical neutron activation analysis

Separation of rare earth elements from scandium by extraction chromatography. Application to radiochemical neutron activation analysis for trace rare earth elements in geological samples, 498 (2003) 25

RAFA

Rank annihilation factor analysis for spectrophotometric study of complex formation equilibria, 486 (2003) 109

Raman

Reliability of the contribution profiles obtained through the SIM-PLISMA approach and used as reference in a calibration process. Application to Raman micro-analysis of dust particles, 495 (2003) 205

Raman microscopy

Non-destructive in situ determination of pigments in 15th century wall paintings by Raman microscopy, 480 (2003) 317

Raman spectroscopic analysis

Romano-British wall-paintings II: Raman spectroscopic analysis of two villa sites at Nether Heyford, Northants, 484 (2003) 211

Raman spectroscopy

Detection of volatile organic compounds using surface enhanced Raman spectroscopy substrates mounted on a thermoelectric cooler, 488 (2003) 15

Surface vibrational sum frequency and Raman studies of PAMAM G0, G1 and acylated PAMAM G0 dendrimers, 496 (2003) 117

Raman excitation profile of a sterically protected diphosphene [ArP=PAr], 496 (2003) 155

Random copolymers

Synthesis of molecular imprinted organic-inorganic hybrid polymer binding caffeine, 481 (2003) 175

Randomisation test

Validation of consensus between proteomic and clinical chemistry datasets by applying a new randomisation *F*-test for generalised procrustes analysis, 490 (2003) 365

Rank of matrix

Determination of the number of light-absorbing species in the protonation equilibria of selected drugs, 489 (2003) 137

Rapid prototyping

Rapid prototyping of glass microchannels, 496 (2003) 205

Rapid separation

Liquid-liquid microbatch extraction system for rapid mutual separation of fission products, 484 (2003) 139

Rare earth elements

Solid phase extraction for analysis of biogenic carbonates by electrothermal vaporization inductively coupled plasma mass spectrometry (ETV-ICP-MS): an investigation of rare earth element signatures in otolith microchemistry, 476 (2003) 1

Separation of rare earth elements from scandium by extraction chromatography. Application to radiochemical neutron activation analysis for trace rare earth elements in geological samples, 498 (2003) 25

Rats

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 1: Endocrine ovarian function, 483 (2003) 225

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 2: ovarian morphology, 483 (2003) 233

Raw wool

Effect of the carbon dioxide modifier on the lipid composition of wool wax extracted from raw wool, 477 (2003) 233

Reactivation of HRP

Reactivation of inactivated horseradish peroxidase with ethyleneurea and allantoin for determination of hydrogen peroxide by micro-flow injection horseradish peroxidase-catalyzed chemiluminescence, 495 (2003) 233

Real samples

Flow injection chemiluminescence determination of carbaryl using photolytic decomposition and photogenerated tris (2,2'-bipyridyl)ruthenium(III), 476 (2003) 141

Real-time

Real-time two-dimensional wavelet compression and its application to real-time modeling of ion mobility data, 490 (2003) 59

Recognition force spectroscopy

Heterobifunctional crosslinkers for tethering single ligand molecules to scanning probes, 497 (2003) 101

Recognition mechanism

Study on the mechanism of chiral recognition with molecularly imprinted polymers, 489 (2003) 33

Recombinant

Analysis for endogenous and recombinant porcine somatotropine in serum, 483 (2003) 201

Recovery

Correction function on biased results due to matrix effects. Application to the routine analysis of pesticide residues, 478 (2003) 281

Rectifying

Langmuir monolayers of gold nanoparticles: from ohmic to rectifying charge transfer, 496 (2003) 29

Red light emission

Direct evidence of singlet molecular oxygen [$O_2(^1\Delta_g)$] production in the reaction of acetonitrile with hydrogen peroxide in alkaline solutions, 482 (2003) 99

Redox-active

Engineering DNA-electrode connectivities: manipulation of linker length and structure, 496 (2003) 81

Engineering DNA-electrode connectivities: manipulation of linker length and structure, 496 (2003) 92

Reducing sugars

A kinetic spectrophotometric method for the determination of ternary mixtures of reducing sugars with the aid of artificial neural networks and multivariate calibration, 480 (2003) 53

Reed

Performance of selected destruction methods for the determination of heavy metals in reed plants (*Phragmites australis*), 497 (2003) 191

Reference material

Production of clenbuterol, diethylstilbestrol and trenbolone mass standards in lyophilised bovine urine, 483 (2003) 401

Reference pH values

Effect of citrate impurities on the reference pH value of potassium dihydrogen buffer solution, 482 (2003) 137

Refractive index

Multi-reflection photometric flow cell for use in flow injection analysis of estuarine waters, 499 (2003) 81

Refrigerants

Growing neural networks for a multivariate calibration and variable selection of time-resolved measurements, 490 (2003) 71

Relative recovery

Enhancing microdialysis recovery of metal ions by incorporating poly-L-aspartic acid and poly-L-histidine in the perfusion liquid, 482 (2003) 91

Release kinetics

Differential pulse polarography: a suitable technique for monitoring drug release from polymeric nanoparticle dispersions, 491 (2003) 57

Reliability

Investigation of the reliability of piezoelectric chemical sensors, 480 (2003) 307

Remediation

Applications of surface analysis in the environmental sciences: dehalogenation of chlorocarbons with zero-valent iron and iron-containing mineral surfaces, 496 (2003) 301

Remote analysis

Remote determination of oxygen and water at millimetre wave frequencies using a fibre optic communications network, 476 (2003) 25

Remote sensing

Estimation of trace vapor concentration-pathlength in plumes for remote sensing applications from hyperspectral images, 490 (2003) 139

Representative

Gy sampling theory in environmental studies. 2. Subsampling error estimates, 490 (2003) 159

Reproducibility

Determination of uncertainty in analytical measurements from collaborative study results on the analysis of a phenoxymethylpenicillin sample, 481 (2003) 261

Elemental fractionation of Si, Al, Ti, Fe, Ca, Mn, P, and Ba in five marine sedimentary reference materials: results from sequential extractions, 487 (2003) 117

Residual lime

Flow system to gas capture from a nebulized solution, 479 (2003) 167

Residue

Rapid method for the determination of stanozolol in meat with supercritical fluid extraction and liquid chromatography-mass spectrometry, 483 (2003) 1

Surface plasmon resonance biosensor screening of poultry liver and eggs for nicarbazin residues, 483 (2003) 165

Detection of levamisole residues in bovine liver and milk by immunobiosensor, 483 (2003) 181

Determination of flunixin and ketoprofen in milk by liquid chromatography-tandem mass spectrometry, 488 (2003) 25

Determination of veterinary drug residues by liquid chromatography and tandem mass spectrometry, 492 (2003) 105

Resin

Chelating resin sorption followed by supercritical fluid extraction and liquid chromatographic determination of aluminum in liquid samples, 494 (2003) 125

Residue analysis

Value of alternative sample matrices in residue analysis for stanozolol, 483 (2003) 11

Liquid chromatographic determination of levamisole in animal plasma: ultraviolet versus tandem mass spectrometric detection, 483 (2003) 215

Development and optimisation of a method for the extraction of benzimidazoles from animal liver using supercritical carbon dioxide, 483 (2003) 313

Residue control

Zilpaterol—a new focus of concern in residue analysis, 493 (2003) 63

Residue depletion

Estimation the withdrawal period for veterinary drugs used in food producing animals, 483 (2003) 251

Residue determination

Isolation of bound residues of nitrofurans from tissue by solid-phase extraction with determination by liquid chromatography with UV and tandem mass spectrometric detection, 483 (2003) 91

Resonance

Raman excitation profile of a sterically protected diphosphene [ArP=PAR], 496 (2003) 155

Resonance light scattering

Direct quantification of γ -globulin in human blood serum by resonance light scattering techniques without separation of human serum albumin, 493 (2003) 179

Resonance light scattering (RLS) technique

Resonance light scattering technique used for biochemical and pharmaceutical analysis, 500 (2003) 105

Resonant frequency

Crystallization monitoring in supersaturated solution with a quartz crystal sensor, 491 (2003) 71

Resonant resistance

Crystallization monitoring in supersaturated solution with a quartz crystal sensor, 491 (2003) 71

Retention parameter

New uniform algorithm to predict reversed phase retention values under different gradient conditions, 476 (2003) 123

Reversed phase chromatography

Selenium speciation analysis in a sediment using strong anion exchange and reversed phase chromatography coupled with inductively coupled plasma-mass spectrometry, 478 (2003) 219

Reversed phase HPLC

New uniform algorithm to predict reversed phase retention values under different gradient conditions, 476 (2003) 123

Separation of arsines and trinitrotoluene by reversed phase high performance liquid chromatography and micellar electrokinetic capillary chromatography, 495 (2003) 239

Reversed-phase liquid chromatography (RPLC)

Separation of nonpolar analytes using methanol-water mixtures at elevated temperatures, 485 (2003) 51

Review

Valves and flow injection manifolds: an excellent marriage with unlimited versatility, 480 (2003) 181

Advantages and disadvantages of nuclear magnetic resonance spectroscopy as a hyphenated technique, 497 (2003) 1

Rg3

Liquid chromatography-electrospray ionization mass spectrometry for metabolism and pharmacokinetic studies of ginsenoside Rg3, 492 (2003) 283

Rhodamine B

Chemiluminescence determination of ultramicro DNA with a flow-injection method, 478 (2003) 31

Chemiluminescence behavior based on oxidation reaction of rhodamine B with cerium(IV) in sulfuric acid medium, 489 (2003) 173

Rhodium

Determination of Pt, Pd and Rh in biological samples by electrothermal atomic absorption spectrometry as compared with

adsorptive cathodic stripping voltammetry and total-reflection X-ray fluorescence analysis, 498 (2003) 93

Rhubarb anthraquinones and bianthrone

Analysis of nine rhubarb anthraquinones and bianthrone by micellar electrokinetic chromatography using experimental design, 482 (2003) 47

RIA

Oxidative stress as a bio-marker of estrogen exposure in healthy veal calves, 483 (2003) 281

Rice

Bandpass reaction cell inductively coupled plasma mass spectrometry for the determination of silver and cadmium in samples in the presence of excess Zr, Nb and Mo, 493 (2003) 213

Electrothermal vaporization inductively coupled plasma-mass spectrometry for the determination of Cr, Cu, Cd, Hg and Pb in rice flour, 495 (2003) 143

Ridge regression

Application of modified alternating least squares regression to spectroscopic image analysis, 476 (2003) 93

Rietveld analysis

Use of X-ray and other techniques to analyse the phase transformation induced in archaeological cast iron after its stabilisation by the electrolytic method, 494 (2003) 245

RNA amplification

Continuous-flow DNA and RNA amplification chip combined with laser-induced fluorescence detection, 494 (2003) 1

Robust calibration

Multivariate calibration of spectral data using dual-domain regression analysis, 490 (2003) 291

Robustness

Optimisation of a flow injection system with electrochemical detection using the desirability function. Application to the determination of hydroquinone in cosmetics, 479 (2003) 173

Roman and Gallo-Roman periods

Characterization of thermally assisted hydrolysis and methylation products of polyphenols from modern and archaeological vine derivatives using gas chromatography-mass spectrometry, 493 (2003) 137

Roman pigments

Investigation of roman age pigments found on pottery fragments, 478 (2003) 147

Romano-British villa

Romano-British wall-paintings II: Raman spectroscopic analysis of two villa sites at Nether Heyford, Northants, 484 (2003) 211

Ronidazole

Production and characterisation of polyclonal antibodies to a range of nitroimidazoles, 483 (2003) 193

Room temperature ionic liquid

Room temperature ionic liquid as a novel medium for liquid/liquid extraction of metal ions, 488 (2003) 183

Room-temperature phosphorescence (RTP)

Investigation of six-membered carbocyclic compounds as a molecular switch block of room temperature phosphorescence in nondeoxygenated β -cyclodextrin solution, 484 (2003) 111

Energy transfer—room temperature phosphorescence for the opto-sensing of transition metal ions, 486 (2003) 1

Room temperature phosphorescence in the liquid state as a tool in analytical chemistry, 488 (2003) 135

Study of the substituent groups effect on the room-temperature phosphorescent emission of fluorene derivatives in solution, 489 (2003) 165

Room temperature phosphorimetric determination of cyanide based on triplet state energy transfer, 491 (2003) 27

Fluorescence and room temperature phosphorescence of 6-bromo-2-naphthol in β -cyclodextrin solution and its selective molecular recognition for cyclohexane, 494 (2003) 71

Ropivacaine, 3-OH-ropivacaine

Determination of ropivacaine and its metabolites in patient urine: Advantage of liquid chromatography–tandem mass spectrometry over liquid chromatography–UV detection and liquid chromatography–mass spectrometry, 492 (2003) 253

Routine analysis

Determination of 81 multiclass pesticides in fresh foodstuffs by a single injection analysis using gas chromatography–chemical ionization and electron ionization tandem mass spectrometry, 484 (2003) 167

Routine analysis of mercury species using commercially available instrumentation: chemometric optimisation of the instrumental variables, 486 (2003) 255

RPLC

Comparison of elution strength, column efficiency, and peak symmetry in subcritical water chromatography and traditional reversed-phase liquid chromatography, 494 (2003) 157

RT-PCR

Continuous-flow DNA and RNA amplification chip combined with laser-induced fluorescence detection, 494 (2003) 1

 $\text{Ru}(\text{bpy})_3^{2+}$

Electrochemiluminescence sensor using tris(2,2'-bipyridyl)ruthenium(II) immobilized in Eastman-AQ55D–silica composite thin-films, 480 (2003) 285

 $\text{Ru}(\text{bpy})_3^{3+}$

Chemiluminescence determination of citrate and pyruvate and their mixtures by the stopped-flow mixing technique, 485 (2003) 63

 $\text{Ru}(\text{bpy})_3^{3+}$ photogenerated

Flow injection chemiluminescence determination of carbaryl using photolytic decomposition and photogenerated tris (2,2'-bipyridyl)ruthenium(III), 476 (2003) 141

 $\text{Ru}(\text{bpy})_3^{2+}$ –TPA

Flow injection analysis of glucose based on its inhibition of electrochemiluminescence in a $\text{Ru}(\text{bpy})_3^{2+}$ –tripropylamine system, 498 (2003) 61

Rutin trihydrate

Using on-line solid phase extraction for simultaneous determination of ascorbic acid and rutin trihydrate by sequential injection analysis, 497 (2003) 165

S

S,S'-Ethylenediamine disuccinate

Solubility products for aminocarboxylate ligands: determination, validation and speciation uses, 480 (2003) 119

Saccharomyces cerevisiae

Use of ATP measurements by bioluminescence to quantify yeast's sensitivity against a killer toxin, 495 (2003) 217

Salicylate method

Simplified version of the sodium salicylate method for analysis of nitrate in drinking waters, 477 (2003) 125

Salicylic acid

Coupling of monolithic columns with sequential injection technique. A new separation approach in flow methods, 494 (2003) 133

Salting-out

Selective extraction of thallium(III) in the presence of gallium(III), indium(III), bismuth(III) and antimony(III) by salting-out of an aqueous mixture of 2-propanol, 477 (2003) 243

Samarium

Polymeric membrane and coated graphite samarium(III)-selective electrodes based on isopropyl 2-[(isopropoxycarbothioyl)disulfanyl]ethanethioate, 486 (2003) 93

Sammon's mapping

Monitoring of yeast fermentation by ion mobility spectrometry measurement and data visualisation with Self-Organizing Maps, 484 (2003) 93

Sample preconcentration

Determination of trace iodide in seawater by capillary electrophoresis following transient isotachophoretic preconcentration. Comparison with ion chromatography, 497 (2003) 67

Sample preparation

Automated sample preparation method for suspension arrays using renewable surface separations with multiplexed flow cytometry fluorescence detection, 478 (2003) 85

On the determination of platinum group elements in environmental materials by inductively coupled plasma mass spectrometry and microwave digestion, 489 (2003) 245

Sample processing

Evaluation of sample processing and sub-sampling performance, 477 (2003) 169

Sample stacking

Large volume sample stacking capillary electrophoresis for metallothioneins analysis in eel liver, 486 (2003) 183

Sample tube wall thickness

Influence of the variable wall thickness of the sample tubes and a quartz Dewar on the EPR signal intensity in a single TE₁₀₂ and double TE₁₀₄ rectangular cavity, 482 (2003) 229

Sampling

Gy sampling theory in environmental studies. 2. Subsampling error estimates, 490 (2003) 159

Trace-element analysis in biological fluids: evaluation of contamination in samples collected with metallic needles, 494 (2003) 167

San Francisco Bay Estuary

Organic complexation and total dissolved trace metal analysis in estuarine waters: comparison of solvent-extraction graphite furnace atomic absorption spectrometric and chelating resin flow injection inductively coupled plasma-mass spectrometric analysis, 481 (2003) 127

SARs

Evaluation of the structure/cross-reactivity relationship of polycyclic aromatic compounds using an enzyme-linked immunosorbent assay kit, 487 (2003) 43

Saturated alcohols

Prediction of the chromatographic retention of saturated alcohols on stationary phases of different polarity applying the novel semi-empirical topological index, 477 (2003) 29

Scab

Atrazine analysis using an amperometric immunosensor based on single-chain antibody fragments and regeneration-free multicalibrant measurement, 500 (2003) 287

Scaling of variables

Discarding or downweighting high-noise variables in factor analytic models, 490 (2003) 277

Scan time

Spectral transformations for deconvolution methods applied on gas chromatography-mass spectrometry data, 488 (2003) 231

Scanning electron microscopy

Investigation of the reliability of piezoelectric chemical sensors, 480 (2003) 307

Scattering media

Multiresolution analysis for quantification of optical properties in scattering media using pulsed photon time-of-flight measurements, 490 (2003) 185

Schlieren effect

Multi-reflection photometric flow cell for use in flow injection analysis of estuarine waters, 499 (2003) 81

Schubert's method

Comparative study of binding strengths and thermodynamic aspects of Cu(II) and Ni(II) with humic acid by Schubert's ion-exchange method, 497 (2003) 235

Screen printed electrode

Development of a biosensor for the quantitative detection of 2,4,6-trichloroanisole using screen printed electrodes, 484 (2003) 15

Screening

Detection of levamisole residues in bovine liver and milk by immunobiosensor, 483 (2003) 181

Use of ion-trap liquid chromatography-mass spectrometry to screen and confirm drug residues in aquacultured products, 483 (2003) 373

Screening immunoassay

Electrochemical ELISA for the screening of DDT related compounds: analysis in waste waters, 487 (2003) 83

Screening methods

Detection of cefquinome in milk by liquid chromatography and screening methods, 483 (2003) 363

Screen-printed

Adsorption: an easy and efficient immobilisation of acetylcholinesterase on screen-printed electrodes, 481 (2003) 209

Screen-printed carbon electrode

Flow injection electrochemical enzyme immunoassay based on the use of an immunoelectrode strip integrate immunosorbent layer and a screen-printed carbon electrode, 488 (2003) 61

Screen-printed electrode

Stripping chronopotentiometric detection of copper using screen-printed three-electrode system—application to acetic-acid bioavailable fraction from soil samples, 493 (2003) 95

Prussian Blue and enzyme bulk-modified screen-printed electrodes for hydrogen peroxide and glucose determination with improved storage and operational stability, 485 (2003) 111

Atrazine analysis using an amperometric immunosensor based on single-chain antibody fragments and regeneration-free multicalibrant measurement, 500 (2003) 287

SDMA

Rapid simultaneous determination of arginine and methylated arginines in human urine by high-performance liquid chromatography-mass spectrometry, 487 (2003) 145

Se(IV)

Study of metal-loaded activated charcoals for the separation and determination of selenium species by energy dispersive X-ray fluorescence analysis, 478 (2003) 229

Se(VI)

Study of metal-loaded activated charcoals for the separation and determination of selenium species by energy dispersive X-ray fluorescence analysis, 478 (2003) 229

Seafood

On-line determination of manganese in solid seafood samples by flame atomic absorption spectrometry, 477 (2003) 149

Seafood extract

Flow injection potentiometric detection of trimethylamine in seafood using tungsten oxide electrode, 478 (2003) 53

Seawater

Sensitive determination of iodine species, including organo-iodine, for freshwater and seawater samples using high performance liquid chromatography and spectrophotometric detection, 482 (2003) 59

On-line electrochemical monitoring of (TNT) 2,4,6-trinitrotoluene in natural waters, 485 (2003) 139

Preconcentration of manganese(II) from natural and sea water on a palmitoyl quinolin-8-ol functionalized XAD copolymer resin and spectrophotometric determination with the formaldoxime reagent, 485 (2003) 205

Experimental designs in the development of a new method for the sensitive determination of cadmium in seawater by adsorptive cathodic stripping voltammetry, 487 (2003) 229

Determination of trace metals in seawater by on-line column preconcentration inductively coupled plasma mass spectrometry using metal alkoxide glass immobilized 8-quinolinol, 499 (2003) 157

Seawater analysis

Determination of trace iodide in seawater by capillary electrophoresis following transient isotachophoretic preconcentration. Comparison with ion chromatography, 497 (2003) 67

Second harmonic generation

Polarization characterization in surface second harmonic generation by nonlinear optical null ellipsometry, 496 (2003) 133

Measuring melittin binding to planar supported lipid bilayer by chiral second harmonic generation, 496 (2003) 143

Second-order calibration

Second-order bilinear calibration for determining polycyclic aromatic compounds in marine sediments by solvent extraction and liquid chromatography with diode-array detection, 498 (2003) 47

Second-order data

Influence of selectivity and sensitivity parameters on detection limits in multivariate curve resolution of chromatographic second-order data, 476 (2003) 111

Sediment

Solid sample graphite furnace atomic absorption spectroscopy for supporting arsenic determination in sediments following a sequential extraction procedure, 476 (2003) 15

Selenium speciation analysis in a sediment using strong anion exchange and reversed phase chromatography coupled with inductively coupled plasma-mass spectrometry, 478 (2003) 219

Selective extractions to assess the biogeochemically relevant fractionation of inorganic mercury in sediments and soils, 479 (2003) 233

Arsenic speciation in environmental and biological samples. Extraction and stability studies, 495 (2003) 85

Sediment analysis

Micellar microwave-assisted extraction combined with solid-phase microextraction for the determination of polycyclic aromatic hydrocarbons in a certified marine sediment, 477 (2003) 81

SELDI-ToF

Validation of consensus between proteomic and clinical chemistry datasets by applying a new randomisation *F*-test for generalised procrustes analysis, 490 (2003) 365

Selective

Gas chromatographic detection of organometallic compounds by reactive-flow photometry, 477 (2003) 269

Selectivity

Influence of selectivity and sensitivity parameters on detection limits in multivariate curve resolution of chromatographic second-order data, 476 (2003) 111

Preparation of surfactant anion-selective electrodes with different selectivity coefficients and a trial to determine each component in binary surfactant mixtures, 481 (2003) 221

Parallel column liquid chromatography with a single multi-wavelength absorbance detector for enhanced selectivity using chemometric analysis, 490 (2003) 197

Selenium

Study of metal-loaded activated charcoals for the separation and determination of selenium species by energy dispersive X-ray fluorescence analysis, 478 (2003) 229

Multisyringe flow injection system for total inorganic selenium determination by hydride generation-atomic fluorescence spectrometry, 486 (2003) 217

Methodological advances for selenium speciation analysis in yeast, 500 (2003) 171

Selenium determination

Hydride generation atomic fluorescence spectrometric determination of ultratrace of selenium and tellurium in cow milk, 481 (2003) 291

Selenium speciation

Selenium speciation analysis in a sediment using strong anion exchange and reversed phase chromatography coupled with inductively coupled plasma-mass spectrometry, 478 (2003) 219

Selenium-containing protein

Methodological advances for selenium speciation analysis in yeast, 500 (2003) 171

Seleno-DL-methionine

Study of metal-loaded activated charcoals for the separation and determination of selenium species by energy dispersive X-ray fluorescence analysis, 478 (2003) 229

Self-assembled monolayer

Self-assembled monolayers of crown ethers for solid phase extraction in flow-injection analysis, 489 (2003) 13

Friction force microscopy of self-assembled monolayers: probing molecular organisation at the nanometre scale, 479 (2003) 17

Amperometric flow-injection determination of phenolic compounds at self-assembled monolayer-based tyrosinase biosensors, 494 (2003) 187

Novel determination of cadmium ions using an enzyme self-assembled monolayer with surface plasmon resonance, 500 (2003) 119

Seeking connectivity between engineered proteins and transducers: connection for glutathione S-transferase fusion proteins on surface plasmon resonance devices, 500 (2003) 323

Self-modeling curve resolution

Characterization of subcritical water oxidation with in situ monitoring and self-modeling curve resolution, 485 (2003) 73

Mutual peak matching in a series of HPLC-DAD mixture analyses, 490 (2003) 41

Reliability of the contribution profiles obtained through the SIMPLISMA approach and used as reference in a calibration process. Application to Raman micro-analysis of dust particles, 495 (2003) 205

Self-Organizing Maps

Monitoring of yeast fermentation by ion mobility spectrometry measurement and data visualisation with Self-Organizing Maps, 484 (2003) 93

Semi-empirical topological index

Prediction of the chromatographic retention of saturated alcohols on stationary phases of different polarity applying the novel semi-empirical topological index, 477 (2003) 29

Sensitive

Gas chromatographic detection of organometallic compounds by reactive-flow photometry, 477 (2003) 269

Sensitivity

Influence of selectivity and sensitivity parameters on detection limits in multivariate curve resolution of chromatographic second-order data, 476 (2003) 111

Sensor

Lifetime-based optical sensor for high-level $p\text{CO}_2$ detection employing fluorescence resonance energy transfer, 480 (2003) 275

Chemical sensor for lanthanum(III) determination using azacrown as ionophore in poly(vinyl chloride) matrix, 486 (2003) 199

Characterization of a fluorescent sol-gel encapsulated erythrosin B dissolved oxygen sensor, 487 (2003) 101

High-speed gas chromatographic separations with diaphragm valve-based injection and chemometric analysis as a gas chromatographic "sensor", 490 (2003) 223

Labelless and reversible immunosensor assay based upon an electrochemical current-transient protocol, 495 (2003) 21

Sensor array

Classical least squares transformations of sensor array pattern vectors into vapor descriptors. Simulation of arrays of polymer-coated surface acoustic wave sensors with mass-plus-volume transduction mechanisms, 490 (2003) 169

Portable instrument for electrochemical gas sensing, 500 (2003) 145

Separation

Ion imprinted polymer particles: synthesis, characterization and dysprosium ion uptake properties suitable for analytical applications, 478 (2003) 43

Synthesis of imprinted polymer material with palladium ion nanopores and its analytical application, 488 (2003) 173

Immobilized poly-L-histidine for chelation of metal cations and metal oxyanions, 495 (2003) 151

Monolithic columns—a new concept of separation in the sequential injection technique, 499 (2003) 205

Separation and preconcentration

Sequential injection-bead injection-lab-on-valve schemes for on-line solid phase extraction and preconcentration of ultra-trace levels of heavy metals with determination by electrothermal atomic absorption spectrometry and inductively coupled plasma mass spectrometry, 499 (2003) 139

Separation of thallium

Selective extraction of thallium(III) in the presence of gallium(III), indium(III), bismuth(III) and antimony(III) by salting-out of an aqueous mixture of 2-propanol, 477 (2003) 243

Sephadex LH-20

Application of size-exclusion chromatography to the analysis of shrimp for sulfonamide residues, 483 (2003) 147

Sepharose beads

Flow injection analysis of uric acid with a uricase- and horseradish peroxidase-coupled Sepharose column based luminol chemiluminescence system, 499 (2003) 41

Sequential determination

Novel thiocyanate-selective membrane sensors based on di-, tetra-, and hexa-imidepyridine ionophores, 482 (2003) 9

Sequential extraction

Determination of As(III) and As(V) in soils using sequential extraction combined with flow injection hydride generation atomic fluorescence detection, 477 (2003) 139

Selective extractions to assess the biogeochemically relevant fractionation of inorganic mercury in sediments and soils, 479 (2003) 233

Elemental fractionation of Si, Al, Ti, Fe, Ca, Mn, P, and Ba in five marine sedimentary reference materials: results from sequential extractions, 487 (2003) 117

Sequential injection (SI)

Automated sample preparation method for suspension arrays using renewable surface separations with multiplexed flow cytometry fluorescence detection, 478 (2003) 85

Sequential injection-bead injection-lab-on-valve schemes for on-line solid phase extraction and preconcentration of ultra-trace levels of heavy metals with determination by electrothermal atomic absorption spectrometry and inductively coupled plasma mass spectrometry, 499 (2003) 139

Exploiting sequential injection analysis with bead injection and lab-on-valve for determination of lead using electrothermal atomic absorption spectrometry, 499 (2003) 167

Sequential injection analysis (SIA)

- Determination of carbonate and hydrogencarbonate by titration using sequential injection analysis, 485 (2003) 187
- Reversed flow injection and sandwich sequential injection methods for the spectrophotometric determination of copper(II) with cuprizone, 486 (2003) 227
- Indirect spectrophotometric determination of *p*-aminobenzoic acid in sunscreen formulations by sequential injection analysis, 493 (2003) 233
- Coupling of monolithic columns with sequential injection technique. A new separation approach in flow methods, 494 (2003) 133
- Using on-line solid phase extraction for simultaneous determination of ascorbic acid and rutin trihydrate by sequential injection analysis, 497 (2003) 165
- Fully automated drug liberation apparatus for semisolid preparations based on sequential injection analysis, 499 (2003) 9
- Zone fluidics in flow analysis: potentialities and applications, 499 (2003) 29
- Kinetic determination of L(-)-malic acid in wines using sequential injection analysis, 499 (2003) 99
- Determination of ethanol in distilled liquors using sequential injection analysis with spectrophotometric detection, 499 (2003) 123
- Speciation of Mn(II) and Mn(VII) by on-line spectrophotometric sequential injection analysis, 499 (2003) 129
- Monolithic columns—a new concept of separation in the sequential injection technique, 499 (2003) 205

Sequential injection chromatography

- Coupling of monolithic columns with sequential injection technique. A new separation approach in flow methods, 494 (2003) 133
- Monolithic columns—a new concept of separation in the sequential injection technique, 499 (2003) 205

Serine

- Synthesis of novel chitosan resin derivatized with serine moiety for the column collection/concentration of uranium and the determination of uranium by ICP-MS, 480 (2003) 239

Serum

- Clenbuterol food poisoning diagnosis by gas chromatography–mass spectrometric serum analysis, 483 (2003) 207
- Flow injection analysis of uric acid with a uricase- and horseradish peroxidase-coupled Sepharose column based luminol chemiluminescence system, 499 (2003) 41
- Flow-injection simultaneous determination of copper and iron in patient sera with 2-(5-bromo-2-pyridylazo)-5-(*N*-propyl-*N*-sulfo-propylamino)aniline and its application to disease diagnosis, 499 (2003) 91

Serum samples

- Investigation of the luminescent properties of terbium–anthranilate complexes and application to the determination of anthranilic acid derivatives in aqueous solutions, 476 (2003) 149

SFG

- Surface vibrational sum frequency and Raman studies of PAMAM G0, G1 and acylated PAMAM G0 dendrimers, 496 (2003) 117

Sheep muscle

- Liquid chromatographic-electrospray tandem mass spectrometric method for the determination of mebendazole and its hydrolysed and reduced metabolites in sheep muscle, 483 (2003) 111

Shrimp

- Application of size-exclusion chromatography to the analysis of shrimp for sulfonamide residues, 483 (2003) 147
- Screening and confirmation of chloramphenicol in shrimp tissue using ELISA in combination with GC-MS² and LC-MS², 483 (2003) 153

SIA

- Determination of amoxicillin in pharmaceuticals using sequential injection analysis (SIA). Evaluation of the presence of interferents using multivariate curve resolution, 485 (2003) 195

Sibutramine

- Simultaneous determination of sibutramine and its *N*-desmethyl metabolites in human plasma by liquid chromatography–electrospray ionization–mass spectrometry. Method and clinical applications, 492 (2003) 241

Signal profile model study

- Validation of the membrane composition effect on the flow-injection signal profile of chalcogenide-based ion-selective sensors: a model study using electrochemical approach. Hg(II) flow-injection detector case, 476 (2003) 55

Signal-to-noise

- Discarding or downweighting high-noise variables in factor analytic models, 490 (2003) 277

Significant factors

- Validation of consensus between proteomic and clinical chemistry datasets by applying a new randomisation *F*-test for generalised procrustes analysis, 490 (2003) 365

Silica gel

- Electrochemical and catalytic investigation of carbon paste modified with Toluidine Blue O covalently immobilised on silica gel, 476 (2003) 43

Silicate/Nafion composite film

- Amperometric phenol biosensor based on sol–gel silicate/Nafion composite film, 479 (2003) 143

Silicon nitride

- Simple test system for single molecule recognition force microscopy, 479 (2003) 59

Silver

- Bandpass reaction cell inductively coupled plasma mass spectrometry for the determination of silver and cadmium in samples in the presence of excess Zr, Nb and Mo, 493 (2003) 213

Silver determination

- Selective cloud point extraction and preconcentration of trace amounts of silver as a dithizone complex prior to flame atomic absorption spectrometric determination, 484 (2003) 155

Silver dispersion

Sol-gel derived metal dispersed ceramic-graphite composite electrode for amperometric determination of dopamine, 478 (2003) 321

Silybinin

Thermodynamic dissociation constants of silychristin, silybin, silydianin and mycophenolate by the regression analysis of spectrophotometric data, 486 (2003) 125

Silychristin

Thermodynamic dissociation constants of silychristin, silybin, silydianin and mycophenolate by the regression analysis of spectrophotometric data, 486 (2003) 125

Silydianin

Thermodynamic dissociation constants of silychristin, silybin, silydianin and mycophenolate by the regression analysis of spectrophotometric data, 486 (2003) 125

Simplexes

Delaunay triangulation method for multivariate calibration, 488 (2003) 1

SIMPLISMA

SIMPLISMA applied to two-dimensional wavelet compressed ion mobility spectrometry data, 484 (2003) 75

Real-time two-dimensional wavelet compression and its application to real-time modeling of ion mobility data, 490 (2003) 59

Reliability of the contribution profiles obtained through the SIMPLISMA approach and used as reference in a calibration process. Application to Raman micro-analysis of dust particles, 495 (2003) 205

Simultaneous determination

Analysers of chromium and/or cobalt, 488 (2003) 243

Simultaneous multicomponent determination

Simultaneous determination of methylene blue and new methylene blue by slab optical waveguide spectroscopy and artificial neural networks, 487 (2003) 109

Single and double rectangular cavity

Influence of the variable wall thickness of the sample tubes and a quartz Dewar on the EPR signal intensity in a single TE₁₀₂ and double TE₁₀₄ rectangular cavity, 482 (2003) 229

Single particle

Sensitive miniature single-particle immunoassay of prostate-specific antigen using time-resolved fluorescence, 482 (2003) 157

Singlet oxygen

Direct evidence of singlet molecular oxygen [O₂ (¹Δ_g)] production in the reaction of acetonitrile with hydrogen peroxide in alkaline solutions, 482 (2003) 99

Six-membered carbocyclic compounds

Investigation of six-membered carbocyclic compounds as a molecular switch block of room temperature phosphorescence in nondeoxygenated β-cyclodextrin solution, 484 (2003) 111

Size-exclusion

Application of size-exclusion chromatography to the analysis of shrimp for sulfonamide residues, 483 (2003) 147

Skimmed milk powder

Single biosensor immunoassay for the detection of five aminoglycosides in reconstituted skimmed milk, 488 (2003) 53

Slab optical waveguide

Simultaneous determination of methylene blue and new methylene blue by slab optical waveguide spectroscopy and artificial neural networks, 487 (2003) 109

Slope comparison method

Ultratrace determination of phosphorus in ultrapurified water by a slope comparison method, 481 (2003) 311

Sludge

Speciation of chromium in wastewater and sludge by extraction with liquid anion exchanger Amberlite LA-2 and electrothermal atomic absorption spectrometry, 478 (2003) 119

Slurries and atomic fluorescence spectrometry

Non-chromatographic speciation analysis of arsenic and antimony in milk hydride generation atomic fluorescence spectrometry, 493 (2003) 195

Smoke

Electron spin resonance and spin trap investigation of free radicals in cigarette smoke: development of a quantification procedure, 481 (2003) 1

S-N Schiff's base

Novel gadolinium poly(vinyl chloride) membrane sensor based on a new S-N Schiff's base, 495 (2003) 51

Sodium

Conformational analysis of 12-crown-3 and sodium ion selectivity of electrodes based on bis(12-crown-3) derivatives with malonate spacers, 480 (2003) 291

Sodium carbonate

Electrothermal atomic absorption spectrometric determination of Cr(VI) in soil after leaching of Cr(VI) species with carbon dioxide, 491 (2003) 81

Sodium diclofenac

Monolithic columns—a new concept of separation in the sequential injection technique, 499 (2003) 205

Sodium tetraethylborate

Determination of butyltin species in natural waters using aqueous phase ethylation and off-line room temperature trapping, 477 (2003) 103

Sodium tetraphenylborate

Flow injection chemiluminescent immunoassay with *para*-phenylphenol and sodium tetraphenylborate as synergistic enhancers, 485 (2003) 57

Soil

- Determination of As(III) and As(V) in soils using sequential extraction combined with flow injection hydride generation atomic fluorescence detection, 477 (2003) 139
- Flow system to gas capture from a nebulized solution, 479 (2003) 167
- Comparison of immunoassay and gas chromatography-mass spectrometry for measurement of polycyclic aromatic hydrocarbons in contaminated soil, 486 (2003) 31
- Determination of napropamide in technical formulations, soil and vegetable samples by sensitised fluorescence: validation of the method, 491 (2003) 37
- Electrothermal atomic absorption spectrometric determination of Cr(VI) in soil after leaching of Cr(VI) species with carbon dioxide, 491 (2003) 81
- Bandpass reaction cell inductively coupled plasma mass spectrometry for the determination of silver and cadmium in samples in the presence of excess Zr, Nb and Mo, 493 (2003) 213

Soil extraction method

- Simultaneous extraction of organotin, organolead and organomercury species from soils and litter, 493 (2003) 23

Soil reflectance

- The potential of field spectroscopy for the assessment of sediment properties in river floodplains, 484 (2003) 189

Solenoid micro-pumps

- Multi-pumping flow system for spectrophotometric determination of bromhexine, 499 (2003) 107

Sol-gel

- Amperometric biosensor based on a nanoporous ZrO_2 matrix, 478 (2003) 59
- Sol-gel derived metal dispersed ceramic-graphite composite electrode for amperometric determination of dopamine, 478 (2003) 321
- Lifetime-based optical sensor for high-level $p\text{CO}_2$ detection employing fluorescence resonance energy transfer, 480 (2003) 275
- Electrochemiluminescence sensor using tris(2,2'-bipyridyl)ruthenium(II) immobilized in Eastman-AQ55D-silica composite thin-films, 480 (2003) 285
- Free and sol-gel immobilized alkaline phosphatase-based biosensor for the determination of pesticides and inorganic compounds, 484 (2003) 45
- Amperometric biosensor for hydrogen peroxide based on hemoglobin entrapped in titania sol-gel film, 486 (2003) 209
- Characterization of a fluorescent sol-gel encapsulated erythrosin B dissolved oxygen sensor, 487 (2003) 101
- Fast and long term optical sensors for pH based on sol-gels, 495 (2003) 45
- Coupled enzyme reaction microarrays based on pin-printing of sol-gel derived biomaterials, 500 (2003) 3

Sol-gel column

- Flow injection analysis of glucose based on its inhibition of electrochemiluminescence in a $\text{Ru}(\text{bpy})_3^{2+}$ -tripropylamine system, 498 (2003) 61

Sol-gel immobilization

- Sol-gel derived urease-based optical biosensor for the rapid determination of heavy metals, 481 (2003) 75

Sol-gel process

- Synthesis of molecular imprinted organic-inorganic hybrid polymer binding caffeine, 481 (2003) 175

Sol-gel technique

- Amperometric phenol biosensor based on sol-gel silicate/Nafion composite film, 479 (2003) 143
- High extraction efficiency solid-phase microextraction fibers coated with open crown ether stationary phase using sol-gel technique, 486 (2003) 63

Solid phase extraction

- Solid phase extraction for analysis of biogenic carbonates by electrothermal vaporization inductively coupled plasma mass spectrometry (ETV-ICP-MS): an investigation of rare earth element signatures in otolith microchemistry, 476 (2003) 1
- Simultaneous determination of flumequine and oxolinic acid in chicken tissues by solid phase extraction and capillary electrophoresis, 477 (2003) 21
- Preconcentration of copper on ion-selective imprinted polymer microbeads, 480 (2003) 251
- Molecularly imprinted solid phase extraction for rapid screening of cephalexin in human plasma and serum, 481 (2003) 165
- Faster analysis of anabolic steroids in kidney fat by downscaling the sample size and using gas chromatography-tandem mass spectrometry, 483 (2003) 269
- Solid phase extraction of lead by Chelest Fiber Iry (aminopolycarboxylic acid-type cellulose), 485 (2003) 19
- Using on-line solid phase extraction for simultaneous determination of ascorbic acid and rutin trihydrate by sequential injection analysis, 497 (2003) 165

Solid sampling

- Solid sample graphite furnace atomic absorption spectroscopy for supporting arsenic determination in sediments following a sequential extraction procedure, 476 (2003) 15

Solid state sensor

- Miniaturized back-side contact transducer for potentiometric sensors, 485 (2003) 103

Solid-phase clean-up

- Quantitative multi-residue analysis of tetracyclines and their 4-epimers in pig tissues by high-performance liquid chromatography combined with positive-ion electrospray ionization mass spectrometry, 492 (2003) 199

Solid-phase extraction

- β -Cyclodextrin epichlorohydrin copolymer as a solid-phase extraction adsorbent for aromatic compounds in water samples, 477 (2003) 93
- Isolation of bound residues of nitrofurans from tissue by solid-phase extraction with determination by liquid chromatography with UV and tandem mass spectrometric detection, 483 (2003) 91

- Evaluation of Pb-Spec[®] for flow-injection solid-phase extraction preconcentration for the determination of trace lead in water and wine by flame atomic absorption spectrometry, 485 (2003) 9
- Measurement of 4-nonylphenol and 4-*tert*-octylphenol in human urine by column-switching liquid chromatography-mass spectrometry, 486 (2003) 41
- Quantitation of plasma thymidine by high-performance liquid chromatography-atmospheric pressure chemical ionization mass spectrometry and its application to pharmacodynamic studies in cancer patients, 486 (2003) 51
- Multi-walled carbon nanotubes packed cartridge for the solid-phase extraction of several phthalate esters from water samples and their determination by high performance liquid chromatography, 494 (2003) 149
- Quantitative determination of sulfonamide in meat by solid-phase extraction and capillary electrophoresis, 499 (2003) 215
- Solid-phase microextraction (SPME)**
- Micellar microwave-assisted extraction combined with solid-phase microextraction for the determination of polycyclic aromatic hydrocarbons in a certified marine sediment, 477 (2003) 81
- High extraction efficiency solid-phase microextraction fibers coated with open crown ether stationary phase using sol-gel technique, 486 (2003) 63
- Solid-phase microextraction and liquid chromatography/mass spectrometry in drug analysis, 492 (2003) 49
- Analysis of carcinogenic aromatic amines in water samples by solid-phase microextraction coupled with high-performance liquid chromatography, 495 (2003) 109
- Solid-state electrochemistry**
- Identification of iron(III) oxides and hydroxy-oxides by voltammetry of immobilised microparticles, 477 (2003) 157
- Solubility monitoring**
- Crystallization monitoring in supersaturated solution with a quartz crystal sensor, 491 (2003) 71
- Solubility product**
- Solubility products for aminocarboxylate ligands: determination, validation and speciation uses, 480 (2003) 119
- Solution**
- Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419
- Solution equilibria**
- Using solution equilibria to determine average molecular weight of the Suwannee River fulvic acids, 496 (2003) 325
- Solvatochromism**
- Molecular design, characterization, and application of multiinformation dyes for optical chemical sensing. IV. Multiinformation dyes with extended spectral sensitivity in the near-infrared spectral range, 482 (2003) 19
- Solvent extraction**
- Selective extraction of thallium(III) in the presence of gallium(III), indium(III), bismuth(III) and antimony(III) by salting-out of an aqueous mixture of 2-propanol, 477 (2003) 243
- Room temperature ionic liquid as a novel medium for liquid/liquid extraction of metal ions, 488 (2003) 183
- Zone fluidics in flow analysis: potentialities and applications, 499 (2003) 29
- Solvent generation**
- Determination of 18 nucleobases, nucleosides and nucleotides in human peripheral blood mononuclear cells by isocratic solvent-generated ion-pair chromatography, 481 (2003) 245
- Solvent polymeric membrane**
- Symmetrical electrochemical cell for determination of coextraction constants of metal salts for ion-selective polymeric membranes, 485 (2003) 253
- Somatotropine**
- Analysis for endogenous and recombinant porcine somatotropine in serum, 483 (2003) 201
- Sonic spray ionization**
- Rapid analysis of pentazocine in human plasma by liquid chromatography/mass spectrometry with sonic spray ionization, 492 (2003) 249
- Sorption**
- Investigation into sorption processes in the anodic stripping voltammetric speciation of Cu in natural waters, 476 (2003) 33
- Sorption-scintillation determination of ⁹⁰Sr in natural water, 480 (2003) 151
- Sorption capacity**
- Application of thermodynamics in a specific force field to the adsorption of Al³⁺ ions on the chelating resins Ostsorb Oxin, Ostsorb Salicyl, Spheron Oxin, and Spheron Salicyl. Mathematical analysis of sorption isotherms using nonlinear mean square software, 488 (2003) 123
- Sorption mechanism**
- Application of thermodynamics in a specific force field to the adsorption of Al³⁺ ions on the chelating resins Ostsorb Oxin, Ostsorb Salicyl, Spheron Oxin, and Spheron Salicyl. Mathematical analysis of sorption isotherms using nonlinear mean square software, 488 (2003) 123
- SOS-response**
- Bacterial *Lux-Fluoro* test for biological assessment of pollutants in water samples from urban and rural origin, 487 (2003) 51
- Source separation**
- Cross validation and uncertainty estimates in independent component analysis, 490 (2003) 341
- Soxhlet extraction**
- Extraction of brominated flame retardants from polymeric waste material using different solvents and supercritical carbon dioxide, 491 (2003) 111

Soya sauces

Molecular sensing of 3-chloro-1,2-propanediol by molecular imprinting, 491 (2003) 15

Spatial information

SpaRef: a clustering algorithm for multispectral images, 490 (2003) 303

SPE

Optimization and validation of an enzyme immunoassay for the insect growth regulator fenoxycarb, 487 (2003) 15

Speciation

Investigation into sorption processes in the anodic stripping voltammetric speciation of Cu in natural waters, 476 (2003) 33

Speciation analysis of mercury in seafood by using high-performance liquid chromatography on-line coupled with cold-vapor atomic fluorescence spectrometry via a post column microwave digestion, 477 (2003) 131

Determination of As(III) and As(V) in soils using sequential extraction combined with flow injection hydride generation atomic fluorescence detection, 477 (2003) 139

Europium speciation by time-resolved laser-induced fluorescence, 478 (2003) 11

Speciation of chromium in wastewater and sludge by extraction with liquid anion exchanger Amberlite LA-2 and electrothermal atomic absorption spectrometry, 478 (2003) 119

Selective extractions to assess the biogeochemically relevant fractionation of inorganic mercury in sediments and soils, 479 (2003) 233

Simultaneous, sensitive and selective on-line chemiluminescence determination of Cr(III) and Cr(VI) by capillary electrophoresis, 485 (2003) 169

Routine analysis of mercury species using commercially available instrumentation: chemometric optimisation of the instrumental variables, 486 (2003) 255

Non-chromatographic speciation analysis of arsenic and antimony in milk hydride generation atomic fluorescence spectrometry, 493 (2003) 195

Speciation of Mn(II) and Mn(VII) by on-line spectrophotometric sequential injection analysis, 499 (2003) 129

On-line collection/concentration of trace metals for spectroscopic detection via use of small-sized thin solid phase (STSP) column resin reactors. Application to speciation of Cr(III) and Cr(VI), 499 (2003) 149

Methodological advances for selenium speciation analysis in yeast, 500 (2003) 171

Speciation modelling

Solubility products for aminocarboxylate ligands: determination, validation and speciation uses, 480 (2003) 119

Spectral library search

Spectral similarity versus structural similarity: infrared spectroscopy, 490 (2003) 313

Spectral unit normalization

Non-destructive and clean prediction of aviation fuel characteristics through Fourier transform-Raman spectroscopy and multivariate calibration, 482 (2003) 115

Spectroelectroanalysis

Flow injection spectroelectroanalytical method for the determination of promethazine hydrochloride in pharmaceutical preparations, 494 (2003) 215

Spectroelectrochemistry and ferrocene

Spectroelectrochemical responsiveness of a freestanding, boron-doped diamond, optically transparent electrode toward ferrocene, 500 (2003) 137

Spectroelectrochemistry

Flow injection spectroelectroanalytical method for the determination of promethazine hydrochloride in pharmaceutical preparations, 494 (2003) 215

Spectrofluorimetry

Micelle-mediated spectrofluorimetric determination of ampicillin based on metal ion-catalysed hydrolysis, 484 (2003) 223

Determination of melatonin in commercial preparations by micellar electrokinetic chromatography and spectrofluorimetry, 488 (2003) 97

Spectrofluorimetric determination of naltrexone by a kinetic method using the stopped-flow technique, 495 (2003) 249

Spectrometer x-axis calibration

Rare-earth glass reference materials for near-infrared spectrometry: sources of x-axis location variability, 490 (2003) 85

Spectrophotometric detection

Utility of copper(II) oxide as a packed reactor in flow injection assembly for rapid analysis of some angiotensin converting enzyme inhibitors, 489 (2003) 115

Spectrophotometric determination

Simultaneous determination of copper, nickel, cobalt and zinc using zincon as a metallochromic indicator with partial least squares, 487 (2003) 181

Gold and alloy nanoparticles in solution and thin film assembly: spectrophotometric determination of molar absorptivity, 496 (2003) 17

Spectrophotometric method

Simplified version of the sodium salicylate method for analysis of nitrate in drinking waters, 477 (2003) 125

Spectrophotometric titration

Thermodynamic dissociation constants of silychristin, silybin, silydianin and mycophenolate by the regression analysis of spectrophotometric data, 486 (2003) 125

Spectrophotometry

Thiacalix[4]arenetetrasulfonate as specific pre-column chelating reagent for nickel(II) ion in kinetic differentiation mode high-performance liquid chromatography, 478 (2003) 163

A kinetic spectrophotometric method for the determination of ternary mixtures of reducing sugars with the aid of artificial neural networks and multivariate calibration, 480 (2003) 53

Novel flow injection spectrophotometric determination of fosinopril using UV-assisted digestion and an orthophosphates calibration graph, 481 (2003) 321

Development and validation of chemometrics-assisted spectrophotometry and micellar electrokinetic chromatography for the determination of four-component pharmaceuticals, 489 (2003) 77

Using on-line solid phase extraction for simultaneous determination of ascorbic acid and rutin trihydrate by sequential injection analysis, 497 (2003) 165

Multi-reflection photometric flow cell for use in flow injection analysis of estuarine waters, 499 (2003) 81

Determination of ethanol in distilled liquors using sequential injection analysis with spectrophotometric detection, 499 (2003) 123

Spectroscopic data

Dynamic time warping of spectroscopic BATCH data, 498 (2003) 133

Spin tapping

Electron spin resonance and spin trap investigation of free radicals in cigarette smoke: development of a quantification procedure, 481 (2003) 1

Spiramycin

Liquid chromatographic-tandem mass spectrometric detection of banned antibacterial growth promoters in animal feed, 483 (2003) 99

Determination of macrolide antibiotics in meat and fish by liquid chromatography-electrospray mass spectrometry, 492 (2003) 187

Spirits

Determination of ethanol in distilled liquors using sequential injection analysis with spectrophotometric detection, 499 (2003) 123

Split-flow thin (SPLITT)

Development of magnetic split-flow thin fractionation for continuous particle separation, 497 (2003) 115

SPLMOD

Assessment of techniques for DOSY NMR data processing, 490 (2003) 231

SPME

Experimental design applied to the determination of several contaminants in Duero River by solid-phase microextraction, 477 (2003) 257

Optimization and validation of an enzyme immunoassay for the insect growth regulator fenoxycarb, 487 (2003) 15

Development of a non-labeled immunosensor for the herbicide trifluralin via optical waveguide lightmode spectroscopic detection, 487 (2003) 31

SPR

Novel determination of cadmium ions using an enzyme self-assembled monolayer with surface plasmon resonance, 500 (2003) 119

Square-wave voltammetry

On-line electrochemical monitoring of (TNT) 2,4,6-trinitrotoluene in natural waters, 485 (2003) 139

⁹⁰Sr

Sorption-scintillation determination of ⁹⁰Sr in natural water, 480 (2003) 151

SRM analysis

Electrochemical lead separation from copper, copper alloy, silver and silver alloy for isotope ratio determination in archaeometric investigations, 497 (2003) 227

μSRXRF

Exploratory analysis of L'vov platform surfaces for electrothermal atomic absorption spectrometry by using three-way chemometric tools, 495 (2003) 177

SSFP

Continuous wave free precession. Practical analytical tool for low-resolution nuclear magnetic resonance measurements, 478 (2003) 313

Stability

Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

Prussian Blue and enzyme bulk-modified screen-printed electrodes for hydrogen peroxide and glucose determination with improved storage and operational stability, 485 (2003) 111

Arsenic speciation in environmental and biological samples. Extraction and stability studies, 495 (2003) 85

Stability constants

Aluminum phosphate dispersed on a cellulose acetate fiber surface. Preparation, characterization and application for Li⁺, Na⁺ and K⁺ separation, 477 (2003) 305

Challenges in modelling and optimisation of stability constants in the study of metal complexes with monoprotated ligands. Part I. A glass electrode potentiometric and polarographic study of a Cu-TAPSO-OH system, 493 (2003) 105

Stable isotope

Decarbonation and preservation method for the analysis of organic C and N contents and stable isotope ratios of low-carbonated suspended particulate material, 491 (2003) 125

Fourier-transform mass spectrometry for detection of thioester-bound intermediates in unfractionated proteolytic mixtures of 80 and 191 kDa portions of Bacitracin A synthetase, 496 (2003) 217

Stable isotope dilution assay

Simultaneous analysis of folic acid and pantothenic acid in foods enriched with vitamins by stable isotope dilution assays, 495 (2003) 133

Stacking

Optimization in sample stacking for the measurement of short chain organic acids in serum of natural rubber latex by capillary electrophoresis, 482 (2003) 37

Standard addition

Simultaneous determination of methylxanthines in coffees and teas by UV-Vis spectrophotometry and partial least squares, 493 (2003) 83

Second-order bilinear calibration for determining polycyclic aromatic compounds in marine sediments by solvent extraction and liquid chromatography with diode-array detection, 498 (2003) 47

Standard addition method

Implementation of an automatic standard addition method in a flow-batch system: application to copper determination in an alcoholic beverage by atomic absorption spectrometry, 486 (2003) 143

Standard reference material

Effect of citrate impurities on the reference pH value of potassium dihydrogen buffer solution, 482 (2003) 137

Elemental fractionation of Si, Al, Ti, Fe, Ca, Mn, P, and Ba in five marine sedimentary reference materials: results from sequential extractions, 487 (2003) 117

Standards

Production of clenbuterol, diethylstilbestrol and trenbolone mass standards in lyophilised bovine urine, 483 (2003) 401

Stanozolol

Rapid method for the determination of stanozolol in meat with supercritical fluid extraction and liquid chromatography-mass spectrometry, 483 (2003) 1

Value of alternative sample matrices in residue analysis for stanozolol, 483 (2003) 11

Stationary phase

Capillary gas chromatographic properties of three new cyclodextrin derivatives with acyl groups in the 6-position of β -cyclodextrin, 498 (2003) 39

Statistical batch process monitoring

Dynamic time warping of spectroscopic BATCH data, 498 (2003) 133

Statistical estimation

Estimation the withdrawal period for veterinary drugs used in food producing animals, 483 (2003) 251

Statistical moments

Additivity of statistical moments in the exponentially modified Gaussian model of chromatography, 478 (2003) 99

Steady state

A wall-jet disc electrode for simultaneous and continuous on-line measurement of sodium dithionite, sulfite and indigo concentrations by means of multistep chronoamperometry, 486 (2003) 73

Stepwise regression

Prediction of drug bioavailability based on molecular structure, 485 (2003) 89

Steroidogenic enzymes

Effect of long-term exposure to combinations of growth promoters in Long Evans rats. Part 2: ovarian morphology, 483 (2003) 233

Stopped-flow

Flow injection differential potentiometric determination of lysine by using a lysine biosensor, 477 (2003) 315

Application of two-way decomposition methods in the simultaneous determination of cobalt, nickel and iron by coupling stopped-flow techniques and CCD detection, 491 (2003) 219

Stopped-flow technique

Chemiluminescence determination of citrate and pyruvate and their mixtures by the stopped-flow mixing technique, 485 (2003) 63
Spectrofluorimetric determination of naltrexone by a kinetic method using the stopped-flow technique, 495 (2003) 249

Storage

Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

Stormwater

Determination of colloiddally-associated polycyclic aromatic hydrocarbons (PAHs) in fresh water using C_{18} solid phase extraction disks, 486 (2003) 159

Streptomycin

Single biosensor immunoassay for the detection of five aminoglycosides in reconstituted skimmed milk, 488 (2003) 53

Stripping voltammetry

Particle-based detection of DNA hybridization using electrochemical stripping measurements of an iron tracer, 482 (2003) 149

Multivariate analytical sensitivity in the determination of selenium, copper, lead and cadmium by stripping voltammetry when using soft calibration, 489 (2003) 85

Stripping voltammetry

Nanoparticle-based electrochemical DNA detection, 500 (2003) 247

Strong acid

Response to high acidity and basicity at a platinum electrode in chronopotentiometry, 478 (2003) 337

Strong anion exchange chromatography

Selenium speciation analysis in a sediment using strong anion exchange and reversed phase chromatography coupled with inductively coupled plasma-mass spectrometry, 478 (2003) 219

Strong base

Response to high acidity and basicity at a platinum electrode in chronopotentiometry, 478 (2003) 337

Strong cation exchange resin

Evaluation of behaviour of linear monoamines $CH_3-(CH_2)_{n-1}-NH_2$ ($n = 1-6$) in ion chromatography, 477 (2003) 41

Structure

Dynamic imaging of single DNA-protein interactions using atomic force microscopy, 479 (2003) 3

Structure elucidation of organic compounds

Advantages and disadvantages of nuclear magnetic resonance spectroscopy as a hyphenated technique, 497 (2003) 1

Subcritical CO_2

Effect of the carbon dioxide modifier on the lipid composition of wool wax extracted from raw wool, 477 (2003) 233

Subcritical water chromatography

Comparison of elution strength, column efficiency, and peak symmetry in subcritical water chromatography and traditional reversed-phase liquid chromatography, 494 (2003) 157

Subcritical water oxidation

Characterization of subcritical water oxidation with in situ monitoring and self-modeling curve resolution, 485 (2003) 73

Sub-sampling

Evaluation of sample processing and sub-sampling performance, 477 (2003) 169

Gy sampling theory in environmental studies. 2. Subsampling error estimates, 490 (2003) 159

Substructure descriptors

Spectral similarity versus structural similarity: infrared spectroscopy, 490 (2003) 313

Sugar beet

Comparison of supervised pattern recognition methods with McNemar's statistical test. Application to qualitative analysis of sugar beet by near-infrared spectroscopy, 477 (2003) 187

Sulbactam

Fast high performance liquid chromatography method for in-process control of sulbactam, 498 (2003) 1

Sulfachloropyridazin

Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

Sulfadiazine

Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

Sulfide

Trace sulfide determination in oxic freshwaters, 477 (2003) 113

Voltammetric and amperometric determination of sulfite using an aluminum electrode modified by nickel pentacyanonitrosylferate film. Application to the analysis of some real samples, 497 (2003) 133

Sulfonamide

'In situ' preparation of nitrous acid solutions by photoreduction in a flow assembly for analysis of pharmaceuticals, 476 (2003) 131

Rapid high-performance liquid chromatographic determining technique of sulfamonomethoxine, sulfadimethoxine, and sulfaquinoxaline in eggs without use of organic solvents, 481 (2003) 255

Application of size-exclusion chromatography to the analysis of shrimp for sulfonamide residues, 483 (2003) 147

Biosensor immunoassay for the detection of eight sulfonamides in chicken serum, 483 (2003) 171

Extraction procedure for sulfachloropyridazine in porcine tissues and detection in a sulfonamide-specific enzyme-linked immunosorbent assay (ELISA), 494 (2003) 21

Immunochemical rapid test for multiresidue analysis of antimicrobial drugs in milk using monoclonal antibodies and hapten-glucose oxidase conjugates, 495 (2003) 11

Enhanced flow-injection-chemiluminometric determination of sulfonamides by on-line photochemical reaction, 499 (2003) 57

Quantitative determination of sulfonamide in meat by solid-phase extraction and capillary electrophoresis, 499 (2003) 215

Sulfonamide determination

Affinity biosensors based on disposable screen-printed electrodes modified with DNA, 479 (2003) 125

Sulphamethoxazole

Enhanced flow-injection-chemiluminometric determination of sulfonamides by on-line photochemical reaction, 499 (2003) 57

Sum frequency generation

Polarization characterization in surface second harmonic generation by nonlinear optical null ellipsometry, 496 (2003) 133

Sunscreen

Indirect spectrophotometric determination of *p*-aminobenzoic acid in sunscreen formulations by sequential injection analysis, 493 (2003) 233

Super heavy elements

Liquid-liquid microbatch extraction system for rapid mutual separation of fission products, 484 (2003) 139

Supercritical fluid

Extraction of brominated flame retardants from polymeric waste material using different solvents and supercritical carbon dioxide, 491 (2003) 111

Supercritical fluid extraction

Rapid method for the determination of stanozolol in meat with supercritical fluid extraction and liquid chromatography-mass spectrometry, 483 (2003) 1

Development and optimisation of a method for the extraction of benzimidazoles from animal liver using supercritical carbon dioxide, 483 (2003) 313

Application of a gas-liquid entraining rotor to supercritical fluid extraction. Removal of iron(III) from water, 485 (2003) 1

Chelating resin sorption followed by supercritical fluid extraction and liquid chromatographic determination of aluminum in liquid samples, 494 (2003) 125

Supersaturation

Crystallization monitoring in supersaturated solution with a quartz crystal sensor, 491 (2003) 71

Supersonic jet

Supersonic jet/multiphoton ionization/time-of-flight mass spectrometry for dioxin analysis. Effect of solvent in solution inlet/laser vaporization technique, 484 (2003) 163

Supervised pattern recognition method

Comparison of supervised pattern recognition methods with McNemar's statistical test. Application to qualitative analysis of sugar beet by near-infrared spectroscopy, 477 (2003) 187

Supported liquid membrane extraction

Extraction and preconcentration of manganese(II) from biological fluids (water, milk and blood serum) using supported liquid membrane and membrane probe methods, 485 (2003) 25

Supramolecular porphyrin films

Electrocatalytic activity of a new nanostructured polymeric tetra-ruthenated porphyrin film for nitrite detection, 480 (2003) 97

Supramolecular switch

Methanol controllable chromophoric supramolecular switch investigated by electrospray mass spectrometry, 495 (2003) 1

Surface acoustic wave (SAW)

Classical least squares transformations of sensor array pattern vectors into vapor descriptors. Simulation of arrays of polymer-coated surface acoustic wave sensors with mass-plus-volume transduction mechanisms, 490 (2003) 169

Surface analysis

Applications of surface analysis in the environmental sciences: dehalogenation of chlorocarbons with zero-valent iron and iron-containing mineral surfaces, 496 (2003) 301

Surface chemistry

Chemical force microscopy: applications in surface characterisation of natural hydroxyapatite, 479 (2003) 39

Surface compounds

Thermal decomposition of surface compounds for the generation of small quantities of acetaldehyde. Calibration of a thermal desorption-gas chromatography-flame ionization detection, 488 (2003) 89

Surface plasmon resonance

Seeking connectivity between engineered proteins and transducers: connection for glutathione S-transferase fusion proteins on surface plasmon resonance devices, 500 (2003) 323

Surface plasmon resonance (SPR)

Evaluation of the recognition ability of molecularly imprinted materials by surface plasmon resonance (SPR) spectroscopy, 489 (2003) 191

Surface plasmon resonance biosensor

Surface plasmon resonance biosensor screening of poultry liver and eggs for nicarbazin residues, 483 (2003) 165

Surface vibrational sum frequency

Surface vibrational sum frequency and Raman studies of PAMAM G0, G1 and acylated PAMAM G0 dendrimers, 496 (2003) 117

Surfaces

Investigation of the reliability of piezoelectric chemical sensors, 480 (2003) 307

Surfactants

Analysis of polyethoxylated surfactants in microemulsion-oil-water systems. III. Fractionation and partitioning of polyethoxylated alcohol surfactants, 477 (2003) 293

Meeting challenges in forensic toxicology in Japan by liquid chromatography/mass spectrometry, 492 (2003) 83

Flow-injection determination of cinnarizine using surfactant-enhanced permanganate chemiluminescence, 499 (2003) 223

Suspended particulate matter

An in situ filtration system for trace element determination in suspended particulate matter, 498 (2003) 165

Synchronization

Dynamic time warping of spectroscopic BATCH data, 498 (2003) 133

Synchrotron radiation X-ray fluorescence

Detection of metalloproteins in human liver cytosol by synchrotron radiation X-ray fluorescence after sodium dodecyl sulphate polyacrylamide gel electrophoresis, 485 (2003) 131

Synergistic action

Flow injection chemiluminescent immunoassay with *para*-phenyl-phenol and sodium tetraphenylborate as synergistic enhancers, 485 (2003) 57

Synergistic extraction

Synergistic extraction of lanthanum(III) from chloride medium by mixtures of 1-phenyl-3-methyl-4-benzoyl-pyrazolone-5 and triisobutylphosphine sulphide, 477 (2003) 251

Syringe pumps

Flow injection on-line dilution for flame atomic absorption spectrometry by micro-sample introduction and dispersion using syringe pumps, 481 (2003) 273

T

Tablet analysis

Determination of naproxen in pharmaceuticals by differential pulse voltammetry at a platinum electrode, 495 (2003) 69

Tablets

Determination of melatonin in commercial preparations by micellar electrokinetic chromatography and spectrofluorimetry, 488 (2003) 97

Tabu search

Hybrid genetic algorithm-tabu search approach for optimising multilayer optical coatings, 490 (2003) 211

Tandem mass spectrometry

Screening for gestagens in kidney fat using accelerated solvent extraction and liquid chromatography electrospray tandem mass spectrometry, 483 (2003) 51

Isolation of bound residues of nitrofurans from tissue by solid-phase extraction with determination by liquid chromatography with UV and tandem mass spectrometric detection, 483 (2003) 91

Liquid chromatographic-tandem mass spectrometric detection of banned antibacterial growth promoters in animal feed, 483 (2003) 99

Liquid chromatographic determination of levamisole in animal plasma: ultraviolet versus tandem mass spectrometric detection, 483 (2003) 215

Tanimoto index

Spectral similarity versus structural similarity: infrared spectroscopy, 490 (2003) 313

Tannins

Characterization of thermally assisted hydrolysis and methylation products of polyphenols from modern and archaeological vine derivatives using gas chromatography-mass spectrometry, 493 (2003) 137

Tap water

Flow-injection investigation of the chemiluminescent reaction of bis(2,4,6-(trichlorophenyl)oxalate) with free chlorine, 484 (2003) 101

TAPSO

Challenges in modelling and optimisation of stability constants in the study of metal complexes with monoprotonated ligands. Part I. A glass electrode potentiometric and polarographic study of a Cu-TAPSO-OH system, 493 (2003) 105

TaqMan

Duplex probes: a new approach for the detection of specific nucleic acids in homogenous assays, 491 (2003) 135

 μ -TAS

Optimisation of thermal lens microscopic measurements in a microchip, 480 (2003) 79

TCPO

Flow-injection investigation of the chemiluminescent reaction of bis(2,4,6-(trichlorophenyl)oxalate) with free chlorine, 484 (2003) 101

TCSPC

Fully time-resolved near-field scanning optical microscopy fluorescence imaging, 496 (2003) 259

Time-resolved

Time-resolved fluorescence spectroscopy for illuminating complex systems, 500 (2003) 71

Tea

Simultaneous determination of methylxanthines in coffees and teas by UV-Vis spectrophotometry and partial least squares, 493 (2003) 83

Chelating resin sorption followed by supercritical fluid extraction and liquid chromatographic determination of aluminum in liquid samples, 494 (2003) 125

Tea analysis

Atomic absorption spectrophotometric determination of trace copper in waters, aluminium foil and tea samples after preconcentration with 1-nitroso-2-naphthol-3,6-disulfonic acid on Ambersorb 572, 480 (2003) 259

Teflon AF

Liquid core waveguide-based optical spectrometry for field estimation of dissolved BTEX compounds in groundwater. A feasibility study, 485 (2003) 155

Tellurium determination

Hydride generation atomic fluorescence spectrometric determination of ultratrace selenium and tellurium in cow milk, 481 (2003) 291

Temperature control

Rapid determination of chemical oxygen demand using a focused microwave heating system featuring temperature control, 491 (2003) 99

Temperature correction

Rare-earth glass reference materials for near-infrared spectrometry: sources of x -axis location variability, 490 (2003) 85

Temperature effect

Comparison of elution strength, column efficiency, and peak symmetry in subcritical water chromatography and traditional reversed-phase liquid chromatography, 494 (2003) 157

Temperature programmed desorption

Measurement of the chemical and morphological changes that occur on gold surfaces following thermal desorption and acid dissolution of adsorbed mercury, 496 (2003) 279

Template polymerisation

Molecular recognition properties of peptide mixtures obtained by polymerisation of amino acids in the presence of estradiol, 481 (2003) 41

Tenax[®]

Determination of butyltin species in natural waters using aqueous phase ethylation and off-line room temperature trapping, 477 (2003) 103

TEOS

Fast and long term optical sensors for pH based on sol-gels, 495 (2003) 45

Terbium(III)

Lanthanide sensitized chemiluminescence determination of grepafloxacin in tablets and human urine, 482 (2003) 105

Simultaneous determination of ciprofloxacin and tetracycline in biological fluids based on dual-lanthanide sensitised luminescence using dry reagent chemical technology, 494 (2003) 55

Terbium-anthranilate complexes

Investigation of the luminescent properties of terbium-anthranilate complexes and application to the determination of anthranilic acid derivatives in aqueous solutions, 476 (2003) 149

Terracotta

Pigment and terracotta analyses of Hellenistic figurines in Crete, 497 (2003) 209

Tetracycline

Simultaneous determination of ciprofloxacin and tetracycline in biological fluids based on dual-lanthanide sensitised luminescence using dry reagent chemical technology, 494 (2003) 55

Flow injection analysis of tetracycline in pharmaceutical formulation with pulsed amperometric detection, 499 (2003) 191

Tetracycline and 4-epitetracycline antibiotic tissue residues

Quantitative multi-residue analysis of tetracyclines and their 4-epimers in pig tissues by high-performance liquid chromatography combined with positive-ion electrospray ionization mass spectrometry, 492 (2003) 199

1,3,5,7-Tetramethyl-8-(3',4'-diaminophenyl)-difluoroboradiazas-indacene (TMDABODIPY)

Development of a fluorescent probe for nitric oxide detection based on difluoroboradiazas-indacene fluorophore, 481 (2003) 101

Tetrazolium-teriodomercurate

New triiodomercurate-modified carbon paste electrode for the potentiometric determination of mercury, 478 (2003) 329

 β -Thalassemia

Detection of β -thalassemia by a DNA piezoelectric biosensor coupled with polymerase chain reaction, 481 (2003) 55

Thallium(III)

Selective extraction of thallium(III) in the presence of gallium(III), indium(III), bismuth(III) and antimony(III) by salting-out of an aqueous mixture of 2-propanol, 477 (2003) 243

The Abraham model

Extraction of selected pollutants in open tubular capillary columns, 497 (2003) 199

The Law of Mixtures (LM) method

The Law of Mixtures method for multivariate calibration, 476 (2003) 73

Theoretical descriptors

Prediction of drug bioavailability based on molecular structure, 485 (2003) 89

Therapeutic drug monitoring

Liquid chromatography/mass spectrometry for therapeutic drug monitoring of immunosuppressants, 492 (2003) 133

Thermal decomposition

Thermal decomposition of surface compounds for the generation of small quantities of acetaldehyde. Calibration of a thermal desorption-gas chromatography-flame ionization detection, 488 (2003) 89

Thermal lens microscopy

Optimisation of thermal lens microscopic measurements in a microchip, 480 (2003) 79

Thermochemolysis

Characterization of thermally assisted hydrolysis and methylation products of polyphenols from modern and archaeological vine derivatives using gas chromatography-mass spectrometry, 493 (2003) 137

Thermodynamic

Retention and thermodynamic characteristics of mercury(II) complexes onto polyurethane foams, 481 (2003) 29

Comparative study of binding strengths and thermodynamic aspects of Cu(II) and Ni(II) with humic acid by Schubert's ion-exchange method, 497 (2003) 235

Thermodynamic stability

The accuracy and precision of a new H/D exchange- and mass spectrometry-based technique for measuring the thermodynamic stability of proteins, 496 (2003) 225

Thermoelectric cooler

Detection of volatile organic compounds using surface enhanced Raman spectroscopy substrates mounted on a thermoelectric cooler, 488 (2003) 15

Thermoresponsive

Fluorescence nonradiative energy transfer analysis of crosslinker heterogeneity in core-shell hydrogel nanoparticles, 496 (2003) 53

Thermospray flame furnace atomic absorption spectrometry

Improvements in thermospray flame furnace atomic absorption spectrometry, 479 (2003) 215

Thermospray nebulization

Improvements in thermospray flame furnace atomic absorption spectrometry, 479 (2003) 215

Thiacalixarene

Thiacalix[4]arenetetrasulfonate as specific pre-column chelating reagent for nickel(II) ion in kinetic differentiation mode high-performance liquid chromatography, 478 (2003) 163

Thiocyanate

Novel thiocyanate-selective membrane sensors based on di-, tetra-, and hexa-imidepyridine ionophores, 482 (2003) 9

Thiol compound

High-performance liquid chromatography-atmospheric pressure chemical ionization/tandem mass spectrometry for the determination of a thiol compound in plasma, 492 (2003) 215

Thiol cotton fiber

Determination of ultra-trace gold in natural water by graphite furnace atomic absorption spectrophotometry after in situ enrichment with thiol cotton fiber, 479 (2003) 225

Thiram

Voltammetric study on the complex of thiram-copper(II) and its application, 482 (2003) 29

Three-way calibration

Determination of carbendazim, fuberidazole and thiabendazole by three-dimensional excitation-emission matrix fluorescence and parallel factor analysis, 491 (2003) 47

Three-way data

Analyses of three-way data from equilibrium and kinetic investigations, 490 (2003) 99

Thymidine

Quantitation of plasma thymidine by high-performance liquid chromatography-atmospheric pressure chemical ionization mass spectrometry and its application to pharmacodynamic studies in cancer patients, 486 (2003) 51

Thymine

Engineering DNA-electrode connectivities: manipulation of linker length and structure, 496 (2003) 81

Engineering DNA-electrode connectivities: manipulation of linker length and structure, 496 (2003) 92

Thyroid cancer

Capillary electrophoretic profiling and pattern recognition analysis of urinary nucleosides from thyroid cancer patients, 486 (2003) 171

TIBPS

Synergistic extraction of lanthanum(III) from chloride medium by mixtures of 1-phenyl-3-methyl-4-benzoyl-pyrazolone-5 and triisobutylphosphine sulphide, 477 (2003) 251

Tilmicosin

Determination of macrolide antibiotics in meat and fish by liquid chromatography-electrospray mass spectrometry, 492 (2003) 187

Time frequency spectrum

Wavelet frequency spectrum and its application in analyzing an oscillating chemical system, 484 (2003) 201

Time-correlated single photon counting

Multiresolution analysis for quantification of optical properties in scattering media using pulsed photon time-of-flight measurements, 490 (2003) 185

Time-of-flight

Supersonic jet/multiphoton ionization/time-of-flight mass spectrometry for dioxin analysis. Effect of solvent in solution inlet/laser vaporization technique, 484 (2003) 163

Time-of-flight mass spectrometry

Flow injection electrochemical hydride generation inductively coupled plasma time-of-flight mass spectrometry for the simultaneous determination of hydride forming elements and its application to the analysis of fresh water samples, 479 (2003) 203

Chiral recognition of borneol by association with zinc(II) and L-tryptophan in the gas phase, 482 (2003) 1

Time-resolved

Fully time-resolved near-field scanning optical microscopy fluorescence imaging, 496 (2003) 259

Time-resolved fluorescence

Sensitive miniature single-particle immunoassay of prostate-specific antigen using time-resolved fluorescence, 482 (2003) 157

Time-resolved measurements

Growing neural networks for a multivariate calibration and variable selection of time-resolved measurements, 490 (2003) 71

Tin(II)

Effect of citric acid and hydrochloric acid on the polarographic behaviour of tin. Application to the determination of tin(II) in presence of tin(IV) in the activating solutions of the electroless plating of polymers, 484 (2003) 243

Tin(IV)

Effect of citric acid and hydrochloric acid on the polarographic behaviour of tin. Application to the determination of tin(II) in presence of tin(IV) in the activating solutions of the electroless plating of polymers, 484 (2003) 243

Tiopronin

Electrochemical oxidation of tiopronin at diamond film electrodes and its determination by amperometric flow injection analysis, 499 (2003) 183

TISAB

Morpholinoethanesulfonic acid-based buffer system for improved detection limit and stability of the fluoride ion selective electrode, 478 (2003) 77

Tissues

Modification of 17 β -estradiol metabolite profile in steer edible tissues after estradiol implant administration, 483 (2003) 289

Titania sol-gel

Amperometric biosensor for hydrogen peroxide based on hemoglobin entrapped in titania sol-gel film, 486 (2003) 209

Titin

Force mode atomic force microscopy as a tool for protein folding studies, 479 (2003) 87

Titration

Determination of carbonate and hydrogencarbonate by titration using sequential injection analysis, 485 (2003) 187

Tizanidine

Validated liquid chromatography method for assay of tizanidine in drug substance and formulated products, 478 (2003) 171

TLC/FID

Effect of the carbon dioxide modifier on the lipid composition of wool wax extracted from raw wool, 477 (2003) 233

TNT

On-line electrochemical monitoring of (TNT) 2,4,6-trinitrotoluene in natural waters, 485 (2003) 139

Separation of arsines and trinitrotoluene by reversed phase high performance liquid chromatography and micellar electrokinetic capillary chromatography, 495 (2003) 239

Tobacco

Quantitative analysis of cytokinins in plants by liquid chromatography-single-quadrupole mass spectrometry, 480 (2003) 207

***o*-Tolidine**

Indirect spectrophotometric determination of *p*-aminobenzoic acid in sunscreen formulations by sequential injection analysis, 493 (2003) 233

Toluidine Blue O

Electrochemical and catalytic investigation of carbon paste modified with Toluidine Blue O covalently immobilised on silica gel, 476 (2003) 43

Tomato

Determination of napropamide in technical formulations, soil and vegetable samples by sensitised fluorescence: validation of the method, 491 (2003) 37

Top-down approach

Comparison of different approaches to estimate the uncertainty of a liquid chromatographic assay, 480 (2003) 39

Topological descriptor

Prediction of the chromatographic retention of saturated alcohols on stationary phases of different polarity applying the novel semi-empirical topological index, 477 (2003) 29

Total internal reflected resonance light scattering (TIR-RLS)

Total internal reflected resonance light scattering detection of DNA at water/tetrachloromethane interface with acridine orange and cetyltrimethylammonium bromide, 494 (2003) 11

Total reflection X-ray fluorescence

Element determination in medieval soil samples by total reflection X-ray fluorescence analysis, 480 (2003) 327

Total-reflection X-ray fluorescence analysis

Determination of Pt, Pd and Rh in biological samples by electrothermal atomic absorption spectrometry as compared with adsorptive cathodic stripping voltammetry and total-reflection X-ray fluorescence analysis, 498 (2003) 93

Toxic fingerprint

Microplate-based microbial assay for risk assessment and (eco)toxic fingerprinting of chemicals, 485 (2003) 121

Toxicity classification

Toxicity biomonitoring of degradation byproducts using freeze-dried recombinant bioluminescent bacteria, 481 (2003) 229

Toxicity monitoring

Toxicity biomonitoring of degradation byproducts using freeze-dried recombinant bioluminescent bacteria, 481 (2003) 229

Toxicity prediction

NMR-based metabonomic toxicity classification: hierarchical cluster analysis and k-nearest-neighbour approaches, 490 (2003) 3

Toxicity classification from metabonomic data using a density superposition approach: 'CLOUDS', 490 (2003) 109

Toxkit

Microplate-based microbial assay for risk assessment and (eco)toxic fingerprinting of chemicals, 485 (2003) 121

TPD

Decomposition of dimethyl methylphosphonate on $\text{TiO}_2(110)$: principal component analysis applied to X-ray photoelectron spectroscopy, 496 (2003) 289

Trace analysis

New flow injection potentiometric graphite coated ion-selective electrode for the determination of VO^{2+} ions, 481 (2003) 213

Detection of perfluorocarbons using ion mobility spectrometry, 484 (2003) 63

Trace element chemistry

Factor analytical approaches for evaluating groundwater trace element chemistry data, 490 (2003) 123

Trace elements

Determination of trace metals in seawater by on-line column pre-concentration inductively coupled plasma mass spectrometry using metal alkoxide glass immobilized 8-quinolinol, 499 (2003) 157

Trace iron

Determination of trace iron in indium phosphide wafer by on-line matrix separation and inductively coupled plasma mass spectrometry, 482 (2003) 189

Trace metal

Performance of the diffusive gradients in thin films technique for measurement of trace metals in low ionic strength freshwaters, 478 (2003) 237

Organic complexation and total dissolved trace metal analysis in estuarine waters: comparison of solvent-extraction graphite furnace atomic absorption spectrometric and chelating resin flow injection inductively coupled plasma-mass spectrometric analysis, 481 (2003) 127

On-line preconcentration system coupled to electrothermal atomic absorption spectrometry for the simultaneous determination of bismuth, cadmium, and lead in urine, 495 (2003) 165

Evaluation of capillary electrophoresis combined with a BCR sequential extraction for determining distribution of Fe, Zn, Cu, Mn, and Cd in airborne particulate matter, 498 (2003) 175

Training set sample selection

Selection of calibration set samples in determination of olive oil acidity by partial least squares-attenuated total reflectance-Fourier transform infrared spectroscopy, 489 (2003) 59

Tranquillisers

Validation of a method for detecting and quantifying tranquillisers and a β -blocker in pig tissues by liquid chromatography-tandem mass spectrometry, 483 (2003) 335

Transducers

Seeking connectivity between engineered proteins and transducers: connection for glutathione S-transferase fusion proteins on surface plasmon resonance devices, 500 (2003) 323

Transient high ozone formation

Data mining of the relationship between volatile organic components and transient high ozone formation, 490 (2003) 153

Transition metal complexes

The utility of ion-molecule reactions in a quadrupole ion trap mass spectrometer for analyzing metal complex coordination structure, 496 (2003) 233

Transition metals

Energy transfer—room temperature phosphorescence for the optosensing of transition metal ions, 486 (2003) 1

Transportable equipment

Non-destructive in situ determination of pigments in 15th century wall paintings by Raman microscopy, 480 (2003) 317

Trap

Portable instrument for electrochemical gas sensing, 500 (2003) 145

Trenbolone

Production of clenbuterol, diethylstilbestrol and trenbolone mass standards in lyophilised bovine urine, 483 (2003) 401

Triangular wave control

Determination of dissociation constants of weak acids by feedback-based flow ratiometry, 499 (2003) 199

Trichloroanisole

Development of a biosensor for the quantitative detection of 2,4,6-trichloroanisole using screen printed electrodes, 484 (2003) 15

Triclosan

Electrochemical determination of triclosan at a mercury electrode, 494 (2003) 225

Tricyclic anti-depressants

Drug detection based on the conformational changes of calmodulin and the fluorescence of its enhanced green fluorescent protein fusion partner, 500 (2003) 237

Trifluoroacetic anhydride

Study of lactol activation by trifluoroacetic anhydride via in situ Fourier transform infrared spectroscopy, 497 (2003) 155

Trifluralin

Development of a non-labeled immunosensor for the herbicide trifluralin via optical waveguide lightmode spectroscopic detection, 487 (2003) 31

Trilinear model

Mitigating model deficiency in three-way data analysis by the combination of background constraining and iterative correcting techniques, 487 (2003) 171

Trimethoprim

Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

Determination of ropivacaine and its metabolites in patient urine: Advantage of liquid chromatography–tandem mass spectrometry over liquid chromatography–UV detection and liquid chromatography–mass spectrometry, 492 (2003) 253

2,2,7-Trimethyl-3,5-octanedione

Application of a gas–liquid entraining rotor to supercritical fluid extraction. Removal of iron(III) from water, 485 (2003) 1

Trimethylamine

Flow injection potentiometric detection of trimethylamine in sea-food using tungsten oxide electrode, 478 (2003) 53

Triplet lifetime measurements

Room temperature phosphorimetric determination of cyanide based on triplet state energy transfer, 491 (2003) 27

Triton X-114

Selective cloud point extraction and preconcentration of trace amounts of silver as a dithizone complex prior to flame atomic absorption spectrometric determination, 484 (2003) 155

Tumor marker

Determination of tumor marker CA125 by capillary electrophoretic enzyme immunoassay with electrochemical detection, 497 (2003) 75

Tungsten oxide electrode

Flow injection potentiometric detection of trimethylamine in sea-food using tungsten oxide electrode, 478 (2003) 53

Two-way spectral data

Rank annihilation factor analysis for spectrophotometric study of complex formation equilibria, 486 (2003) 109

TXRF

Element determination in medieval soil samples by total reflection X-ray fluorescence analysis, 480 (2003) 327

Seasonal variations in diurnal concentrations of trace elements in atmospheric aerosols in Chicago, 496 (2003) 315

Tylosin

Liquid chromatographic–tandem mass spectrometric detection of banned antibacterial growth promoters in animal feed, 483 (2003) 99

Determination of macrolide antibiotics in meat and fish by liquid chromatography–electrospray mass spectrometry, 492 (2003) 187

Tylosin A

Practical approach for the stability testing of veterinary drugs in solutions and in biological matrices during storage, 483 (2003) 419

Tyrosinase

Amperometric phenol biosensor based on sol–gel silicate/Nafion composite film, 479 (2003) 143

Amperometric flow-injection determination of phenolic compounds at self-assembled monolayer-based tyrosinase biosensors, 494 (2003) 187

Tyrosinase biosensor

A sensitive mediator-free tyrosinase biosensor based on an inorganic–organic hybrid titania sol–gel matrix, 489 (2003) 199

U

Ultrapurified water

Ultratrace determination of phosphorus in ultrapurified water by a slope comparison method, 481 (2003) 311

Ultrasonic extraction

Trace determination of nitrated polycyclic aromatic hydrocarbons using liquid chromatography with on-line electrochemical reduction and fluorescence detection, 482 (2003) 219

Ultrasonic slurry sampling

Electrothermal vaporization inductively coupled plasma-mass spectrometry for the determination of Cr, Cu, Cd, Hg and Pb in rice flour, 495 (2003) 143

Ultrasound assisted

Flow injection manifolds for liquid-liquid extraction without phase separation assisted by ultrasound, 489 (2003) 1

Ultrasound-assistance

Ultrasound-assisted continuous liquid-liquid extraction without phase separation and hydrolysis of paracetamol in suppositories, 489 (2003) 223

Ultra-trace gold

Determination of ultra-trace gold in natural water by graphite furnace atomic absorption spectrophotometry after in situ enrichment with thiol cotton fiber, 479 (2003) 225

Uncertainty

Development of a method for estimating an accurate equivalence point in nickel titration of cyanide ions, 476 (2003) 159

Evaluation of sample processing and sub-sampling performance, 477 (2003) 169

Correction function on biased results due to matrix effects. Application to the routine analysis of pesticide residues, 478 (2003) 281

Determination of uncertainty in analytical measurements from collaborative study results on the analysis of a phenoxymethylpenicillin sample, 481 (2003) 261

Evaluation of the analytical method performance for incurred samples, 485 (2003) 241

Uncertainty contributions

Investigation of equilibration and uncertainty contributions for the determination of inorganic mercury and methylmercury by isotope dilution inductively coupled plasma mass spectrometry, 500 (2003) 155

Uncertainty estimates

Cross validation and uncertainty estimates in independent component analysis, 490 (2003) 341

Uranium determination

Synthesis of novel chitosan resin derivatized with serine moiety for the column collection/concentration of uranium and the determination of uranium by ICP-MS, 480 (2003) 239

Uranium(VI) and thorium(IV)

Thorium(IV) and uranium(VI) sorption studies on octacarboxymethyl-C-methylcalix[4]resorcinarene impregnated on a polymeric support, 485 (2003) 213

Urban dust reference material

Analysis of polycyclic aromatic hydrocarbons in airborne particles using open-vessel focused microwave-assisted extraction, 495 (2003) 99

Urease

Sol-gel derived urease-based optical biosensor for the rapid determination of heavy metals, 481 (2003) 75

Uric acid

Microdialysis sampling and monitoring of uric acid in vivo by a chemiluminescence reaction and an enzyme on immobilized chitosan support membrane, 478 (2003) 23

Uricase

Flow injection analysis of uric acid with a uricase- and horseradish peroxidase-coupled Sepharose column based luminol chemiluminescence system, 499 (2003) 41

Urinary calculi

Determination of the composition of human urinary calculi composed of whewellite, weddellite and carbonate apatite using artificial neural networks, 491 (2003) 211

Urinary nucleosides

Capillary electrophoretic profiling and pattern recognition analysis of urinary nucleosides from thyroid cancer patients, 486 (2003) 171

Urine

Value of alternative sample matrices in residue analysis for stanozolol, 483 (2003) 11

Screening procedures for clenbuterol residue determination in bovine urine and liver matrices using enzyme-linked immunosorbent assay and liquid chromatography, 483 (2003) 61

Determination of chloramphenicol in animal tissues and urine. Liquid chromatography-tandem mass spectrometry versus gas chromatography-mass spectrometry, 483 (2003) 125

Validation of a multiresidue liquid chromatography-tandem mass spectrometric method for the quantitation and confirmation of corticosteroid residues in urine, according to the proposed SANCO 1085 criteria for banned substances, 483 (2003) 341

Production of clenbuterol, diethylstilbestrol and trenbolone mass standards in lyophilised bovine urine, 483 (2003) 401

Measurement of 4-nonylphenol and 4-tert-octylphenol in human urine by column-switching liquid chromatography-mass spectrometry, 486 (2003) 41

Rapid simultaneous determination of arginine and methylated arginines in human urine by high-performance liquid chromatography-mass spectrometry, 487 (2003) 145

NMR-based metabonomic toxicity classification: hierarchical cluster analysis and k-nearest-neighbour approaches, 490 (2003) 3

Determination of a small, highly polar aminopropylphosphonic acid as racemate in plasma and urine and as separated enantiomers in plasma by liquid chromatography and tandem mass spectrometry, 492 (2003) 261

On-line preconcentration system coupled to electrothermal atomic absorption spectrometry for the simultaneous determination of bismuth, cadmium, and lead in urine, 495 (2003) 165

Fluorimetric determination of dopamine in pharmaceutical products and urine using ethylene diamine as the fluorogenic reagent, 497 (2003) 93

Urine analysis

Electrochemical study of the interaction of levofloxacin with DNA, 495 (2003) 61

Urine samples

Determination of ropivacaine and its metabolites in patient urine: Advantage of liquid chromatography–tandem mass spectrometry over liquid chromatography–UV detection and liquid chromatography–mass spectrometry, 492 (2003) 253

Ursodiol

Simple and sensitive fluorimetric liquid chromatography for simultaneous analysis of chenodiol and ursodiol in pharmaceutical formulations, 493 (2003) 159

UV digestion

Novel flow injection spectrophotometric determination of fosinopril using UV-assisted digestion and an orthophosphates calibration graph, 481 (2003) 321

UV/UV method

Rapid estimation of global sugars by UV photodegradation and UV spectrophotometry, 477 (2003) 325

UV-Vis spectrometry

Characterization of subcritical water oxidation with in situ monitoring and self-modeling curve resolution, 485 (2003) 73

UV-Vis spectrophotometry

Colorimetric determination of amino acids using genipin from *Gardenia jasminoides*, 480 (2003) 267

Spectrophotometric, potentiometric and chromatographic pK_a values of polyphenolic acids in water and acetonitrile–water media, 484 (2003) 253

Determination of carbonate and hydrogencarbonate by titration using sequential injection analysis, 485 (2003) 187

V

Vacancy separation

Optically gated vacancy electrophoresis in microfluidic devices, 496 (2003) 195

Validation

Liquid chromatographic determination of levamisole in animal plasma: ultraviolet versus tandem mass spectrometric detection, 483 (2003) 215

Validation of analytical methods based on mass spectrometric detection according to the "2002/657/EC" European decision: guideline and application, 483 (2003) 325

Validation of a multiresidue liquid chromatography–tandem mass spectrometric method for the quantitation and confirmation of corticosteroid residues in urine, according to the proposed SANCO 1085 criteria for banned substances, 483 (2003) 341

Evaluation of the analytical method performance for incurred samples, 485 (2003) 241

Validation of consensus between proteomic and clinical chemistry datasets by applying a new randomisation F -test for generalised procrustes analysis, 490 (2003) 365

Quantitative multi-residue analysis of tetracyclines and their 4-epimers in pig tissues by high-performance liquid chromatogra-

phy combined with positive-ion electrospray ionization mass spectrometry, 492 (2003) 199

Development and validation of a heart-cutting liquid chromatography–mass spectrometry method for the determination of process-related substances in cetirizine tablets, 492 (2003) 271

Vanadyl

New flow injection potentiometric graphite coated ion-selective electrode for the determination of VO^{2+} ions, 481 (2003) 213

Vanadyl salophen

Novel monohydrogenphosphate sensor based on vanadyl salophen, 481 (2003) 85

Vanilla extracts

Determination of flavour components in natural vanilla extracts and synthetic flavourings by mixed micellar electrokinetic capillary chromatography, 485 (2003) 179

Vapor descriptors

Classical least squares transformations of sensor array pattern vectors into vapor descriptors. Simulation of arrays of polymer-coated surface acoustic wave sensors with mass-plus-volume transduction mechanisms, 490 (2003) 169

Variable scaling

Improved analysis of multivariate data by variable stability scaling: application to NMR-based metabolic profiling, 490 (2003) 265

Variable selection

The potential of field spectroscopy for the assessment of sediment properties in river floodplains, 484 (2003) 189

Growing neural networks for a multivariate calibration and variable selection of time-resolved measurements, 490 (2003) 71

Variable stability

Improved analysis of multivariate data by variable stability scaling: application to NMR-based metabolic profiling, 490 (2003) 265

Vegetables

Determination of 81 multiclass pesticides in fresh foodstuffs by a single injection analysis using gas chromatography–chemical ionization and electron ionization tandem mass spectrometry, 484 (2003) 167

Veterinary

Identification of "unknown analytes" in injection sites: a semi-quantitative interpretation, 483 (2003) 387

Veterinary drug

Determination of veterinary drug residues by liquid chromatography and tandem mass spectrometry, 492 (2003) 105

Estimation the withdrawal period for veterinary drugs used in food producing animals, 483 (2003) 251

Vibrational spectroscopy

Applications of surface analysis in the environmental sciences: dehalogenation of chlorocarbons with zero-valent iron and iron-containing mineral surfaces, 496 (2003) 301

Virginiamycin

Liquid chromatographic-tandem mass spectrometric detection of banned antibacterial growth promoters in animal feed, 483 (2003) 99

Visible spectrum

Comparison of indices and multivariate models to non-destructively predict the fruit chlorophyll by means of visible spectrometry in apple fruit, 481 (2003) 119

Visualization

Monitoring of yeast fermentation by ion mobility spectrometry measurement and data visualisation with Self-Organizing Maps, 484 (2003) 93

Vitamin B₁₂

Sub-picogram determination of Vitamin B₁₂ in pharmaceuticals and human serum using flow injection with chemiluminescence detection, 488 (2003) 71

Vitamins B6/B12

Development and validation of chemometrics-assisted spectrophotometry and micellar electrokinetic chromatography for the determination of four-component pharmaceuticals, 489 (2003) 77

Volatile organic components

Data mining of the relationship between volatile organic components and transient high ozone formation, 490 (2003) 153

Volatile organic compound

Detection of volatile organic compounds using surface enhanced Raman spectroscopy substrates mounted on a thermoelectric cooler, 488 (2003) 15

Investigation of the reliability of piezoelectric chemical sensors, 480 (2003) 307

Voltammetric method

Symmetrical electrochemical cell for determination of coextraction constants of metal salts for ion-selective polymeric membranes, 485 (2003) 253

Voltammetry

Identification of iron(III) oxides and hydroxy-oxides by voltammetry of immobilised microparticles, 477 (2003) 157

Ceramic-based multisite microelectrode array for rapid choline measures in brain tissue, 481 (2003) 65

Voltammetric study on the complex of thiram-copper(II) and its application, 482 (2003) 29

Direct voltammetric determination of Mo(VI) in plants: the need for a multivariate study of interferences, 487 (2003) 243

Self-assembled monolayers of crown ethers for solid phase extraction in flow-injection analysis, 489 (2003) 13

Mercury-free simultaneous determination of cadmium and lead at a glassy carbon electrode modified with multi-wall carbon nanotubes, 489 (2003) 215

Trace-element analysis in biological fluids: evaluation of contamination in samples collected with metallic needles, 494 (2003) 167

Electrochemical study of the interaction of levofloxacin with DNA, 495 (2003) 61

Contribution of migration current to the voltammetric deposition and stripping of lead with and without added supporting electrolyte at a mercury-free carbon fibre microdisc electrode, 500 (2003) 307

W**W/WO₃ pH ultramicrosensor**

Solid-state pH ultramicrosensor based on a tungstic oxide film fabricated on a tungsten nanoelectrode and its application to the study of endothelial cells, 480 (2003) 109

Wall paintings

Non-destructive in situ determination of pigments in 15th century wall paintings by Raman microscopy, 480 (2003) 317

Romano-British wall-paintings II: Raman spectroscopic analysis of two villa sites at Nether Heyford, Northants, 484 (2003) 211

Wastewater

Speciation of chromium in wastewater and sludge by extraction with liquid anion exchanger Amberlite LA-2 and electrothermal atomic absorption spectrometry, 478 (2003) 119

Column preconcentration of mercury as HgI₄²⁻ using methyltriocetylammmonium chloride-naphthalene adsorbent with subsequent anodic stripping-differential pulse voltammetric determination, 481 (2003) 23

Rapid determination of chemical oxygen demand using a focused microwave heating system featuring temperature control, 491 (2003) 99

Wastewater treatment plant

Whole cell immobilised biosensors for toxicity assessment of a wastewater treatment plant treating phenolics-containing waste, 487 (2003) 61

Water

Simplified version of the sodium salicylate method for analysis of nitrate in drinking waters, 477 (2003) 125

Experimental design applied to the determination of several contaminants in Duero River by solid-phase microextraction, 477 (2003) 257

On-line preconcentration of palladium on alumina microcolumns and determination in urban waters by inductively coupled plasma mass spectrometry, 478 (2003) 209

Evaluation of new strategies to prepare templated polymers with sufficient oligosaccharide recognition capacity, 484 (2003) 53

Simultaneous determination of nitrite and nitrate in water by chemiluminescent flow-injection analysis, 495 (2003) 225

Water analysis

Atomic absorption spectrophotometric determination of trace copper in waters, aluminium foil and tea samples after preconcentration with 1-nitroso-2-naphthol-3,6-disulfonic acid on Ambersorb 572, 480 (2003) 259

Characterisation of a transparent optical test strip for quantification of water hardness, 481 (2003) 139

Water matrix

Analyser of chromium and/or cobalt, 488 (2003) 243

Water samples

Room temperature phosphorimetric determination of cyanide based on triplet state energy transfer, 491 (2003) 27

Multi-walled carbon nanotubes packed cartridge for the solid-phase extraction of several phthalate esters from water samples and their determination by high performance liquid chromatography, 494 (2003) 149

Water/tetrachloromethane interface

Total internal reflected resonance light scattering detection of DNA at water/tetrachloromethane interface with acridine orange and cetyltrimethylammonium bromide, 494 (2003) 11

Water-micellar media

Determination of ibuprofen and novocaine hydrochloride with the use of water-micellar solutions of surfactants, 481 (2003) 149

Waters

Synthesis of novel chitosan resin derivatized with serine moiety for the column collection/concentration of uranium and the determination of uranium by ICP-MS, 480 (2003) 239

Wavelet

Multivariate calibration of spectral data using dual-domain regression analysis, 490 (2003) 291

Wavelet compression

Real-time two-dimensional wavelet compression and its application to real-time modeling of ion mobility data, 490 (2003) 59

Wavelet frequency spectrum

Wavelet frequency spectrum and its application in analyzing an oscillating chemical system, 484 (2003) 201

Wavelet transform

Application of wavelet transform to background correction in inductively coupled plasma atomic emission spectrometry, 485 (2003) 233

Weak variables

Discarding or downweighting high-noise variables in factor analytic models, 490 (2003) 277

Weddellite

Determination of the composition of human urinary calculi composed of whewellite, weddellite and carbonate apatite using artificial neural networks, 491 (2003) 211

Whewellite

Determination of the composition of human urinary calculi composed of whewellite, weddellite and carbonate apatite using artificial neural networks, 491 (2003) 211

Wine

Characterization of the aromatic composition of some liquid foods by nuclear magnetic resonance spectrometry and liquid chromatography with nuclear magnetic resonance and mass spectrometric detection, 488 (2003) 35

Characterization of thermally assisted hydrolysis and methylation products of polyphenols from modern and archaeological vine derivatives using gas chromatography-mass spectrometry, 493 (2003) 137

Kinetic determination of L(-)-malic acid in wines using sequential injection analysis, 499 (2003) 99

Wine phenolics

Monitoring the total phenolic/antioxidant levels in wine using flow injection analysis with acidic potassium permanganate chemiluminescence detection, 499 (2003) 47

Withdrawal period

Influence of milking frequency on withdrawal period after application of β -lactam antibiotic-based drugs, 483 (2003) 241

Withdrawal time

Estimation the withdrawal period for veterinary drugs used in food producing animals, 483 (2003) 251

Wool wax

Microwave enhanced extraction of wool wax from solid wool scour wastes, 494 (2003) 255

Wool wax extraction

Effect of the carbon dioxide modifier on the lipid composition of wool wax extracted from raw wool, 477 (2003) 233

X

Xanthine oxidase

Microfabricated bioreactor chips for immobilised enzyme assays, 486 (2003) 149

Xanthosine 5'-monophosphate

Determination of 18 nucleobases, nucleosides and nucleotides in human peripheral blood mononuclear cells by isocratic solvent-generated ion-pair chromatography, 481 (2003) 245

X-ray diffraction

Investigation of roman age pigments found on pottery fragments, 478 (2003) 147

Use of X-ray and other techniques to analyse the phase transformation induced in archaeological cast iron after its stabilisation by the electrolytic method, 494 (2003) 245

Pigment and terracotta analyses of Hellenistic figurines in Crete, 497 (2003) 209

X-ray fluorescence

Measurement of K, L and higher shell photoionisation cross-sections at 59.5 keV, 491 (2003) 239

X-ray photoelectron spectroscopy

Decomposition of dimethyl methylphosphonate on TiO₂(110): principal component analysis applied to X-ray photoelectron spectroscopy, 496 (2003) 289

Applications of surface analysis in the environmental sciences: dehalogenation of chlorocarbons with zero-valent iron and iron-containing mineral surfaces, 496 (2003) 301

Xylazine

Validation of a method for detecting and quantifying tranquillisers and a β -blocker in pig tissues by liquid chromatography–tandem mass spectrometry, 483 (2003) 335

Y

Yeast

Methodological advances for selenium speciation analysis in yeast, 500 (2003) 171

Yeast fermentation

Monitoring of yeast fermentation by ion mobility spectrometry measurement and data visualisation with Self-Organizing Maps, 484 (2003) 93

Yoghurt

Food processing effects on residues: penicillins in milk and yoghurt, 483 (2003) 73

Z

Zearalenone

Analysis of zearalenone and α -zearalenol in animal feed using high-performance liquid chromatography, 487 (2003) 137

Zeeman effect

Investigation of trace level binding of PtCl_6 and PtCl_4 to alfalfa biomass (*Medicago sativa*) using Zeeman graphite furnace atomic absorption spectrometry, 478 (2003) 139

Zilpaterol

Zilpaterol—a new focus of concern in residue analysis, 493 (2003) 63

Zinc

On-line preconcentration system using a minicolumn of polyurethane foam loaded with Me-BTABr for zinc determination by Flame Atomic Absorption Spectrometry, 481 (2003) 283

Simultaneous determination of copper, nickel, cobalt and zinc using zincon as a metallochromic indicator with partial least squares, 487 (2003) 181

Zinc bacitracin

Liquid chromatographic–tandem mass spectrometric detection of banned antibacterial growth promoters in animal feed, 483 (2003) 99

Zinc(II)

Chiral recognition of borneol by association with zinc(II) and L-tryptophan in the gas phase, 482 (2003) 1

Zone fluidics

Zone fluidics in flow analysis: potentialities and applications, 499 (2003) 29
